U.S. COIN AUCTION  
MARCH 14-16, 2019 | DALLAS

## Heritage Signature® Auction #1293

# U.S. Coins

Featuring: The Stockbridge Stella • The Marcello Collection, Part V  
• A Network Television Executive's Collection of Rare Hawaiian Coins

March 14-16, 2019 | Dallas

### FLOOR Signature® Sessions 1-3

(Floor, Telephone, HERITAGELive!®, Internet, Fax, and Mail)

Heritage Auctions, Dallas • 1st Floor Auction Room  
3500 Maple Avenue • Dallas, TX 75219

Session 1 - PREMIER

Thursday, March 14 • 6:00 PM CT • Lots 3001–3448

Session 2

Friday, March 15 • 2:00 PM CT • Lots 3449–3945

Session 3

Friday, March 15 • 6:00 PM CT • Lots 3946–4525

### INTERNET Signature® Session 4

(HERITAGELive!®, Internet, Fax, & Mail only Session)

Session 4

Saturday, March 16 • 1:00 PM CT • Lots 7001–8283

### LOT SETTLEMENT AND PICK-UP

Weekdays starting Friday, March 15th 10:00 AM –  
1:00 PM CT by appointment only.

Extended Payment Terms available. Email: Credit@HA.com

Lots are sold at an approximate rate of 200 lots per hour, but it  
is not uncommon to sell 150 lots or 250 lots in any given hour.

#### Buyer's Premium Per Lot:

This auction is subject to a Buyer's Premium of 20% (minimum \$19) per lot.

TX Auctioneer Licenses: Teia Baber 16624; Edward Beardsley 16632; Sarah Davies 17505; Nicholas Dawes 16784; Sophie Duncan 17901; Christopher Dykstra 16601; Fiona Elias 17126; Francesca Felgar 17902; Samuel Foose 11727; Alissa Ford 17104; Kathleen Guzman 16142; Gregory Holman 17653; Roberta Kramer 17439; Brent Randall Lewis 17881; Jennifer Jayne Marsh 17105; Marina Medina 17512; Bob Merrill 13408; Paul Minshull 16591; Rochelle Mortenson 17898; Scott Peterson 13256; Michael Provenzale 17157; Catherine Rigdon 17897; Michael Sadler 16129; Barry Sandoval 17649; Martin Scammel, Jr. 17659; Nathan Schar 17365; Kimberly Serrano 17657; Anthony Singleton 17507; Andrea Voss 16406; Jacob Walker 16413; Brian Wiedman 17894; Adam Williams 17893; Phillip Wooten 17656.

### BIDDING METHODS

#### HERITAGE Live!® Bidding

Bid live on your computer or mobile, anywhere in the world, during the Auction using our HERITAGELive!® program at HA.com/Live

#### Live Floor Bidding

Bid in person during the floor sessions.

#### Live Telephone Bidding (Floor Sessions Only)

Phone bidding must be arranged 24 hours before your session begins. Client Service: 866-835-3243

#### Internet Absentee Bidding

Proxy bidding ends ten minutes prior to the session start time. Live Proxy bidding continues through the session. HA.com/1293

#### Fax Bidding

Fax bids must be received 24 hours before your session begins. Fax: 214-409-1425

Phone: 214-528-3500 • 877-HERITAGE (437-4824)

Fax: 214-409-1425

Dear Bidder,

Our busy January/February coast-to-coast swing is complete, and now we look forward to returning to our World Headquarters in Dallas (3500 Maple Avenue) for the next U.S. Coins Heritage Signature event. The recently completed Long Beach Expo auction brought nearly \$11 million for U.S. Coins, with strong prices realized for gold ingots and high-end gold coins. On the East Coast, Heritage's Orlando FUN auction was a great success, with four lots exceeding the \$1 million mark – led by the finest-known 1885 Trade dollar, which realized a record \$3.96 million. In total – including U.S. Currency, World Coins, and World Currency – the January FUN Show auction eclipsed the \$71 million mark for the fourth straight year.

We see strong prices in many areas, limited only by enough high-quality coins coming to auction. It is a good time not only to buy, but to sell into a strengthening market! Our Central States Official Auction is accepting consignments until March 11, and after that we return to Long Beach, with a consignment deadline of April 22.

The current Dallas Signature auction features an impressive Premier Session on Thursday evening, March 14, plus two floor sessions on Friday – one in the afternoon, followed by an evening session. Our online-only Internet Signature® Session is on Saturday afternoon.

A beautiful, fresh-to-market 1879 Flowing Hair stella certified PR66 Cameo by PCGS leads the Dallas lineup, which includes three Featured Collections:

### **The Stockbridge Stella**

For 50 years, "Aunt Mary" lived in a colonial cottage on a carefully manicured five-acre property in Stockbridge, Massachusetts. Stockbridge has a rich Revolutionary War history, and was a frequent subject of the famous American painter, illustrator, and author Norman Rockwell. Mary's husband died about 20 years ago, and she lived alone since then. They never had children, so their niece, Mary Jane and her husband, Michael, plus nephew Jeff were like children. Mary was active in the garden club and was generous with her time, and charitable with her money. But she was very careful,

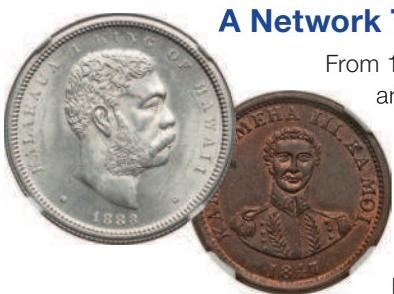

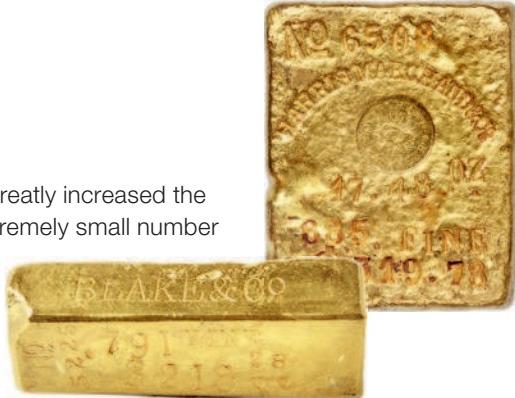

never spending extravagantly, steaming unused postage stamps off envelopes, and cleaning out used ziplock bags. She had nice things in her house but never alluded to what they were worth. As Mary's health was deteriorating, she warned Mary Jane to not just "throw things away" because some pieces were valuable. After she died, the three heirs went through the house and discovered things like a Corot painting (appraised for \$175K-\$250K), and a bottle of rye whisky that had been casked in 1863. There was money hidden away all over the house, sometimes in hollowed out books, which Mary used to pay people. They also found a sack of coins in an antique safe, including Spanish gold cobs, double eagles, and this remarkable stella. Michael took the coins to a dealer in Pittsfield who had never seen a stella in person before, and he told them it had to be graded and sent to auction. Aunt Mary was never a coin collector, and probably did not know what the coin was worth. Her niece and nephew believe the gold coins may have been accepted as payments long ago, when her husband had his own business.

We are thrilled to offer this outstanding stella in the auction as lot 3255.

## The Marcello Collection, Part V

Well over 500 gold bars were recovered from the S.S. *Central America*, which greatly increased the number of ingots available to that specialized group of collectors, yet it is an extremely small number of Gold Rush ingots considering the historic footprint they represent. The Marcello Collection – now in its fifth installment of gold ingots and other Territorial gold – has created an upswell of interest among bidders with every auction appearance. Our Dallas event includes two more gold ingots from The Marcello Collection that are sure to continue the trend. One is an attractive 17.48 ounce Harris, Marchand & Co. gold ingot (recovered from the S.S. *Central America*). Harris, Marchand was the only California Gold Rush firm to use a coin-like hallmark on their ingots. A second ingot is from Blake & Co., a 13.35 ounce trapezoidal-shaped gold bar, with three imprinted sides. The smoothly finished sides suggest that perhaps Blake & Co. intended this ingot, and others, for commercial usage.

## A Network Television Executive's Collection of Rare Hawaiian Coins

From 1975 to 1986, a well-known television executive traveled coast-to-coast between California and New York, as well as to Hawaii, seeking the finest Hawaiian coins from private individuals, collectors, dealers, and auctions. These coins were safeguarded in a vault. On November 26, 2018 – after 32 years – the safe deposit box was opened, revealing an exceptional private collection. We are pleased to offer a portion of this fine collection in the current Dallas auction. These coins represent an excellent way to discover the interesting and unique numismatic relationship between Hawaii and America, as portrayed by its coinage.

We wish all of our friends, clients, and dealer associates a warm welcome to Dallas. This is our opportunity to meet and serve you, and we look forward to assisting you with lot viewing, buying, selling, consigning, or simply answering any questions you might have. We hope you can attend the auction in person. If unable to attend, you can always bid through HA.com, e-mail, U.S. mail, and fax. Real-time options for remote bidding include telephone bidding, and online bids with HERITAGE Live!®.

Good luck and – once again – welcome to Dallas!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

## SESSION ONE

## COLONIALS

1662 Oak Tree Twopence, MS61  
Small 2, Rare Noe 31.5 Subvariety

**3001** 1662 Oak Tree Twopence, Small 2, MS61 NGC. Noe 31.5, Salmon 1-A, R.7. 11.9 gn. Die alignment: 345°. While the original slate-gray toning and bold strike make this an attractive choice for the collector looking for an example of the type, the unusual subvariety makes it of significant interest to the specialist collector as well. The Noe 31.5 was first published by Eric P. Newman in *The Secret of the Good Samaritan Shilling* (1959). A reverse die crack running across the crudely recut numerals makes the date appear to read 1672. Michael Hodder had only recorded four of these when he cataloged the 2002 Hain Family sale (where he called it R.7), and this is substantially nicer than the Very Fine example in the Kendall Collection. Listed on page 50 of the 2019 Guide Book. Census (for the major variety): 2 in 61, 10 finer (2/19). NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

1662 Oak Tree Twopence, MS63  
Noe-30, Small 2

**3002** 1662 Oak Tree Twopence, Massachusetts, Small 2, MS63 NGC. Noe-30, W-240, Salmon 1-A, R.4. This distinctive variety shows the 166 in the date closely spaced, with a long-tailed 2 distant to the right. The rarer Noe-31 variety has a prominent die break through the top of the long-tailed 2. The Noe-30 piece offered here is Uncirculated and well-preserved. The obverse is struck off-center toward 6 o'clock, with the N:MA running off the flan. There is a wide, unstruck margin on the opposite side of the planchet. The reverse is better centered. Both sides of this attractive Oak Tree twopence exhibit olive-gold and russet toning with no distracting abrasions. The surfaces are satiny and pleasing. Listed on page 50 of the 2019 Guide Book. NGC ID# 2ARD, PCGS# 45355 Base PCGS# 17

1652 Pine Tree Sixpence, AU53  
Noe-33, Misaligned Obverse Die

**3003** 1652 Pine Tree Sixpence, Pellets at Trunk, AU53 PCGS. Noe-33, W-670, Salmon 2-B, R.3. Gunmetal-gray and lavender toning embraces unmarked and briefly circulated surfaces. The lower reverse displays the somewhat wavy appearance typical of rocker press emission. Characteristic of Noe-33 (but not Noe-33a), the obverse appears off-center toward 12 o'clock, while the reverse is well centered. Listed on page 51 of the 2019 Guide Book. NGC ID# BYVT, PCGS# 45367 Base PCGS# 22

1787 Massachusetts Cent, MS62 Brown  
Scarce Ryder 4-C

**3004** 1787 Massachusetts Cent, Arrows in Left Talon, MS62 Brown NGC. Ryder 4-C, W-6100, Low R.4. A glossy medium brown commonwealth copper. No marks are more than incidental, and the high points show only slight blending. Ryder 4-C is a somewhat better variety, identified by die flaws near the W in WEALTH and the M in MASSACHUSETTS. Listed on page 71 of the 2019 Guide Book. NGC ID# 2B25, PCGS# 302

1787 Connecticut Copper, MS63 Brown  
Horned Bust, Miller 4-L  
Single Finest Certified

**3005** 1787 Connecticut Copper, Horned Bust MS63 Brown NGC. M. 4-L, W-2810, R.1. Our Die State IV, with a large wedge-shaped horn affixed to the bust, and heavy clash marks near the R in AUCTORI. A lovely chocolate-brown example of the popular Guide Book variety. No marks are apparent across the satiny surfaces. As of (1/19), NGC has certified 39 pieces, with the present lot as the single finest. PCGS has certified 109 pieces, but none above MS62 Brown. Listed on page 73 of the 2019 Guide Book. NGC ID# 2B2T, PCGS# 364

1787 Fugio Cent, MS64+ Red and Brown  
N. 8-X, STATES UNITED, 4 Cinquefoils

**3006** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64+ Red and Brown NGC. N. 8-X, W-6750, R.3. This Bank of New York Hoard variety is in an impressive late die state with a massive die break that obscures the central portion of the motto. Definition is otherwise good on this Plus-designated near-Gem. Mint red color glows from the protected areas, complementing mahogany-brown patina overall. Some roughness at the upper reverse and a large carbon spot near FU(GIO) are normal. Listed on page 99 of the 2019 Guide Book. NGC ID# 2B8E, PCGS# 884

1787 Fugio Cent, MS65+ Brown  
Luminous Original Surfaces  
UNITED STATES, Cinquefoils, N. 8-B

**3007** 1787 Fugio Cent, UNITED STATES, 4 Cinquefoils, MS65+ Brown PCGS Gold Shield. N. 8-B, W-6740, R.3. A relatively plentiful UNITED STATES, Cinquefoils variety, although seldom available in such fine condition. Including all varieties, PCGS has certified just 29 Gem or finer Brown Fugio cents, plus a dozen Gem or finer Red and Brown coins. This is one of just three Plus-graded Gems at PCGS overall, and one of two for the UNITED STATES, Cinquefoils subtype. It is rare, and it is beautifully preserved. Each side displays a sharp strike and luminous satin luster. Neither side has true brown color, although a blend of rose and burgundy hues just keeps this coin from a Red and Brown designation. There are no mentionable abrasions. The reverse is heavily clashed, with an outline of the sun and rays in the lower reverse margin. A cartwheel effect is produced in hand. Listed on page 99 of the 2019 Guide Book. Population: 10 in 65 (2 in 65+) Brown, 2 finer; 3 in 65 Red and Brown, 0 finer (2/19). NGC ID# 2B8F, PCGS# 889

1783 Chalmers Threepence, W-1760, XF40  
Seldom-Encountered Denomination

**3008** 1783 Chalmers Threepence XF40 PCGS. Breen-1018, W-1760, R.5. Annapolis, Maryland silversmith John Chalmers issued small silver coins in 1783, denominated as threepence, sixpence, and shillings. His shillings are most frequently encountered today, and his sixpence are least as frequently seen. Although Chalmers earned a profit from his silver coins, they were well-respected and filled a void in commerce in the late 18th century. This attractive example has delicate rose and champagne toning over pleasing blue-steel surfaces. A well-centered impression shows full border details on the obverse and partial border details on the reverse. Listed on page 63 of the 2019 Guide Book. Population: 3 in 40, 11 finer (2/19). NGC ID# 2AUP, PCGS# 592

(1792-94) Kentucky Token, MS65 Brown  
W-8805, Engrailed Edge

- 3009** (1792-94) Kentucky Token, Engrailed Edge MS65 Brown NGC. Breen-1162, W-8805, R.6. The Reeded (or Engrailed) Edge Kentucky token is rare in comparison to the plentiful Plain Edge issue, although a small number of fairly high-grade pieces are known for ambitious collectors. This Gem is the sole finest Brown Engrailed Edge coin at NGC by a margin of two points, although it is slightly behind a Red and Brown coin of the same grade listed in the NGC Census. No other pieces of this quality are reported at that service. The present coin displays satiny reddish-brown surfaces and sharp definition. No surface blemishes are apparent. Listed on page 87 of the 2019 Guide Book. NGC ID# AUBM, PCGS# 617

Washington Liberty & Security Penny  
Bust Left, Plain Rims, Baker-30  
MS63 Red and Brown

- 3010** (1795) Washington Liberty & Security Penny, Plain Rims, MS63 Red and Brown NGC. Baker-30, W-11050, Musante GW-45, R.2. The lettered edge variety is presumed, since the edge is obscured by the holder. The initial orange-red color illuminates the legends and shield, and outlines the bust and eagle. A spot is noted near the first E in GEORGE, but the strike is bold, and both sides show only unimportant contact. As of (1/19), the sole example certified as Red and Brown by NGC. Listed on page 96 of the 2019 Guide Book. NGC ID# 2B7V, PCGS# 768

## HALF CENTS

1793 Half Cent, VG8  
C-2, B-2

- 3011** 1793 C-2, B-2, R.3, VG8 PCGS. The Y is far from the pileus, and a pointed stem points to the left side of the U in UNITED, identifying the C-2, B-2 variety. The Liberty Head facing to the left appears only on the first-year 1793 half cents. Intermingled tan and olive-brown surfaces exhibit rich steel-brown toning around the devices. Minor corrosion on each side only slightly diminishes the eye appeal of this example. Our EAC grade Good 5. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

1793 C-2, B-2 Half Cent, Fine 12  
Attractive Two-Tone Example

- 3012** 1793 C-2, B-2, R.3, Fine 12 PCGS. While the dark brown fields have microscopic roughness, this nicely-centered representative features light brown devices, presenting a highly coveted two-tone appearance. The obverse detail on this piece is slightly stronger than the reverse detail. Our EAC grade VG8. NGC ID# 2222, PCGS# 35006 Base PCGS# 1000

1825 C-2, B-2 Half Cent, MS65 Brown  
Scarce Early Die State

- 3013** 1825 C-2, B-2, R.1, MS65 Brown PCGS. Manley Die State 1.0, showing bold details including the repunched star 12 and a sharp stem end. The early die state is considered scarcer than either of the later die states. This lovely example has rich, lustrous chocolate-brown surfaces with areas of lighter brown and traces of faint bluish overtones. Our EAC grade MS63. Population for the date: 5 in 65 (1 in 65+) Brown, 0 finer (2/19). NGC ID# 222T, PCGS# 35249 Base PCGS# 1141

1855 Braided Hair Half Cent, MS66 Red and Brown  
None Finer at PCGS

- 3014** 1855 C-1, B-1, R.1, MS66 Red and Brown PCGS Gold Shield. Strong mint luster glows from large expanses of mint red color, overlaid with steel-blue accents to easily achieve the Red and Brown designation. A sharp strike exists throughout the central devices, while the borders show areas of minor weakness at the dentils. The eye appeal is excellent. This Premium Gem example is the sole-finest 1855 certified by PCGS in Red and Brown. All other MS66 pieces are in Brown format, with none finer (1/19). Our EAC grade MS63. NGC ID# 26YZ, PCGS# 35334 Base PCGS# 1234

1855 C-1, B-1 Half Cent, MS65 Red  
Good For Type Purposes

- 3015** 1855 C-1, B-1, R.1, MS65 Red PCGS. The 1855 half cent enjoys a small mintage of 56,500 coins, examples of which remain collectible through MS64 Red. The issue becomes conditionally scarce at this level and is unknown in better grades. Deep brick-red surfaces display well-struck central motifs, while the stars and dentils are typically soft. Exceptionally preserved with some carbon on each side. Our EAC grade MS64. Population: 43 in 65 (4 in 65+) Red, 0 finer (2/19). NGC ID# 26YZ, PCGS# 35335 Base PCGS# 1235

## LARGE CENTS

1793 S-3, B-4 Cent, VF25  
Chain, AMERICA

- 3016** 1793 Chain, AMERICA, S-3, B-4, Low R.3, VF25 PCGS. The "Leaning R" variety and easily attributed as such. An important, yet scarce one-year type, the 1793 Chain cent boasts an original mintage of a mere 36,103 pieces. Since most of these coins disappeared into circulation, it is little wonder that the few extant representatives are always in strong demand among both type collectors and early copper specialists. Although moderately worn, this is a remarkably problem-free coin for the grade, with only a few trivial rim bruises and minor handling marks. The reverse is typically bolder than the obverse, but both sides display appreciable definition that includes a fully defined date. The flan is a uniform dark brown and is not porous as on the usual example. The fields are moderately abraded, and all of the links in the chain are fully detailed. A fine example which should produce strong interest from bidders. Our EAC grade Fine 12. NGC ID# 223F, PCGS# 35438 Base PCGS# 1341

1793 S-8, B-13 Wreath Cent, AU50  
Intermediate Die State

**3017** 1793 Wreath, Vine and Bars Edge, S-8, B-13, R.3, AU50 PCGS. Ex: Neiswinter Collection. Breen Die State II with light clash marks on the obverse that are not found on S-9, also struck from this die. A fine die crack follows the diagonal die bulge on the reverse. A few minor or moderate surface marks are limited to the obverse of this piece, while the reverse displays several trivial rim bruises. Both sides have a lovely blend of olive and chocolate-brown with faint bluish overtones. Our EAC grade VF35.  
Ex: Darwin Palmer (2/1990); Jim Neiswinter (Goldberg Coins, 1/2019), lot 14. NGC ID# 223H, PCGS# 35456 Base PCGS# 1347

1793 Wreath Cent, Fine 12  
S-9, Vine and Bars Edge

**3018** 1793 Wreath, Vine and Bars Edge, S-9, B-12, R.2, Fine 12 PCGS. An olive-brown example of this widely collected first-year, single-year design subtype. All of the legends are clear, and although small marks are scattered, none merit comment save for a few minor left obverse rim dings. Minutely granular here and there. Our EAC grade VG7.  
Ex: Long Beach Signature (Heritage, 2/2009), lot 166, where it realized \$4,887.50. NGC ID# 223H, PCGS# 35459 Base PCGS# 1347

1793 S-11 Wreath Cent, VF25  
Cracked Planchet

**3019** 1793 Wreath, Lettered Edge, S-11c, B-16c, Low R.3, VF25 PCGS. Breen Die State III. PCGS identifies this piece as a mint error with a 1/2" Cracked Planchet. Unfortunately, they didn't tell us if this is a Lettered Edge or a Vine and Bars Edge. Because the obverse has heavy clash marks, and no Vine and Bars Edge coins exist with clash marks, we submit that this piece is a Lettered Edge example, and most likely S-11c. The smooth olive-brown surfaces exhibit minor handling marks but have none of the usual porosity found on most surviving Wreath cents. Our EAC grade Fine 12. NGC ID# 223J, PCGS# 35477 Base PCGS# 1350

## FLYING EAGLE CENTS

**1857 Flying Eagle Cent, MS66  
Rarely Offered So Fine**

**3020 1857 MS66 NGC.** Flying Eagle cents as type coins are readily available in just about any grade desired, at least through MS65. In Premium Gem condition, the type in general is scarce, and 1857 coins in this grade are rare. This date has a certified population of slightly more than a third of that of the 1858 (Small and Large Letters varieties combined), and it appears at auction less than a third as frequently as the 1858 date. It is also uncollectible in finer condition, while the 1858 is represented by a handful of Superb Gems.

This 1857 coin displays sharp devices and satiny tan-gold mint luster. Additional shades of rose and greenish toning emerge in the peripheries, amplifying the eye appeal of this high-end Flying Eagle cent. Census: 15 in 66, 1 finer (2/19). NGC ID# 226P, PCGS# 2016

**1858 Flying Eagle Cent, MS66  
Large Letters Type Coin**

**3021 1858 Large Letters MS66 NGC.** Students of the Flying Eagle cent will want to acquire both a Small Letters 1858 coin and a Large Letters example, the latter of which is offered here in seldom-seen Premium Gem condition. However, for the collector of dates only, or type collectors seeking a single example of the Flying Eagle design, a Large Letters 1858 is an ideal candidate as well. This piece is sharp and satiny with tan-gold mint luster. A streak of deeper amber toning stretches horizontally across the upper obverse. Census: 4 in 66, 0 finer (2/19). NGC ID# 2277, PCGS# 2019

**1858 Large Letters Cent, MS66  
Fully Struck, Semiprooflike**

**3022 1858 Large Letters MS66 PCGS.** High Leaves Reverse. Close E in ONE. A fully struck specimen with semiprooflike fields and exceptionally unabraded surfaces. A lens shows only infrequent pinpoint carbon. An outstanding Premium Gem from the final year of the short-lived introductory small cent type. Population: 45 in 66 (4 in 66+), 3 finer (1/19). NGC ID# 2277, PCGS# 2019

## INDIAN CENTS

**1867 Cent, MS65 Red  
Three Coins Finer at PCGS**

**3023 1867 MS65 Red PCGS.** Radiant mint luster issues from each side of this glowing copper-orange Gem cent. The fields are clean, and carbon is restricted to a couple of small spots on the neck. The feather tips and ribbon diamonds show crisp detail. Definition is somewhat softer around the outer areas. Population: 35 in 65 (3 in 65+) Red, 3 finer (2/19). NGC ID# 227R, PCGS# 2090

**1873 Closed 3 Cent, MS65+ Red  
High-End CAC Rarity**

- 3024 1873 Closed 3 MS65+ Red PCGS Gold Shield. CAC.** The Closed 3 1873 cent is rarer in Gem Red condition than the Open 3 variant. This Plus-graded coin is CAC-endorsed in a Secure holder, and only a few finer pieces are known. Well-struck design elements complement satiny copper-red luster. A few faint flecks do not detract. Population: 15 in 65 (2 in 65+) Red, 7 finer. CAC: 4 in 65, 6 finer (1/19). NGC ID# 227X, PCGS# 2111

**1908-S Cent, MS66 Red  
Just One Coin Graded Higher**

- 3025 1908-S MS66 Red PCGS Gold Shield.** Until 1908, branch mints were not asked to strike minor denomination coinage (cents or nickels). That changed when the San Francisco Mint struck more than 1.1 million Indian Head cents dated 1908-S — the third-lowest mintage of the series. Premium Gem examples like this coin are rare, and essentially uncollectible any finer. A microscopic dappling of reddish-tan patina adds eye appeal to the sharply struck Red surfaces of this lustrous cent. There are no significant marks or signs of carbon. Population: 71 in 66 (9 in 66+) Red, 1 finer (1/19). NGC ID# 2296, PCGS# 2234

## LINCOLN CENTS

**1909-S VDB Lincoln Cent, MS66 Red  
Luminous Original Luster**

- 3026 1909-S VDB MS66 Red PCGS Gold Shield.** Frosty luster shimmers across the Premium Gem surfaces of this Red 1909-S VDB cent. A few microscopic pepper specks are visible beneath a loupe, although the overall appearance is outstanding. The strike is sharp and eye appeal abounds. The S-VDB Lincoln cent is the long-recognized key date in the series due to its mintage of only 484,000 pieces — the lowest in the series. Widespread preservation of this issue early on lead to it being relatively plentiful today for collectors, although ready availability has not decreased demand for or the value of this key date. NGC ID# 22B2, PCGS# 2428

**1912-D Cent, MS66+ Red  
Top of the Population Reports**

- 3027 1912-D MS66+ Red PCGS Gold Shield.** The 1912-D cent is a semi-key that is moderately scarce in all grades. While low-end Mint State coins are usually available, Choice and Gem examples with full red color are extremely scarce and always in demand. The Denver Mint had not yet mastered all aspects of striking Lincoln cents, evidenced by microscopic die wear at the borders and along the raised elements.

This Premium Gem Red specimen possesses copper-orange luster and well-impressed definition of the central motifs. The coin is free of carbon with the exception of a few minute flecks beneath the O in GOD and a few more hidden below Lincoln's hairline. By virtue of its Plus designation, this example is tied for finest-known at both services. Population: 4 in 66+ Red, 0 finer (1/19). NGC ID# 22BB, PCGS# 2455

1915 Cent, MS67 Red  
Registry Set Contender

**3028** 1915 MS67 Red PCGS.

The 1915 Lincoln cent is conditionally rare in MS67 Red, and such coins are essential for Registry collectors. This piece is boldly struck and lustrous with lightly textured surfaces. Rich copper-orange and deeper apricot hues adorn each side, and only a few faint flecks are visible with a loupe. PCGS lists only a single finer Red example of the date. Population: 14 in 67 (1 in 67+) Red, 1 finer (2/19). NGC ID# 22BK, PCGS# 2479

1916-D Cent, MS66 Red  
Rarely Seen This Nice

**3029** 1916-D MS66 Red PCGS.

The Denver Mint manufactured nearly 36 million Lincoln cents in 1916. Full Red Premium Gems are seldom offered, so we expect significant interest in this lot. Both sides are fully defined, with exceptional detail on Lincoln's portrait in particular. Satiny luster over copper-orange surfaces void of carbon should appeal to the most discerning specialists. Population: 20 in 66 (5 in 66+) Red, 2 finer (2/19). NGC ID# 22BP, PCGS# 2491

1922 No D Cent, AU58  
FS-401, Strong Reverse

**3030** 1922 No D, Strong Reverse, FS-401, AU58 PCGS Gold Shield. CAC.

Die Pair 2. The average grade for this popular variety falls between VF25 and VF30. This nearly Uncirculated survivor features the usual softness on the motto and portrait, and the D mintmark is entirely missing as a result of lapping. A strong second 2 in the date is diagnostic. The reverse, struck from a fresh die, is boldly defined on the upper wheat stalks and the legends. Original brown surfaces exhibit faint accents of rose and peach-orange. Partial prints appear in the left obverse field. NGC ID# 22C9, PCGS# 37676 Base PCGS# 3285

1955 Cent, MS64 Red  
Doubled Die Obverse

**3031** 1955 Doubled Die Obverse, FS-101, MS64 Red PCGS.

Strong doubling is evident on the date and all lettering on the obverse, identifying the FS-101. This incredibly popular Guide Book variety helped popularize variety collecting in the 1950s and '60s. FS-101 is only marginally available in Choice Red condition, and Gems are rare with any amount of original luster. The present near-Gem displays full, satiny luster with rich copper-red coloration. A sharp strike complements a lack of severe abrasions, as eye appeal surpasses expectations for the grade. PCGS lists 21 numerically finer Red examples, all in MS65 or MS65+ (2/19). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

1955 Doubled Die Cent, MS64 Red  
Scarce With Intact Mint Red

**3032** 1955 Doubled Die Obverse, FS-101, MS64 Red NGC.

Broad separation of the lettering on the obverse gives the 1955 Doubled Die instant appeal, and the doubling also explains the scarcity of these pieces as relatively few could have entered the channels of commerce without being noticed. But what is of added importance and rarity with this piece is the presence of intact mint red luster. Few Doubled Dies show such preservation, primarily because most were handled, and as a result even if the handling was minimal it was usually sufficient to eventually turn the surfaces brown. This example displays bright, even light red luster with only a couple of small specks of carbon evident. Census: 41 in 64 (1 in 64+) Red, 4 finer (1/19). NGC ID# 8H87, PCGS# 37912 Base PCGS# 2827

## PROOF LINCOLN CENTS

1914 Cent, PR67 Brown  
Vividly Toned

- 3033 1914 PR67 Brown PCGS.** Both sides of this Superb Gem proof 1914 Lincoln cent display vivid blue and violet toning, although the blue is by far the dominant color on each side. Violet serves as an undertone on the obverse, and on the reverse it is most prominent around the periphery. The strike is sharp and neither side displays contact marks or other impairments. Among the finest Brown pieces certified. Population: 5 in 67 Brown, 0 finer (2/19). NGC ID# 22KX, PCGS# 3318

1915 Cent, PR66+ Red and Brown  
Scarce This Fine

- 3034 1915 PR66+ Red and Brown PCGS, CAC.** Only 1,150 proof Lincoln cents were struck in 1915. Premium Gem survivors are scarce regardless of color designation, and finer pieces are rare. This Plus-designated Red and Brown coin displays razor-sharp detail and broad, squared rims. Deep copper-red luster merges with burgundy-brown toning around the margins. Population: 30 in 66 (6 in 66+) Red and Brown, 4 finer. CAC: 21 in 66, 4 finer (2/19). NGC ID# 22KY, PCGS# 3322

1916 Cent, PR66+ Brown  
Sharp and Exceptionally Well-Preserved

- 3035 1916 PR66+ Brown PCGS.** The 1916 is the last matte proof in the Lincoln cent series, and it is the rarest aside from the 1909 VDB proof issue. This high-end Premium Gem Brown example displays a sharp strike and near-flawless surfaces. Each side has a coppery-pink hue, with a dusting of delicate burgundy toning over the top. Nearly worthy of a Red and Brown designation. Population: 6 in 66 (1 in 66+) Brown, 1 finer (2/19). NGC ID# 22KZ, PCGS# 3324

1916 Lincoln Matte Proof Cent  
CAC-Approved PR65 Red

- 3036 1916 PR65 Red PCGS, CAC.** The 1916 matte proof Lincoln cent comes from a small mintage of 1,050 coins, the bottom rung of a mintage decline that began after 1910, when matte proof cent production hit its peak of 4,083 pieces. The 1916 is the rarest matte proof in high grade after the 1909 VDB. This Gem Red 1916 is tact-sharp and offers a rich array of cherry-red, copper-orange, and golden-green colors. A few scattered specks are seen on the reverse as usual for a coin that has not been dipped. Red Gems are seldom offered at auction, and this issue is extremely rare any finer. Population: 15 in 65 Red, 5 finer. CAC: 5 in 65, 3 finer (2/19). NGC ID# 22KZ, PCGS# 3326

1941 Cent, PR67 Red  
Finest-Certified Registry Coin

- 3037 1941 PR67 Red PCGS.** A total of 21,100 Lincoln cent proofs were struck in 1941, up significantly from the 15,872 specimens produced the year before. While thousands of 1941 proofs are graded through PR66 Red, there are remarkably few pieces known in Superb Gem Red condition. PCGS and NGC have each certified 12 such coins for a total of 24, although that figure likely includes at least a few resubmissions. None are graded higher (2/19). This fire-orange proof cent enjoys reflective fields and a predictably full impression. A single lint mark in the lower-left obverse field serves as a pedigree identifier. NGC ID# 3H34, PCGS# 3350

1990 No S Cent, PR69 Deep Cameo  
FS-101, Top 100 Modern Variety

- 3038 1990 No S, FS-101, PR69 Deep Cameo PCGS.** The only missing mintmark variety in the Lincoln cent series takes 13th place on Schechter and Garrett's 100 Greatest U.S. Modern Coins. As of 2011, about 250 pieces had been reported, and today's certification totals at PCGS and NGC are only marginally higher, probably reflecting some level of duplication. This example is tied for finest at both services combined (2/19). It features dramatic contrast, essentially flawless copper-orange surfaces, and terrific eye appeal. NGC ID# 274B, PCGS# 408239 Base PCGS# 93506

## TWO CENT PIECES

1870 Two Cent, MS65 Red  
None Graded Higher

**3039** 1870 MS65 Red PCGS. Two cent production fell by nearly half from 1869 to 1870, following a trend since the denomination's inception only six years earlier. Strongly defined on the olive leaves, motto, and wreath, this rich copper-orange Gem with minimal carbon would make an ideal Registry coin, as none are graded higher at either service. Population: 17 in 65 Red, 0 finer (2/19). NGC ID# 22NE, PCGS# 3608

1872 Two Cent, MS66 Red and Brown  
Tied for Finest at Both Services

**3040** 1872 MS66 Red and Brown PCGS. This is the singular circulation-strike key date in the short-lived two cent series. The Mint limited production to a mere 65,000 pieces, and PCGS reports 775 grading events across all grades and color categories. The vast majority of survivors are reported in grades ranging from Very Good to About Uncirculated. All Mint State coins are scarce. This Premium Gem is one of the finest examples any collector could hope to locate.

Fiery-orange color melds with deeper shades of steel-blue and magenta. Hints of semiprooflikeness are apparent in the fields, and the strike is pinpoint-sharp. The reverse shows some interesting die cracks toward the lower border. Population: 4 in 66 Red and Brown, 0 finer (2/19). NGC ID# 22NG, PCGS# 3613

## THREE CENT SILVER

1860 Three Cent Silver, MS67+  
Tied for Finest Certified

- 3041** 1860 MS67+ NGC. Few three cent silver pieces were set aside at the time of issue, thus accounting for their scarcity today, especially in high grades. This NGC-certified example has only two peers at this grade and PCGS has certified only one. Rich gray-blue and rose toning covers each side with vibrant underlying mint luster. NGC ID# 5LDM, PCGS# 3678

1866 Three Cent Silver, Crisp MS66  
Dusky Lavender-Gray Patina

- 3042** 1866 MS66 PCGS. CAC. The low-mintage issues toward the end of the three cent silver series were produced, not for widespread circulation, but rather so that the Mint would have quantities of small-denomination coinage on hand to pay off odd amounts to depositors. A thin veil of dusky lavender-gray patina covers most of this Premium Gem, along with accents of cobalt-blue at the upper reverse. Fully struck on the shield, leaves, and fletchings. Population: 13 in 66 (1 in 66+), 14 finer. CAC: 6 in 66, 10 finer (2/19). NGC ID# 22NK, PCGS# 3686

1866 Three Cent Silver, MS67  
Tied for Finest at NGC

- 3043** 1866 MS67 NGC. Late-date three cent silver coins were never meant for circulation. Instead, they were used to pay off odd amounts to depositors of gold or silver at the Mint. This 1866 Superb Gem, one of 22,000 pieces struck, showcases melded blue, violet, and golden-russet patina over essentially unmarked and fully struck surfaces. A hint of contrast is evident between the frosted motifs and semireflective fields. Census: 5 in 67 (2 in 67★), 0 finer (2/19). NGC ID# 22NK, PCGS# 3686

1869 Three Cent Silver, MS65  
Low Business Strike Mintage

- 3044** 1869 MS65 NGC. An inner circle of cerulean-blue yields to iridescent rainbow shades at the borders of this colorfully toned 1869 three cent silver. Sharply struck for the issue, we note a few tiny marks under a strong loupe but no significant distractions. The coin's original eye appeal stands out, augmented by the Gem surfaces and high technical quality. Just 4,500 pieces were struck, and few are finer. Census: 7 in 65, 10 finer (1/19). NGC ID# 22ZK, PCGS# 3689

## PROOF THREE CENT SILVER

1858 Three Cent Silver, Toned PR66  
Scarce in All Grades

- 3045** 1858 PR66 PCGS. Deeply reflective fields illuminate multicolor toning on this Premium Gem proof 1858 three cent silver piece. The strike is sharp, although die lapping weakens the obverse star on the lower left edge. PCGS estimates that only about 100 proofs of this date survive in all grades. Pieces this fine are rare. Population: 17 in 66 (2 in 66+), 2 finer; 1 in 66 Cameo, 0 finer (2/19). NGC ID# 27C5, PCGS# 3705

## THREE CENT NICKEL

1868 Three Cent Nickel, MS67  
Tied for Finest as a Strike for Circulation

- 3046** 1868 MS67 NGC. Business strike three cent nickels are definitely an overlooked 19th series. Although 3.2 million pieces were struck, few were set aside. This is especially the case for high-grade pieces. Only five other coins have been certified in this ultimate grade by NGC (2/19). The lustrous surfaces display even, light golden-gray patina and a hint of semiprooflikeness in the fields. NGC ID# 2756, PCGS# 3734

## PROOF THREE CENT NICKEL

1877 Three Cent Nickel, PR67 Cameo  
Perfect for an Advanced Registry Set

- 3047** 1877 PR67 Cameo PCGS. CAC. The key-date, proof-only 1877 three cent nickel has a mintage of just 900 specimens. This Superb Gem is one of the finest obtainable survivors. Its deeply reflective fields and frosted motifs show faint glints of golden color but are otherwise brilliant. Perfect for an advanced Registry Set. Population: 17 in 67 (2 in 67+) Cameo, 0 finer. CAC: 18 in 67, 0 finer (2/19). NGC ID# 275X, PCGS# 83773

## PROOF SHIELD NICKEL

1867 Shield Nickel, PR67 Cameo  
Popular No Rays Variant

- 3048** 1867 No Rays PR67 Cameo NGC. A spectacular Superb Gem proof representative from the first year of the popular No Rays design, this coin exhibits sharply detailed, frosty design elements that contrast noticeably with the deeply mirrored fields. The impeccably preserved surfaces show a few highlights of pale jade toning. Census: 2 in 67 Cameo (1 in 67★), 0 finer (2/19). NGC ID# 5EB6, PCGS# 83821

## LIBERTY NICKELS

1885 Liberty Nickel, MS65  
Cornerstone of Any Collection

- 3049** 1885 MS65 PCGS. Gem examples of this key Liberty nickel issue are seldom seen and always command intense interest at auction. This piece is vibrantly lustrous with light golden hues overall. The lower-left wreath is unusually well-defined. A few small ticks on Liberty's chin and neck are all that limit the grade.  
Ex: ANA Signature (Heritage, 8/2015), lot 3438, where it brought \$7,050. NGC ID# 2773, PCGS# 3846

1886 Liberty Nickel, MS66  
Series Key in High Grade

- 3050** 1886 MS66 PCGS Gold Shield. From a modest business-strike mintage of 3.3 million pieces, the 1886 Liberty nickel is usually regarded as the second-rarest issue of the series. In terms of high-grade rarity, the 1886 is actually number one, narrowly eclipsing its 1885 counterpart. It seems the coins were all released into circulation at the time of issue and circulated heavily for decades, before collector interest developed enough to cull them out of circulation in the 1930s. The 1886 is rare in MS66 condition today, and finer coins are virtually unobtainable.

This spectacular Premium Gem exhibits sharply detailed design elements in most areas, with just a touch of the usual softness on the lower wreath. The well-preserved surfaces radiate satiny mint luster, under shades of lavender-gray and pale gold toning. Population: 15 in 66 (2 in 66+), 2 finer (1/19). NGC ID# 277U, PCGS# 3847

## BUFFALO NICKELS

1914 Nickel, Glistening MS67  
Among the Finest Certified

- 3051** 1914 MS67 PCGS. CAC. Luster glistens on the unabraded surfaces of this CAC-endorsed Superb Gem, illuminating golden toning across the interiors that transitions to rose hues in the margins. Some minor strike softness affects the hair above the Indian's braid and the bison's shoulder, but the border elements are well-defined. Eye appeal is spectacular on this piece. The 1914 is rarely offered in MS67, and it is unknown numerically finer. Population: 35 in 67 (1 in 67+), 0 finer. CAC: 7 in 67, 0 finer (2/19). NGC ID# 22R4, PCGS# 3924

1917-D Buffalo Nickel, MS66  
Rare at This Grade With CAC Approval

1918/7-D Nickel, CAC-Approved AU55  
Exceptional Collector Coin

**3052** 1917-D MS66 PCGS Gold Shield. CAC. Delicate pastel hues adorn satiny mint luster throughout this CAC-approved Premium Gem. The 1917-D is a rarity in high grades, and only five Premium Gems are CAC-endorsed. Finer examples of the date are almost uncollectible. This piece shows sharp design elements and offers outstanding visual appeal. Population: 25 in 66 (2 in 66+), 1 finer. CAC: 5 in 66, 0 finer (1/19). NGC ID# 22RE, PCGS# 3935

**3053** 1918/7-D FS-101 AU55 PCGS. CAC. Although condition keys abound, there are no date and mintmark combinations in the Buffalo nickel series that serve as a genuine “stopper” for the set. However, several key varieties are challenging to locate, particularly in high grade. The 1918/7-D is one of the most important and sought-after of these. The overdate feature is visible to the unaided eye, and high-end AU examples are seldom found, especially with CAC endorsement as this Choice AU coin has. The surfaces have soft, satiny luster and light golden toning. Almost no true wear is present, although some strike softness is evident on the bison's shoulder and head, and the hair above the Indian's braid. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1919-D Buffalo Nickel, MS65  
Struck From New Dies**

**3054** 1919-D MS65 PCGS. Struck from fresh dies, this Gem 1919-D Buffalo nickel stands apart from the majority of the survivorship, showing smooth satin surfaces and incredibly sharp central detail. A touch of weakness affects only the tip of the upper obverse feather. Delicate pastel hues adorn each side, and eye appeal is outstanding. Housed in a green label holder. Population: 80 in 65 (4 in 65+), 20 finer (1/19). NGC ID# 22RM, PCGS# 3942

**1921-S Buffalo Nickel, MS65  
Better San Francisco Issue**

**3055** 1921-S MS65 NGC. According to David Lange, "...signs of hurried work include multiple die cracks and metal flowlines, both evidence of extended die use." This coin shows evidence of both of these, with small die cracks visible at the date and feathers, as well as weakness in detail near the rim. In contrast, the overall strike is unusually strong for the date. San Francisco issues of this period are typically weak. Green-gold in color with bright luster, this is a desirable option for the Buffalo nickel collector searching for a high-quality Gem 1921-S. Census: 39 in 65 (2 in 65★), 6 finer (1/19). Ex: FUN Signature (Heritage, 1/2009), lot 822, which realized \$4,025. NGC ID# 22RU, PCGS# 3948

**1924-D Nickel, Toned MS65+  
Above-Average Strike**

**3056** 1924-D MS65+ PCGS. CAC. The profound strike softness with which examples of this issue were typically produced contributes to the scarcity of high-grade survivors. This high-end Gem exhibits a minor degree of weakness on the bison's head and shoulder, as well as on portions of the obverse portrait, though the strike seems above-average for the issue. The Indian's braid, the date, the bison's horn and tail, and the lettering are all sharply defined. Excellent surface preservation confirms this coin's Gem status. Iridescent champagne, lavender, and ice-blue toning encompasses each side, adding to the eye appeal. PCGS has graded just nine examples finer (1/19). NGC ID# 22RY, PCGS# 3952

**1924-S Nickel, MS64  
Better Date in High Grade**

**3057** 1924-S MS64 PCGS. CAC. The 1924-S is a well-known strike rarity from the 1920s, as the branch mints in general lacked efforts to produce high quality coins. Much of this seems to have been due to the prolonged use of worn dies, which produced erosion in the design and softened details. This coin stands out in all respects, being struck from fairly fresh dies and having above-average sharpness. Some weakness is noted above the Indian's braid on the obverse and on the bison's shoulder on the reverse. Satiny luster yields lilac and golden toning, and there are no bothersome abrasions. Ex: ANA Signature (Heritage, 8/2016), lot 3486, which realized \$5,875. NGC ID# 22RZ, PCGS# 3953

**1926 Buffalo Nickel, MS67+  
Tied for Finest at PCGS**

**3058** 1926 MS67+ PCGS. Plentiful in lower grades, the 1926 Buffalo nickel becomes conditionally scarce in MS67, and it is unknown numerically finer at PCGS. This is one of a half dozen Plus-graded Superb Gems at PCGS, a top-level coin for the Registry Set collector. It also has enormous type coin appeal, showcasing a bold strike and vibrant, luminous mint luster. Mint-green and pale golden hues adorn each side, with faint lilac accents in the protected areas. Population: 55 in 67 (6 in 67+), 0 finer (2/19). NGC ID# 22S5, PCGS# 3957

**1926-S Buffalo Nickel, MS64  
Prized, Key Issue in the Series**

**3059** 1926-S MS64 PCGS. In general, 1926-S nickels are a homely bunch, with weak strikes and substandard eye appeal. Choice About Uncirculated coins are scarce and finer examples are rare. This softly lustrous, nickel-gray coin displays attractive, problem-free surfaces and near-Gem quality. The strike is a notch below sharp — still strong for the issue — with minimal signs of die wear and impressive visual allure. PCGS reports just 16 numerically finer pieces (2/19). NGC ID# 22S7, PCGS# 3959

1937-D Buffalo Nickel, MS64

Three-Legged Reverse

1937-D Three-Legged Nickel, MS65

Key, Late-Date Issue

- 3060 1937-D Three-Legged, FS-901, MS64 PCGS.** This popular variety has appeared in the Guide Book for many years and is an integral part of a complete set of Buffalo nickels. PCGS (2/19) has certified only 75 examples numerically finer than this Choice Mint State piece that exhibits splendid amber and pale blue toning on its lustrous surfaces. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3061 1937-D Three-Legged, FS-901, MS65 NGC.** According to the well-known story Walter Breen published in his *Complete Encyclopedia*, the 1937-D Three-Legged Buffalo nickels were created by overzealous die polishing. This makes them a die-state variety, rather than a variety that was originally created merely by a pairing of two dies, from which all examples show the same characteristics. In this respect, the Three-Legged Buffalos are in the same category as the 1922 No D cents, which began their die life as ordinary 1922-D Lincolns. The Three-Legged Buffalos are also in the same class as the much more elusive 1936-D 3-1/2-Legged Buffalos, as well as the various Two Feathers issues. Given the rather large number of 1937-D Three-Legged Buffalos surviving, a collector with sufficient means might be able to trace earlier and later die stages of both the obverse and reverse dies, perhaps due to differing amounts of luster or die erosion. This is an unusually high-grade example whose surfaces are satiny and problem-free and show just the slightest accent of patina. Census: 58 in 65 (3 in 65+), 23 finer (2/19). NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1938-D/S Buffalo Nickel, MS68  
Spectacular Multicolor Toning**

- 3062** 1938-D/S FS-511 MS68 NGC. A popular *Cherrypickers'* variety, available in all grades but rarely as Superb as this impressive MS68 example. Tawny-gold toning merges with rainbow hues on both sides, with lime-green, red-gold, and lilac colors providing exceptional eye appeal. The dual mintmark is multiply punched D/D/S with an S initially impressed into the die, then subsequent D punches applied. This is a sharply struck and essentially unimprovable example. Census: 33 in 68 (8 in 68★, 1 in 68+, 1 in 68+★), 0 finer (1/19). NGC ID# 22T3, PCGS# 38476 Base PCGS# 3985

**PROOF BUFFALO NICKELS**

**1913 Type Two Nickel, PR67  
Second-Scarcest Matte Proof**

- 3063** 1913 Type Two PR67 PCGS. After the reverse of the nickel was modified in 1913, another 1,514 proofs were struck. The Type Two has been overlooked for many years because of the one-year type status of the Type One design, but it is actually the second-rarest matte proof (second only to the 1916). This is a remarkably well-preserved example whose surfaces are essentially defect-free. Close examination shows just the faintest trace of toning on the reverse (none is seen on the obverse). Population: 73 in 67 (7 in 67+), 9 finer (2/19). NGC ID# 278S, PCGS# 3990

**1936 Nickel, Top-Grade PR68  
Brilliant Finish Registry Coin**

- 3064** 1936 Type Two — Brilliant Finish PR68 NGC. Delicate champagne and rose-pink hues adorn this top-grade proof 1936 Type Two nickel, producing an overall rose-gold appearance when viewed with the unaided eye. The strike is sharp and the preservation is virtually flawless. In fact, this is among the finest Brilliant Finish proofs at NGC, a Registry collector's dream coin. Census: 21 in 68, 0 finer (2/19). NGC ID# 278Y, PCGS# 3995

**PROOF JEFFERSON NICKEL**

**1940 Jefferson Nickel, PR68  
Reverse of 1940**

- 3065** 1940 Reverse of 1940 PR68 NGC. CAC. The Reverse of 1940 has sharply defined steps on Monticello, while the older Reverse of 1938 is not well-defined in this area. This magnificent PR68 specimen exhibits sharp definition throughout, with deeply reflective fields and impeccably preserved surfaces, under shades of sea-green and ice-blue toning. Census: 7 in 68, 3 finer. CAC: 5 in 68, 0 finer (2/19). NGC ID# 279Z, PCGS# 4177

**EARLY HALF DIMES**

**1794 V-1, LM-1 Half Dime, XF40  
Rare First-Year Die Variety**

- 3066** 1794 V-1, LM-1, R.6, XF40 PCGS. LM-1 is the rarest of the four 1794 half dime die marriages. Stars 4, 8, and 12 are repunched, as is the T in UNITED. This piece is in a later die state with wispy die cracks across the obverse. The surfaces are vibrantly toned in sea-green, gold, and rose colors. Detail is sharp, with rub generally limited to the eagle's breast. The portrait has a few tiny contact marks and the reverse has a pair of short, faded pinscratches. Ex: New York Signature (Heritage, 11/2003), lot 5900, which realized \$4,140. NGC ID# 22ZT, PCGS# 38581 Base PCGS# 4250

**1795 Flowing Hair Half Dime, AU55  
V-5, LM-8, Rich Colorful Toning**

- 3067** 1795 V-5, LM-8, R.3, AU55 PCGS. The surfaces appear olive-gray at first glance, but when tilted beneath a light at just the right angle, lovely violet and gold undertones glow from partially reflective fields. There is no distinct wear, although the lower-left obverse and left-hand reverse are weakly struck where planchet adjustment marks angle across the eagle from the border. The surfaces are void of any post-minting problems or significant marks, and Liberty's upper hair strands are individually sharp. NGC ID# 22ZV, PCGS# 38592 Base PCGS# 4251

**1800 V-1, LM-1 Half Dime, XF45**  
Well-Detailed Liberty Portrait

- 3068 1800 V-1, LM-1, R.3, XF45 NGC.** The date numerals are sharp on this early die state example. Some die bulging on the reverse weakens the stars and clouds above the eagle, but the obverse is well-defined. There is a shallow linear depression across Liberty's neck. Little wear is present on this Draped Bust type coin. Old-time olive-gray and lilac toning covers each side, producing pleasant eye appeal. NGC ID# 2326, PCGS# 38601 Base PCGS# 4264

**1803 Large 8 Half Dime, AU50**  
V-1, LM-2, Draped Bust Type Coin

- 3069 1803 Large 8, V-1, LM-2, R.4, AU50 NGC.** This About Uncirculated Draped Bust type coin is well-detailed across the interiors, with little high-point wear. Slight strike weakness in the upper reverse margin does not detract. Deep, olive-gray patina covers each side, and the surfaces are devoid of bothersome abrasions. Half dime coinage was minimal during the early years of the Mint. In 1803, one of the higher mintages was produced, yet this still amounted to only 37,850 coins. Census: 2 in 50, 15 finer (1/19). NGC ID# 2329, PCGS# 38608 Base PCGS# 4269

### BUST HALF DIME

**1833 Half Dime, V-7, LM-1, MS67**  
Among the Finest Certified

- 3070 1833 V-7, LM-1, R.3, MS67 NGC.** Diagnostic indicators for the LM-1 variety include 83 in the date leaning together and the first A in AMERICA over the left upright of the M in UNUM. This marvelous Superb Gem is one of 18 MS67 submissions at NGC, including three in MS67★, with none finer (2/19). Brilliant centers are framed by original shades of dusky violet-gray and cobalt-blue toning. Lustrous and strongly struck. NGC ID# 232F, PCGS# 38686 Base PCGS# 4280

### SEATED HALF DIMES

**1837 Half Dime, MS66+**  
Frosty No Stars Type Coin

- 3071 1837 No Stars, Small Date (Flat Top 1) MS66+ PCGS. CAC.** The devices are sharp and vibrant luster engulfs each side of this mostly brilliant Premium Gem type coin. Die erosion around the margins blurs portions of the border dentils. Small areas of golden border toning warm the peripheries, and no abrasions are immediately visible. All 1837 Seated half dimes are No Stars coins and the Small Date variant is scarce in high grade. Plus-graded by PCGS with CAC endorsement. Population: 17 in 66 (4 in 66+), 7 finer. CAC: 10 in 66, 8 finer (2/19). NGC ID# 232M, PCGS# 4312

**1860 Half Dime, MS68**  
None Seen Finer

- 3072 1860 MS68 PCGS.** The 1860 half dime is a popular type coin issue due to its general availability, but Superb Gem examples are scarce and are major rarities at the MS68 level. This piece is among the finest certified. The strike is lacking slightly on portions of the wreath, but the outstanding preservation of the surfaces balances the eye appeal. Virtually brilliant centers cede to violet and blue peripheral toning. Population: 5 in 68, 0 finer (2/19). NGC ID# 2347, PCGS# 4377

### PROOF SEATED HALF DIME

**1871 Seated Liberty Half Dime, PR68★**  
Tied for Finest Cameo

- 3073 1871 PR68★ Cameo NGC.** Vivid shades of cobalt-blue and golden-tan toning visit the impeccably preserved surfaces of this incredible PR68 example. The sharply detailed, richly frosted design elements contrast boldly with the deeply mirrored fields to create a stunning cameo effect. The terrific eye appeal is confirmed by the Star designation. Census: 2 in 68 Cameo (2 in 68★), 0 finer (2/19). NGC ID# 2368, PCGS# 84454

## EARLY DIMES

**1796 JR-2 Dime, XF Details  
Well-Detailed Draped Bust Type Coin**

**3074** 1796 JR-2, R.4 — Scratched, Cleaned — ANACS. XF Details, Net VF20. This is a well-detailed JR-2 dime, a suitable type coin for the budget-conscious collector. The coin has long retoned since being cleaned in the distant past, showing mottled gold, russet, and lilac-gray. Two scratches are apparent, one short and located behind Liberty's eye and a longer one above the eagle's head — neither is bothersome. Other light, scattered abrasions are apparent with a loupe. NGC ID# 236B, PCGS# 38743 Base PCGS# 4461

**1805 Dime, JR-2, MS62  
Attractively Toned, CAC Endorsed**

**3075** 1805 4 Berries, JR-2, R.2, MS62 PCGS. CAC. The narrow, "anemic A's" in the reverse legend help identify the JR-2 variety, as does the presence of just four berries on the olive stem. A short die line pins the flag of 5 to Liberty's drapery. Just two die marriages were employed to strike 120,780 1805 dimes, and of those two varieties JR-2 is more readily seen than JR-1 (which has five berries on the branch).

A parabolic die crack through ERT of LIBERTY indicates a late die state for this lustrous and attractively toned MS62 example. Silver mint luster penetrates lilac-gray and pinkish-gold patina. The strike is a bit up-and-down — sharp in some areas, less-so in others, but overall the motifs are boldly rendered. The eye appeal is exceptional. Housed in an old green label holder with CAC endorsement. NGC ID# 236S, PCGS# 38769 Base PCGS# 4477

**BUST DIME**

**1833 JR-1 Dime, MS65  
Essentially Brilliant**

**3076 1833 JR-1, R.3, MS65 NGC.** The 1 in the date is higher than the 8, star 7 points to the junction of the curl and headband, and TES O are about equally spaced. Ten die marriages are known for the 1833 dime. JR-1 is considered one of the more collectible. This essentially brilliant Gem shows the slightest tinges of pale gold color and is strongly struck throughout. Tiny ticks only appear under magnification. Census (all varieties): 21 in 65, 6 finer (1/19). NGC ID# 237D, PCGS# 38862 Base PCGS# 4522

**SEATED DIMES**

**1864 Dime, Fortin-102a, MS66  
Few Are Finer, Ex: Gardner**

**3077 1864 F-102a, R.5, MS66 NGC.** Reflectivity at the colorfully toned margins and immaculate preservation give this Premium Gem exceptional visual appeal, while splashes of amber, teal, and royal-blue accent vibrant mint luster that enriches each side. The toning pattern identifies this piece as the outstanding 1864 dime from the Eugene H. Gardner Collection — an exceptional example of the scarce, low-mintage Civil War issue represented by a mintage of only 11,000 coins. Struck from clashed dies, it is a late use of proof dies that were employed for circulation strikes as well. PCGS reports only three numerically finer examples, and none are finer at NGC. Census: 6 in 66 (1 in 66+), 0 finer (1/19). NGC ID# 239M, PCGS# 538202 Base PCGS# 4639

**1865-S Seated Dime, MS62  
Conditionally Rare San Francisco Issue**

**3078 1865-S Repunched Date, F-103, R.4, MS62 PCGS Gold Shield.** The 1865-S is rare in all Mint State grades. Fewer than two dozen pieces are thought to exist in Uncirculated condition — most of those grade MS60 to MS62. The issue is often lightly struck with little (if any) surviving mint luster. This example shows a sharper strike than many, and is faintly lustrous beneath slightly subdued silver-gray surfaces, with a few flecks of deep-gray toning. PCGS reports just six Uncirculated examples. Population: 1 in 62, 5 finer (1/19). PCGS# 538210 Base PCGS# 4642

**BARBER DIMES**

**1903-S Barber Dime, MS67  
Tied for the Finest Certified**

**3079 1903-S MS67 NGC.** The '03-S is always in demand because of its absolute as well as condition rarity, due in large part from its mintage of only 613,300 pieces. The brilliant centers are bordered by rich peripheral arcs of multicolored iridescence, which lends a fully natural appearance. The surfaces are sharply struck and free from any troublesome abrasions. As a future pedigree identifier, a tiny contact mark is seen at the center of the M of DIME on the reverse. Census: 2 in 67, 0 finer (2/19). NGC ID# 23EP, PCGS# 4832

**1905-O Dime, MS66+  
Delicately Toned**

**3080 1905-O MS66+ PCGS.** The 1905-O Barber dime is moderately plentiful — by Barber coinage standards — in grades through MS64, but it is scarce finer. The high-end Premium Gem example offered here is rare. Delicate ice-blue, lilac, and yellow-gold hues adorn vibrantly lustrous surfaces, complementing sharp devices. The surfaces are free of mentionable abrasions. Population: 22 in 66 (3 in 66+), 7 finer (2/19). NGC ID# 23EU, PCGS# 4836

## MERCURY DIMES

**1916-D Mercury Dime, Dramatic MS64**  
Rare This Fine, Sharp and Attractive

**3081** 1916-D MS64 PCGS. The mintage of 264,000 pieces is just one factor that makes the 1916-D much rarer than even its low mintage suggests. The Philadelphia mintage of more than 22 million 1916 dimes satisfied the novelty of the new series, while the Denver issue was released much later in the year, and saw less demand.

Attractive russet-brown and deep aqua-gray toning gives this splendid, near-Gem '16-D dramatic eye appeal. The toning contrasts boldly with its silver centers, which are sharply struck despite the lack of a Full Bands designation. In fact, the horizontal bands are fully split save for a bit of incomplete division of the central band, and only minor flatness on the leaf overlapping the lower diagonal is seen. Bold silver luster shines through the distinctive patina, and there are no notable marks. Population: 15 in 64 (2 in 64+), 5 finer (1/19). NGC ID# 23GY, PCGS# 4906

**1916-D Mercury Dime, MS63 Full Bands**  
**Requisite Series Key Issue**

**3082** 1916-D MS63 Full Bands PCGS. Generally well-struck and perhaps more available with Full Bands than non-Full Bands coins in similar grade, the 1916-D nevertheless brings a strong premium with the FB designation. This Select Uncirculated coin is sharply struck particularly on the obverse, where Liberty's winged portrait is well-defined, and the fasces have the requisite split bands and sharp diagonals to earn the Full Bands designation.

The surfaces display rich-lilac pearlescence interspersed with flecks and isolated areas of deep-gray toning. Fine-grained surfaces show only a few tiny marks, with sharpness of the motifs extending to the rims. This thoroughly original example is sure to draw strong interest from series collectors as the unquestioned and vital key to a Mercury dime set. NGC ID# 23GY, PCGS# 4907

1918-D Mercury Dime, Full Bands  
Splendid Border-Toned Gem

**3083 1918-D MS65 Full Bands PCGS Gold Shield.** Known as one of the most challenging mintmarked dates to find sharply struck, the 1918-D is a condition rarity even in MS65 with the Full Bands designation. This example displays uncommonly attractive patina in addition to its sharp strike. Amber and violet border toning adds rainbow colors to the palette, while an element of lavender imbues the lustrous, silver-gray centers.

The obverse is suitably well-defined, and while the leaf overlapping the lower diagonal band shows slight softness, the central bands offer a clean separating line. This is a great coin that is as carefully preserved as the Gem grade demands, definitively rare any finer, while seldom seen so sharp and colorful. Population: 27 in 65 Full Bands, 5 finer (1/19). NGC ID# 23H6, PCGS# 4919

1925-D Dime, MS66 Full Bands  
Rare This Fine, CAC

**3084 1925-D MS66 Full Bands PCGS Gold Shield. CAC.** Scarce in high Mint State grades and elusive with Full Bands, this sharply struck 1925-D bucks both trends with brilliant-white surfaces and a rim-to-rim sharp strike. Blazing mint luster gleams from each side of this Premium Gem, which received CAC endorsement for its high-end quality. Only a few Full Bands examples are finer. Population: 33 in 66 (4 in 66+) Full Bands, 4 finer. CAC: 10 in 66, 2 finer (1/19). NGC ID# 23HN, PCGS# 4951

## TWENTY CENT PIECES

1875-S Twenty Cent, Frosty MS66  
High-End Type Coin

**3085 1875-S MS66 PCGS. BF-5, R.2.** BF-5 is known in a late die state with a shattered reverse and a rim cud below the date on the obverse. This piece lacks the rim cud on the obverse, and while the reverse is extensively cracked, the breaks are not as prominent as they are on the later state. This coin's appeal is as a type coin. The 1875-S twenty cent piece is scarce in MS66 and a major rarity finer, but it is the most plentiful issue in the series so well-preserved. This example displays shimmering original luster with golden interiors and blue-green borders. Some strike softness is noted on several border stars and the upper edge of the eagle's left (facing) wing. Population: 76 in 66 (10 in 66+), 7 finer (2/19). NGC ID# 23R7, PCGS# 5298

**1875-S/S Twenty Cent, Frosty MS66  
FS-302, Misplaced Date, Repunched Mintmark**

- 3086 1875-S/S Misplaced Date, FS-302, BF-16, R.1, MS66 NGC.** FS-302 shows a boldly repunched mintmark that resembles a dollar sign, and on the obverse the top of a misplaced digit (possibly a 5) is in the dentils below the 7 in the date. The snowy-white surfaces are unblemished and show a faint tint of light golden border toning. Strike weakness affects the border stars and areas of the Liberty portrait, but the reverse is better-defined. The 1875-S twenty cent piece is scarce in this grade and rare finer. Census: 54 in 66 (2 in 66+, 3 in 66★), 9 finer (2/19). NGC ID# 23R7, PCGS# 145009 Base PCGS# 5298

**EARLY QUARTERS**

**1796 B-2 Quarter, Fine Details  
Collectible Small Eagle Type Coin**

- 3087 1796 B-2, R.3 — Repaired, Corroded — ANACS.** Fine Details, Net Good 4. Tompkins Die State 1/1. The obverse is unlapped in this die state, with all of Liberty's hair curls intact. Both sides are lightly tooled, but the swirling marks are most visible in the right obverse field. The work may have been done to correct some faint granularity on each side, which ANACS references on the holder insert as corrosion. To the unaided eye, this B-2 quarter displays smooth slate-gray surfaces cast in olive-gold toning. Detail is pleasing for the grade and the borders are mostly strong. A collectible Small Eagle type coin. NGC ID# 23RA, PCGS# 38920 Base PCGS# 5310

**1806 B-3 Quarter, Lustrous AU58**

- 3088 1806 B-3, R.1, AU58 PCGS.** Tompkins Die State 3/5, both dies heavily clashed and cracked. B-3 is a plentiful variety, often encountered in type collectors' collections. The I in LIBERTY is from a broken punch missing the right foot, and the denomination on the reverse is placed so that neither the 5 nor the C touch the eagle's tailfeathers or the fletchings. This lustrous near-Mint coin is weakly struck along the right-hand obverse border and across the upper-central reverse, with the stars and eagle's head indistinct. Light golden interiors cede to blue-gray borders, offering strong eye appeal. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

**BUST QUARTERS**

**1818/5 B-3 Quarter, MS65  
Among the Finest Certified**

- 3089 1818/5 B-3, R.3, MS65 NGC.** This die combination includes a later use of the overdate obverse die, although in this stage the overdate feature is no longer visible. The overall B-3 die combination, while scarce, is usually available in higher grades, and this Gem MS65 piece barely reaches the low end of the Condition Census.

Some weakness is evident in the centers, but most of the design details are sharply impressed. Lovely mint frosty shines through the vivid gold toning over the obverse and reverse surfaces. Census: 20 in 65 (1 in 65+), 11 finer (2/19).

Ex: Joseph C. Thomas Collection / Central States Signature (Heritage, 4-5/2009), lot 2321, where it brought \$14,375. NGC ID# 23RH, PCGS# 411648 Base PCGS# 5323

**1838 Capped Bust Quarter, B-1, MS64  
Lustrous and Attractive Final-Year Type Coin**

- 3090 1838 B-1, R.1, MS64 NGC.** Despite a reported mintage of 366,000 pieces, just one die marriage is known for 1838 quarters. This is a Choice Uncirculated example with golden-tan toning and traces of blue at the margins. A glass reveals a number of faint, hair-thin abrasions in the left obverse field beneath the attractive patina, as well as a small pinscratch beneath the left (facing) wing. The strike and eye appeal are strong throughout both sides. Census: 19 in 64 (1 in 64+), 5 finer (1/19). NGC ID# 23S5, PCGS# 39015 Base PCGS# 5357

**SEATED QUARTERS**

**1859-S Quarter Dollar, XF45  
Few Known This Fine**

- 3091 1859-S XF45 NGC.** Briggs 1-A. A mintage of 80,000 pieces was insufficient to ensure the widespread survival of the 1859-S quarter dollar. The issue is scarce in all grades and unknown in Mint State. This Choice XF coin is conditionally rare. The strike is sharp and wear is minimal. Both sides feature uniform olive-gray patina and are devoid of bothersome abrasions. Census: 3 in 45, 3 finer (2/19). NGC ID# 23TN, PCGS# 5450

**1868-S Quarter Dollar, MS65  
A Condition Census Rarity**

- 3092 1868-S MS65 NGC.** Only 96,000 quarter dollars were struck at San Francisco in 1868, yet this was the highest mintage of the denomination at that mint in a decade. The 1868-S is also scarcer in Mint State than its lower-mintage Philadelphia counterpart, as it circulated to a greater extent. NGC has certified only 10 pieces in all Mint State grades, including two in this grade and one MS66 coin finer (2/19). We have previously handled the other NGC Gem in the Central States Signature (Heritage, 4/2015), lot 5026, where it realized \$17,625. This piece is every bit as well preserved as that one, and it displays lustrous surfaces with light golden and russet toning. The upper obverse stars are weak, but other design elements show better definition. Census: 2 in 65, 1 finer (2/19). NGC ID# 23UG, PCGS# 5473

## PROOF SEATED QUARTERS

1863 Quarter, Toned PR66  
Rarely Offered This Fine

- 3093** 1863 PR66 NGC. Briggs Reverse D. The obverse die is unlisted in Briggs for this proof marriage, which shows the date slightly further left than on the documented 4-D proof dies. Only 460 proof quarters were struck in 1863. This Premium Gem survivor is needle-sharp across all design elements and has tremendous reflectivity in the fields. The obverse displays mottled champagne-gray and light olive toning, while the reverse has additional blue and violet hues. Considerable cameo contrast is apparent on the reverse. Census: 12 in 66 (1 in 66+), 2 finer (1/19). NGC ID# 23WR, PCGS# 5559

1874 Seated Liberty Quarter, PR66  
Arrows at Date

- 3094** 1874 Arrows PR66 NGC. The slight weight change in 1873 was identified with arrowheads at the date, as had been done two decades earlier. At the beginning of 1875, those arrowheads were removed. Lovely gold, violet, and blue toning appears on both sides of this nicely mirrored Premium Gem proof. Census: 25 in 66, 6 finer (2/19). NGC ID# 23XS, PCGS# 5575

## BARBER QUARTERS

1901-S Barber Quarter, AU55  
The Key to the Series

- 3095** 1901-S AU55 NGC. The 1901-S Barber quarter claims a minuscule mintage of 72,664 pieces and few high-quality examples were saved by contemporary collectors. The elusive nature of the 1901-S was only realized in the 1930s, when the Standard Catalogue of United States Coins began publishing mintage figures for the coins, as well as pricing data. By that time, the coins had been circulating for decades, incurring extensive wear and attrition along the way. Today, the issue is seldom seen in grades above the VG range and the 1901-S is the acknowledged key to the series.

The present coin is an attractive Choice AU specimen that exhibits just a touch of wear on the high points of the strongly impressed design elements. The lightly abraded surfaces retain significant amounts of original mint luster, under pleasing shades of lavender-gray toning. Census: 4 in 55, 16 finer (2/19). NGC ID# 23YR, PCGS# 5630

**1912 Barber Quarter, Luminous MS67  
Condition Census Registry Coin**

**3096 1912 MS67 PCGS Gold Shield.** This relatively plentiful Philadelphia issue — boasting a mintage in excess of 4.4 million coins — becomes conditionally scarce in MS65 and is genuinely rare at the Premium Gem level of preservation. Only three Superb Gems are reported, one of which is the luminous coin offered here. All three top-grade coins are plated on the PCGS CoinFacts webpage, although only one — the toned Eugene Gardner coin — has ever appear at public auction in an MS67 holder. That coin last realized \$16,450, in the FUN Signature (Heritage, 1/2016), lot 3931, exactly twice what it realized less than a year prior in the Gardner sale.

This Superb Gem is equally well preserved and sharp, showing no mentionable weakness or surface impairments. It is nearly brilliant — indeed, of the three MS67 coins, this piece is the closest to being entirely free of toning. Luster is luminous and eye appeal excels. Population: 3 in 67, 0 finer (1/19). NGC ID# 23ZS, PCGS# 5662

**PROOF BARBER QUARTERS**

**1897 Barber Quarter, PR67 Cameo  
High-Grade Contrasted Proof, CAC Endorsed**

**3097 1897 PR67 Cameo PCGS. CAC.** The fields of this Superb Gem quarter display liquidlike mirroring, toned in shades of grayish-blue and ivory. Frosted devices add cameo contrast and accentuate a sharp strike. Just 731 proofs were struck. Survivors are nearly equally split among non-cameo, Cameo, and Deep Cameo examples at the PR67 grade. Population: 14 in 67 (3 in 67+) Cameo, 3 finer. CAC: 12 in 67, 3 finer (1/19). NGC ID# 242C, PCGS# 85683

**1898 Quarter, PR67+ Deep Cameo  
CAC-Endorsed Registry Candidate**

**3098 1898 PR67+ Deep Cameo PCGS Gold Shield. CAC.** Superb Gem proof 1898 Barber quarters are more or less distributed throughout Deep Cameo, Cameo, and non-Cameo levels of contrast, although the Deep Cameo coins — particularly those with CAC endorsement — are the most highly sought-after. This Plus-designated piece showcases starkly contrasted frost-white devices and liquidlike mirroring in the fields. Neither side is toned, and the preservation is virtually flawless. Population: 14 in 67 (2 in 67+) Deep Cameo, 12 finer. CAC: 6 in 67, 14 finer (1/19). NGC ID# 242D, PCGS# 95684

**1904 Quarter, Toned PR68  
Just One Finer Non-Cameo at Either Service**

**3099 1904 PR68 NGC.** Pale-red and gray-blue shades are prominent components of multicolor toning that covers this Superb Gem quarter. Sharply struck and well-mirrored, the immaculate surfaces show no mentionable marks or distractions. Eye appeal alone is deserving of the designated PR68 grade, although the quality of strike is equally impressive. Frosted devices contrast mildly with the highly reflective fields. Just 670 pieces were struck, with only 11 proofs known at this grade or finer by both PCGS and NGC combined, including Cameo and Deep Cameo. NGC Census: 6 in 68 (1 in 68★), 1 finer (2/19). NGC ID# 242K, PCGS# 5690

## STANDING LIBERTY QUARTERS

**1916 Standing Liberty Quarter, AU Details  
Well-Detailed and Toned**

**3100** 1916 — Cleaned — NGC Details. AU. A touch of wear is mainly evident on Liberty's knee, with most other details appearing unworn. Although lightly cleaned in the past, this 1916 Standing Liberty quarter has since retoned deep golden-russet, lavender, and cobalt-blue hues, which lighten to pale gray in the centers. This is a pleasing example of the first-year key, one that will fit in well with an otherwise problem-free Standing Liberty quarter collection. NGC ID# 43XR, PCGS# 5704

**1916 Standing Liberty Quarter  
Premier Key Date, AU Sharpness**

**3101** 1916 — Altered Surfaces — PCGS Genuine. AU Details. This is the premier key date in Hermon A. MacNeil's Standing Liberty quarter series. A total of 52,000 pieces were struck in 1916, the same year new designs for the dime and half dollar were also introduced. Most examples of the 1916 circulated extensively, and high-grade representatives can be challenging to obtain. This piece enjoys AU sharpness, with particularly strong definition on the date and eagle's feathers. Silvery surfaces are unnaturally subdued, resulting in a Details assessment.

**1916 Standing Liberty Quarter, MS62  
Satiny Full Head Example  
An Iconic Depiction of Liberty**

**3102** 1916 MS62 Full Head PCGS. The model for Hermon MacNeil's Liberty on his 1916 quarter dollar design was long thought to be Doris Doscher, an actress and known model who had worked with MacNeil and other sculptors. However, in the 1970s, it was made known that Mrs. Irene MacDowell, the wife of MacNeil's tennis partner, also claimed to have modeled for the design. It is possible that both women at one point or another stood for the sculptor, as he spent months preparing the design and it was common practice at the time for allegorical sculptures — such as a depiction of Liberty — to be a composite of several different real-world models. Today, MacNeil's "standing" Liberty is one of the most iconic depictions of the allegorical goddess on United States coinage.

This Mint State 1916 quarter has Full Head detail and is generally well-struck for the issue. Satiny mint luster reveals a hint of light golden toning, and grade-limiting abrasions are trivial. Eye appeal is pleasing for the grade. NGC ID# 2AMV, PCGS# 5705

**1916 Standing Liberty Quarter, MS64  
Frost-White Full Head Representative**

**3103 1916 MS64 Full Head NGC.** The 1916 Standing Liberty quarter was released to the public in early January 1917, with no recognition, alongside the first 1917-dated pieces. The intent was to prevent hoarding of the low-mintage 1916 issue, and it worked to a certain extent — most 1916 quarters circulated extensively and survive today only in low grades. However, attractive Mint State coins have also survived, often through the discovery of original rolls that were never paid out into commerce. Uncirculated Full Head pieces are the most highly sought-after.

This Choice Full Head coin is brilliant, and a radiant cartwheel effect engulfs the bright surfaces. A few scattered light marks are visible, but none are bothersome. Strike sharpness is pleasing for the issue, with the understanding that "mushiness" in the obverse design is from poor engraving of the die, not inadequate die pressure. An excellent example for the grade. NGC ID# 2AMV, PCGS# 5705

**1917 Type Two Quarter, MS67 Full Head  
Among the Finest Pieces Certified**

**3104 1917 Type Two MS67 Full Head NGC.** Type One 1917 quarters with full heads are plentiful, although cherished as examples of a short-lived design. Full head Type Two 1917 pieces are significantly scarcer, and they are rare at the MS67 level. Liberty's head, the gown lines, and the shield rivets are fully struck on this Registry coin, and only the date and the reverse legend near 12 o'clock show even a hint of weakness. Brilliant, lustrous, and essentially flawless. Census: 12 in 67 (1 in 67+) Full Head, 0 finer (1/19). Ex: ANA Signature (Heritage, 8/2007), lot 734, which realized \$5,462.50; FUN Signature (Heritage, 1/2009), lot 2636, which realized \$4,887.50. NGC ID# 2434, PCGS# 5715

## WASHINGTON QUARTERS

**1932-S Washington Quarter, MS65+  
Highly Sought First-Year Key Issue**

**3105 1932-S MS65+ PCGS Gold Shield.** The majority of Gem or finer 1932-S quarters show intermittent russet-brown toning to one extent or another. This example holds true to form, with isolated areas of deep-brown patina congregating at the borders, and only faint interruptions to the satiny, silver centers. There are no marks of consequence visible on the sharply struck surfaces, while bright mint luster remains prominent throughout both sides. Population: 12 in 65+, 4 finer (1/19). NGC ID# 2449, PCGS# 5792

**1932-S Quarter Dollar, MS65+  
High-End Registry Coin**

**3106 1932-S MS65+ PCGS Gold Shield.** In Gem condition, this key San Francisco issue is genuinely scarce, and many examples are tightly held in Washington quarter collections. Finer pieces are out of reach for most collectors. This Plus-graded coin displays a sharp strike and satiny luster. Daubs of russet toning in the margins surround pearl-white interiors. Only a few trivial contact marks are apparent. Population: 12 in 65+, 4 finer (1/19). NGC ID# 2449, PCGS# 5792

**1958 Quarter, Registry-Grade MS67+  
FS-901, Type B Reverse**

**3107 1958 Type B Reverse, FS-901, MS67+ PCGS.** The rare Type B Reverse has sharper design definition than its plentiful Type A Reverse counterpart. Since 1958 proofs have a Type B Reverse, it appears that proof dies no longer suitable or requisite for proof production were used to strike coins for commerce, as an economy measure. This is the single finest PCGS-certified example; a Superb Gem with lovely peripheral ruby-red, golden-brown, and jade-green patina. Population: 2 in 67 (1 in 67+), 0 finer (2/19). NGC ID# 246F, PCGS# 146067 Base PCGS# 5864

**1962 Quarter Dollar, MS67+  
Tied for Finest at PCGS  
Beautifully Toned CoinFacts Plate Coin**

**3108 1962 MS67+ PCGS Gold Shield.** Certified 1962 Washington quarters in Superb Gem condition are scarce and highly sought-after among Registry Set collectors. This Plus-graded piece is tied with one other as the finest at PCGS, a recognition that makes it one of the two most important PCGS-graded examples of the issue. Plated on the PCGS CoinFacts webpage, it shows radiant luster and vivid multicolor toning. The strike is sharp and there are no bothersome abrasions. Population: 31 in 67 (2 in 67+), 0 finer (1/19). NGC ID# 246P, PCGS# 5872

**EARLY HALF DOLLARS**

**1794 Flowing Hair Half, VF20  
O-101, Sharply Defined, Ex: Hilt**

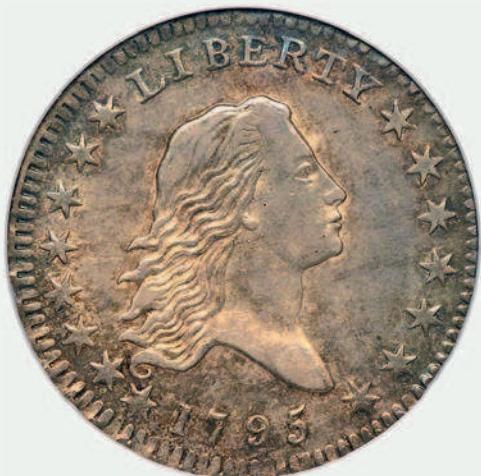

**3109 1794 O-101, T-7, High R.3, VF20 NGC.** Tompkins Die State 1/2. The master dies for Flowing Hair half dollars consisted of just the bust on the obverse and the eagle on the reverse. Working dies were made by hand with punches and graving tools to create the date, stars, and lettering on the obverse, and the laurel branches, leaves, berries, and legend on the reverse. Because the average working die only produced 4,000 pieces (or less), a total of six obverse dies and seven reverse dies were needed to produce 23,464 half dollars dated 1794.

The Overton-101 variety is the most available 1794 variety by far, but it is scarce both in terms of surviving examples and demand. This coin shows strong definition on all of the devices and an attractive, medium-gray patina. Golden highlights occupy the recesses. A few light adjustment marks are seen at the upper-left reverse, and several small marks are scattered across the surfaces, visible with a glass.

Ex: Hilt Collection / Central States Signature (Heritage, 4/2015), lot 5052, where it brought \$12,925. NGC ID# 24E6, PCGS# 39200 Base PCGS# 6051

1795 Half Dollar, AU50  
O-102, Two Leaves Type Coin

1795 Flowing Hair Half, O-117a, XF40  
Lightly Toned With Traces of Luster

**3110** 1795 2 Leaves, O-102, T-26, R.4, AU50 NGC. Tompkins Die State 5/2. This is the latest state of the obverse die, with cracks on either end of the date, through the right-hand stars, and radially through the E in LIBERTY to the top of the head. The reverse has a crack above the ERI in AMERICA, but the heavy retained cud by the UNI in UNITED — diagnostic of O-102a — has not yet formed. As a Flowing Hair type coin, this piece carries vast superiority to lower-grade 1795 halves. Trivial points of wear include Liberty's temple and the top of the head, as well as the bottom of the bust truncation. On the reverse, the eagle's head and the upper edges of the wings are lightly worn, but tremendous feather detail remains in the wings. On the obverse, Liberty's hair is sharply detailed. There are no discernible adjustment marks. Both sides have pastel gold, powder-blue, and olive-gray toning, with smooth surfaces and satiny fields. Housed in a prior generation holder. NGC ID# 37NX, PCGS# 39215 Base PCGS# 6052

**3111** 1795 2 Leaves, O-117a, T-3, R.4, XF40 PCGS. Tompkins Die State 4/2. The obverse shows the diagnostic O-117a die crack from the bust to border, between the date and star 15, with a faint branch crack to the tops of 95, confirming the Overton variety. This example is sharply defined for a Choice VF coin, with hints of luster apparent in the protected areas. The surfaces display light gray toning with splashes of ivory over the high points. A short streak of deep toning through star 1 joins numerous light abrasions and lines visible with a lens. A pleasing example of the issue and seldom found in finer grades. NGC ID# 24E7, PCGS# 39234 Base PCGS# 6052

1796 16 Stars Draped Bust Half Dollar  
 O-102, Sharp VF25  
 Not Seen at Auction in 105 Years

**3112** 1796 16 Stars, O-102, T-2, High R.5, Amato-212, VF25 PCGS. Tompkins Die State 5/3. This late die state shows a heavy retained cud at stars 1 to 4, with an additional crack that connects star 1 to the dentils at the outer point and continues faintly into the hair curls. On the reverse, a lesser die crack runs from the rim to the O in OF, down the right side of that letter, and into the wreath. Another stretches from the CA in AMERICA toward the fraction.

This O-102 1796 half dollar is a relic of generations past. It has no known auction appearances in more than a century, since it was offered in the Arthur Nygren Collection (B. Max Mehl, 11/1914), lot 181. Mehl described the coin:

**"1796. Sixteen stars, 7 before and 8 [sic] behind bust. Variety with die break through the bottom four stars on left. A tiny nick at E in LIBERTY and on eagle. These do not mar the appearance nor value of this precious coin. A few hair lines on neck. Well struck and perfectly centered, only highest portions showing slight wear. Very fine. Excessively rare. Record for this date over \$300.00. See plate."**

The lot realized \$87, a 30% premium over the price it brought 24 years before, in 1890. The “nick” referenced on the E in LIBERTY is more accurately described as a dimple, although since it deforms the middle crossbar of the E, it is indeed likely of post-Mint origin. The small pits on the eagle’s body are less prominent and may be planchet flaws. On the obverse, mint-made planchet adjustment marks slant down and to the left across the neck and hair, and on the reverse there is a vertical planchet lamination in the field to the right of the eagle’s beak. In the same location — and elsewhere around the reverse eagle — myriad light, swirling scratches smooth the fields. These may have contributed to what appears to be an otherwise conservative numeric grade on the old blue label PCGS holder. Detail on this coin is incredibly sharp for the VF25 grade, with the only significant points of wear being Liberty’s temple and the eagle’s breast. Each side is uniformly bright lilac-gray and satiny. Aesthetics are pleasing to the unaided eye.

*Ex: Wm. F. Johnson, formerly owned by late Robert Coulton Davis (New York Stamp & Coin, 1/1890), lot 583, which realized \$66; Arthur Nygren Collection (B. Max Mehl, 11/1914), lot 181, which realized \$87. NGC ID# 24EA, PCGS# 39262 Base PCGS# 6058*

1801 O-101, T-2 Half Dollar, Scarce XF45  
Inaugural Heraldic Eagle Issue

**3113** 1801 O-101, T-2, R.3, XF45 PCGS. Tompkins Die State 3/4. The left foot of the first A in AMERICA hovers over the fourth wing feather, but does not touch the wing, and AME in AMERICA are joined at the base. Multiple rust lumps appear on both the obverse and reverse of this low-mintage 1801 — the first year of the heraldic eagle reverse on a half dollar. This is a Choice XF example, with traces of golden mint luster remaining in Liberty's lower curls and sporadic gray-gold toning throughout both sides. Population (all varieties): 20 in 45, 18 finer (2/19). NGC ID# 24ED, PCGS# 39267 Base PCGS# 6064

1802 Draped Bust Half Dollar, AU53  
Challenging Low-Mintage Issue, O-101  
Ex: Garrett-Pryor

**3114** 1802 O-101, T-1, R.3, AU53 PCGS. Ex: Pryor. Only 29,890 Draped Bust half dollars were minted in 1802, and the date is the most difficult to locate of all the Heraldic Eagle half dollars, especially in high grades. Only one die variety is known for the issue.

The present coin has an illustrious history, linked to three great collections of past years. This example surfaced in the collection of John Colvin Randall, the great 19th century student of die varieties. W. Elliot Woodward sold the collection in 1885. The description in his auction catalog reads, "1802 Uncirculated; brilliant. The finest I have met with; extremely rare. Plate." The lot was sold to T. Harrison Garrett, a director of the B & O Railroad, of Monopoly fame, and the architect of the famous Garrett Collection. The coin later found a place in the James Bennett Pryor Collection, a specialized gathering of half dollars known for the quality and completeness of the collection.

The coin offered here is an attractively toned high-grade example, with a sharp strike and minimally abraded surfaces. The surfaces are a pleasing greenish-gray, with touches of rose and blue in areas. Population: 3 in 53, 4 finer (2/19).

Ex: John Colvin Randall Collection (Woodward, 6/1885), lot 221; T. Harrison Garrett; John Work Garrett; Johns Hopkins University; Garrett Collection (Bowers and Ruddy, 11/1979), lot 278; James Bennett Pryor Collection (Bowers and Merena, 1/1996), lot 5; ANA Signature (Heritage, 8/2010), lot 3139; Pre-Long Beach Auction (Goldberg Auctioneers, 1/2011), lot 1416. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

**BUST HALF DOLLARS****1807 Capped Bust Half, AU50  
Small Stars, O-113**

**3115** 1807 Capped Bust, Small Stars, O-113, R.2, AU50 PCGS. Original steel-gray patina blankets this lightly abraded representative. Both sides exhibit a triple set of clash marks. Well-struck overall, though Liberty's neck curls and the eagle's left (facing) shoulder are softly impressed. O-113 and its cracked die state O-113a are the only Small Stars varieties for this first-year Capped Bust date. NGC ID# 24EN, PCGS# 39359 Base PCGS# 6087

**1818/7 O-101 Half Dollar, MS63  
Lustrous, Frosted Silver Surfaces**

**3116** 1818/7 Large 8, O-101, R.1, MS63 PCGS. The crossbar of a 7 shows boldly above the top of the date's second 8. This sharply struck Select Mint State example is essentially untoned, with flashy silver-gray surfaces and faint golden-gray accents. A slender die break extends from the rim through star 11 to the rear hair curls. On the reverse, UNITED crowds the rim. A small number of wispy marks is consistent with the assigned grade, which at MS63 places this coin near the low end of the Condition Census for the popular variety. NGC ID# 24FA, PCGS# 39540 Base PCGS# 6115

**1822/1 O-101 Half, MS63  
Rarely Offered in Uncirculated Condition**

**3117** 1822/1 O-101, R.1, MS63 PCGS Gold Shield. The reverse is unique to Overton-101, featuring the right serif of the A in STATES over the I in PLURIBUS. This supposed overdate slopes downward from left to right and shows an apparent underdigit 1 beneath the second 2. Stephen Herrman lists only 11 Mint State appearances for the variety during the past 10 years, headed by the Pittman-Pogue specimen, which grades MS66. This MS63 offering exhibits dusky lavender, gold, and ice-blue toning over smooth surfaces. The central strike is shy of full details, while the peripheries are sharp including most of the obverse stars. Population: 3 in 63, 4 finer (1/19). NGC ID# 24FH, PCGS# 39604 Base PCGS# 6130

**1829 O-105 Small Letters Half, MS65  
Original Semireflective Surfaces**

**3118** 1829 Small Letters, O-105, R.1, MS65 NGC. Dappled reddish-gray toning displays cobalt-blue shades at the borders over semireflective fields throughout this Gem O-105 half. The motifs are sharply struck with most of the obverse stars fully formed — more so than usually seen on the right-hand stars, which often lack their centers, and are less sharp than the stars at left. Soft luster illuminates frosted devices and nearly mark-free surfaces. Three or possibly four MS66 coins exist for the variety, with a host of MS65 pieces vying for the low end of the Condition Census. NGC ID# 8YZY, PCGS# 39784 Base PCGS# 6154

**1830 O-101 Half Dollar, MS65  
Small 0, Condition Census Quality**

**3119** 1830 Small 0, O-101, R.1, MS65 NGC. The A in STATES is recut, and the second T is low relative to the adjacent A and E. According to Stephen Herrman's most recent listing, this piece ranks among the top examples offered over the past 12 years. To be sure, this specimen is spectacularly clean and highly lustrous. Its essentially brilliant surfaces present strongly struck motifs and just a hint of central softness, with the outer elements drawn slightly toward the rims. Best of luck trying to find a better example of the 1830 O-101 half dollar. NGC ID# 24FU, PCGS# 39810 Base PCGS# 6156

## 1830 O-115 Bust Half, MS64+★

Clean Fields, Rich Patina

- 3120** 1830 Small 0, O-115, R.2, MS64+★ NGC. This colorfully toned O-115 stands alone at the low end of the variety's Condition Census by virtue of its richly deserved Plus and Star designations by NGC. Vivid orange-gold and deep-aqua hues surround a grayish-lavender portrait of Liberty, while the reverse employs a similar toning pattern. Overall, the strike is sharp — but not full — because several right-side obverse stars lack their central details. A few small marks are noted, none of any real import. It is the spectacular color that carries this coin to high grades for eye appeal. It is surely unique in that regard among all of the variety, and likely for the entire series. NGC ID# 24FU, PCGS# 39826 Base PCGS# 6156

## 1832 Half Dollar, Beautiful MS64+

Small Letters, O-103

- 3121** 1832 Small Letters, O-103, R.1, MS64+ PCGS Gold Shield. CAC. A triangular die defect on Liberty's left ribbon end and recutting on the upright of the 5 in 50 identify the O-103 die variety. Silver-gray and lavender shades blend with speckled accents of steel-blue and olive-green over this marvelously high-end near-Gem half dollar. The obverse is slightly deeper in tone, but both sides are equally lustrous and well-preserved. NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160

## 1834 Half Dollar, MS65+

O-104, Large Date, Small Letters

Finest-Known Example of the Variety

- 3122** 1834 Large Date, Small Letters, O-104, R.2, MS65+ PCGS Gold Shield. Five die marriages make up the Large Date, Small Letters Guide Book variety. Overton-104 is a rare die marriage in high grade, with only a handful of pieces known in MS64 and MS65. The Stephen Herrman Census lists two MS65s tied for finest. This Plus-graded piece surpasses them as the finest-known O-104 half dollar. Struck from an early die state, this piece is sharp throughout save for a few border stars and on the left edge of the shield. Vibrant cartwheel luster illuminates well-preserved surfaces, and lovely peach-gold, lilac, sea-green, and olive-gray toning covers each side. A loupe reveals no bothersome abrasions. Population (Large Date, Small Letters): 18 in 65 (4 in 65+), 2 finer (1/19). NGC ID# 24FY, PCGS# 39908 Base PCGS# 6165

## REEDED EDGE HALF DOLLARS

1836 GR-1 Half Dollar, AU58  
Reeded Edge, 1,200 Pieces Struck

**3123** 1836 Reeded Edge, GR-1, R.2, AU58 PCGS. Light golden toning appears mainly around the peripheries, with an area of deeper color at the lower reverse. The interior portions of this key-date Reeded Edge half dollar are largely brilliant and partially lustrous. Well-struck with faint hairlines and trivial high-point friction. Population: 30 in 58, 31 finer (2/19). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

1836 Reeded Edge Half Dollar, GR-1, MS63  
Rare This Well-Preserved

**3124** 1836 Reeded Edge, GR-1, R.2, MS63 NGC. The reeded edge collar was introduced on the half dollar denomination in 1836 to take advantage of the new steam powered technology. Only 1,200 Capped Bust, Reeded Edge half dollars were struck that year, all from the same pair of dies. The 1836 is always in demand because of its low mintage and its status as a first-year type coin. The issue is scarce in all Mint State grades, and rare in MS63 or finer.

This is an attractive Select representative with well-detailed design elements that show just a touch of the usual softness on the eagle's left (facing) claw. From a later state of the dies, a die crack is visible from the edge near the second S in STATES into the field, and a few small die lumps are clustered around the E. The lightly marked surfaces are blanketed in vivid shades of golden-brown and lavender-gray toning, with satiny mint luster underneath. Census: 5 in 63, 6 finer (1/19). NGC ID# 2U28, PCGS# 531046 Base PCGS# 6175

## SEATED HALF DOLLAR

1868-S Seated Half, MS65  
WB-101, High Date Variety

**3125** 1868-S WB-101, Die Pair 8, R.3, MS65 PCGS. CAC. There are no "common" Uncirculated S-Mint half dollars from the 1860s, only those that are slightly less-scarce than others. The 1868-S falls into the challenging category, and it is rare in Gem or finer grades. Perhaps because of its generous mintage (over 1.1 million pieces struck), the 1868-S is consistently underrated in high grades.

This Gem is in the earliest die state seen for the variety. No clash marks or die cracks are present, and faint recutting is visible on the bases of the 18 in the date. A die line in the upper feathers of the eagle's left (facing) wing, date placement, and mintmark orientation confirm the attribution. The surfaces beam silver cartwheel luster beneath dappled powder-gray and lilac toning. The strike is sharp through the centers with only minor weakness on some of the stars. The frosty surfaces show a few light abrasions but no distracting marks, and their natural appeal earns the sole CAC endorsement for the MS65 level. Population: 2 in 65, 2 finer. CAC: 1 in 65, 0 finer (2/19). PCGS# 572184 Base PCGS# 6324

## PROOF SEATED HALF DOLLARS

1859 Half Dollar, PR65 Cameo  
Rarely Offered in This Grade

**3126** 1859 PR65 Cameo PCGS Gold Shield. A rare Gem Cameo example of the proof 1859 half dollar. PCGS lists only one Deep Cameo example — a PR65 coin. This Cameo displays a full strike and modest field-device contrast, with a light golden hue across the mirrored fields. A few faint hairlines are visible with a loupe, determining the grade. Population: 2 in 65 (1 in 65+) Cameo, 3 finer; 1 in 65 Deep Cameo, 0 finer (1/19). NGC ID# 27TJ, PCGS# 86413

## 1870 Half Dollar, PR67

Ex: Kaufman, John Story Jenks  
Tied for Finest Known

**3127** 1870 PR67 NGC. CAC. Ex: Phillip Kaufman Collection. This pristine Superb Gem proof is bathed in aquamarine and rose-gold patina. The strike is bold save for minor blending on Liberty's chest and the eagle's left (facing) ankle. This half dollar appeared in a 1992 Superior auction as part of a group of consecutive original proof sets (dated 1865 through 1890) "purchased at the Mint at the time of issue and only reappearing again in 1991 . . . Our consignor has asked to sell these singly rather than in sets." However, in its 1999 Sotheby's appearance, the lot description stated it came from the John Story Jenks collection. Jenks (1839-1923) was among the most prominent numismatists at the turn of the last century, and unlike most collectors of his day, always pursued the highest obtainable quality. In 2013, Kevin Flynn wrote a biography of Jenks and concluded that "John Story Jenks is the greatest American coin collector." Henry Chapman's 1921 auction of the Jenks collection included a lengthy run of original proof sets. At the time of its 1992 auction appearance, the present proof 1870 half dollar was the single finest certified. Only two other NGC coins equal the grade of this spectacular coin, and PCGS has only certified two at the MS67 level (2/19). This is the only CAC-endorsed PR67.

Ex: John Story Jenks Collection (H. Chapman, 12/1921), lot 6316, part of an original nongold proof set; Orlando Sale (Superior, 8/1992), lot 356; John and Rebecca Moores Collection (Sotheby's, 11/1999), lot 34; Phil Kaufman Collection (Heritage, 5/2003), lot 6784; Eugene H. Gardner Collection (Heritage, 6/2014), lot 30538, where it sold for \$21,150. NGC ID# 27U5, PCGS# 6428

## 1885 Half Dollar, PR67+ Cameo

Outstanding Overall Quality

**3128** 1885 PR67+ Cameo NGC. Eye appeal and technical quality are virtually unimprovable — a serious consideration for those building specialized sets of Seated Liberty coinage. Rose-toned centers progress to rings of violet, blue, gold, and magenta around the borders. The devices display a thick layer of frost that contrasts against the watery, unmarked fields. The 1885 is a low total-mintage issue with just 5,200 circulation strikes and 930 proofs. Census: 9 in 67 Cameo (1 in 67+, 1 in 67★, 1 in 67+★), 2 finer (2/19). NGC ID# 27UL, PCGS# 86446

## BARBER HALF DOLLARS

1893-S Half Dollar, Strong MS64  
Nine Finer Coins at PCGS

**3129** 1893-S MS64 PCGS Gold Shield. The obverse of this Choice Mint State Barber half dollar has intermingled sea-green, gold, and iridescent toning, scintillating underlying mint, luster and bold design motifs. The sharply defined reverse is nearly brilliant with frosty luster and peripheral gold toning. Population: 20 in 64 (2 in 64+), 9 finer (2/19). NGC ID# 24LM, PCGS# 6467

1905 Barber Half Dollar, MS66  
Seldom Available This Fine

**3130** 1905 MS66 PCGS. Frosty silver luster radiates boldly from both sides of this sharply struck and attractive Premium Gem 1905 half. Rare found finer, the coin displays traces of golden toning around the margins. Nearly full details on the central elements adds to the visual and technical merit of the piece. The 1905 is a low-mintage issue in the series (fifth-lowest, to be exact) — an often undervalued Philadelphia date among Barber halves. Population: 9 in 66 (2 in 66+), 4 finer (2/19). NGC ID# 28PX, PCGS# 6501

## WALKING LIBERTY HALF DOLLARS

1916-S Half Dollar, Frosty MS65  
First S-Mint Representative

- 3131 1916-S MS65 PCGS.** The inaugural-date status of the 1916-S combined with its small mintage of 508,000 coins (fourth-lowest total in the series) explain its perennial popularity. Each side is typically frosty, though the level of preservation is anything but usual. This strongly defined Gem is conditionally scarce, and finer representatives are rare. Bright with translucent lilac-gray accents. PCGS reports only 14 finer submissions (2/19). NGC ID# 24PN, PCGS# 6568

1917-S Half Dollar, MS64  
Obverse Mintmark, Strong Detail

- 3132 1917-S Obverse Mintmark MS64 NGC.** A lovely example of what is normally a challenging issue to locate in high grades. The entirety of the obverse is blanketed in a veil of gold patina with glints of blue and magenta at the lower border. The reverse remains almost fully brilliant, save for a similar blush of yellow-gold along the left margin. The rims are broad and the central devices display strong detail. There are 32 higher-graded submissions at NGC (2/19). NGC ID# 26G7, PCGS# 6572

1917-S Obverse Half Dollar, MS64  
Scarce Early Issue

- 3133 1917-S Obverse Mintmark MS64 PCGS. CAC.** Only 952,000 pieces were struck of the Obverse variant of the 1917-S half. It has proved to be a conditional rarity with only a few dozen Gem or finer examples known. This is one of the finer near-Gem coins obtainable. The reverse is faintly tinged with golden toning and more obvious orange-to-rose hues are present on the obverse. The mint luster is soft and swirling, and a streak of reddish-brown toning descends from the center of the M in AMERICA into the eagle's wing. PCGS has graded 48 numerically finer examples (2/19). NGC ID# 26G7, PCGS# 6572

1917-S Half Dollar, MS65  
Reverse Mintmark, Rare Any Finer

- 3134 1917-S Reverse Mintmark MS65 PCGS.** A pleasing Gem Mint State example, this second-year Walking Liberty half dollar has frosty silver luster with splashes of deep, iridescent toning on the obverse. The reverse is almost entirely brilliant and untoned, save for a speckling of similar iridescence along the margins. Strike sharpness is good for the issue, which Bowers notes "varies from quite good to miserable." The central strike on this example shows brief detail at the branch hand thumb and fingers, although details are not quite complete on the eagle's trailing leg feathers.

The 1917-S is about equally scarce with the reverse mintmark as it is with an obverse mintmark in Gem or finer grades. Either way, high-grade pieces are of the greatest interest to Walking Liberty specialists. Gems are always in strong demand, and finer examples are rare. Population: 53 in 65 (2 in 65+), 12 finer (2/19). NGC ID# 24PU, PCGS# 6573

**1919-D Walker Half Dollar, MS63+  
Radiant Satin Mint Luster**

**3135 1919-D MS63+ PCGS Gold Shield.** This Denver issue serves as a standout condition rarity. Among certified coins, the average grade awarded by the leading services falls between VF35 and XF40. All Mint State coins are challenging, in part because the 1919-D was not especially well-produced. This example has impressively radiant satin mint luster over lightly toned surfaces, which show deeper color on the reverse. Central design definition is lacking, as is so often the case on the 1919-D. Grazes and bagmarks are surprisingly scant. NGC ID# 24PZ, PCGS# 6578

**1927-S Walking Liberty Half, MS65  
None Finer at NGC**

**3136 1927-S MS65 NGC.** On close inspection, slight separation can be detected between Liberty's thumb and index finger, and some detail is present on Liberty's head and the eagle's leg. This amount of detail is rare on the 1927-S, one of the most poorly struck issues of the series. The unmarked surfaces display vibrant satiny mint luster and outstanding eye appeal. NGC has not graded an example in higher numeric grade (2/19). NGC ID# 24RA, PCGS# 6587

**1928-S Walking Liberty Half, MS65  
Remarkably Strong Strike for the Issue**

**3137 1928-S MS65 PCGS.** The 1928-S is both an absolute rarity with only 1.9 million pieces struck as well as a strike rarity. This unquestioned Gem shows most of the definition on the skirt lines of Liberty and good detail on the eagle's feathers. The mint luster is bright and frosted with just a hint of pale golden patina present. Population: 66 in 65 (3 in 65+), 8 finer (2/19). NGC ID# 24RB, PCGS# 6588

**1933-S Half Dollar, Fully Struck MS66**

**3138 1933-S MS66 PCGS, CAC.** Dabs of gold toning appear over the upper obverse of this frosty S-mint half dollar, while the reverse exhibits complete brilliance. The strike is crisp with a fully outlined and rounded thumb in the center of the obverse. PCGS has only certified 16 finer examples of this important issue (2/19). NGC ID# 24RE, PCGS# 6591

**1938-D Half Dollar, MS67  
None Numerically Finer, Low Mintage**

**3139 1938-D MS67 PCGS.** The 1938-D was saved by the roll because of its low mintage (491,600 coins). Examples are popular across all grades and remain collectible through MS66. Superb Gems are much more difficult to locate. This satiny D-mint Walker is entirely brilliant. The fields are impressively preserved, and just a hint of softness occurs over the branch hand. Population: 51 in 67 (4 in 67+), 0 finer (2/19). NGC ID# 24RV, PCGS# 6605

**1947 Half Dollar, MS67+  
Top-of-the-Line Registry Coin**

**3140 1947 MS67+ PCGS Gold Shield.** An available date and a cap on the Walking Liberty half dollar series, the 1947 is conditionally scarce in Superb Gem condition and rare with the Plus designation as seen here. No finer examples are known (1/19). This issue is popular among type collectors, and in this condition it is an essential Registry Set candidate. This satiny piece is unabraded and well-struck. Pastel iridescence tints the left-hand portion of the obverse, leaving the remainder of each side olive-gold. Eye appeal is pleasing. Population: 88 in 67 (10 in 67+), 0 finer (1/19). NGC ID# 24SM, PCGS# 6630

## PROOF WALKING LIBERTY HALF DOLLAR

1938 Half Dollar, PR68★  
Cameo-Contrasted Obverse

- 3141** 1938 PR68★ NGC. This Star-designated Superb Gem is among the finest-certified proof 1938 Walking Liberty half dollars. NGC reports four Cameo examples of this issue, the finest of which grade only PR66. This piece has appreciable cameo contrast on the obverse, but the reverse less so. The coin is brilliant and fully struck. Eye appeal is spectacular. Census: 55 in 68 (8 in 68★), 0 finer (1/19). NGC ID# 27V6, PCGS# 6638

## PROOF FRANKLIN HALF DOLLAR

1951 Half Dollar, Brilliant PR68  
Among the Finest Pieces at PCGS

- 3142** 1951 PR68 PCGS. CAC. PCGS has certified just six proof 1951 Franklin half dollars at the PR68 level, all non-Cameos. This piece is CAC endorsed, making it one of the finest-known 1951 proofs and an important Registry candidate. The strike is full throughout, and satiny devices complement modestly reflective fields. The coin is entirely brilliant and virtually flawless. Population: 6 in 68, 0 finer. CAC: 8 in 68, 0 finer (1/19). NGC ID# 27VB, PCGS# 6692

## EARLY DOLLARS

1795 Silver Plug Flowing Hair Dollar  
Three Leaves, B-7, BB-18, Fine Details

- 3143** 1795 Flowing Hair, Three Leaves, Silver Plug, B-7, BB-18, R.3 — Cleaned — PCGS Genuine Gold Shield. Fine Details. Bowers Die State I. Clear evidence of a Mint-inserted silver plug is visible on both the obverse and reverse of this smoothly worn Flowing Hair dollar. Struck from the B-7, BB-18 dies, the fields and devices are somewhat bright from an old cleaning, with traces of silver-gray toning at the obverse borders and throughout the reverse elements. A small rim bump is noted below star 1. Interestingly, a few faint adjustment marks are seen at the lower-left reverse margin (best visible with a loupe) — silver plug dollars seldom required additional adjustment by the Mint. This is a pleasing example despite the light cleaning and minor marks.

1795 Draped Bust Dollar, XF40  
Off-Center Portrait, B-14, BB-51  
Sharp and Lightly Toned

- 3144** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF40 PCGS. Bowers Die State "II." Light die clashing is visible on both sides. The new Draped Bust design was initially struck with the portrait too far left, with Liberty's highest curl directly under the B of LIBERTY. This is a lightly toned, golden-gray example with a sharp strike and slate-blue toning at the rims. Liberty retains sharp hair definition and the eagle's breast feathers show partial details. A small planchet flaw near the first S of STATES is the sole mint-made anomaly. There are no adjustment marks on either side. Housed in a previous generation green label holder. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1795 Draped Bust Dollar, Choice XF  
Off-Center Portrait, B-14, BB-51

**3145** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2, XF45 PCGS. Bowers Die State I. The first use of the Draped Bust portrait was initially placed too far left of center. Only after a healthy number of pieces were struck was the placement changed on a new die (BB-52). This Choice XF BB-51 representative shows steel and gunmetal-gray tones. A bit of rub occurs over the centers, but the left-hand stars, for example, are razor-sharp. Adjustment marks appear throughout the reverse. NGC ID# 24X2, PCGS# 39996 Base PCGS# 96858

1796 Silver Dollar, XF Details  
Small Date, Large Letters  
B-4, BB-61, Early Die State

**3146** 1796 Small Date, Large Letters, B-4, BB-61, R.3 — Improperly Cleaned — NGC Details. XF. Bowers Die State I. The glossy surfaces exhibit rich blue-green and plum-red patina. Moderate adjustment marks, as coined, cross the portrait, but no post-strike abrasions are readily apparent. A loupe reveals faint scuffs on the field near the profile. The centers are lightly brought up, but wear from circulation is minimal.

1796 B-4, BB-61 Dollar, Choice XF  
Small Date, Large Letters

**3147** 1796 Small Date, Large Letters, B-4, BB-61, R.3, XF45 NGC. Bowers Die State I. An attractive stone-gray and steel-blue representative. No marks are remotely consequential. The eagle's breast and the curls near the ear exhibit wear commensurate with the grade. The BB-61 die pairing is often the target of early type collectors in search of a Small Eagle dollar.  
Ex: Long Beach Signature (Heritage, 6/2011), lot 3827; Anaheim ANA Signature (Heritage, 8/2016), lot 5045, which realized \$7,050. NGC ID# CAUF, PCGS# 40000 Base PCGS# 6860

1796 Small Date, Small Letters Dollar, VF30  
Colorful Album-Toned B-2, BB-63 Variety

**3148** 1796 Small Date, Small Letters, B-2, BB-63, R.4, VF30 NGC. Bowers Die State I. All examples of BB-63 are struck from perfect dies, without die cracks or die clashing. The obverse displays small, evenly spaced numerals — the same obverse that is shared with the ultra-rare Large Letters BB-64 (just two pieces known). BB-63 uses a Small Letters reverse held over from the 1795 Off-Center Bust dollars, and later used on other 1796, 1797, and 1798 varieties. This is a lovely album-toned example, with sea-green and blue shades at the borders framing champagne-gold interiors. A glass reveals scattered small marks and moderate wear, but no overt problems, and the coin is free of adjustment marks. PCGS# 39998 Base PCGS# 6859

1797 10x6 Stars Dollar, VF30  
B-3, BB-71 Type Coin

**3149** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF30 ANACS. Bowers Die State III, both dies lapped, as usual. This is an important 10x6 Stars variety, sought-after by Guide Book variety collectors. A scarce earlier die state is known without lapsing on the reverse. This VF30 coin is well-detailed and displays uniform olive-gray patina. No adjustment marks are present and the stars are sharp. Complete border dentils surround each side. A smooth, problem-free 10x6 Stars type coin. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1797 Dollar, B-3, BB-71, XF40  
10x6 Stars Guide Book Variety

- 3150** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF40 PCGS. Bowers Die State III, both dies lapped. BB-71 is one of only three die marriages for the 1797 silver dollar, and it is the only one with the 10x6 obverse star formation. Only 7,776 dollars were struck during the 1797 calendar year, although 1797-dated dies may have been used into 1798 production. BB-71 corresponds to the 10x6 Stars Guide Book variety, making it an essential acquisition for many collectors of early dollars. This lightly circulated coin displays deep lilac-gray and gold patina. No adjustment marks are visible and detail is sharp. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1798 Large Eagle Dollar, B-6, BB-96, AU50  
Knob 9, Five Vertical Shield Lines, 10 Arrows

- 3151** 1798 Large Eagle, Knob 9, 5 Vertical Lines, 10 Arrows, B-6, BB-96, R.3, AU50 NGC. Bowers Die State II. The upper hair curl is lapped, and a crack is only just beginning to form near star 1. The Knob 9 in the date and five verticals on each shield stripe are diagnostic. This moderately scarce variety is seldom seen at the AU grade level. Limited traces of friction appear on the high points of Liberty's portrait and the eagle, but overall detail is strong. Both sides show pleasing lavender-gray and golden patina that heightens the eye appeal. NGC ID# 24X6, PCGS# 40011 Base PCGS# 40008

1798 Large Eagle, Pointed 9 Dollar, AU50  
B-23, BB-105, Wide Date

- 3152** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3, AU50 PCGS. Bowers Die State II. BB-105 shares its obverse with BB-104 and its reverse with BB-106, which creates a rather befuddling combination of die states. This coin is struck from an early stage of the reverse die, lacking most of the Mint-made die flaws in and around STATES, with only a few flaws between T and E. The obverse die, too, is in an early state — no lapping of Liberty's curls, and no cracks. BB-105 is scarce in About Uncirculated and finer grades. This example displays smooth and attractive medium-gray surfaces with traces of mint luster in the obverse stars and throughout the reverse margins. Grade-consistent high point wear confirms its brief circulation. NGC ID# 24X6, PCGS# 40022 Base PCGS# 40018

1798 Large Eagle Dollar, AU53  
B-25, BB-123, Early Die State

- 3153** 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4, AU53 PCGS. Bowers Die State II without the usually seen obverse die cracks. Attractive, medium silver-gray toning deepens around the borders with traces of golden luster shining through the natural patina. Moderate adjustment marks angle through the date area across the portrait, as produced. The strike varies — sharp in most areas, but weak at the bust point and on the corresponding reverse at OF. B-25 has blundered field stars, where the Line Star Pattern was placed too high and the star tips run into the clouds. NGC ID# 24X6, PCGS# 40040 Base PCGS# 40018

1799 7x6 Stars Dollar, Lustrous AU55  
B-5, BB-157, Exceptional Type Coin

**3154** 1799 7x6 Stars, B-5, BB-157, R.2, AU55 NGC. Bowers Die State III, with extensive reverse die cracks. This Choice AU BB-157 dollar could easily pass for a finer grade on grounds of eye appeal. A brush of high-point wear aside, substantial luster remains in the fields and design recesses, and both sides have a tinge of delicate rose-gold toning. Additional intrusions of blue and lavender grace the reverse peripheries. The coin is sharp and well-centered with no obvious adjustment marks. NGC ID# 24X7, PCGS# 40049 Base PCGS# 6878

1799 B-16, BB-158 Dollar, AU53  
Close 17, Near-Terminal Obverse Cracks

**3155** 1799 7x6 Stars, B-16, BB-158, R.2, AU53 NGC. Bowers Die State IV. This is the Close 17 Obverse variety, in an advanced die state with the obverse die shattered and bulging. Adjustment marks at the mid- to upper-left border cross into the left obverse field. Despite the late die stage, this deeply toned dollar displays solid About Uncirculated definition throughout both sides. Intense grayish-brown shades blanket the obverse and reverse alike, yet non Mint-made marks are minimal and this early dollar is an interesting die state study with its own unique charm. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

## GOBRECHT DOLLARS

1836 Gobrecht Dollar, Toned PR62  
Judd-60 Original  
Die Alignment I, Die State E

**3156** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR62 NGC. Silver. Plain Edge. Die Alignment I (center of Liberty's head is opposite the D in DOLLAR). Die State E. This die state is clearly delineated by the rim nick over the A in STATES, created by Mint personnel who were apparently unfamiliar with the new steam press, causing unintentional rim damage to the dies as they were used and removed and remounted. Each side shows speckled russet-golden toning that turns deep blue around the margins. The fields are bright and moderately reflective, enough so that they enhance and enliven the toning seen over each side. The strike details are strong overall, the only exception being the high points of Liberty's hair curls. NGC ID# BLWV, PCGS# 11225

**1839 Original Gobrecht Dollar, Unc Details  
Judd-104, Die State B**

**3157** 1839 Name Omitted, Judd-104 Original, Pollock-116, R.3 — Altered Surfaces — PCGS Genuine. Unc Details. Silver. Reeded Edge. Die Alignment IV (medal turn, the head of Liberty is opposite the F in OF). Die State B. The die state is just barely attributable with the only readily seen pick-up point being the die line above the T that angles toward the E in UNITED. A die crack from State A can be faintly seen connecting the tops of MER. The surfaces have been enhanced to improve the mirroring in the fields. This enhancement obscures some of the die attributes seen on problem-free examples and it also diminishes contact marks. Most of each side is brilliant with a hazy gray outline of patina surrounding the obverse margin. Sharply struck throughout.

**SEATED DOLLARS**

**1869 Seated Liberty Dollar, MS64  
Underrated Issue in High Grades**

**3158** 1869 MS64 NGC. OC-2, R.2. Osburn-Cushing Die State b/d. Struck from a polished proof obverse die and a circulation strike reverse, this variety is sometimes mistaken for a proof. Doubling on the motto and reverse die cracks help confirm the variety. Pale golden-bronze toning covers both sides of this Choice Uncirculated example, with sharply struck devices and only minor marks visible with a glass. Gunmetal-blue accents ring the borders at the rim. The large mintage of 423,700 pieces makes the 1869 issue readily available in lesser grades, yet it is conditionally scarce in near-Gem and rare any finer. Census: 10 in 64, 3 finer (2/19). NGC ID# 24ZC, PCGS# 6962

**1870-CC Seated Dollar, AU53  
Ex: Reiver, First Carson City Issue**

**3159** 1870-CC AU53 NGC. OC-6, High R.5. Ex: Jules Reiver Collection. The 7 is centered between two dentils, and the CC mintmark is closely spaced. Attractive golden-brown and slate-gray toning graces the lightly marked and minimally worn surfaces. The fields have a few wispy hairlines, and an area of mint-made roughness is noted left of the pole beneath the shoulder. The 1870-CC is the most available of the four CC-mint issues of the Seated type, but it is nonetheless of considerably greater rarity than any CC-mint Morgan dollar, especially in Mint State. The 1870-CC is also famous as the first issue struck by the Carson City Mint.  
Ex: Jules Reiver Collection, Part II (Heritage, 1/2006), lot 21563, where it brought \$4,600. NGC ID# 24ZE, PCGS# 6964

**3160** No Lot.

## PROOF SEATED DOLLAR

1872 Seated Liberty Dollar, PR64  
Reflective, Lightly Toned Fields

- 3161** 1872 PR64 PCGS. OC-P1, R.2. Osburn-Cushing Die State a/a. A Top 30 Variety. This is a sharply struck proof, one of 950 pieces produced by the Philadelphia Mint in addition to more than 1.1 million 1872 circulation strikes. The entire proof mintage was struck from a single die pair, which features doubling of the motto at IN GOD WE and some diagnostic die lines beneath the junction of the branch stem and arrow fletchings. A faint haze of golden-gray toning reveals deeply mirrored fields when the coin is viewed at an angle. This is a sharp near-Gem proof, lightly toned with only a few wispy hairlines and nice eye appeal. Housed in an old green label holder. Population: 50 in 64 (1 in 64+), 25 finer (1/19). NGC ID# 252U, PCGS# 7020

## TRADE DOLLARS

1874-CC Trade Dollar, MS63  
Heavily Exported Issue

- 3162** 1874-CC MS63 PCGS. Tall CC, period after FINE. The 1874-CC Trade dollar was heavily exported to the Orient for trade. Many surviving examples are chopmarked, including some coins in MS63 and MS64. This Select example has no chopmarks. It is fully struck, untoned, and frosted with a vibrant cartwheel effect. No significant abrasions are seen. Population: 47 in 63 (3 in 63+), 24 finer (2/19). NGC ID# 2532, PCGS# 7035

1878-S Trade Dollar, MS65  
Dappled Olive-Gold Toning

- 3163** 1878-S MS65 PCGS. This mass-produced San Francisco issue is one of the more collectible Trade dollars in high grades, perfect for type representation. Dappled olive-gold patina adorns dusky silver surfaces that glisten with frost mint luster. Both sides are as strongly detailed as one could hope to find, including the olive leaves, Liberty's head, and the eagle's feathers and talons. Population: 25 in 65 (3 in 65+), 23 finer (2/19). NGC ID# 253G, PCGS# 7048

## PROOF TRADE DOLLARS

1873 Trade Dollar, PR64 Cameo  
Scarce First-Year Issue

- 3164** 1873 PR64 Cameo PCGS. The 1873 is a surprisingly scarce proof. Usually first-year issues are set aside in larger numbers than successive years, but for some reason that was not the case with the Trade dollar. This is a brightly reflective proof that also displays frost over the devices that gives the coin its cameo appearance. The center of the obverse is almost brilliant with light golden around the margin, the reverse is lightly and evenly toned. Population: 16 in 64 (2 in 64+) Cameo, 2 finer (2/19). NGC ID# 27YJ, PCGS# 87053

1879 Trade Dollar, PR65 Cameo  
Vivid Multicolor Toning

- 3165** 1879 PR65 Cameo NGC. 1879 was year one of a short-lived Trade dollar boom. Relegated to proof-only status (since there was no demand for circulation strikes), the series was a lame duck — its days numbered — although speculators and collectors were quick to capitalize on the small proof mintage of 1,541 pieces. Many of those coins still exist today, but few are as attractive as this richly toned Gem Cameo. A sharp strike resides beneath shades of azure-blue, violet, and sunset-gold. Frosted devices sit on vibrant, glassy-mirrored fields that show a few delicate lines but no marks or distractions. The eye appeal is exceptional. Census: 23 in 65 Cameo (1 in 65+), 48 finer (1/19). NGC ID# 27YR, PCGS# 87059

## MORGAN DOLLARS

1878 7TF Morgan, Toned MS66  
Reverse of 1879

- 3166** 1878 7TF Reverse of 1879 MS66 PCGS Gold Shield. The Reverse of 1879 hub shows the top fletching slanted, rather than parallel to the others, and the eagle's breast is more convex. This Premium Gem example displays warm peach-gold toning across the central obverse with sea-green and blue border hues. The reverse is near-brilliant. Well-struck design elements and frosty luster add to the eye appeal, and there are no bothersome abrasions. Population: 35 in 66 (1 in 66+), 1 finer; 1 in 66 Prooflike, 0 finer (1/19). NGC ID# 253L, PCGS# 7076

1879-CC Silver Dollar, MS62  
Semireflective Fields

- 3167** 1879-CC MS62 PCGS. A dazzling cartwheel effect and original surfaces give this Mint State 1879-CC dollar excellent visual appeal despite scattered abrasions that limit the grade. The devices are frosty, creating modest cameo contrast with the semiprooflike fields. Neither side exhibits mentionable toning. The 1879-CC is a semikey date in the Carson City short set. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, Frosty MS63  
Blazing Mint Luster

- 3168** 1879-CC MS63 NGC. A Normal Mintmark example of this challenging Carson City issue, showing radiant, frosty mint luster with no toning. Central sharpness is outstanding. Scattered abrasions on the obverse, mainly on the cheek, limit the grade. The reverse is essentially pristine aside from a couple of contact marks on the eagle's elevated breast. A spectacular coin with tremendous eye appeal. NGC ID# 253U, PCGS# 7086

1879-CC Morgan Dollar, MS64+  
Normal Mintmark, High-End Surfaces With CAC

- 3169** 1879-CC MS64+ PCGS. CAC. Normal mintmark. Although located near plentiful sources of gold and silver, the Carson City Mint struggled to attract gold and silver deposits for its coinage operations. Demands for silver under terms of the Bland-Allison Act only made things worse. After striking more than 2.2 million Morgan dollars in 1878, the Nevada Mint could manage just 756,000 silver dollars in 1879 before its silver bullion was gone.

This is a high-end, frosted near-Gem example of that mintage. It carries both the PCGS Plus designation and CAC endorsement — factors that recognize the absence of any serious marks and the high eye appeal of the Choice, lustrous surfaces. A faint crescent of gold toning along the left obverse margin fades into the brilliant-silver portrait. The devices are sharply defined despite some blended hair strands over the ear. Less than 7% of the PCGS-certified 1879-CC dollars at the MS64 level have received the Plus designation (1/19). NGC ID# 253U, PCGS# 7086

1879-CC VAM-3 Dollar, MS62  
Capped Die, A Guide Book Variety

**3170** 1879-CC Capped Die, VAM-3, MS62 PCGS. A Top 100 Variety. Popularly collected alongside other *Guide Book* varieties, the 1879-CC Capped Die Morgan dollar features evidence of a Large CC over Small CC mintmark. Each side is brilliant and frosty with trivial incompleteness at the centers. Scattered grazes explain the grade. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-CC VAM-3 Dollar, MS62  
Capped Die, Top 100 Variety

**3171** 1879-CC Capped Die, VAM-3, MS62 PCGS. A Top 100 Variety. The 1879-CC is the secondmost challenging Carson City Morgan dollar after the 1889-CC. Mint State examples are highly sought after but not even remotely as available as their later counterparts from the early to mid-1880s. This Capped Die representative enjoys shimmering mint frost and complete brilliance. Well-struck with relatively clean fields for the grade. NGC ID# 253U, PCGS# 133869 Base PCGS# 7088

1879-O Dollar, MS64 Deep Mirror Prooflike  
Rare O-Mint Issue With Such Reflectivity

**3172** 1879-O MS64 Deep Mirror Prooflike PCGS. Ex: Naples II. The 1879-O is an issue we have long respected. It is difficult to locate in high grades and with a strong strike, and it is almost never seen with deeply mirrored fields. A coin as unusual and rare as this one would be expected to have come from such a distinguished collection as Naples II. The fields are deeply mirrored and the devices show snowy contrast. The striking details are well-defined on each side. Brilliant throughout. Population: 31 in 64 (4 in 64+) Deep Mirror Prooflike, 3 finer (2/19).  
Ex: FUN Signature (Heritage, 1/2007), lot 6889, where it brought \$4,025. NGC ID# 253V, PCGS# 97091

1881-S Morgan Dollar, MS68  
Flawless Type Coin

**3173** 1881-S MS68 PCGS. CAC. The 1881-S Morgan dollar claims a large mintage of 12.7 million pieces, making it an available issue in most Uncirculated grades. Even MS68 examples can be located with patience, but finer coins are extremely rare. This spectacular MS68 example features razor-sharp design elements and impeccably preserved surfaces, with vibrant mint luster throughout. PCGS has graded two numerically finer examples (1/19). NGC ID# 2549, PCGS# 7130

1882-CC Silver Dollar, MS67  
Registry-Grade Survivor

**3174** 1882-CC MS67 PCGS. The 1882-CC is a plentiful Carson City issue following the release of about 600,000 pieces in the GSA sales of the 1970s, when Treasury vaults were cleared of the last of the stockpile of 19th century silver dollars that were never used in commerce. However, pieces preserved well enough to qualify for an MS67 grade are scarce. This Superb Gem displays frosty, brilliant luster and bold strike. The fields are clean, as is Liberty's cheek. PCGS lists only a single numerically finer example (2/19). NGC ID# 254S, PCGS# 7134

1883-S Morgan Dollar, Sharp MS64+  
Reflective Fields, Strong Mint Luster

**3175** 1883-S MS64+ PCGS Gold Shield. CAC. The fields are semiprooflike and nearly clear of marks, while Liberty's cheek has a few light grazes visible with a lens. A sharp strike provides full definition over the ear, and only the highest curves of the eagle's talons lack full details. This brilliant and attractive 1883-S is high-end for the Choice Uncirculated grade, and trails only two dozen finer coins at PCGS at the top of the population for the issue. CAC endorsement adds to the appeal. Population: 54 in 64+, 24 finer. CAC: 90 in 64, 5 finer (1/19). NGC ID# 254K, PCGS# 7148

## 1883-S Morgan Dollar, MS64+

A Beautiful Blend of Luster and Mirroring  
Lovely Pastel Toning

- 3176 1883-S MS64+ PCGS Gold Shield. CAC.** The 1883-S is a semikey date in Uncirculated grades. For most collectors, it is inaccessible with Prooflike and Deep Mirror Prooflike designations, making high-end lustrous coins the chief pursuit. The 1883-S is seldom seen in MS64 with a Plus designation, and CAC-approved coins are scarce. Finer pieces in Gem condition are rare. This example, although held from an MS65 grade by a couple of faint grazes in the field below the E in E PLURIBUS UNUM, is nonetheless among the finest MS64 coins that we have seen, both technically and visually. Frosty luster on the devices complements subtle reflectivity in the fields. Lovely peach-orange, rose, and lilac hues are cast across each side in pastel shades, and the central sharpness is outstanding. PCGS lists 26 finer pieces, including a couple of numerically finer Prooflike coins (1/19). NGC ID# 254K, PCGS# 7148

## 1884-S Morgan Dollar, MS61

Sharply Detailed, Lustrous Specimen

- 3177 1884-S MS61 NGC.** The 1884-S Morgan dollar claims a mintage of 3.2 million pieces, but the issue was not well-represented in the Treasury releases of the 1960s, making it elusive in Mint State grades today. This attractive MS61 specimen exhibits sharply detailed design elements and lightly toned, lustrous surfaces with only minor signs of contact. NGC ID# 254P, PCGS# 7156

## 1884-S Morgan Dollar, MS63

Challenging Issue in High Grade

- 3178 1884-S MS63 NGC.** Morgan dollar production declined at the San Francisco Mint in 1884, to 3.2 million pieces, a fairly modest mintage in the context of the series. Some of the coins were released into circulation, making the issue easy to locate in circulated grades today. However, most of the coins held in government storage were melted under the provisions of the Pittman Act in 1918. The 1884-S was not well-represented in the Treasury releases of the 1960s and the issue is elusive in all Mint State grades.

The present coin is an attractive Select specimen with sharply detailed design elements and lightly marked surfaces. Pleasing shades of lavender-gray toning blanket both sides, with a few highlights of pale gold. Vibrant mint luster shines through the patina. Census: 46 in 63, 15 finer (2/19). NGC ID# 254P, PCGS# 7156

## 1885-CC Silver Dollar, MS66

CAC-Approved Deep Mirror Prooflike Coin

- 3179** 1885-CC MS66 Deep Mirror Prooflike PCGS Gold Shield. CAC. A scarce, high-end Deep Mirror Prooflike example of this popular Carson City issue, showing frost-white devices and liquidlike fields. Neither side exhibits toning, and a dramatic cameo effect is apparent on each side. A few light contact marks prevent Superb Gem classification. Population: 51 in 66 (7 in 66+) Deep Mirror Prooflike, 2 finer. CAC: 17 in 66, 0 finer (1/19). NGC ID# 254S, PCGS# 97161

## 1887/6 VAM-2 Silver Dollar, MS66

Tied for the Finest Certified

- 3180** 1887/6 VAM-2 MS66 PCGS. A Top 100 Variety. Remnants of the bottom curve of a 6 are clearly visible at the bottom of the 7 on this important overdate variety that was discovered in 1971. A faint horizontal die line in front of Liberty's eye confirms the variety. This Premium Gem is tied for the finest that PCGS has certified, while NGC has never certified an example finer than MS65. This piece has brilliant silver luster and tinges of peripheral gold on the obverse, and is 100% toned in blue, gold, violet, and amber on the reverse. Population: 15 in 66 (1 in 66+), 0 finer (2/19). NGC ID# 2552, PCGS# 133908 Base PCGS# 7174

## 1889 Silver Dollar, MS67

Important Registry Set Contender

- 3181** 1889 MS67 PCGS Gold Shield. Despite the highest mintage of any Morgan dollar except the 1921 Philadelphia issue, the 1889 is a prime condition rarity in Superb Gem condition. More than 21.7 million pieces were struck, often with overused dies. The fortunate high-grade coins that exist come from new dies, and such examples are few and far between. Both type set and series collectors offer stiff competition for the seldom-seen Superb coins when they make a rare auction appearance.

This exemplary MS67 piece is brilliant with lightly frosted, sharply struck motifs set against smooth and reflective fields. As the grade suggests, marks are limited to a few widely scattered, minuscule ticks and barely perceptible grazes. The partially prooflike fields confirm an early strike from fresh dies. PCGS and NGC combined report just one numerically finer example (at PCGS). Population: 6 in 67, 1 finer (1/19). NGC ID# 2558, PCGS# 7188

**1889-CC Silver Dollar, AU50  
Key Carson City Issue**

**1889-CC Morgan Dollar, Unc Details  
Seldom Encountered Branch Mint Key**

**3182** 1889-CC AU50 NGC. A bright, satiny, and untoned About Uncirculated example of the key Carson City Morgan dollar. Scattered light abrasions accompany trivial high-point wear, but the design elements retain strong detail. This is a pleasing example for the grade. For many Morgan dollar collectors, an attractive 1889-CC is one of the most challenging coins to acquire. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar, AU55  
Key Old West Branch Mint Issue**

**3183** 1889-CC AU55 PCGS Gold Shield. Just 350,000 pieces were struck, one of the low-mintage Morgan dollars made even scarcer by collector demand, and a highly sought issue by Carson City specialists. This silver-gray example displays golden-gray accents around the raised elements for strong, natural eye appeal. A few light ticks are seen on Liberty's jawline, but the coin has few abrasions overall and traces of mint luster linger on both sides. Despite brief wear, sharply defined motifs include full hair details above the ear and a boldly struck eagle. NGC ID# 2559, PCGS# 7190

**1889-CC Silver Dollar, AU55  
High-End and Lustrous**

**3184** 1889-CC AU55 NGC. Peripheral die cracks appear on each side of this piece. The satiny surfaces are lustrous in the fields and show light high-point wear on the devices. A good strike prevails. Each side is well-preserved for the grade with light champagne toning. The 1889-CC in this grade is an elusive and popular issue, being the rarest of the Carson City Morgans and one of the most prominent key dates in the entire series from all mints. Most survivors are heavily circulated. NGC ID# 2559, PCGS# 7190

**3185** 1889-CC — Questionable Color — PCGS Genuine. Unc Details. Attractive Mint State 1889-CC Morgan dollars are highly sought-after and scarce. This Details-graded coin is a more affordable option that still offers tremendous visual appeal. No wear is apparent on the design elements, and vibrant luster illuminates the fields. PCGS astutely recognizes the light pastel toning on each side as being of an unnatural origin, although it is mildly attractive and serves to mask a few scattered marks on each side. Faint hairlines are visible on the obverse under close study, hidden beneath the patina. This 1889-CC dollar is well-struck and exhibits no obtrusive abrasions. An outstanding coin that will fit in well with an otherwise problem-free Morgan dollar collection.

1889-CC Dollar, MS63  
Exceptional Quality for the Issue

**3186** 1889-CC MS63 PCGS. VAM-2. High 9 in the date, the lower part of the flag on the 1 is doubled, and the CC mintmark is set slightly to the right. Collectors would expect an 1889-P or 1889-S Morgan dollar to look like this — bright, lustrous, fully struck, unworn — but not an 1889-CC. With only 350,000 pieces manufactured, most of which ended up either in circulation or the melting pot, the issue is a famous condition rarity and a key date in all grades. Abrasions are trivial, and the fields are even cleaner than the grade suggests. A prize for any specialist in the Morgan dollar series. PCGS has graded 34 finer submissions (2/19). NGC ID# 2559, PCGS# 7190

1889-CC Silver Dollar, MS63 Prooflike  
Brilliant With Reflective Fields

**3187** 1889-CC MS63 Prooflike PCGS. 1889-CC remains the most coveted of all CC silver dollars. While prooflike and deep mirror prooflike examples of Carson City's key issue are scarce-to-rare, examples in middle Uncirculated grades are occasionally available for those able to fend off a host of interested bidders. The mintage of just 350,000 pieces is low even by Carson City's standards, because the famed branch mint did not become fully operational until October of 1889 after a three-year halt of coinage operations.

This sharply struck example is untoned and pleasing, with fully reflective fields. The few light abrasions that dot the surfaces are grade-consistent, minimized by bright mint luster and noticeable contrast between the lightly frosted devices and mirrored fields. Few prooflike examples are certified any finer. Population: 35 in 63 (3 in 63+) Prooflike, 9 finer (1/19). NGC ID# 2559, PCGS# 7191

**1892-CC Silver Dollar, MS65**  
Reflective Fields, Brilliant Luster

**3188 1892-CC MS65 PCGS.** This brilliant Gem showcases a blend of cartwheel luster and prooflike reflectivity, although the depth of mirroring falls just shy of earning a Prooflike designation from PCGS. The devices are well-struck, and aside from a few tiny ticks on Liberty's chin, there are no mentionable abrasions. PCGS lists only 39 finer non-Prooflike coins; no Prooflike or Deep Mirror Prooflike coins are listed finer than MS65 at PCGS (1/19). NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS65**  
Scarce Frosted Gem Example

**3189 1892-CC MS65 PCGS. CAC. VAM-8.** The date is set far right, with die chips in the lower portions of 8 and 9 in the date. This impressive Gem 1892-CC dollar shows only faint luster grazes on the obverse and two or three minor abrasions on the reverse. Brilliant and frosted, the motifs are sharply struck and stand out against the smooth, lustrous fields. Sharply struck everywhere except the eagle's talons. PCGS reports 40 numerically finer examples (2/19). NGC ID# 255M, PCGS# 7214

**1893-CC Morgan Dollar, MS63**  
Toned Final-Year Issue From Carson City

**3190 1893-CC MS63 PCGS.** Frosty original luster illuminates lightly abraded surfaces on this Select final-year Carson City Morgan. The surfaces are largely amber-gold in color, although deeper sea-green hues appear around the peripheral relief elements. Slight strike weakness occurs over the central high points, as usual for this issue. NGC ID# 255S, PCGS# 7222

**1893-CC Morgan Dollar, MS63**  
Final Carson City Issue

**3191 1893-CC MS63 PCGS.** In true 1893-CC fashion, a few roller marks over the ear indicate an incomplete strike in that area, and the eagle's lower extremities show a bit of weakness as well. Grade-limiting marks are confined to the reverse, where a group of small marks on the eagle's breast and a scrape on the right (facing) wing are noted. The rest of this brilliant, blaze-white coin is remarkably clear of abrasions and the fields are smoothly reflective to earn the well-deserved Select Uncirculated grade. The eye appeal is exceptional for the grade. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS63**  
Refreshingly Clear Fields

**3192 1893-CC MS63 PCGS. CAC.** The final silver dollars were struck at the Carson City Mint in June 1893, after a six-month production of 677,000 coins. No special care was taken for the issue, where weak strikes and bagmarks are the rule. This Select Uncirculated piece is typically soft on the eagle's breast and at Liberty's ear. Bits of orange toning at the margins accompany remarkably clean fields, which are brilliant and reflective. NGC ID# 255S, PCGS# 7222

**1893-O Dollar, Bright and Lustrous MS62**

**3193 1893-O MS62 PCGS. CAC. Ex: California.** A production of 300,000 coins ranks among the lowest in the series. The issue is also a formidable condition rarity that proves nearly unobtainable just a few points higher than this lustrous, untoned MS62. Strike definition is good for the New Orleans facility. Bagmarks are unsurprisingly prominent, but the visual appeal remains far above average. NGC ID# 255T, PCGS# 7224

**1893-S Morgan Dollar, XF40  
Sought-After Series Key**

**3194** 1893-S XF40 PCGS.

Thanks to the repeal of the Sherman Silver Purchase Act, only a token mintage of 100,000 Morgan dollars was accomplished at the San Francisco Mint in 1893, making the issue the business-strike key to the series. This impressive XF specimen shows some light wear on the well-detailed design elements and the lightly abraded surfaces are toned in delicate shades of lavender and golden-tan. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, XF45  
Sharp and Untoned, Highly Collectible Grade**

**3195** 1893-S XF45 PCGS.

The low mintage of 100,000 pieces either circulated or was unceremoniously melted, creating the rarest Morgan dollar of the series. It is thought that fewer than 12,000 gradable coins remain from the small mintage in all grades combined. This is an untoned, bright-silver example with Choice XF definition. A combination of rub and weak strike above the ear is typical for the grade. Traces of reflectivity remain around the stars and legends, where brief glimpses of mint luster reside. NGC ID# 255U, PCGS# 7226

**1893-S Morgan Dollar, AU53  
Lustrous and Appealing**

**3196** 1893-S AU53 PCGS.

Moderate luster remains in the protected portions of the fields on this About Uncirculated 1893-S dollar, and each side has a cast of light golden toning that corresponds to light wear on the high points of the devices. The surfaces are relatively smooth, and eye appeal is excellent for the grade.

Attractive AU-level 1893-S dollars are in constant demand among collectors, as they represent the highest level of preservation available to most collectors. In Mint State, the 1893-S is rare in the context of the series, and in the finer Mint State levels, examples of this date are trophy coins that headline major auctions. For most collectors, this attractive AU piece will be a highlight of a great collection. NGC ID# 255U, PCGS# 7226

**1894 Morgan Dollar, MS63**  
Low-Mintage Philadelphia Key Issue

- 3197 1894 MS63 PCGS Gold Shield. CAC.** Always in demand because of its low 110,000-piece mintage, this Select Uncirculated 1894 is lustrous and lightly toned, with olive-gold and steel-blue accents. Strong silver luster illuminates frosted, minimally abraded surfaces. A touch of weakness on a few strands over Liberty's ear is a minor exception to the otherwise sharp strike. CAC endorsement confirms the surface quality and high eye appeal. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64**  
Ex: Jack Lee

- 3198 1894 MS64 PCGS.** This is a gorgeous near-Gem with frosty silver luster and exceptional design definition, weak only over Liberty's ear, and there only a touch weak. The reverse details are bold including sharp breast feathers. PCGS has only certified 32 finer pieces (2/19).

Ex: Jack Lee Estate, Inventory / Dallas Signature (Heritage, 10/2008), lot 1426, where it brought \$7,475. NGC ID# 255V, PCGS# 7228

**1894 Morgan Dollar, MS64**  
Low-Mintage Philadelphia Issue

- 3199 1894 MS64 PCGS.** Ex: Bermuda Collection (Mike Casper, via John Love). This issue's low mintage is undoubtedly responsible for much of its charm and attraction to collectors. However, it is also an unquestioned condition rarity, with high grade pieces seldom offered. The luster is frosted and quite simply outstanding, as seen on most high-grade examples of this issue. Strongly struck also, the surfaces are brilliant except for a thin outline of golden patina over the denticles on the obverse. A few shallow luster grazes are all that keep this lovely piece from a full Gem grade. PCGS has graded 32 numerically finer examples (2/19). NGC ID# 255V, PCGS# 7228

**1895-O Morgan, Minimally Marked AU58**

- 3200 1895-O AU58 PCGS.** The 1895-O is thought to be the third-rarest Morgan dollar in Uncirculated grades, and it ranks among the top dozen or so scarcities in near-Mint condition, too. This AU58 1895-O has the eye appeal, luster, and surface quality of a low-to-mid level Mint State coin, but slight rub is visible on the high points of Liberty's cap, hair curls, and eagle's breast. Only a few light bagmarks exist on the lightly toned silver surfaces, with traces of reddish-gold at the rims. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58**  
Low-Mintage New Orleans Issue

- 3201 1895-O AU58 PCGS.** This well-struck, nearly Uncirculated 1895-O dollar retains virtually full luster and a strong cartwheel effect. Hints of light champagne toning on each side accompany a few minor handling marks, although the eye appeal is generous for an AU grade level. The 1895-O is scarce in Mint State, out of reach for many collectors at that level. NGC ID# 255Y, PCGS# 7236

**1895-O Morgan Dollar, AU58**  
Elusive Issue in High Grade

- 3202 1895-O AU58 PCGS. CAC.** From a low mintage of 450,000 pieces, the 1895-O Morgan dollars is one of the most challenging issues of the series in high grade. This attractive near-Mint specimen exhibits just a trace of wear on the well-detailed design elements and the lightly abraded surfaces retain traces of original mint luster, under pleasing shades of lavender-gray toning. NGC ID# 255Y, PCGS# 7236

1895-O Morgan Dollar, MS61  
Low-Mintage Branch-Mint Issue

**3203 1895-O MS61+ NGC.** The 1895-O Morgan dollar claims a low mintage of 450,000 pieces and the issue was not well-produced. Most examples seen are softly struck, with insipid mint luster. In addition, most of the coins were released into circulation and few were saved by contemporary collectors or preserved in government storage. The 1895-O was notably absent from the Treasury releases of the 1960s. As a result, the issue is rarely encountered in high grade today.

The present coin is an attractive MS61 example with well-detailed design elements that show just a trace of blending on the hair strands above Liberty's ear. The satiny surfaces exhibit the minimum number of minor contact marks for the grade and are brilliant throughout. Census: 59 in 61 (2 in 61+), 51 finer (2/19). NGC ID# 255Y, PCGS# 7236

1895-S Morgan Dollar, MS63  
Semiprooflike Fields

**3204 1895-S MS63 PCGS. CAC.** This Select 1895-S displays traditional satin luster and brilliant surfaces. Semiprooflike fields are a hallmark attribute, seldom seen on this better San Francisco issue. Only minimal abrasions are present and the strike is above-average. Although often available through MS63, the 1895-S Morgan dollar is seldom offered with a CAC endorsement in Mint State. NGC ID# 255Z, PCGS# 7238

1896-O Morgan Dollar, MS63  
Seldom Encountered Any Finer

**3205 1896-O MS63 PCGS.** Despite an adequate mintage of 4.9 million pieces, the 1896-O Morgan dollar is somewhat scarce in MS63 condition, and finer coins are rare. This attractive Select specimen exhibits a better-than-average strike for the issue, with just a trace of blending on the hair above the ear. The lustrous, lightly marked surfaces are toned in delicate shades of pale gold and lavender. PCGS has graded 34 numerically finer examples (2/19). NGC ID# 27ZU, PCGS# 7242

1896-O Morgan Dollar, MS63  
Rarely Available Finer

**3206 1896-O MS63 PCGS.** The 1896-O is conditionally elusive in attractive Mint State condition, and only 34 coins are reported finer than the present at PCGS. No Prooflike or Deep Mirror Prooflike pieces are reported at that service finer than MS62 (1/19). This Select example displays brilliant, satiny mint luster and well-struck design elements. A few light scuffs on the obverse prevent a finer designation. NGC ID# 27ZU, PCGS# 7242

**1896-S Morgan Dollar, MS64**  
Challenging Issue in Higher Grades

- 3207 1896-S MS64 PCGS.** The 1896-S Morgan dollar is a challenging issue in the higher ranges of Mint State, as most examples circulated heavily in the late 19th and early 20th centuries. This attractive Choice example displays well-detailed design elements and well-preserved surfaces with vibrant mint luster throughout. Highlights of golden-tan and magenta toning add to the outstanding eye appeal. NGC ID# 2564, PCGS# 7244

**1902-S Morgan, MS66**  
Exquisite Toning, Rare Any Finer

- 3210 1902-S MS66 PCGS.** Virtually unavailable any finer, this Premium Gem 1902-S is attractively toned and sharply struck for the issue, which always has momentary softness at the centers. Iridescent rainbow colors play across both sides, tending toward the rustic end of the spectrum with rose-red, forest-green, cerulean-blue, and amber-gold hues. Essentially mark-free surfaces show a clean cheek and neck on Liberty, and a notable absence of any bagmarks. PCGS and NGC combined have seen just five numerically finer examples. PCGS population: 57 in 66 (8 in 66+), 5 finer (1/19). NGC ID# 256P, PCGS# 7282

**1896-S Morgan Dollar, Elusive MS65**

- 3208 1896-S MS65 PCGS.** The 1896-S Morgan dollar was produced in adequate numbers, but the issue circulated heavily at the time of issue and most of the coins held in government storage were melted under the Pittman Act in 1918. The 1896-S is decidedly scarce at the MS65 grade level, and finer coins are rare. This well-detailed Gem exhibits well-preserved, lustrous surfaces, with delicate highlights of pale gold toning. Population: 79 in 65 (5 in 65+), 5 finer (2/19). NGC ID# 2564, PCGS# 7244

**1904 Dollar, Colorful MS66**  
A Great Registry Offering

**1902-S Morgan, MS66**  
Outstanding Surface Quality

- 3209 1902-S MS66 PCGS.** PCGS lists no Prooflike or Deep Mirror Prooflike examples of the 1902-S dollar above MS65, and non-Prooflike pieces are scarce in this condition. This Premium Gem is brilliant and unabraded with well-struck centers. Appreciable reflectivity is apparent in the fields, although the mirror quality needed for a Prooflike designation is lacking. Population: 56 in 66 (7 in 66+), 5 finer (1/19). NGC ID# 256P, PCGS# 7282

- 3211 1904 MS66 PCGS.** Little attention was paid to the 1904 until recent decades, when its status as a condition rarity became solidified. Most examples are poorly struck with dull surfaces and numerous bagmarks. This Premium Gem dollar is a pleasing exception that features beautiful multicolor patina in shades of sea-green, ice-blue, violet, and gold. Bright mint luster percolates through the toning. The strike is far above-average despite a hint of softness on the breast feathers. This is a great chance for the advanced collector to acquire one of the finest certified examples of this late-date emission. Population: 49 in 66 (4 in 66+), 1 finer (2/19). NGC ID# 256U, PCGS# 7290

**1904-S Dollar, Choice Uncirculated**  
Far Finer Than Usually Seen

- 3212 1904-S MS64 PCGS.** Mint luster throughout this Choice Uncirculated San Francisco dollar is satiny rather than typically frosted. It glistens softly from silver surfaces lightly toned in blushes of golden color around the marginal devices. Central detail is characteristic, while the overall preservation is significantly better than the usually-encountered Choice XF representative. NGC ID# 256W, PCGS# 7294

## PROOF MORGAN DOLLARS

1882 Silver Dollar, Colorful PR66

- 3213** 1882 PR66 PCGS. CAC. This Premium Gem proof 1882 Morgan dollar is a tale of two sides, the obverse showing brilliant sunset-orange patina ringed with pale blue, the reverse smoke-gray with glints of rose around the rims. It is a highly reflective, downright pretty, and well-preserved piece, as the CAC endorsement suggests. Population: 18 in 66, 21 finer. CAC: 2 in 66, 5 finer (1/19). Ex: FUN Signature (Heritage, 1/2014), lot 6024. NGC ID# 27Z6, PCGS# 7317

1891 Dollar, PR66  
Just 650 Proofs Struck

- 3214** 1891 PR66 NGC. The 1891 Morgan dollar has one of the lowest proof mintages in the series. Only 650 pieces were produced. This Premium Gem dollar showcases the full strike expected of a proof and is richly toned in deep shades of violet, gold, and blue patina. The underlying fields maintain a glassy appearance, heightening the appeal. NGC ID# 27ZL, PCGS# 7326

## PEACE DOLLARS

1934-S Peace Dollar, MS64  
Key San Francisco Date

- 3215** 1934-S MS64 PCGS. A dusting of light toning on the obverse of this near-Gem 1934-S Peace dollar leaves the reverse essentially brilliant. Both sides are frosty and radiantly lustrous. A touch of strike softness on the central hair curls and the eagle's wing is not immediately obvious. The 1934-S is a better date, boasting a mintage of barely more than 1 million coins. Pieces grading finer than the present are scarce. NGC ID# 257Z, PCGS# 7377

1934-S Peace Dollar, MS65

Rarely Offered Finer

- 3216** 1934-S MS65 PCGS. Dusky golden-olive and grayish toning covers this Gem 1934-S Peace dollar, complementing well-struck design elements and frosty underlying mint luster. Only a little more than 1 million silver dollars were struck at San Francisco in 1934, and this issue is the scarcest Peace dollar in Mint State overall. Examples in MS65 are occasionally available, but PCGS lists only 33 finer pieces (1/19). NGC ID# 257Z, PCGS# 7377

## GOLD DOLLARS

1849 Gold Dollar, MS65  
Closed Wreath

- 3217** 1849 Closed Wreath MS65 PCGS. The second subtype for this first-year issue shows the wreath ends close to the numeral 1. Closed Wreath 1849 gold dollars are scarcer in high grades than their Open Wreath counterparts, particularly in MS64 and above. Frosty mint luster and a full strike are hallmarks of this smooth Gem. Free of mentionable imperfections. Population: 25 in 65 (2 in 65+), 6 finer (2/19). NGC ID# 25BA, PCGS# 7503

1853-C Gold Dollar, MS62  
Rarely Offered in Mint State

- 3218** 1853-C MS62 PCGS. Variety 1. The 1853-C is a fairly plentiful gold dollar from the Charlotte Mint, despite a small mintage of only 11,515 pieces. Nonetheless, Mint State coins are rare. This example displays a sharp strike and satiny greenish-gold luster. Light handling marks limit the grade but none are individually bothersome. Population: 12 in 62, 6 finer (1/19). NGC ID# 25BV, PCGS# 7522

**1853-O Gold Dollar, MS65**  
Conditionally Rare, Few Known Finer

- 3219** 1853-O MS65 NGC. Variety 1. Bold die lines above IT in UNITED and a high date confirm the attribution. With 290,000 pieces struck, this is the most collectible of the six New Orleans gold dollar issues. It becomes scarce only at the MS64 grade level, while comparable Gems are conditionally rare. Shades of yellow-gold vary from light to dark over well-preserved surfaces. Strike definition is complete, and mint luster is wonderfully vibrant. Census: 10 in 65, 2 finer (2/19). NGC ID# 25BX, PCGS# 7524

**1855-C Type Two Gold Dollar, AU55**  
Deep Reddish-Gold Color

- 3220** 1855-C AU55 NGC. Variety 2. This is the more often seen of two varieties, featuring the date slightly further right. Doug Winter calls the 1855-C the rarest Charlotte gold dollar in high grades after the 1849-C Open Wreath. This orange and reddish-gold Choice About Uncirculated example is characteristically defined and shows heavy clash marks around the portrait. Perhaps 30 or 40 pieces are known across all AU grades, while two to five Mint State coins are believed extant, according to Winter's estimation. NGC ID# 25C5, PCGS# 7533

**1858-S Gold Dollar, MS62**  
Tied for Finest at NGC

- 3221** 1858-S MS62 NGC. An entire collection of S-mint gold dollars needs only seven coins. The San Francisco Mint produced limited quantities of this denomination, almost all prior to the Civil War. In 1858, 10,000 pieces were struck. This MS62 coin is tied with two others as the finest at NGC. That service reports just 101 grading events for this date in all grades combined (2/19). Softly frosted surfaces have deep original orange-gold color and sharply struck design elements. No significant abrasions are seen. NGC ID# 25CK, PCGS# 7550

**1859-C Gold Dollar, MS63**

The Sole Finest at NGC

- 3222** 1859-C MS63 NGC. The 1859-C is the final gold dollar issued at the Charlotte Mint. Production totaled only 5,235 coins, and it is believed that fewer than 250 examples survive in all grades, mostly in XF and lower levels; AU coins are scarce and Uncirculated pieces are major rarities.

More high-grade pieces trade hands now than has been the case in years past, not because more coins have been discovered, but because graders have correctly begun to compensate for the inherently poor strike that always affects this issue. Every known example of the 1859-C gold dollar shows considerable softness on both sides to an extent discernible with the naked eye. As seen on the currently offered example, the border denticles are mushy and the central regions lack sharp definition. Mild planchet irregularity is observed in parts of the reverse field, as made. These attributes define the issue, and are not to be mistaken for coin-specific flaws. This piece is Uncirculated and possesses satiny olive-gold luster. No major abrasions are observed. The specialist will admire this coin for what it is: the sole finest at NGC (2/19).

Ex: Long Beach Signature (Heritage, 6/2015), lot 4177, where it realized \$15,275. NGC ID# 25CM, PCGS# 7552

**1859-D Gold Dollar, AU55  
Collectible Dahlonega Issue**

**3223** 1859-D AU55 PCGS. Variety 11-N. Two die pairs were required to strike just 4,952 pieces of this popular Dahlonega gold dollar, which ranks third in availability among the many scarce D-mint gold dollar issues. Numerous die polish lines appear left of the wreath, while remnants of die clashing remain around the central elements. Attractive rich-gold color flows evenly across surfaces that retain a moderate amount of mint luster. A few light abrasions include a thin, vertical mark outside the curve of Liberty's hair and headdress. Population: 30 in 55, 60 finer (1/19). NGC ID# 25CN, PCGS# 7553

**1860-D Gold Dollar, AU50  
Landmark Issue, Only 1,566 Coins Struck**

**3224** 1860-D AU50 PCGS. Variety 12-P. Bowers has called this a "landmark" issue in the series, and collectors have recognized it as such for more than a century. Augustus Heaton wrote in 1893 that the 1860-D was "exceedingly rare." Only 1,566 pieces were struck. Less than 10% of that figure survives, although the percentage is relatively high because hoarding began in 1861. This lightly circulated yellow-gold example has typically incomplete detail. Dentilation is missing along the left obverse border and the corresponding area on the reverse. Nevertheless, this is a pleasing representative of a difficult issue to locate in any grade. NGC ID# 25CS, PCGS# 7556

**PROOF GOLD DOLLARS**

**1886 Gold Dollar, PR65  
In a Green Label Holder**

**3225** 1886 PR65 PCGS. The large mintage of 1886 proof gold dollars is deceiving, since the number of surviving proofs is surprisingly low for such a large production. A total of 1,016 proofs were struck in addition to 5,000 circulation strikes. This Gem proof is vibrant and colorful, with variegated lilac, rose, and peach-gold toning throughout its mirrored fields. Light frost covers the similarly toned, sharply struck motifs. Housed in a previous generation green label holder. Population: 15 in 65, 9 finer (1/19). NGC ID# 25EW, PCGS# 7636

**1888 Gold Dollar, PR63 Cameo  
Nicely Contrasted and Well-Balanced, CAC**

**3226** 1888 PR63 Cameo PCGS. CAC. This sole CAC-endorsed Select Cameo proof displays glittering medium-gold color and nice contrast between Liberty's portrait and the surrounding mirrored fields. Some light hairlines are noted, but no marks of any size. The reverse is rotated 45° counterclockwise. The strike is sharp overall, especially at the dentils, wreath, and Liberty's hair curls, although ERT is weak within the band below the headdress. The Bowers reference estimates 200 or so true proofs survive from a mintage of 1,079 pieces. Population: 2 in 63 Cameo, 37 finer. CAC: 1 in 63, 20 finer (2/19). NGC ID# 25EY, PCGS# 87638

**EARLY QUARTER EAGLES**

**1807 BD-1 Quarter Eagle, AU Sharpness  
Only 6,812 Pieces Produced**

**3227** 1807 BD-1, R.3 — Cleaned — NGC Details. AU. Bass-Dannreuther Die State a/a, uncracked. In the Capped Bust Right series, the 1807 is the date seen most often and the one usually used in type sets. But the mintage was remarkably low with only 6,812 pieces produced. As with most quarter eagles of this type, there are no adjustment marks (did the Mint employees just not look as closely at quarter eagles?). The surfaces on this piece are noticeably bright from cleaning and reasonably well-defined throughout with no large or singularly detracting abrasions.

1808 BD-1 Quarter Eagle, XF Details  
Singular Capped Bust Left Type Coin

1824/1 Quarter Eagle, BD-1, AU58  
Important Capped Bust Left Type

**3228** 1808 BD-1, R.4 — Damaged, Cleaned — ANACS. XF Details, Net VF20. Bass-Dannreuther Die State b, the early die crack from the back of Liberty's cap through the right-hand stars being visible, but not the later one near the date. There is a prominent depression in the planchet at the IB in PLURIBUS that makes the corresponding portion of the obverse uneven. The right-hand borders are worn to the stars and legend. ANACS also notes an old cleaning, although this 1808 Capped Bust Left quarter eagle has since retoned a pleasing honey-gold hue. Detail is strong on the central devices, although the stars are worn. No adjustment marks are apparent. The 1808 is a one-year type coin, and only one die variety is known. This is easily one of the most sought-after early gold issues. NGC ID# BFVZ, PCGS# 45515 Base PCGS# 7660

**3229** 1824/1 BD-1, R.5, AU58 PCGS. Bass-Dannreuther Die State a/a. Both the obverse and reverse were struck from leftover 1821 dies, with faint remnants of an underdigit 1 beneath the date's primary 4. A reported mintage of just 2,600 pieces was produced from a single pair of dies (BD-1). The Capped Bust Left series is short-but-challenging, regardless of date. The 1824/1 is sole bonafide overdate of the series, although the repunched date 1826/6 was historically considered an 1826/5 overdate for many years.

This near-Mint example is equally at home in an Uncirculated set as well as in a high-grade circulated collection. Orange-gold surfaces display slight reflectivity thanks to the low mintage, and scattered small marks require magnification to be seen. A sharp obverse strike counterbalances minor weakness at the eagle's talons and arrow fletchings. There are no meaningful distractions for the assigned grade. PCGS CoinFacts suggests 40 to 60 pieces are known in all grades combined. Population: 5 in 58, 11 finer (1/19). NGC ID# BFW4, PCGS# 45517 Base PCGS# 7663

**1830 BD-1 Quarter Eagle, AU53**  
Scarce, Heavily Melted Issue

**3230 1830 BD-1, R.4, AU53 PCGS.** Bass-Dannreuther Die State a/a, as always with perfect dies. There is only one die variety of the 1830 quarter eagle, which shows repunching on the I in AMERICA. During this period, United States gold circulated little due to the heavy gold weight of the coins in relation to their face value, being instead hoarded and melted by profiteers. The small mintage of 4,540 pieces produced few survivors. According to John Dannreuther in *Early U.S. Gold Coin Varieties*, only 80 to 100 examples are extant.

This About Uncirculated coin displays sharp definition across most design elements, being a trifle weak only on left edge of the shield. The protected areas of the fields are semiprooflike, complementing pleasant straw-gold patina. However, fine surface chatter is visible in the open areas of the obverse fields when viewed beneath a loupe. Housed in a green label holder.

Ex: FUN Signature (Heritage, 1/2004), lot 7362, which realized \$9,775. NGC ID# BFW8, PCGS# 45524 Base PCGS# 7670

## CLASSIC QUARTER EAGLES

**1836 Script 8 Two and a Half, MS63**  
Head of 1835, Variety 11

**3231 1836 Script 8 MS63 PCGS. Variety 11, R.2.** The lack of a berry on the stem is the key pick-up point for this Script 8 variety, with a die crack extending from the rim through the left-hand points of star 6 to the nearby coronet and beyond. The central hair curls and horizontal shield lines are a bit soft on this Select Uncirculated example, but the coin is otherwise sharp, and the lustrous, partially reflective surfaces show only minor marks. Scarce any finer. Population: 41 in 63 (3 in 63+), 16 finer (2/19). NGC ID# 25FU, PCGS# 7694

**1839-D Classic Two and a Half, AU50**  
Sole D-Mint of This Design Type

**3232 1839-D AU50 NGC. Winter 1-A, Variety 26, R.3.** The 1839-D maintains a high level of popularity with collectors since it is the only D-mint quarter eagle of this design and it is the first year of issue for the denomination from Dahlonega. The majority of survivors (200-250 pieces in all grades) mostly fall within the VF-XF grade range. This AU is definitely above-average. The surfaces are bright yellow-gold with faint traces of luster surrounding the devices. Light, numerous abrasions are scattered across each side. NGC ID# 4UKS, PCGS# 7700

**1839-O Quarter Eagle, AU55**  
First New Orleans Gold Coin

**3233 1839-O AU55 PCGS. Variety 27. High Date, Wide Fraction.** Both dies show evidence of lapping, and minor clash marks are noted inside Liberty's ear. The reverse has a die crack through the olive branch to the I in UNITED, and other minor cracks through the tops of letters in STATES. Neither die was used elsewhere in the series. This Choice AU example has trivial handling marks on its still lustrous yellow-gold surfaces with a minor scraped and strike weakness at the lower reverse. Population: 24 in 55, 60 finer (2/19). NGC ID# 25G7, PCGS# 7701

## LIBERTY QUARTER EAGLES

1843-C Two and a Half, MS61  
Large Date, Plain 4

**3234** 1843-C Large Date, Plain 4, MS61 NGC. Variety 1. The 18 in the date and the mintmark on the reverse are repunched on the Large Date 1843-C quarter eagle variety. The Large Date variety represents most 1843-C coins, but it is nonetheless rare in Mint State. This piece displays satiny straw-gold luster and surprisingly few abrasions for the grade. Moderate strike weakness in the centers is normal for the issue. NGC ID# 7HLG, PCGS# 7728

1844-C Quarter Eagle, AU55  
Scarce-to-Rare Charlotte Gold

**3235** 1844-C AU55 NGC. Variety 1. Scarce in all grades and rare in Mint State, this Choice About Uncirculated 1844-C represents an important opportunity for any branch mint gold specialist. The coin is softly struck on the eagle as always seen, while the obverse seems to grade several points higher than the reverse. Medium greenish-gold surfaces show scattered tiny marks and bits of cloudy orange toning. Census: 25 in 55, 27 finer (1/19). NGC ID# 25GU, PCGS# 7735

1847-C Two and a Half, MS62  
Rare in Uncirculated Grades

**3236** 1847-C MS62 NGC. Variety 1. The 1847-C quarter eagle comes from a mintage of only 23,226 pieces. This issue circulated extensively in the South. The Charlotte Mint accepted significant amounts of local domestic bullion for coinage, and the quarter eagles and half eagles produced with that gold were readily returned to the local economy. Mint State 1847-C quarter eagles are rarely offered. This piece is well-struck for the issue and displays pleasing olive-gold patina with satiny mint luster. No mentionable abrasions are present. Census: 12 in 62, 8 finer (2/19). NGC ID# 25H6, PCGS# 7745

## PROOF LIBERTY QUARTER EAGLES

1889 Two and a Half, PR64 Cameo  
Scarce, Low-Mintage Proof Date

**3237** 1889 PR64 Cameo PCGS. The mintage of 1889 proof quarter eagles dropped by almost half from the previous year, and the number of survivors is line with this decreased production. Only 20 to 25 pieces are believed known today. This is a deeply reflective proof with rim-to-rim mirroring on each side. Slight haziness surrounds the devices, undoubtedly the result of an old cleaning. The less-than-Gem grade, though, is derived from a few tiny contact marks in the left obverse field. Even, light reddish-gold color is seen throughout. Population: 7 in 64 Cameo, 5 finer (2/19). NGC ID# 288C, PCGS# 87915

1903 Two and a Half, PR63+  
Exceptional Quality for the Grade

1903 Quarter Eagle, PR66  
Rare High-End Example

**3238** 1903 PR63+ PCGS. CAC. The 1903 quarter eagle had a mintage of 197 pieces, and the most recent estimate of the number of survivors (done by John Dannreuther) suggests that 80 to 100 pieces may exist of the JD-1 variety, and 40 to 60 examples may survive of the JD-2 variant. This piece was struck from the JD-1, State a dies. The surfaces are bright throughout, the only variation in color being a faint copper stain between stars 2 and 3. Close examination with a loupe shows a few stray hairlines, but these do not appear to have come from an intentional cleaning. As such, this moderately contrasted proof represents excellent value at this grade level. NGC ID# 288T, PCGS# 7929

**3239** 1903 PR66 PCGS. PCGS lists only a single Cameo example of this proof issue (a Gem) and no Deep Cameos, meaning that the best coins typically available to collectors are the high-end non-Cameo pieces. This Premium Gem is just such a coin. There are 12 pieces in this grade at PCGS and just two finer (2/19). These coins survive from a mintage of 197 proof 1903 quarter eagles. Although not overly rare, this issue is significantly scarcer than the certified population figures suggest. PCGS and NGC combined have graded an example on 292 occasions, which exceeds the number of pieces struck by 95 coins. In their gold Encyclopedia, Garrett and Guth estimate that more than 100 pieces survive, but the frequency of auction appearances for the date suggests that the survivorship is probably no greater than about 150 coins.

This piece is fully struck and has deeply mirrored orange-gold fields. Although not a Cameo, subtle contrast is still apparent on each side at certain angles. The coin is beautifully preserved and free of contact marks and hairlines. NGC ID# 288T, PCGS# 7929

1905 Two and a Half, PR66  
Glittering Mirrors, Rare in This Grade

**3240** 1905 PR66 NGC. CAC. Brilliant proofs were in vogue at the Mint in 1905, with few proofs struck with substantial contrast between the fields and devices. There are no Deep Cameo quarter eagle proofs for the date, and in many cases, even the few Cameo examples are borderline qualifiers for that finish.

Mirrorlike radiance gleams from bright, glassy fields of this Premium Gem example, and although some of the central motifs have a moderate helping of mint frost, Liberty's cheek and neck lack any semblance of cameo contrast. Overall, the 1905 date is considered a readily available issue. Often lost in the frequency of high-grade 1905 circulation strikes and lesser-graded proofs is the stark scarcity of Premium Gem and finer proof 1905 quarter eagles. We have offered just one PR66 coin and three PR67 pieces since 1995. Together, NGC and PCGS report a mere eight finer specimens than the present CAC-endorsed PR66 example. Census: 14 in 66 (1 in 66★), 5 finer. CAC: 2 in 66, 4 finer (1/19). NGC ID# 7KG5, PCGS# 7931

## INDIAN QUARTER EAGLES

1911-D Quarter Eagle, AU58  
Strong D, Red-Gold Accents

**3241** 1911-D AU58 PCGS. Strong D. A hint of reddish color complements the olive-gold hue that dominates this borderline-Uncirculated quarter eagle from the lowest mintage in the series (55,680 coins). The diagnostic wire rim is present at the upper-right obverse border. There are minor hairlines on each side, plus a few small abrasions behind the eagle's head elsewhere on the reverse. A wonderful example of this famous 20th century key date. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, AU58  
Strong D, Variegated Color

**3242** 1911-D AU58 PCGS. The 1911-D quarter eagle is a curious issue with a remarkably low mintage for the series, only 55,600 pieces struck when most of the other issues are in the half-million range or just below. This is a piece with an unusual two-toned appearance, with alternating patches of bright yellow-gold and deep, almost brown-gold. The mintmark is strong, as claimed on the insert, but is somewhat difficult to make out because of one of the deeper areas of color. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half Dollar, AU58+  
Clear Mintmark, High-End Quality

**3243** 1911-D AU58+ NGC. CAC. If not for the slightest hint of rub along the headband and eagle's shoulder, this borderline Uncirculated 1911-D would stand the equal of any low-to-mid-grade Mint State example. Attractive orange-gold surfaces show minimal marks and radiate nearly full mint luster. The mintmark is boldly visible. CAC endorsement joins the NGC Plus designation to confirm the quality. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS61  
Strong D, Excellent Eye Appeal

**3244** 1911-D MS61 NGC. Strong D. A sharp wire rim along the right-hand obverse border and a strong, clear mintmark confirm the authenticity of this near-Mint 1911-D quarter eagle. A CAC endorsement accompanies original bronze-gold coloration and smooth fields. Hints of satin luster remain in the recesses. The key Denver issue of the Indian quarter eagle series is seldom found this nice with original, eye-appealing surfaces. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS61  
Attractive Orange-Gold Color

**3245** 1911-D MS61 PCGS. A well-defined mintmark and Mint State surface quality make this 1911-D quarter eagle a great candidate to fill the key slot in a date set. While the strongly orange-gold surfaces show a small number of abrasions, wispy and otherwise, this piece is sure to attract considerable bidder interest.

*Ex: Houston Signature (Heritage, 10/2010), lot 4354; Dallas Signature (Heritage, 3/2013), lot 4161. NGC ID# 7KR7, PCGS# 7943*

1911-D Quarter Eagle, MS61  
Bold Strike and Mintmark

**3246** 1911-D MS61 NGC. The Indian Head quarter eagle series is one of the most-collectible sets in U.S. numismatics, attainable in multiple grade levels with no out-and-out stoppers. The 1911-D in Mint State is the most challenging issue, both by demand and population. This lustrous, medium-gold example displays a strong D mintmark and a good strike. Marks are limited to two or three tiny nicks by the Indian's chin and few scattered, faint abrasions in the high, open fields. NGC ID# 7KR7, PCGS# 7943

1911-D Indian Quarter Eagle, MS61  
Bold Mintmark

**3247** 1911-D MS61 NGC. The 1911-D claims a minuscule mintage of 55,680 pieces, making it the most elusive issue in the Indian quarter eagle series. This attractive Mint State specimen exhibits well-detailed design elements, with a bold D mintmark. The lustrous greenish-gold surfaces show the minimum number of minor contact marks for the grade. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, MS62  
Bold Mintmark, Sharp Strike

**3248** 1911-D MS62 NGC. A diagnostic wire rim exists at the upper-right obverse to confirm all genuine 1911-D quarter eagles — an important pick-up point, especially for pieces with a weak D mintmark. This example is a Strong D coin, with lustrous rich-gold color and only scattered, minor marks. Four short linear abrasions intersect the eagle's neck and opposing wing. The strike is sharp throughout. NGC ID# 7KR7, PCGS# 7943

1914 Two and a Half, MS64+  
Condition Key in Finer Grades

**3249** 1914 MS64+ PCGS. CAC. The Plus designation and CAC endorsement earn this 1914 Indian quarter eagle high marks among series specialists, since in finer condition it is one of the biggest condition keys in the series. The coin is well-struck and displays satiny wheat-gold mint luster. Only a few light grazes in the reverse field behind the eagle prevent full Gem classification. Population: 65 in 64+, 67 finer. CAC: 85 in 64, 9 finer (1/19). NGC ID# 7KRA, PCGS# 7946

## THREE DOLLAR GOLD PIECES

**1857 Three Dollar Gold, MS63**  
Rare Issue in High Grade

- 3250 1857 MS63 PCGS.** The Mint State availability of this issue declines in MS63, and the date is genuinely rare just one point finer. Offered here is a collector-grade Select example with exceptional eye appeal and original orange-gold luster. Scattered light marks account for the grade but none are individually bothersome. The bowknot shows the only noticeable strike weakness. Population: 28 in 63 (4 in 63+), 8 finer (2/19). NGC ID# 7K5G, PCGS# 7976

**1857 Three Dollar Gold, MS63**  
Rare Any Finer

- 3251 1857 MS63 PCGS.** The smallish mintage of 20,891 circulation strikes makes the 1857 a scarce three dollar gold in all grades. Population figures indicate few pieces were saved by collectors, where the estimate of Mint State coins is just 45 to 60 pieces known. This lustrous and frosted yellow-gold example shows parallel die striations typical of an early strike, and die clashing indicates the dies clashed almost immediately. The coin is sharply struck, with few marks and vibrant eye appeal. Population: 28 in 63 (4 in 63+), 8 finer (2/19). NGC ID# 7K5G, PCGS# 7976

**1863 Three Dollar, MS61**  
Popular Low-Mintage Date

- 3252 1863 MS61 PCGS.** Given the hoarding of gold and silver induced by the uncertainties of the Civil War and the stop put on specie payments, it is surprising any three dollar gold pieces were struck at all in 1863. A small number of depositors must have made special requests, or the Mint wanted to maintain a quantity of three dollar gold pieces on hand. Either way, 5,000 circulation strikes were produced. This bright MS61 features crisp detail and heavy clashing in the fields. Predictably abraded, this remains an appealing representative of a notably challenging and always-popular issue. NGC ID# 7K5R, PCGS# 7984

**1865 Three Dollar Gold, MS63**

Just 1,140 Pieces Struck

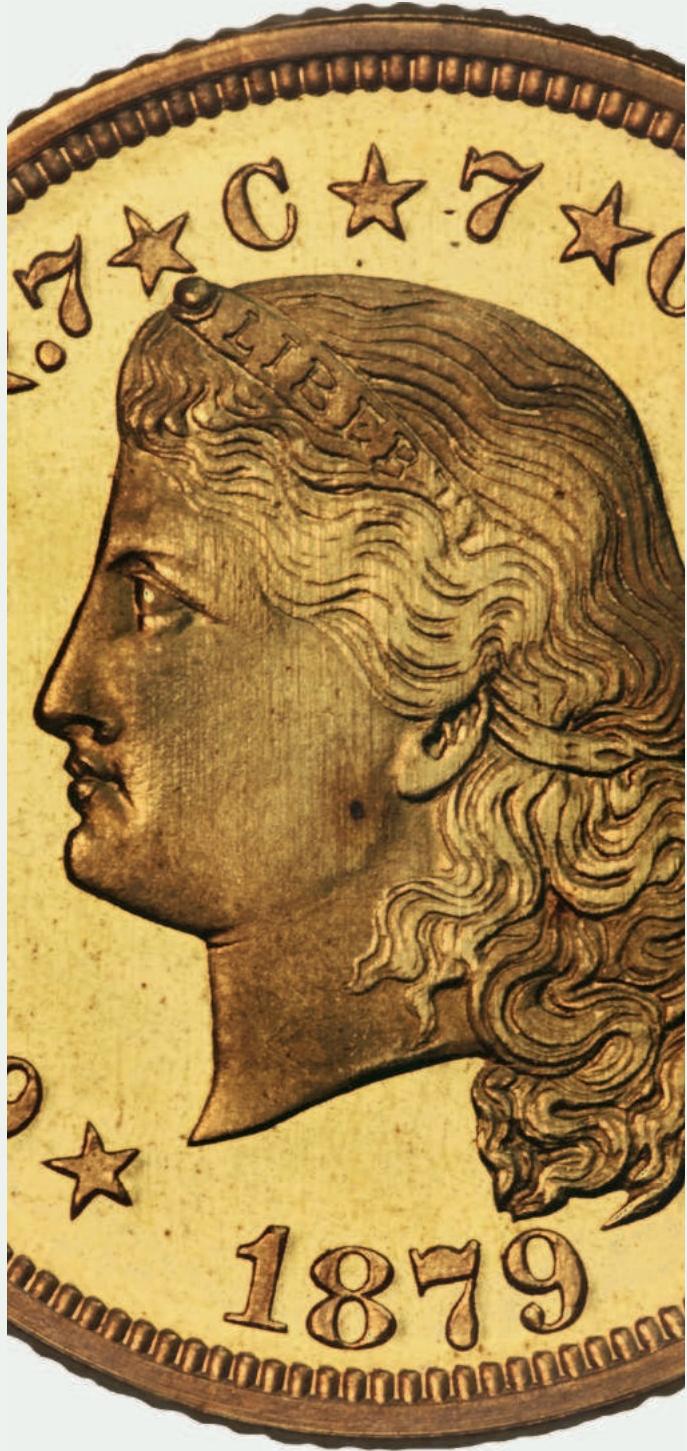

- 3253 1865 MS63 PCGS.** This is a well-struck example with satiny orange-gold luster and faintly striated fields that deliver subtle reflectivity. Light handling marks are all that limit the grade. The 1865 three dollar gold piece boasts a scant mintage of only 1,140 pieces, the lowest in the series prior to 1880, save for the significantly rare 1854-D. We have not previously handled an 1865 three dollar piece in MS63, and we have seen a finer example on only six occasions. Such is the rarity of this Philadelphia issue in high grade, and such is the importance of the current offering. This is an outstanding coin in all respects. Population: 2 in 63, 7 finer (1/19). NGC ID# 7K5S, PCGS# 7986

1887 Three Dollar Gold, MS65  
Seldom Offered This Fine

**3254** 1887 MS65 PCGS. Only 6,000 three dollar gold pieces were struck in 1887, although few coins entered circulation for any length of time. Mint State pieces are plentiful in the lower levels of preservation, and Gems, while conditionally scarce, are yet accessible. In finer grades, the 1887 three dollar piece becomes a great rarity and is out of reach for most collectors. This coin displays satiny mint luster with a hint of field reflectivity. The strike is sharp and both sides are free of significant abrasions. An eye-appealing Gem type coin from late in the series. Population: 28 in 65 (1 in 65+), 10 finer (2/19). NGC ID# 25NA, PCGS# 8009

PROOF FOUR DOLLAR GOLD PIECE

1879 Flowing Hair Stella, PR66 Cameo  
A Fresh-to-Market Example From a New England Estate

**3255** 1879 Flowing Hair, Judd-1635, Pollock-1833, JD-1, R.3, PR66 Cameo PCGS. "Eccentric" is an adjective usually reserved to describe human behavior, but the term seems appropriate for the curious United States pattern that takes the anthropomorphic name, stella. Unique in American numismatics, these four dollar gold pieces were made in limited quantities for just two years. Two types were manufactured for reasons not entirely known (Flowing Hair and Coiled Hair), and much about the conditions of their production remains uncertain. Indeed, for years rumor, legend, and speculation have dominated discourse about this four dollar issue. Simply put, the stella is a numismatic oddity, a relic of the late 19th century with a past shrouded in mystery.

All the more fitting, then, that this particular example derives from an old-time estate, where it sat untouched and undiscovered for decades in an antique safe in a cottage in the Norman Rockwellesque town of Stockbridge, Massachusetts. Like the stella itself, this particular representative, recently graded PR66 Cameo by PCGS, has quite the unorthodox story to tell.

#### Origins of the Denomination

By the mid-1800s, the Industrial Revolution, the development of railways and telegraphs, and increasing trade served to heighten and enhance the complex nature of international exchanges - financial, commercial, and cultural. What we might now refer to as globalization demanded a system of equivalencies between weights, measures, and currencies.

From the 1860s through the 1880s, Americans like Salmon P. Chase, treasury secretary from 1861 to 1864, Samuel B. Ruggles, a delegate to the 1863 International Statistical Congress, George F. Dunning, the superintendent of the New York Assay Office, and Dana Bickford, a manufacturer from Brattleboro, Vermont, believed strongly that the United States ought to develop a new system of coinage to facilitate trade with its European counterparts. Several proposals were made by these men and others, all of which ultimately failed, although their projects did produce a few interesting patterns.

Without question, the most famous of the international coinage proposals is the four dollar gold piece or stella. Serial inventor and flagrant self-promoter Dr. William Wheeler Hubbell of Philadelphia is now credited with the idea for the coin. For a long time the Minister Plenipotentiary to Austria-Hungary, Representative John A. Kasson, was associated with the denomination, having suggested a coin of equal value to the standard gold pieces of the Latin Monetary Union — in other words, a coin worth \$3.88. However, Hubbell distorted Kasson's suggestion and used it as evidence that his plan for a four dollar gold piece would solve the international coinage problem.

No background in mathematics is required to see that Hubbell's plan did not create an equivalency between American and European coinages ( $\$3.88 \neq \$4$ ), but that was beside the point. This was an opportunity for self-advancement, a way to have Congress pass legislation that would authorize a new system of easily convertible "metric" coinage (rounded to the nearest gram or tenth of a gram) struck in Hubbell's patented goloid alloy, composed of gold, silver, and copper in set ratios. The alloy was nothing new, it had existed in similar forms for thousands of years and had previously been rejected by the U.S. government for commercial usage, but Hubbell's persuasive nature convinced Chairman of the Committee on Coinage, Weights, and Measures, Representative Alexander H. Stephens, to recommend test pieces be made.

On October 4, 1879, Mint Director Horatio Chapin Burchard sent a letter to Philadelphia Mint Superintendent A. Loudon Snowden instructing him to have the stellar struck: "Mr. Stephens requests that specimens of coins be prepared in accordance with the provisions of the bills and I am desirous of accommodating the Committee." This letter was the impetus for a small group of 25 Flowing Hair stellas manufactured in December 1879. They were distributed for \$6.10 in three-coin sets in early 1880 along with examples of the Goloid dollar and Metric dollar. An additional 100 sets were requested on March 1, 1880, followed by 300 sets on May 10. Thus, the reported mintage of 425 Flowing Hair stellas. It should be noted that roughly 20 1879 Coiled Hair, 20 1880 Flowing Hair, and 20 1880 Coiled Hair four dollar gold patterns were also struck, likely for well-connected coin dealers and collectors.

The 1879 Flowing Hair stella is the only collectible version of the four variants, though it remains an unquestioned rarity. The obverse was designed by Charles Barber, who modeled the portrait of Liberty after one used by his father William a few years earlier on a five dollar pattern (Judd-1574), while the reverse, which is common to all four issues, was design by Hubbell himself and engraved by Barber.

#### A New Treasure is Found

The series of events that led to the discovery of this Premium Gem Cameo stella is straight out of a Hollywood movie.

According to her niece and nephew, Aunt Mary had always been generous, sharing her time and energy as a community leader, and helping to pay for school and other necessities when family members were in a bind. But she was equally careful, never spending extravagantly on herself and always living within her means. She lived in the same understated home for half a century.

As Aunt Mary's health deteriorated, she warned her niece, who made regular trips up to Stockbridge: "Be careful before giving things away." Without being explicit, she put her niece on notice. Still, after Aunt Mary's death it came as a total surprise that the quaint, colonial house nestled in the Berkshire Mountains contained a variety of often well-hidden antiques, paintings, and other valuables, including a bottle of rye whisky that had been casked in 1863 and bottled in 1913, and a landscape painting by renowned 19th century French artist, Jean-Baptiste-Camille Corot.

The present coin was found in an old safe among a pile of coins, including a couple of Spanish gold cobs and American double eagles. Aunt Mary had never made any mention of the coins, so the executors of the estate brought the cache to a local coin shop for an appraisal. Having no idea what their coins were worth, they were delighted when the coin dealer jumped out of his chair and exclaimed that he had never handled a stella in more than 30 years. As it turned out, Aunt Mary's niece and nephew had inherited a significant rarity.

Unfortunately, nothing is known about the prior history of this coin. The current consignors believe it may have been accepted as payment from a client by their uncle, Mary's husband, who owned his own business.

#### Physical Description

The quality of this Premium Gem Stella is absolutely superb. Eye-catching Cameo contrast is the first thing that stands out, with frosted motifs set against profoundly reflective, mirrorlike fields. The richness of the deep yellow-gold color that dominates each side is interrupted only by a couple of attractive reddish-blue alloy spots on the cheek, within the lower curls, above the second G, and below the lowest points of star 13. Vertical planchet striations and a touch of softness occur across Liberty's portrait, as on virtually all 1879 Flowing Hair stellas.

Heritage Auctions is proud to offer this fresh-to-market representative, the "Stockbridge Stella." Its captivating, offbeat history parallels that of the issue itself, and the numismatic community will surely find as much to like about it as we do.

**The Stockbridge Stella.** NGC ID# 28B2, PCGS# 88057

## EARLY HALF EAGLES

1795 Small Eagle Five Dollar, AU53  
BD-3, Attractive Type Coin

**3256** 1795 Small Eagle, BD-3, High R.3, AU53 NGC. Bass-Dannreuther Die State c/b, with a radial die crack through star 12 and a die flaw above the E in UNITED. BD-3 is a plentiful variety, ideal for type purposes. As many as 225 pieces may be extant, although attractive AU coins with original surfaces are scarce. This example displays strong central detail and is evenly struck with no planchet adjustment marks. Rich olive-gold surfaces cede to reddish-rose hues in the protected peripheral fields, generating attractive visual appeal. An excellent Small Eagle type coin from the first year of gold coinage at the early Philadelphia Mint. NGC ID# 25ND, PCGS# 519852 Base PCGS# 8066

## 1800 BD-2 Five Dollar, XF45

Attractive Type Coin

**3257** 1800 BD-2, High R.3, XF45 ANACS. Bass-Dannreuther Die State c/c. BD-2 is relatively plentiful among early half eagles, making it popular as a type coin. This Choice XF example is well-detailed and displays outstanding olive-gold and deeper-orange hues over each side. The strike is even and sharp, and no adjustment marks are present. According to the die state, each side has light clash marks and there is a thin die crack connecting the I and B in LIBERTY. NGC ID# 25NW, PCGS# 45592 Base PCGS# 8082

1800 BD-2 Half Eagle, MS62  
Pleasing Semireflective Appearance

**3258** 1800 BD-2, High R.3, MS62 NGC. Bass-Dannreuther Die State c/d. The broken 1 punch (Blunt 1) made its appearance on the BD-2 variety and continued in use for 1800 to 1804 dated half eagles until a new punch with a proper flag of 1 was used on the 1804 BD-4 variety. The 1800 BD-2 die pair shares its obverse with the other 1800 varieties, except for the ultra-rare Pointed 1 BD-1 variety.

This medium-gold example shows reflective fields diminished by substantial chatter in the obverse fields. The reverse, in contrast, is nearly prooflike and less-abraded. A sharp strike attends the frosted motifs on both sides, with pleasing mint luster and no virtually no other marks of consequence. Perhaps as many as 175 to 250 pieces survive of the BD-2, most in circulated conditions. Census: 30 in 62 (1 in 62+), 23 finer (1/19). NGC ID# 25NW, PCGS# 45592 Base PCGS# 8082

1800 BD-4 Half Eagle, Choice XF  
Early Die State

**3259** 1800 BD-4, R.4, XF45 PCGS. Bass-Dannreuther Die State c/a, perfect reverse. The repunched M in AMERICA is diagnostic for BD-4. Remarkably little wear is evident, even for the Choice XF grade level. The surfaces display pleasing olive-gold patina with deeper orange undertones. The strike is even and sharp. A couple of green spots are visible at the RT in LIBERTY, and a few smaller ones are hidden within Liberty's hair curls. An appealing early die state example of this collectible early half eagle variety. NGC ID# 25NW, PCGS# 45594 Base PCGS# 8082

1802/1 BD-8 Half Eagle, AU Details

**3260** 1802/1 BD-8, R.4 — Cleaned — NGC Details. AU. Bass-Dannreuther Die State c/b, with a descending die crack through the UNI in UNITED. This overdate issue is popular in high grade. The AU-level coin offered here displays a sharp, even strike and only slight high-point friction. Lightly cleaned, the surfaces display unnaturally bright yellow-gold color and have faint hairlines, but there are no bothersome abrasions on this pleasing 1802/1 half eagle. NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

1802/1 Capped Bust Right Half Eagle, MS64+  
Popular Early Overdate  
BD-8 Variety

**3261** 1802/1 BD-8, R.4, MS64+ PCGS. CAC. Bass-Dannreuther Die State c/b, with the die crack through UNI in UNITED. A substantial mintage of 53,176 Capped Bust Right half eagles was accomplished in 1802, using leftover obverse dies from the previous year that have a 2 punched over the final digit in the date. Eight die varieties are known for the date. This coin represents the BD-8 variety, with the 2 touching the bust, perfect T's in the reverse legend, and the final S in STATES over the far right of a cloud. The BD-8 is a relatively available variety, in the context of the series, with a surviving population of 150-200 examples in all grades. The BD-8 probably accounted for 10,000-15,000 examples of the reported mintage. The obverse die was used previously to strike the BD-6 and BD-7 varieties of this date, but this was the only use of the reverse die. It is possible that there was a remarriage of these dies, with some late die state examples of BD-7 struck between the two pairings.

Collectors have prized the early half eagles since the earliest days of the hobby and the 1802/1 began appearing at auction at least as early as lot 176 of the A.C. Kline Sale (M. Thomas & Sons, 6/1855), although the lot description did not mention the overdate. By the mid-1860s, catalogers began taking note of this feature, as W. Elliot Woodward described the coin in lot 2755 of his Sixth Semi-Annual Sale as, "1802 over 1801; uncirculated, as fine as proof; scarce." The lot was purchased by Thomas Cleneay for \$9, a strong price at the time. More recent sales include the MS64 PCGS example in lot 5346 of the Philadelphia Signature (Heritage, 8/2012) that realized \$64,625.

This Plus-graded Choice specimen exhibits sharply detailed design elements and dramatic clash marks in the fields on both sides. The well-preserved antique-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. This coin represents an exceptional balance of quality and value, as MS65 examples have sold for as much as \$138,000 in recent Heritage auctions. Population (for the variety): 1 in 64, 0 finer (1/19). NGC ID# 25NX, PCGS# 519889 Base PCGS# 8083

**1803/2 Five Dollar, BD-3, AU Sharpness  
Scarce-Yet-Collectible Die Marriage**

- 3262 1803/2 BD-3, R.4 — Rim Damage — PCGS Genuine. AU Details.** Bass-Dannreuther Die State f/b. The 3 in the date is just free of Liberty's bust truncation, while an underdigit 2 is plainly seen beneath the 3. T in UNITED is broadly recut, while the T in LIBERTY is missing its right foot. Several light die cracks comprise the late die state of this bright, sun-gold example. PCGS notes several raised areas on the rim as Rim Damage, while the surfaces show evidence of cleaning as well. Still, this early half eagle retains measurable eye appeal and solid About Uncirculated sharpness, with areas of mint luster seen on both sides.

**1804 Capped Bust Right Half Eagle, BD-7  
Small Over Large 8, Choice About Uncirculated**

- 3263 1804 Small Over Large 8, BD-7, R.4, AU55 PCGS.** Bass-Dannreuther Die State c/c. Blatant and rather spectacular repunching of the date identifies the obverse, which is shared with the rare BD-5 and BD-6 1804 varieties. The reverse defines BD-7, easily identified by the position of the field stars in relation to the eagle's beak, and the upright E in STATES positioned above the underlying cloud junction. The reverse die is in its near-terminal state, heavily clashed and cracked.

Mint luster shines in protected areas of this Choice About Uncirculated coin. Marks are wispy and minor across the generally smooth fields, while Liberty's portrait shows light wear, but no signs of heavy contact. The reverse is sharply struck, with only scant rub and a few unimportant, tiny ticks. Attractive green-gold surfaces provide plenty of eye appeal. NGC ID# BFXB, PCGS# 519897 Base PCGS# 8086

**1804 Capped Bust Right Half Eagle, MS61  
Small Over Large 8, BD-7 Variety**

- 3264 1804 Small Over Large 8, BD-7, R.4, MS61 PCGS.** Bass Dannreuther Die State c/c, with clash marks on both sides and an extensive network of die cracks on the reverse. According to Mint records, 30,475 Capped Bust Right half eagles were struck in 1804, with seven die varieties known for the date. This coin represents the BD-7 variety, with the Small 8 punched over a Large 8 in the date and the upright of E in STATES over a cloud space. The BD-7 has a surviving population of 100-150 examples in all grades and probably accounted for 7,500-12,500 examples of the reported mintage.

This attractive Mint State example offers well-detailed design elements and lightly marked antique-gold surfaces, with a few dark alloy spots on the reverse. Some faint planchet adjustment marks are evident on the upper obverse, through the letters in LIBERTY and the cap. The overall presentation is quite attractive. NGC ID# BFXB, PCGS# 519897 Base PCGS# 8086

1806 Pointed 6 Half Eagle, AU55  
BD-1, 8x5 Stars

1806 Heraldic Eagle Five Dollar, MS64  
Knob 6, 7x6 Stars, BD-6

**3265** 1806 Pointed 6, 8x5 Stars, BD-1, R.4, AU55 PCGS. Bass-Dannreuther Die State c/e. The obverse has faint peripheral die cracks, and the reverse shows a cud through the dentils above the final S in STATES and the space to the right. This Choice About Uncirculated 1806 half eagle displays original yellow-gold luster in the fields amid copper-gold and olive patina. The centers are weakly struck, and numerous crisscrossing adjustment marks are visible on Liberty's portrait. The borders are better-defined. NGC ID# 25P7, PCGS# 45621 Base PCGS# 8090

**3266** 1806 Knob 6, 7x6 Stars, BD-6, R.2, MS64 PCGS. Bass-Dannreuther Die State b/c. As the sole 1806 Knob 6 (Round 6) variety, the BD-6 is relatively available in comparison to other early half eagles. It is moderately scarce in near-Gem condition but becomes rare any finer, with less than a handful of full Gem pieces known. This example is struck from an early obverse die state, while the reverse shows strong die clashing. The M in AMERICA is recut, not mentioned in the Bass-Dannreuther reference.

In our experience, the lump on R in LIBERTY is a die lump (rather than a rust lump), and is visible early-on in the obverse die states. It becomes more prominent in later stages. This lustrous and attractive near-Gem example shows no evidence of obverse die lapping, and the die crack left of 1 in the date is absent, making the obverse an early example of die state b given the prominence of the lump on R. Sharply struck orange-gold surfaces show reddish highlights and considerable bright mint luster. Marks are limited to minor abrasions, which are few and well-separated across frosted, Choice surfaces. The eye appeal is excellent. Population: 44 in 64 (4 in 64+), 3 finer (2/19). NGC ID# BFXJ, PCGS# 45620 Base PCGS# 8089

1807 Bust Right Five Dollar, AU55  
Rare BD-2 Die Variety

**3267** 1807 Bust Right, BD-2, R.5, AU55 NGC. Bass-Dannreuther Die State e/b-f/b. The obverse is cracked above the E in LIBERTY, but the cud has not completely broken away as it has in the latest die state. BD-2 is a rare variety with 50 to 65 pieces known in all grades. This AU representative displays bold detail and lightly worn surfaces. Moderate orange-gold luster remains in the protected regions of the fields, contrasting with the olive-gold patina of the worn areas. NGC ID# CKLF, PCGS# 519899 Base PCGS# 8092

1807 Capped Bust Right Half Eagle, AU53  
Final Year of the Design, BD-6

**3268** 1807 Bust Right, BD-6, High R.4, AU53 NGC. Bass-Dannreuther Die State a/b. An impressive AU53 example of the final die variety in the final year of the Capped Bust Right half eagle series, this coin exhibits only light wear on the design elements, with some minor loss of detail on cloud 3, due to lapping. Evidence of recutting shows on the 1 in the date. The lightly abraded orange-gold surfaces retain a few traces of original mint luster. Some light planchet adjustment marks show in the reverse dentils on the right. The surviving population of the BD-6 numbers no more than 80-100 examples in all grades. NGC ID# CKLF, PCGS# 519905 Base PCGS# 8092

1810 BD-4 Half Eagle, MS64  
Large Date, Large 5, Early Die State

**3269** 1810 Large Date, Large 5, BD-4, R.2, MS64 PCGS. Bass-Dannreuther Die State a/a. A Choice Uncirculated example of this readily available variety, which tops the list of type coin candidates among all other early half eagles. Softly lustrous olive-gold surfaces show a thick layer of mint frost, enhanced by a few deep-olive accents. This is a sharply struck coin, with crisp definition on all of the motifs — lacking sharpness only at the dentils. The obverse stars and Liberty's hair curls are sharp, as are the cap and drapery folds. Likewise, the eagle's head, neck, and wings are full-feathered. Only the left (facing) talons lack full definition. Marks are limited to a few faint abrasions above the eagle's head.

There are no die cracks or die clashing to report, a common die state for the BD-4 variety. The large, squat 5 in the denomination is closed between the upright and tail of the lower loop. A faint area of die bulge exists in the left obverse field near stars 3 to 5, which perhaps relates to the ultimate failure of the die after its long and successful use. John Dannreuther suggests as many as 90,000 BD-4 pieces were struck. Few exist as fine as this original near-Gem example. Population: 37 in 64 (1 in 64+), 4 finer (2/19). NGC ID# BFXP, PCGS# 507598 Base PCGS# 8108

1811 Capped Bust Left Half Eagle, AU58  
Small 5, BD-2

- 3270** 1811 Small 5, BD-2, R.3, AU58 NGC. Bass-Dannreuther Die State d/a. The Small 5 in the denomination identifies the BD-2 variety. This impressive near-Mint specimen offers well-detailed design elements and lightly abraded orange-gold surfaces that show some faint planchet adjustment marks on the reverse borders. Vibrant mint luster adds to the strong eye appeal. Census (for the variety): 5 in 58, 16 finer (2/19). NGC ID# BFXR, PCGS# 507599 Base PCGS# 8109

## LIBERTY HALF EAGLES

1843-D Half Eagle, AU55  
Scarcer Small D Mintmark

- 3271** 1843-D Small D AU55 PCGS. Variety 9-F. The Small D mintmark is seen with less frequency than the Medium D. Winter explains that the variant "is by far the rarer of the two varieties of this year and it should sell for a significant premium, due to its rarity and importance." This bright Choice AU representative enjoys an impressively bold strike for a D-mint five dollar. The fields are partly reflective, and myriad marks appear on each side. Population: 8 in 55, 5 finer (2/19). NGC ID# 25T4, PCGS# 98215

1854 Liberty Head Five, MS64+  
Tied for Finest Known, Ex: Ed Milas

- 3272** 1854 MS64+ PCGS. CAC. Among Philadelphia half eagles, the 1854 is equally scarce (or moreso) than many other P-mint dates. It is unknown in full Gem condition, and just two Plus-graded near-Gems are reported by PCGS and NGC combined. David Akers suggested, "This date is even more rare than the 1851 and 1853 (and far more rare than the 1843, 1847, 1852 or 1861) ..." It is most often encountered in VF or XF condition. The two highest-graded examples are both certified by PCGS. Heritage has sold both of the top-rated coins twice, including this current appearance. Most recently, we sold the other MS64+ example in our September 2017 Signature sale as lot 3973, which realized \$28,800.

The present coin now carries the identical MS64+ PCGS grade with CAC endorsement, and comes out of the well-known Ed Milas Collection of Liberty Head No Motto Half Eagles, offered by Stacks in May 1995 as lot 491. There, it was described as "among the finest known" and "Lovely, rose gold toning over superb, frosty mint lustre in the fields." The Garrett and Guth reference takes note of this exact coin and that appearance, stating "The finest example seen by the authors, many years ago, was the Ed Milas NGC MS-64 coin that sold for \$20,900 in 1995."

Gleaming, smooth surfaces have a few tiny planchet flaws that help pedigree the piece — a shallow void or strike-through near the lower-inside point of star 1, and a similar cluster of pinprick-size planchet marks between stars 12 and 13. A tiny bit of dark toning extends from the curls just into the field at the back of Liberty's neck. The strike is sharp for the issue, with minor weakness at the eagle's neck feathers and at the arrow fletchings. We expect strong bids for this top-rated 1854 Liberty five when it is called. NGC ID# 25UG, PCGS# 8256

**1857-S Five Dollar, MS60  
Three Coins Finer at NGC**

**3273** 1857-S MS60 NGC. Unlike double eagles of the same date-mintmark combination, the population of 1857-S half eagles was not dramatically enhanced by shipwreck recoveries. The issue remains conditionally rare in all Mint State grades, and the average survivor is only fractionally finer than XF45. Razor-sharp stars, curls, feathers, leaves, and fletchings define this Uncirculated five dollar gold piece. Peppered abrasions, including a linear depression near stars 1 and 2, limit the technical grade. Census: 3 in 60, 3 finer (1/19). NGC ID# CBE7, PCGS# 8275

**1858-S Half Eagle, Red-Gold AU55  
Likely Fewer Than 100 Pieces Extant**

**3274** 1858-S AU55 NGC. Fewer than 100 1858-S half eagles are believed to survive from a mintage of 18,600 pieces. These gold pieces circulated heavily in the West, and there was virtually no interest in saving mintmarked coins for numismatic purposes. Reddish-gold surfaces glow with partial mint luster. The central strike is strong, as are the star radials. Moderately abraded with a small mark on the obverse rim at 3:30. An underrated rarity in all grades. Census: 8 in 55, 11 finer (1/19). NGC ID# CLAM, PCGS# 8279

**1859-S Five Dollar, AU50  
Underrated in All Grades**

**3275** 1859-S AU50 NGC. NGC has only graded 30 problem-free examples of the rare 1859-S half eagle, which probably has a survivorship of fewer than 80 pieces. The issue is seriously underrated, providing collectors with an opportunity to reasonably obtain a genuine treasure from the first few years of S-mint operation. This lightly circulated half eagle enjoys pleasing red-gold color and maintains good detail. Abrasions and rim bumps are not overly distracting. Census: 1 in 50, 18 finer (1/19). NGC ID# 25VE, PCGS# 8283

**1860-D Half Eagle, AU58  
Medium D, Minimal Marks**

**3276** 1860-D Medium D AU58 NGC. Variety 46-GG. Bright yellow-gold surfaces are sharply struck and finely grained. Moderate mint luster resolutely glows throughout each side. Just 14,635 pieces were struck — one of the lower Dahlonega half eagle mintages. This near-Mint example is a condition scarcity, and offers a sensible alternative to a full Mint State coin. Census: 35 in 58, 16 finer (1/19). NGC ID# 25VH, PCGS# 8286

**1861 Half Eagle, MS63  
Great Eye Appeal**

**3277** 1861 MS63 PCGS. A large mintage of 688,084 pieces always puts the 1861 half eagle in the picture for No Motto type. This is a splendid Select Uncirculated example, with pulsating mint luster and radiant, sharply struck surfaces. Blond-gold accents enrich attractive, honey-gold coloration. Only trivial marks are seen on the smooth, appealing surfaces. Population: 48 in 63, 48 finer (1/19). NGC ID# 25VK, PCGS# 8288

1865 Half Eagle, AU53  
Seldom Seen in Any Grade

**3278 1865 AU53 PCGS.** By 1862 — the second year of the Civil War — the federal government had ceased paying out gold coins, and hoarding of both gold and silver coinage was widespread. The production totals for half eagles in Philadelphia dropped from 688,000 pieces in 1861 to 4,430 pieces in 1862, and few P-mint half eagles were produced in the entire span from 1862 through 1865. The 1865 circulation strike mintage was a mere 1,270 pieces. Faraway San Francisco was insulated from the fray and continued more normal mintages, since half eagles were the favored denomination out West in the early 1860s.

Many of 1865 examples that survive did circulate to some extent. The average grade of certified survivors is AU50. Mint State coins are virtually unknown: PCGS reports just two MS62 examples, while NGC reports three grading events — two in MS60 and one in MS61. PCGS CoinFacts estimates only 30 to 40 1865 half eagles are known in all grades combined. This AU53 PCGS example displays medium yellow-gold surfaces with some hints of reflective prooflike surface remaining in protected areas. Myriad small marks exist, none particularly overt, consistent with light circulation. An area of strike weakness shows on the eagle's lower feathers and the arrow fletchings. Population: 5 in 53, 7 finer (1/19).

Ex: ANA Signature (Heritage, 8/2015), lot 4344. NGC ID# 2B4N, PCGS# 8298

1866-S No Motto Five, AU50  
Fewer Than 100 Pieces Survive

**3279 1866-S No Motto AU50 NGC.** Half eagle production screeched to a halt at the San Francisco Mint in 1866 after just 9,000 pieces were struck, under orders to replace the No Motto reverse with the mandated With Motto variety "at once." Some of the tiny production was held back and melted. Others entered circulation into the hands of a public that was oblivious to its rarity. Today, less than 100 pieces survive in all grades, with a single Mint State coin certified (by PCGS). This example is lightly worn with most abrasions softened by circulation. A touch of luster remains at the margins of this pleasing, honey-gold example. Census: 5 in 50, 10 finer (1/19).

Ex: ANA Signature (Heritage, 8/2014), lot 3913. NGC ID# 25W2, PCGS# 8300

1882-CC Half Eagle, AU58  
Ideal Carson City Type Coin

**3280 1882-CC AU58 NGC.** Variety 1-A. The mintage of 82,187 pieces is much higher than for earlier CC-mint half eagles, a fact reflected in the issue's availability in Mint State and the higher circulated grades. This apricot-orange piece is well-struck, with just a trace of rub and no visible impairments. Minimally marked surfaces retain soft mint luster. NGC has graded only 27 numerically finer examples (1/19).

Ex: Central States Signature (Heritage, 4/2010), lot 3653. NGC ID# 25XH, PCGS# 8359

**1882-CC Five Dollar, AU58  
Strong Eye Appeal**

- 3281** 1882-CC AU58 PCGS. CAC. Variety 1-A. A single pair of dies is known to have been employed in the production of 82,817 half eagles at the Carson City Mint in 1882. An average example of the 1882-CC will grade fractionally shy of AU50, and Mint State coins with original eye appeal are rarely offered. This elegant near-Mint five dollar gold piece is a lovely example of the issue, virtually unworn with abundant of luster remaining. Peach-gold surfaces exhibit a strong impression and minimal marks. NGC ID# 25XH, PCGS# 8359

**1883-S Liberty Half Eagle, MS64  
Tied for Finest Certified**

- 3282** 1883-S MS64 PCGS. The 1883-S half eagle is seldom seen at auction, and it remains one of the Liberty Head series' most unheralded and underrated condition rarities. This Choice Uncirculated representative displays frosted, rose-gold surfaces with only a few tiny, inconsequential marks and a light graze near the back of Liberty's neck curls. The strike is needle-sharp. The highest certified coins are MS64 at either service, with just seven such pieces identified to date by the two services combined. (2/19). PCGS Population: 6 in 64, 0 finer (2/19). NGC ID# 25XM, PCGS# 8363

**1891-CC Half Eagle, MS64  
Only Two Finer at PCGS**

- 3283** 1891-CC MS64 PCGS. CAC. Variety 2-A. The second 1 in the date is microscopically doubled along its top, with several peripheral die cracks on the reverse. Two obverse dies and one reverse die have been identified from a mintage of 208,000 coins. This Choice Mint State piece has brilliant yellow luster with scattered, inconsequential marks, and trivial copper toning spots. Population: 91 in 64 (5 in 64+), 2 finer. CAC: 21 in 64, 0 finer (2/19). NGC ID# 25Y5, PCGS# 8378

**1893-CC Five Dollar, MS63  
Seldom Offered in This Condition**

- 3284** 1893-CC MS63 PCGS. Variety 1-A. Only 60,000 half eagles were struck at Carson City in 1893, the final year of production at the Nevada branch mint. Surviving examples in MS63 are rare, and finer pieces are out of reach for many collectors. This Select representative displays a sharp strike and satiny yellow-gold mint luster. Faint handling marks and hairlines in the fields are all that limit the grade, with no singular abrasions in evidence. Population: 20 in 63 (2 in 63+), 8 finer (1/19). NGC ID# 25YB, PCGS# 8384

**1899-S Five Dollar, Smooth MS65  
Surprisingly Elusive at This Grade Level**

- 3285** 1899-S MS65 PCGS. A mintage of 1.5 million coins belies the collectibility of the 1899-S five dollar gold piece in Gem condition. This rare MS65 offering presents smooth fields, crisp motifs, and coruscating mint luster. The visual quality is universally appealing. Population: 9 in 65 (1 in 65+), 5 finer (2/19). NGC ID# 25YT, PCGS# 8399

## PROOF LIBERTY HALF EAGLE

1895 Half Eagle, PR66 Ultra Cameo  
81 Pieces Struck  
Condition Census Quality

**3286** 1895 PR66 Ultra Cameo NGC. Series and type collectors alike gravitate to the 1895 and 1896 proofs, because they represent the pinnacle of proof production quality at the Philadelphia Mint. In particular, the 1895 date sparks numismatic interest simply because of its demand in other denominations, and a reputation for heavy mint frost set on deeply reflective surfaces.

This glittering, Premium Gem Ultra Cameo proof will fulfill the requirements of the fussiest proof specialist. Dramatic contrast exists between the yellow-gold, frosted devices and jet-black mirrored fields when viewed at an angle. A ringing full strike imparts pinpoint sharpness to the devices. Die polish areas within the wing and scroll indicate the Mint's attention to detail, and help confirm the JD-1 proof dies. Census: 4 in 66 Ultra Cameo, 3 finer (2/19). NGC ID# 28CZ, PCGS# 98490

## INDIAN HALF EAGLE

1914-D Half Eagle, MS64+  
Rarely Offered Finer

**3287** 1914-D MS64+ PCGS. CAC. One of the rare issues of the series on Gem condition or finer, the 1914-D is scarce in Choice Uncirculated grade as well. This high-end MS64 carries the PCGS Plus designation and CAC endorsement — both important awards in high grades. Gleaming straw-gold surfaces are sharp except for the lowest headdress feathers, while marks include fewer than a handful of small, shallow abrasions. Mint luster glows from every angle. Population: 38 in 64+, 20 finer. CAC: 49 in 64, 3 finer (2/19). NGC ID# 28DV, PCGS# 8528

## EARLY EAGLES

1795 Ten Dollar, AU50 Details  
BD-1, 13 Leaves

**3288** 1795 13 Leaves, BD-1, High R.3 — Repaired — ANACS. **AU50 Details.** Bass-Dannreuther Die State b/a, with a crack through stars 5 to 9, although on this piece the crack is faint due to granular surfaces as a result of the repair work noted by ANACS. A prominent depression in the right obverse field — smoothed out by tooling — merges the field with Liberty's bust. The surfaces are bright yellow-gold and satiny. This is a well-detailed coin and it is evenly struck. BD-1 is plentiful among early gold eagles, with a surviving population of as many as 325 pieces. Examples in all grades are sought-after as type and date representatives, being popular as a first-year issue. NGC ID# 25ZU, PCGS# 45710 Base PCGS# 8551

1797 Capped Bust Right Ten Dollar, VF25  
Large Eagle, BD-4 Variety

**3289** 1797 Large Eagle, BD-4, High R.4, VF25 PCGS. Bass-Dannreuther Die State d/a. The obverse was previously used to strike BD-3 eagles. The inner points of the stars are shortened by lapping, and a die break runs through the second 7 in the date. The reverse die state is perfect. The Bass-Dannreuther reference states that the Bass Collection included "a very rare example in State d/a. Only a few examples have been seen with this perfect state of the reverse die...." Here is another example without the usual cracks through C and R in AMERICA. The present coin represents the scarce BD-4 die marriage, with a long thick neck on the eagle and an irregular cross pattern on the reverse stars. The reported mintage for the Heraldic Eagle type was 10,940 pieces, and the BD-4 variety probably accounted for 3,500-5,000 examples of the total. John Dannreuther estimates a surviving population of 90-110 pieces in all grades.

This coin shows considerable wear on the devices, yet all lettering and major detail are present. The fields exhibit minor abrasions and faint hairlines, but no adjustment marks exist. All in all, the coin is an acceptable, well-circulated representative of this early eagle in a rare die state.

Ex: ANA Signature (Heritage, 8/2017), lot 4152. NGC ID# 25ZY, PCGS# 45719 Base PCGS# 8559

**1799 BD-7 Capped Bust Right Ten, AU58**  
Small Stars, Middle Die State, CAC Approval

**3290 1799 Irregular Date, Small Obverse Stars, BD-7, R.3, AU58**  
PCGS. CAC. Bass-Dannreuther Die State d/d. Rim crumble at obverse stars 1 and 2 and die cracks at ERTY, as well as cracks through the obverse stars left and right identify the mid-to-late die state, combined with reverse die clashing. Although eight Small Stars varieties exist, BD-7 is by far the most available, with perhaps as many as 350 pieces that survive. Only a few of those examples approach the quality and eye appeal of this near-Mint example, which is sharply struck with attractive, orange-gold surfaces. Marks are limited to light field chatter throughout the partially reflective fields. The reverse appears to be full Mint State, with crisp definition — rotated 45° counterclockwise. The date is diagnostically skewed, with the 7 higher than 1 and tilted right. CAC endorsement adds to the considerable eye appeal of this sharp BD-7 ten. NGC ID# 2625, PCGS# 45730 Base PCGS# 98562

**1803 BD-3 Ten Dollar, AU Details**  
Small Reverse Stars

**3291 1803 Small Reverse Stars, BD-3, R.4 — Harshly Cleaned —**  
PCGS Genuine. AU Details. Bass-Dannreuther Die State c/d, with heavy clash marks on both sides. Most prominent are an outline of Liberty's portrait on the reverse and a “ghost” of the date amid the TES in STATES, produced by clashing. This Small Stars Reverse type coin is well-detailed in the centers, although it lacks sharpness on the left-hand obverse stars and on the clouds below OF. The lower edge of the bust truncation is also indistinct. Bright yellow-gold in color from being cleaned.

**1803 Ten Dollar, AU Details**  
Small Reverse Stars  
Rare BD-4 Variety

**3292 1803 Small Reverse Stars, BD-4, R.6 — Improperly Cleaned —**  
NGC Details. AU. Dannreuther Die State c-d/b. No clash marks are present, but delicate cracks are noted between the BE in LIBERTY and the IC in AMERICA. The rare 1803 BD-4 was one of the few early gold die varieties that Harry W. Bass, Jr. never acquired. The reverse die was only used to strike BD-4, and is promptly identified by die flaws on the E in AMERICA and the N in UNITED. This caramel-gold example displays faint hairlines, but luster glimmers from design elements, and no marks are noticeable.

**LIBERTY EAGLES**

**1854-S Eagle, AU58**  
Debut of the San Francisco Mint

- 3293 1854-S AU58 NGC.** The government established a branch of the United States Mint in San Francisco, with operation commencing in 1854. Prior to that time, large shipments from the California gold fields were transported to New Orleans, Philadelphia, Charlotte, and Dahlonega. The cost and risk associated with those shipments was eliminated when the new facility opened. This Choice AU example has myriad trivial surface marks but retains virtually full luster and excellent eye appeal. Census: 57 in 58, 8 finer (2/19). NGC ID# 263K, PCGS# 8615

**1867 Ten Dollar, AU55**  
Low Survival Rate

- 3294 1867 AU55 NGC.** Peach and orange-gold hues emerge from the semireflective fields when tilted beneath a light, while the majority of each side displays medium yellow-gold color. This Choice About Uncirculated 1867 ten is well-detailed and shows few abrasions for the grade. The 1867 is a rare date in all grades, coming from a mintage of only 3,090 pieces. Fewer than 100 survivors are believed known. Census: 16 in 55, 8 finer (1/19). NGC ID# 264L, PCGS# 8615

**1879-S Ten Dollar, MS63**  
Conditionally Rare and Underrated

- 3295 1879-S MS63 PCGS.** The 1879-S is one of the more plentiful Liberty eagle issues of this year from each of the mints, although it remains scarce in Uncirculated condition. This Select example is decidedly rare, and finer pieces are almost uncollectible. A bold strike and radiant, softly frosted mint luster illuminate tangerine-gold surfaces, and only a few light, unobtrusive marks are visible with a loupe. Just two pieces are reported finer at PCGS and NGC combined. Population: 6 in 63, 1 finer (2/19). NGC ID# 265R, PCGS# 8686

**1883-CC Ten Dollar, AU55**

Problem-Free Better Date

- 3296 1883-CC AU55 NGC. Variety 1-A.** Scarce in Choice About Uncirculated condition or finer, the 1883-CC ten dollar gold had a low mintage of just 12,000 pieces. This is a splendidly original example, with traces of prooflike surface clinging to the outer edges of raised devices and only tiny abrasions within the fields. Mint luster peaks through the antique-gold color for added eye appeal. Ex: Public Auction Sale (Stack's, 12/1979), lot 1104 (flip included). NGC ID# 2667, PCGS# 8700

**1906-O Ten Dollar, MS63**  
Scarce So Fine

- 3297 1906-O MS63 PCGS. Variety 1.** The 1906-O is the final Liberty eagle struck at the New Orleans Mint. Only 86,895 pieces were produced, and Mint State survivors are scarce at the MS63 level. In finer condition, this issue is rare. The present coin displays a bold strike and satiny cartwheel luster, illuminating well-preserved surfaces. Each side has rich straw-gold and peach-orange hues. Population: 57 in 63 (6 in 63+), 29 finer (1/19). NGC ID# 53FB, PCGS# 8761

1906-O Ten Dollar, MS65+  
Few Pieces Known This Fine

3298 1906-O MS65+ PCGS. CAC. Variety 1. Gold eagle coinage at New Orleans in 1906 amounted to only 86,895 pieces — about half as many coins as were struck at Philadelphia and but a fraction of the totals produced by Denver and San Francisco. Overall, this is the scarcest of the four 1906 issues, although Mint State pieces are similar in scarcity to the higher-mintage 1906-S. In Gem condition, the 1906-O ten is a major rarity, and it is almost uncollectible finer.

This Plus-designed, CAC-approved MS65 coin displays a sharp strike and satiny brass-golden luster. A radiant cartwheel effect reveals few signs of contact, none are which are visually bothersome. Population: 4 in 65 (2 in 65+), 2 finer. CAC: 3 in 65, 0 finer (1/19). NGC ID# 53FB, PCGS# 8761

New Orleans Mint

## PROOF LIBERTY EAGLE

1887 Ten Dollar Gold, PR64 Deep Cameo  
Attractive Orange-Peel Texture, CAC  
Ex: Byron Reed-Admiral Collection

**3299** 1887 PR64 Deep Cameo PCGS. CAC. JD-1, R.6. Proof eagle production reached a high point in 1887, when 80 specimens were struck. A similar level would not be achieved again until 1899. While Garrett and Guth explain that the high mintage was a direct response to actual collector demand, it seems relatively few pieces were preserved in the long term. They write: "Why the survival rate is so low remains a mystery, but today the total population is less than 30 pieces." Walter Breen was doubtful that more than a dozen proof 1887 eagles survived. More recently, John Dannreuther notes in Volume IV: Gold (Part Two) of *United States Proof Coins*:

"The author believes it to be less rare than those dates in the 1870s and early 1880s, but only a third of the original mintage likely exists. The 1887 is only slightly more available than the 1885 and 1886 proofs with 20 or a few more coins in collections and museums."

This coin has a short but impressive pedigree. It was long-held in the Byron Reed Collection (perhaps Reed obtained it directly from the Mint) until sold in the Christie's/Spink America auction in 1996. It next appeared as part of our sale of the fabulous Admiral Collection, where it remained in its previous generation green label holder, which pre-dated any mention of its Deep Cameo contrast.

Both obverse and reverse exhibit classic and highly sought-after orange-peel texture in the fields, which are deeply reflective. The devices are well-frosted, and bold contrast is evident on both sides. A few delicate hairlines on the obverse do not interfere with the smoothly mirrored fields, and there are no signs of contact. The coin was recently resubmitted to PCGS, where it received its well-deserved Deep Cameo designation. Population: 2 in 64 (1 in 64+) Deep Cameo, 3 finer. CAC: 2 in 64, 1 finer (1/19).

Ex: Byron Reed Collection (Christie's/Spink America, 10/1996), lot 166; The Admiral Collection/Long Beach Signature (Heritage, 2/2018), lot 4333. PCGS# 98827

## INDIAN EAGLES

1907 Wire Rim Indian Eagle, AU Details  
Saint-Gaudens High Relief Version

**3300** 1907 Wire Rim — Cleaned — PCGS Genuine. AU Details. Augustus Saint-Gaudens prepared new designs for both the eagle and double eagle in 1907, before his death. Both denominations were briefly struck in high relief before the engraving department at the Mint reduced the relief to benefit mass coinage. The 1907 High Relief double eagle is well-known and often available — 12,367 pieces were struck, and survivors in one grade or another are usually available, as the coins were heavily saved for their artistic excellence.

The twin of the High Relief double eagle, i.e., the original high relief version of the Indian Head eagle, is the 1907 Wire Rim ten. In contrast to the High Relief double eagle, the Wire Rim eagle comes from a small mintage of 542 pieces, of which 70 coins were eventually melted, leaving a net distribution of 472 coins. Survivors of this issue are scarce, and in high grades are out of reach of most collectors. Offered here is a lightly cleaned but still attractive AU-level coin, showing just a brush of friction over the yellow-gold surfaces. This piece presents an important opportunity for collectors to acquire a more affordable example of one of the most popular gold issues of the 20th century.

1907 Wire Rim Ten Dollar, AU53  
Only 542 Pieces Struck

**3301** 1907 Wire Rim AU53 PCGS. CAC. The obverse is modeled after Augustus Saint-Gaudens' head of Nike. The sculptor made a model using that head, but President Roosevelt suggested placing a warbonnet on Liberty. He reasoned that the warbonnet was as emblematic of Liberty as a Phrygian cap, even more so since no free people ever wore such a cap. Saint-Gaudens acquiesced and sculpted a warbonnet on his head of Nike. A limited production run of 542 pieces were struck of this design in high relief. Most examples were preserved in higher grades, but this AU example gives the collector the opportunity to acquire a Wire Rim at an affordable price. The surfaces are bright golden-orange and, of course, there are numerous small handling marks scattered over each side, but none merit singular mention. NGC ID# 26F2, PCGS# 8850

1907 No Motto Indian Eagle, MS66  
Popular First Year of Design

**3302 1907 No Motto MS66 NGC.** From a mintage of 239,400 pieces, this spectacular Premium Gem represents the first year of the short-lived No Motto design. Many examples were saved for their novelty value, making the issue readily available in high grade. This coin exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces. Vibrant mint luster adds to the terrific eye appeal. NGC has graded 33 numerically finer examples (1/19). NGC ID# 28GF, PCGS# 8852

1908-D Indian Eagle, MS64  
Only Branch Mint No Motto Issue

**3303 1908-D No Motto MS64 PCGS.** The Denver 1908 is the only No Motto Saint-Gaudens ten dollar issue struck at a branch mint, and only 210,000 pieces were produced. While examples are available for a price through MS62 condition, Select and near-Gem coins are scarce, and anything finer is rare. This MS64 representative offers pale peach overtones across wheat-gold luster that takes a yellow turn on the reverse. A few small abrasions and a shallow, stuttering scrape just off the left side of the truncation contribute to the grade. It is interesting to note that on this issue, the mintmark placement is above the olive branch, whereas most later issues put the "D" or "S" below the branch, next to the arrowheads. Population: 64 in 64 (6 in 64+), 10 finer (1/19).  
Ex: FUN Signature (Heritage, 1/2012), lot 5000, realized \$14,950.  
NGC ID# 28GH, PCGS# 8854

1908-D No Motto Indian Eagle, MS65+  
Rare So Well-Preserved

**3304 1908-D No Motto MS65+ NGC.** Although the 1908-D No Motto Indian eagle boasts a higher mintage than its Philadelphia counterpart (210,000 coins), it is significantly scarcer in Select and finer grades. In MS65, the 1908-D No Motto eagle is decidedly rare, as are a handful of finer pieces. Since our Permanent Auction Archives began in 1993, Heritage has handled a Gem or finer 1908-D No Motto on only 14 previous occasions, some of which represent reappearances of just a few coins. The last MS65+ coin that we handled was a PCGS CAC example in the Long Beach Signature (Heritage, 2/2013), lot 3982, which realized \$55,812.50.

This NGC coin is well-struck and devoid of bothersome abrasions, showing bright yellow-gold luster. A cartwheel effect is produced in hand, and under a loupe only the faintest evidence of surface contact is evident on Liberty's cheek. Census: 11 in 65 (1 in 65+), 8 finer (2/19). NGC ID# 28GH, PCGS# 8854

1908-D Indian Eagle, MS66  
Underrated With Motto Issue

**3305 1908-D Motto MS66 NGC.** The design of the Indian eagle was slightly modified part way through the year in 1908 to include the motto IN GOD WE TRUST on the reverse, an important consideration for type purposes. The 1908-D Indian Eagle, With Motto, claims a large mintage of 836,500 pieces, but the issue is decidedly more elusive than that production total would suggest. It is likely that much of the mintage was held in government storage and later melted. Only a handful of specimens have survived at the MS66 grade level.

This spectacular Premium Gem exhibits sharply detailed design elements throughout. The well-preserved orange-gold surfaces show a few hints of lilac, with radiant mint luster on both sides. Overall eye appeal is terrific. Mike Fuljenz considers the 1908-D, With Motto one of the most underrated issues in the series. Census: 5 in 66 (1 in 66+), 3 finer (1/19). NGC ID# 28GK, PCGS# 8860

1908-S Eagle, MS63  
First S-Mint Indian Ten

**3306 1908-S MS63 PCGS.** The 1908-S is always popular as the first Indian eagle struck at the San Francisco Mint. From a small mintage of 59,850 pieces, it also represents the first year of the popular With Motto design. The issue was well-produced and it is not as elusive as the small production total would suggest, making it a suitable choice for branch mint type collectors. This attractive Select specimen exhibits well-detailed design elements, with just a touch of softness on the eagle's shoulder. The pleasing orange-gold surfaces are lustrous and appealing, and show the minimum number of minor contact marks for the grade. Overall eye appeal is outstanding. Population: 47 in 63 (1 in 63+), 79 finer (1/19). NGC ID# 28GL, PCGS# 8861

1909 Indian Eagle, MS65  
Challenging Philadelphia Issue

**3307 1909 MS65 NGC.** Among Indian eagles from the Philadelphia Mint, the 1909 issue is one of the most challenging to locate in high grade. From a business-strike mintage of 184,789 pieces, most of the coins were either released into circulation, where they suffered the usual wear and attrition, or were held in government storage until they were melted in the 1930s. Today, the 1909 Indian ten dollar is rare in MS65 condition, and finer coins are even more elusive.

The coin offered here is a spectacular Gem, with sharply detailed design elements and vivid orange-gold surfaces that exhibit no mentionable distractions. Both sides radiate vibrant mint luster, with terrific eye appeal. Census: 25 in 65 (1 in 65+), 7 finer (2/19). NGC ID# 28GM, PCGS# 8862

**1909-S Ten Dollar, Gorgeous MS64  
Frosty With Lilac Accents**

- 3308 1909-S MS64 PCGS.** Like other early S-mint Saint-Gaudens eagles, the 1909-S is a significant challenge in near-Gem condition. This gorgeous representative features lovely lilac accents over frosty, noticeably clean, and beautifully frosted surfaces. Sharply struck and encapsulated in an old green label holder. NGC ID# 28GP, PCGS# 8864

**1910 Indian Eagle, MS65+  
Condition Rarity Any Finer**

- 3309 1910 MS65+ NGC.** The 1910 Indian eagle is not difficult to locate in lower Mint State grades, but examples in MS65 condition are scarce, and finer coins are rare. This Plus-graded Gem offers sharply detailed design elements and virtually pristine orange-gold surfaces, with vibrant mint luster throughout. NGC has graded 37 numerically finer examples (2/19). NGC ID# 28GR, PCGS# 8865

**1910 Indian Eagle, MS66  
Exceptional Type Coin**

- 3310 1910 MS66 NGC.** The 1910 Indian eagle claims a mintage of 318,500 pieces, and many examples were saved by contemporary collectors. As a result, the 1910 is an available issue in high grade and a popular choice with type collectors. This delightful Premium Gem is sharply detailed throughout, with well-preserved orange-gold surfaces and vibrant mint luster. Census: 20 in 66 (1 in 66+), 17 finer (1/19). NGC ID# 28GR, PCGS# 8865

**1910-D Ten Dollar Indian, MS65  
Satiny Red-Gold Surfaces**

- 3311 1910-D MS65 PCGS.** This ranks among the most plentiful issues in the Indian Head eagle series, with examples being collectible though MS65 condition. Only in MS66 does the 1910-D become scarce. Reddish-gold surfaces are satiny and strongly defined. A cluster of tiny marks between the M in UNUM and the final A in AMERICA likely prevents an even higher grade. This is a lovely example to represent the popular Saint-Gaudens design. NGC ID# 28GS, PCGS# 8866

**1911-D Eagle, MS61  
Series-Low Mintage of 30,100 Coins**

- 3312 1911-D MS61 NGC.** The Denver Mint coined all four denominations of gold coins in 1911, but only the double eagle was minted in substantial numbers. The eagle had a production of 30,100 coins, the lowest mintage of the Indian With Motto series. The facility also produced 72,500 half eagles and 55,680 quarter eagles. This pleasing Mint State piece has scattered surface marks as the grade suggests, yet it retains full mint brilliance and displays a sharp strike, especially on the lower headdress feathers. NGC ID# 28GU, PCGS# 8869

**1911-D Indian Eagle, MS63  
Prime Condition Rarity**

**3313 1911-D MS63 PCGS.** The 1911-D Indian eagle claims a minuscule mintage of 30,100 pieces and few high quality examples were saved by contemporary collectors. As might be expected, the survival rate for the issue is quite low. The combination of tiny mintage and low survival rate makes the 1911-D the premier condition rarity in the Indian eagle series. Most examples seen have been heavily circulated and the issue is elusive in all Mint State grades.

This attractive Select specimen is sharply detailed in most areas, with just a touch of the usual softness on the curls around the face. The pleasing orange-gold surfaces are lightly marked for the grade and both sides radiate vibrant mint luster. Overall eye appeal is strong. Population: 45 in 63 (4 in 63+), 22 finer (1/19). NGC ID# 28GU, PCGS# 8869

**1911-S Indian Eagle, MS62  
Low-Mintage Branch Mint Issue**

**3314 1911-S MS62 PCGS.** From a small mintage of 51,000 pieces, the 1911-S Indian eagle is an elusive issue in high grade. Fortunately, a small hoard of high quality examples surfaced in Europe in the 1970s, somewhat increasing the meager supply. This impressive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces that are minimally marked for the grade. NGC ID# 28GV, PCGS# 8870

**1913-S Eagle, MS61  
Radiant Original Example**

**3315 1913-S MS61 NGC.** A close rival to the 1911-D, the 1913-S Indian eagle is also an important key date in the series, boasting a low mintage of only 66,000 coins. This Mint State example shows scattered light chatter, rather than obtrusive abrasions, with deep honey-gold color, vibrant frosty mint luster, and well-defined design elements. NGC has encapsulated 47 numerically finer representatives (2/19). NGC ID# 28GZ, PCGS# 8874

**1913-S Indian Eagle, MS61  
Elusive in All Mint State Grades**

**3316 1913-S MS61 PCGS.** Only 66,000 Indian eagles were struck at the San Francisco Mint in 1913, making the issue scarce in all Mint State grades today. This impressive MS61 example displays well-detailed design elements, with a touch of the often-seen softness on the hair around the face, and lustrous orange-gold surfaces that show the expected number of minor contact marks for the grade. NGC ID# 28GZ, PCGS# 8874

1913-S Ten Dollar, MS62  
Low Mintage of 66,000 Coins

- 3317 1913-S MS62 PCGS.** Ex: The Fairmont Collection. A mere 66,000 coins constituted the entire mintage of 1913-S ten dollar gold pieces, explaining the issue's rock-solid status as a series semikey. Frosty mint luster glistens softly from the protected areas, though it is somewhat subdued in the open fields. Each side offers light yellow and rose-gold color and good design detail. Notoriously challenging in better condition. NGC ID# 28GZ, PCGS# 8874

1913-S Ten Dollar, MS63  
Scarce This Fine, A Better Date

- 3318 1913-S MS63 PCGS.** Original prairie-gold mint luster engulfs this Select 1913-S Indian eagle in a luminous, warm cartwheel effect. Scattered light abrasions take the form of mild chatter on each side, limiting the grade but posing little visual distraction. The strike is sharp. The 1913-S Indian eagle is a semikey date in the series, coming from a mintage of only 66,000 pieces. In MS63, it is decidedly scarce, and finer pieces are rare. About two-thirds of the Mint State 1913-S tens that we have seen at auction graded MS62 or lower. Population: 30 in 63, 21 finer (2/19). NGC ID# 28GZ, PCGS# 8874

1914 Ten Dollar, MS65+  
Scarce This Well-Preserved

- 3319 1914 MS65+ PCGS.** A slightly better date in Uncirculated condition, the 1914 Indian ten is genuinely scarce in MS65. Finer pieces are rarely seen. This Plus-designed coin displays sharp devices and frosted yellow-gold mint luster. A few light grazes on Liberty's cheek and in the field are all that prevent an even finer grade. An outstanding 1914 gold eagle with tremendous visual interest. Population: 46 in 65 (3 in 65+), 15 finer (1/19). NGC ID# 28H2, PCGS# 8875

1915 Indian Eagle, MS65  
Sharply Detailed, Lustrous Example

- 3320 1915 MS65 NGC.** From a smallish mintage of 351,075 pieces, the 1915 Indian eagle is an elusive issue in high grade. This spectacular Gem exhibits razor-sharp definition on all design elements, with a wire rim on the obverse. The textured yellow-gold surfaces are free of mentionable distractions and vibrant mint luster adds to the terrific eye appeal. Census: 93 in 65 (3 in 65+, 1 in 65★), 27 finer (1/19). NGC ID# 28H5, PCGS# 8878

1915-S Indian Eagle, MS62  
Low-Mintage S-Mint Issue

- 3321 1915-S MS62 PCGS.** The 1915-S Indian eagle claims the second lowest San Francisco Mint production total of the series, at a meager 59,000 pieces. This attractive MS62 specimen offers well-detailed design elements and lustrous orange-gold surfaces that are minimally marked for the grade. Overall eye appeal is strong for this scarcer S-mint issue. Population: 74 in 62 (3 in 62+), 75 finer (1/19). NGC ID# 28H6, PCGS# 8879

1916-S Indian Eagle, MS63  
Final Pre-War Issue

- 3322 1916-S MS63 PCGS. The San Francisco Mint struck 138,500 Indian eagles in 1916, on the brink of the United States' entry into World War I. No more eagles were struck at any U.S. Mint until 1920. This impressive Select specimen exhibits well-detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster throughout. PCGS has graded 78 numerically finer examples (1/19). NGC ID# 28H7, PCGS# 8880

1926 Indian Eagle, MS66  
Registry Grade Example

- 3323 1926 MS66 NGC. More than 1 million Indian eagles were struck at the Philadelphia Mint, but few survivors can match the technical quality and eye appeal of this delightful Premium Gem. This coin exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. Census: 53 in 66 (1 in 66+, 2 in 66★), 0 finer (1/19). NGC ID# 28H9, PCGS# 8882

Vault Full of 1930-S Tens

1930-S Indian Eagle, MS64  
Heavily Melted Series Key  
Seldom Encountered Any Finer

**3324** 1930-S MS64 NGC. Small denomination gold coinage was seldom seen in circulation after World War I, as people had become accustomed to using the more convenient paper money for everyday transactions. Large denomination gold coins still had a role to play in foreign trade and as backing for paper currency, so double eagles were produced regularly throughout the 1920s to serve those needs. There was less demand for eagles, however, and after a large Philadelphia mintage of 1.4 million pieces in 1926, none were struck at any U.S. Mint until a small production of 96,000 examples was accomplished at the San Francisco facility in 1930.

As it happens, even that small mintage proved unnecessary, as an influx of gold from foreign banks more than balanced the outflow of gold in foreign trade in 1930. The unneeded eagles were stored in Mint and Treasury vaults, and none were released into circulation. A small number of coins were distributed to the public through the Treasurer's Office and a few may have been saved by members of the Annual Assay Commission. The great majority of the small mintage was melted into gold bars after the Gold Recall of 1933 took effect, and stored at the Fort Knox Bullion Depository. The 1930-S was the last branch mint eagle ever produced in this country.

Since the coins were never released into circulation, nearly all examples seen today are in Mint State condition. Experts believe the surviving population numbers about 200 coins, with only a handful in circulated grades. Mike Fuljenz notes that many survivors suffered from rough storage and handling, so excessive surface marks can be a problem. Accordingly, the 1930-S is a rare issue in grades above MS64.

The present coin is an attractive Choice example, with unusually smooth yellow-gold surfaces. The design elements are sharply detailed in most areas, with just a trace of the usual softness on the curls around the face. Both sides radiate vibrant mint luster, with terrific eye appeal. We expect intense competition from series specialists when this lot is called. Census: 25 in 64, 14 finer (1/19). NGC ID# 28HA, PCGS# 8883

**1932 Ten Dollar, MS66**

Uncollectible in Better Condition

- 3325** 1932 MS66 PCGS. This Premium Gem ten dollar gold piece grades more than three points higher than the typical survivor, and only a single example is numerically finer at PCGS (2/19). Frosty yellow-gold surfaces are smooth and exhibit strong detail, aside for a touch of softness on the eagle's wing tip. A couple of ticks in the lower-left obverse field define the grade. NGC ID# 28HB, PCGS# 8884

**1932 Eagle, MS66**  
One Coin Finer at PCGS

- 3326** 1932 MS66 PCGS. Given the relative inaccessibility of the ultra-rare 1933, most collectors treat this like the final issue in the series. It also happens to be one of the most plentiful — within reach through MS66. This glittering Premium Gem enjoys warm yellow-gold color and smooth, finely textured fields. Mark on the chin, the eagle's wing tip, and the eagle's neck are the only ones worth mentioning. PCGS reports a single finer submission (2/19). NGC ID# 28HB, PCGS# 8884

**1932 Indian Eagle, MS66**

Condition Rarity in Finer Grades

- 3327** 1932 MS66 NGC. From a truly large mintage of 4.4 million pieces, the 1932 Indian eagle is one of the most available issues of the series. This delightful Premium Gem exhibits sharply detailed design elements and virtually pristine yellow-gold surfaces, with vibrant mint luster and terrific eye appeal. NGC has graded eight numerically finer examples (1/19). NGC ID# 28HB, PCGS# 8884

**1932 Eagle, Frosty Premium Gem**

- 3328** 1932 MS66 PCGS. A single 1932 ten dollar gold piece is graded numerically finer at PCGS, attesting to the issue's conditional rarity above the MS66 grade level (2/19). Nevertheless, the issue maintains its reputation for being among the most collectible dates in the series. A couple of reverse alloy spots adorn this frosty, yellow-gold Premium Gem. Each side is strongly defined. NGC ID# 28HB, PCGS# 8884

**LIBERTY DOUBLE EAGLES**

**1850 Double Eagle, AU58**  
Outstanding Surfaces and Eye Appeal, CAC

**3329 1850 AU58 PCGS. CAC.** Scarce in high About Uncirculated condition as well as in full Mint State grades, the 1850 date is in extra demand by collectors as the earliest attainable double eagle from the Philadelphia Mint. As a regular issue, it fills the first-year slot in many collections. More than 1.1 million pieces were struck, mostly from the first influx of California gold to reach the Mother Mint. This example displays outstanding olive-gold surfaces with a healthy number of orange accents throughout both sides. A sharp strike and surprisingly few marks for the grade earn CAC endorsement to complement the outstanding eye appeal. Population: 59 in 58, 95 finer. CAC: 21 in 58, 15 finer (1/19). NGC ID# 268F, PCGS# 8902

**LIBERTY DOUBLE EAGLES**

**1851-O Twenty, AU55**

Collectible No Motto New Orleans Issue

**3330 1851-O AU55 NGC. Variety 2.** This die variant is most easily distinguished by the die chip to the left side of the R in LIBERTY on the coronet. With its larger mintage of 315,000 coins, the 1851-O twenty is available in appealing lower-end AU grades and does not become truly scarce until the AU58 level. Still, demand for Choice AU representatives vastly outpaces supply. This partially prooflike representative is sharply struck with minimal (small) abrasions present. NGC ID# 268J, PCGS# 8905

**1852 Twenty Dollar, MS61**

Lustrous and Attractive for the Grade

**3331 1852 MS61 PCGS.** Regardless of the year, early Type One twenties from the Philadelphia Mint are scarce. The 1852 is a bit more obtainable than other issues, some of which are shipwreck recoveries from an original mintage of more than 2 million pieces. The provenance of the present example is unknown. Lustrous, rich-gold color radiates from both sides, with scattered light abrasions concentrated on the obverse of this sharply struck double eagle. The eye appeal is well above average. Population: 55 in 61, 53 finer (2/19). NGC ID# 268K, PCGS# 8906

**1853/2' Double Eagle, Lustrous AU55**

In-Demand Guide Book Variety

**3332 1853/2' FS-301 AU55 NGC.** While the exact nature of the so-called 1853/2' date anomaly continues to prompt debate, it remains a popular Guide Book listing. This moderately abraded example shows many nicks and abrasions plus a few reeding marks, yet it retains nearly full mint luster throughout the bright, yellow-gold surfaces. A curved die line or remnant of a digit is visible within the lower loop of 3 to confirm the *Cherrypickers'* variety. Census: 31 in 55, 51 finer (2/19). NGC ID# 268M, PCGS# 145730 Base PCGS# 8909

1853-O Twenty Dollar, AU53  
New Orleans Type Coin

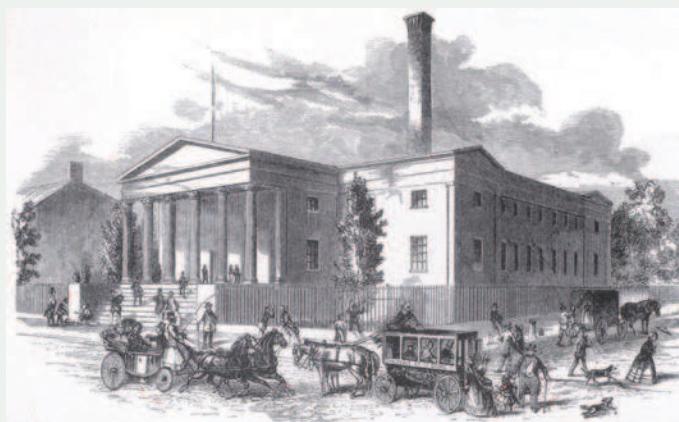

**3333** 1853-O AU53 PCGS. Variety 1. A single die pair was used to strike 71,000 double eagles at the New Orleans Mint in 1853. During this year, gold deposits were substantial at New Orleans, totaling a value in excess of \$2.1 million. Most of the gold was mined in California, with the balance being from deposits of foreign coin and foreign bullion. The following year, California gold deposits at New Orleans dropped off sharply due to the opening of the San Francisco Mint. Thus, the 1853-O is the last of the moderately high-mintage double eagles from New Orleans, which translates into it being the last readily available O-mint coin for modern-day type collectors.

Offered here is a bright yellow-gold example in AU53, showing partial luster in the satiny fields. The strike is sharp and abrasions are light and scattered. On the reverse, a small planchet lamination is evident to the left of the mintmark. Population: 20 in 53, 44 finer (1/19). NGC ID# 268N, PCGS# 8910

1854 Double Eagle, AU53  
Scarce Large Date Variant

**3334** 1854 Large Date AU53 NGC. A die lump on the lower part of Liberty's neck helps confirm the variety. Large Date 1854 double eagles are significantly scarcer than their Small Date counterparts. This About Uncirculated piece displays sharp detail and partially lustrous rose-gold fields. Brighter yellow-gold color appears on the devices. Heavy abrasions on each side are typical of Type One double eagles in AU grades. NGC ID# 268S, PCGS# 98911

**1854-S Double Eagle, MS63**  
Among the First Coins Struck at the S-Mint

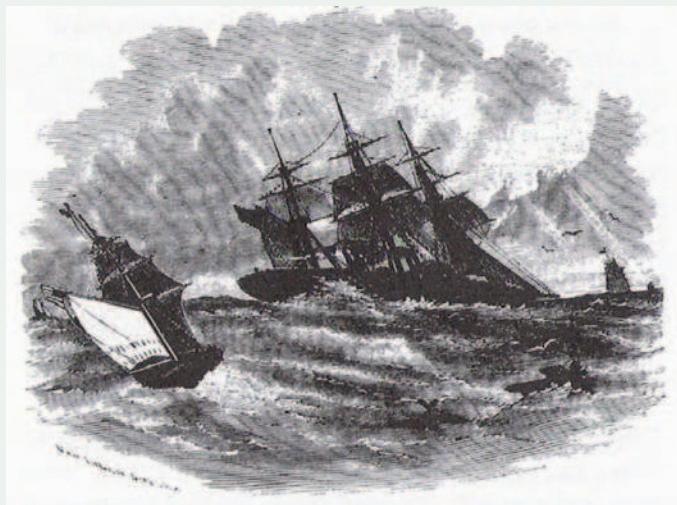

**3335** 1854-S MS63 PCGS. Large S. Dies were received for the first time at the San Francisco Mint on March 15, 1854, having been sent from Philadelphia, where they were produced. The first deposit was made at the S-mint on April 3, and the first coins — double eagles — were struck 12 days later. By the end of the year, the nascent branch mint had manufactured 141,468 twenty dollar gold pieces. Perhaps 100 or so representatives survive in mint condition, with few known finer than this Select example. Brightly frosted yellow-gold surfaces showcase razor-sharp design elements and a handful of grade-defining abrasions. Advanced die cracks appear on each side, and some planchet roughness occurs below the second S in STATES. Population: 14 in 63, 6 finer (2/19). NGC ID# 268U, PCGS# 8913

**1855-S Twenty Dollar, Lustrous AU55**  
*S.S. Central America Survivor*  
With a Pinch of Gold Dust

**3336** 1855-S Bold S, S.S. Central America #2 (with Pinch), Bob Evans Signature, AU55 PCGS. Ex: S.S. Central America. Housed in a double PCGS Ship of Gold slab with a pinch of California gold dust. The coin is highly lustrous, showing only a brush of high-point friction. No major abrasions are apparent, although scattered hairlines are visible with a loupe. An attractive 1855-S double eagle from an historic shipwreck treasure. Central America 1855-S double eagles are much scarcer than their 1857-S counterparts. PCGS# 670691 Base PCGS# 8916

**1856-S Double Eagle, MS62**

Includes a Pinch of Gold

Ex: S.S. Central America

**3337** 1856-S S.S. Central America #2 (with Pinch), Variety 17A, Full Serif, Broken A, Bob Evans Signature, MS62 PCGS. Ex: S.S. Central America. An infrequently seen 1856-S double eagle — recovered from the ill-fated S.S. Central America — is housed in this large-size Ship of Gold PCGS holder. A pinch of California gold dust is also encapsulated in the holder — it, too, was recovered from the famous shipwreck.

This special PCGS holder includes the signature of S.S. Central America chief scientist and historian, Bob Evans, who confirms recovery of the gold dust and, more importantly, the 1856-S twenty. Certified MS62 PCGS, the coin has a few light field abrasions on its attractive, frosted surfaces, but none of the marks are severe or detracting in the least. Sharply struck from Variety 17A dies, it features a full serif on the upper left of U in UNITED and a broken crossbar of A in STATES. Only a dozen Mint State examples of the 1856-S are certified from this die marriage and housed in this special holder style to date (1/19). PCGS# 670695 Base PCGS# 8919

**1856-S Twenty Dollar, MS61**

Recovered From the Central America

**3338** 1856-S No Serif, Spiked F, Variety 17K, MS61 PCGS. Ex: S.S. Central America. SSCA 5975. Hundreds of Uncirculated 1856-S twenties were among the 1,085 examples of this San Francisco issue brought up during the first recovery period, vastly increasing the supply of this previously uncollectible date in mint condition. Every design feature is strongly rendered, and both sides glow with frosty mint luster. Abrasions are absolutely minor for the grade. NGC ID# 2692, PCGS# 70020 Base PCGS# 8919

**1856-S Twenty Dollar, AU55**

Ex: S.S. Central America

With Pinch of Gold Dust

**3339** 1856-S No Serif, Right S, S.S. Central America #2 (with Pinch), Bob Evans Signature, AU55 PCGS. Ex: S.S. Central America. An attractive yellow-gold example with lustrous surfaces and only a brush of high-point wear. No major abrasions are present. Eye appeal is pleasing for the grade. A pinch of California gold dust, also recovered from the S.S. Central America, accompanies the coin, housed in the same double PCGS Ship of Gold slab. PCGS# 670710 Base PCGS# 8919

1857-S Double Eagle, MS66  
Dazzling SSCA Representative

1857-S Double Eagle, MS63  
Spiked Shield, Outstanding Eye Appeal

**3340** 1857-S MS66 PCGS. Variety 20A. This S-mint double eagle was undoubtedly one of the thousands of coins recovered from the wreck of the S.S. Central America. Although it no longer resides in its holder of issue, the raised die gouge through the left shield border, and its extraordinary preservation, are diagnostic of a coin salvaged from the Ship of Gold. Indeed, without the bounty of SSCA twenties, No Motto Liberty Head double eagles in MS66 condition would essentially be uncollectible.

This dazzling coin appears as fresh as the day it was minted. The light peach-gold surfaces are immaculately preserved, having rested undisturbed on the ocean floor for nearly 150 years. Frosty luster rolls over each side, and the impression is unequivocally strong. NGC ID# 2696, PCGS# 8922

**3341** 1857-S Spiked Shield, Variety 20A, MS63 PCGS. CAC. Ex: S.S. Central America. SSCA 3046. Some 30 years after the first treasure was brought up from the S.S. Central America, the shipwreck continues to yield gold coins that display mint-fresh luster and outstanding eye appeal after conservation. This Select Uncirculated example displays a razor-sharp strike and smooth, finely granular surfaces that exhibit exceptionally flashy, orange-gold color. Only a few tiny marks are seen, plus a small, orange-brown alloy mark near the date. Housed in its numbered gold label holder of the original distribution. CAC: 32 in 63, 363 finer (2/19). NGC ID# 2696, PCGS# 70000 Base PCGS# 8922

**1857-S Double Eagle and Pinch of Gold**  
**Ex: S.S. Central America**  
**Exceptional Rose-Gold Example, MS65**

**3342** 1857-S S.S. Central America #2 (with Pinch), Variety 20A, Spiked Shield, Bob Evans Signature, MS65 PCGS. Ex: S.S. Central America. A dazzling Gem 1857-S double eagle, brought up from the famous S.S. Central America shipwreck, and now housed in a large-size Ship of Gold PCGS holder. A pinch of California gold dust is also encapsulated in the holder — it, too, was recovered from the S.S. Central America shipwreck.

The back of the holder has the signature of chief scientist and historian of the shipwreck treasure, Bob Evans, confirming recovery of the gold dust and coin from the S.S. Central America. This luminous Gem double eagle features lovely rose-gold coloration over finely grained fields and sharply struck devices. The coin is remarkably well-preserved, with nearly mark-free surfaces. It is the oft-seen Spiked Shield variety, with a pair of distinctive tines pointing upward from the outside-left shield border. PCGS# 670713 Base PCGS# 670830

**1857-S Double Eagle, Frosty Near-Gem**  
**Ex: S.S. Central America**

**3343** 1857-S Bold S, Variety 20B, MS64 PCGS. CAC. Ex: S.S. Central America. SSCA 2194. The 1857-S double eagle has established itself as the most collectible No Motto twenty in mint condition over the past quarter-century, thanks to the recovery of the fabled Ship of Gold. This near-Gem has the usually frosty appearance, with rich sun-gold color around the rims that lighten to central shades of peach-orange. Razor-sharp with trivial, undistracting grazes. NGC ID# 2696, PCGS# 70001 Base PCGS# 8922

**1857-S Double Eagle, MS61**  
**Ex: S.S. Central America**  
**With Pinch of Gold Dust**

**3344** 1857-S S.S. Central America #2 (with Pinch), Variety-20B, Bold S, Bob Evans Signature, MS61 PCGS. Ex: S.S. Central America. A brilliant, radiantly lustrous yellow-gold 1857-S double eagle with sharp definition and only light, unobtrusive luster grazes to limit the grade. Eye appeal is outstanding for the MS61 level. Housed in a Ship of Gold PCGS holder with a pinch of California gold dust, also recovered from the S.S. Central America shipwreck. PCGS# 670715 Base PCGS# 670830

1857-S Double Eagle, MS64  
Ex: S.S. Central America  
Faint S, Bold 7, Variety 20D, CAC

**3345** 1857-S Faint S, Bold 7, Variety 20D, MS64 PCGS. CAC. Ex: S.S. Central America. SSCA 1335. A radiantly lustrous, smooth, and needle-sharp shipwreck twenty, one of the more than 5,000 1857-S double eagles recovered from the initial salvage operations that commenced in the late 1980s with discovery of the ill-fated ship. Although conserved coins often have a certain "look" that collectors recognize, this example is remarkably fresh and imbued with tantalizing sun-gold color. Orange accents play at the margins. A splendid near-Gem, with only a handful of inconsequential, tiny marks and extraordinary eye appeal. CAC endorsed. Housed in the gold label holder of its original distribution. NGC ID# 2696, PCGS# 70003 Base PCGS# 8922

1861 Liberty Twenty, MS62  
High-End Surfaces, Strong for the Grade

**3346** 1861 MS62 PCGS. The mintage of nearly 3 million pieces makes the 1861 a logical Type I double eagle for most collectors, but that theory only holds true in circulated and lower Uncirculated pieces. Shipwreck recoveries have tipped the balance among high-grade coins. This is a lustrous and well-preserved 1861 twenty, with remarkably few abrasions for the assigned grade. Gleaming rich-gold color radiates from the frosted, high-luster surfaces, and a sharp strike completes the strong eye appeal. PCGS reports just 53 numerically finer examples (1/19). NGC ID# 269G, PCGS# 8932

1861 Double Eagle, MS63  
Semiprooflike No Motto Type Coin

**3347** 1861 MS63 NGC. The 1861 was struck in greater numbers than any other No Motto Liberty Head double eagle (2.9 million pieces). Indeed, the only higher-production issues in the long-running Longacre series are the 1904 and 1904-S. It has been suggested that the higher mintage reflected a need to pay soldiers at the outset of the Civil War, but in reality soldiers were paid in paper currency. The mintage actually reflected an unusually large number of gold deposits and the demand by depositors for this denomination. The Mint also wanted to minimize the delay in converting bullion into usable coin.

The 1861 is scarcely seen this fine. Every design facet is fully struck, and noticeable semiprooflikeness exists in the fields. Rich yellow-gold surfaces display a few minor hairlines that prevent an even higher grade for this readily appealing type coin. NGC ID# 269G, PCGS# 8932

## 1861-S Double Eagle, AU58

Rarely Seen Finer

- 3348** 1861-S AU58 NGC. Medium S. The San Francisco Mint produced a small number of Paquet Reverse twenties before striking 768,000 examples with regular reverse dies. However, widespread circulation and little numismatic interest in mintmarks combined to minimize the number finer than the present coin. This No Motto piece displays just a touch of friction over lustrous, honey-gold surfaces that show abrasions evenly distributed throughout. Only 14 coins have been certified numerically higher by NGC (1/19). Ex: ANA Signature (Heritage, 8/2014), lot 4104, where it brought \$5,939.63. NGC ID# 269K, PCGS# 8935

## 1861-S Twenty, AU58

Lustrous, Original Surfaces

- 3349** 1861-S AU58 PCGS. San Francisco double eagle coinage in 1861 was less than one-sixth the production of Philadelphia. The Philadelphia issue is available in a wide variety of grades and is a popular type coin, while the 1861-S is elusive in the upper AU grade levels and it is rare in mint condition. This nearly Uncirculated coin displays partially lustrous fields and original peach-gold coloration. Surface chatter accompanies trivial high-point wear. NGC ID# 269K, PCGS# 8935

## 1861-S Double Eagle, AU58+

Challenging in High Grades

- 3350** 1861-S AU58+ PCGS. Medium S. Small quantities of 1861-S double eagles have been recovered from shipwrecks, but this remains a challenging issue to locate in high grades. Mint State coins are especially elusive. This AU58+ twenty dollar gold piece maintains considerable mint luster over lightly abraded, virtually unworn surfaces. Strike is typically incomplete for the issue. Marks are peppered throughout. PCGS reports 33 finer submissions (2/19). NGC ID# 269K, PCGS# 8935

## 1862-S Double Eagle, MS60

Infrequently Seen in Mint State

- 3351** 1862-S MS60 PCGS. The 1862-S blends in with other Type One S-mint twenties with its high mintage (more than 854,000 coins), yet, its scarcity in Mint State makes it stand out as a conditional rarity. This piece is moderately abraded, hence the numeric grade, but wholly Uncirculated. The strike is sharp and each side displays luminous peach-gold mint luster that highlights the peripheral fields and the recesses of the devices. Although this piece is at the low end of the Mint State grade range, it is about the finest quality that most collectors will be able to acquire. Coins grading finer than MS61 have made few appearances at auction over the past couple of decades. Population: 3 in 60, 24 finer (2/19). NGC ID# 269N, PCGS# 8938

## 1863 Twenty Dollar, AU50

Popular Wartime Issue  
Original and Scarce

- 3352 1863 AU50 NGC.** A multiplicity of tiny marks populate the fields and devices of this About Uncirculated double eagle, nearly all of them so minor they would not need individual mention. Mint luster remains in and around the main devices on both sides. Attractive old-gold color ensures originality of the surfaces, while a sharp strike endures despite 10 points of wear. The eye appeal is exceptional for a No Motto twenty at the AU50 level. NGC ID# 269P, PCGS# 8939

## 1863-S Twenty Dollar, MS61

Crisp Impression, Few Serious Marks

- 3353 1863-S MS61 PCGS.** Medium S. The fields are impressively unabraded for an MS61. The sole distracting marks appear under Liberty's eye. Frosty mint luster glows from the protected areas and is only slightly subdued in the open fields. The star centers and radials are complete, and Liberty's curls and the eagle's feathers display a crisp impression. Light yellow-gold color dominates, with speckled reddish accents on the obverse. NGC ID# 269R, PCGS# 8940

## 1864 Twenty Dollar, AU50

Sought-After No Motto Issue

- 3354 1864 AU50 PCGS.** The 1864 is a challenging No Motto issue with surviving population of fewer than 500 coins. Prior to the discovery of 17 Uncirculated examples on the S.S. *Republic*, the 1864 was essentially unknown in Mint State, attesting to the issue's conditional rarity. This AU50 double eagle appears to have survived above sea level. Its moderately marked yellow-gold surfaces show signs of short-term circulation, with friction over the high points. The design recesses retain partial mint luster. NGC ID# 269S, PCGS# 8941

## 1865-S Liberty Double Eagle, MS62

Nice Color and Luster

- 3355 1865-S MS62 PCGS.** Ex: Brother Jonathan 840. From a mintage of just over 1 million pieces, the 1865-S Liberty double eagle is reasonably available in Mint State grades. This attractive MS62 specimen exhibits sharply detailed design elements and vibrant mint luster throughout. The vivid orange-gold surfaces show the expected number of minor contact marks for the grade. NGC ID# 269V, PCGS# 8944

1866 Twenty Dollar, MS61  
Conditionally Scarce First-Year Motto Issue

- 3356 1866 Motto MS61 PCGS.** Ex: The Fairmont Collection. This year saw the Mint transition to the so-called Type Two design with IN GOD WE TRUST within the circle of stars above the eagle's head. The new issue was not especially well-saved. No more than a few dozen pieces are believed extant across all Mint State grades, of which a handful are finer than this lustrous MS61 offering, with luminous peach-gold color and well-formed stars, curls, and feathers. A large die crack connects TED ST on the reverse. Peppered abrasions are unsurprising considering the grade. Population: 38 in 61, 11 finer (2/19). NGC ID# 269X, PCGS# 8949

## 1866-S Liberty Twenty, AU53

First Type Two Issue

- 3357** 1866-S Motto AU53 NGC. Several coins from this consignor come from old collections, now certified. This 1866-S Motto double eagle comes out of the Bernard L. Copeland Collection, sold by Stack's in 1967. There, it was described as "a nice Very Fine" but, like a fine wine, it has improved to About Uncirculated (by today's standards). Struck during a transitional year in American coinage with the Motto IN GOD WE TRUST added to most denominations, this rich-gold example retains much of its mint luster beneath moderately abraded fields and devices. We note a gathering of short pin scratches near Liberty's forecurl.  
Ex: The Bernard L. Copeland Collection (Stack's, 4/1967), lot 1879, envelope included. NGC ID# 26B2, PCGS# 8950

## 1866-S With Motto Twenty, AU58

Scarce in Full Mint State

- 3358** 1866-S Motto AU58 PCGS. Tall S Mintmark. This still-lustrous With Motto twenty has its share of bagmarks and field chatter, but actual wear from circulation is minimal-to-nonexistent. Sun-gold color illuminates nearly full details throughout both sides. The San Francisco Mint struck more than 960,000 double eagles in 1866, most of which display the Congressionally mandated IN GOD WE TRUST motto on the reverse. Population: 41 in 58 (2 in 58+), 30 finer (1/19). NGC ID# 26B2, PCGS# 8950

## 1866-S Motto Double Eagle, MS61

A Rarity in Mint State

- 3359** 1866-S Motto MS61 PCGS. In early 1866, the San Francisco Mint struck 120,000 double eagles before the new reverse dies that bore the motto IN GOD WE TRUST arrived. The mint then produced more than 842,000 With Motto coins throughout the remainder of the year. The No Motto issue is a scarce semikey date among Liberty double eagles and is highly sought-after. However, the With Motto variant is itself notable as a condition rarity in Mint State. PCGS has seen only 30 Mint State submissions, including possible duplication, with none grading finer than MS62+ (2/19). This collectible MS61 example displays lustrous, moderately abraded yellow-gold surfaces with olive toning where the abrasions are heaviest. The devices are well-struck, and there are no individually bothersome blemishes. NGC ID# 26B2, PCGS# 8950

1867 Double Eagle, MS61  
Attractive Wheat-Gold Color

- 3360** 1867 MS61 PCGS. All 1867 double eagles are scarce in Mint State, though the issue was struck to the substantial extent of more than a quarter-million coins. This lustrous MS61 representative shows a typically uneven strike and myriad bagmarks. Original wheat-gold color is attractive. NGC ID# 269Z, PCGS# 8951

1868 Double Eagle, AU58  
Rarely Seen in Higher Grades

1868-S Double Eagle, MS61  
CAC-Approval, Radiant Mint Frost

- 3361** 1868 AU58 PCGS. A third-year Type Two issue from a small mintage of 98,575 coins, the 1868 double eagle is scarcely seen this fine and rarely offered in higher grades. PCGS estimates fewer than 10 distinct pieces survive in Mint State. This nearly Uncirculated example enjoys rich orange-gold color and abundant swirling frost that remains on each side. Lightly abraded but strongly defined and practically unworn. The date is repunched. Population: 28 in 58, 14 finer (2/19). NGC ID# 26A3, PCGS# 8953

1868-S Type Two Twenty, MS60  
Always Elusive in Mint State

- 3362** 1868-S MS60 PCGS. This eye-catching, Uncirculated 1868-S displays deeply frosted, sharply struck surfaces, with the eye appeal of an even finer grade. Cartwheel mint luster radiates across both sides. Surprisingly few Mint State examples exist given the generous mintage of 837,500 coins, and most of those are European repatriates with numerous bagmarks. While small marks are scattered throughout the obverse of this coin, they are fewer and less severe than normally seen. Currently, only one example exceeds the MS62 grade at either service, adding to the desirability of this attractive, orange-gold MS60 coin. Population: 16 in 60, 36 finer (2/19). NGC ID# 26A4, PCGS# 8954

1868-S Twenty Dollar, MS61  
Rarely Offered This Fine

- 3364** 1868-S MS61 PCGS. CAC. Ex: The Fairmont Collection. The fact that the 1868-S is such a condition rarity at this grade level should come as no surprise despite its gargantuan mintage of 837,500 coins. The San Francisco Mint's existence was predicated on its ability to convert gold bullion and churn out large numbers of commercial coinage for circulation and export. Its products were rarely saved in Mint State, except for those recovered from various shipwrecks. This CAC-approved MS61 is one of the rare exceptions. Natural, frosty surfaces radiate light golden-yellow color. Strike detail is typical for a Type Two issue. Although this coin is abraded, none of the marks are singular in nature. Population: 28 in 61, 8 finer (2/19). CAC: 6 in 61, 2 finer (2/19). NGC ID# 26A4, PCGS# 8954

- 3363** 1868-S MS61 PCGS. Available in circulated condition, this Type Two San Francisco issue is inherently scarce in Mint State, and it is decidedly rare finer than the current MS61 grade level. This piece is among the finest coins within reach of most collectors. It is well-detailed and lustrous with natural honey-gold luster. Scattered light scuffs are all that limit the grade. No singular abrasions are noted. Population: 26 in 61, 8 finer (1/19). NGC ID# 26A4, PCGS# 8954

**1870 AU58 Double Eagle  
A Highly Lustrous Example**

**3365 1870 AU58 NGC.** This brilliant and highly lustrous near-Mint example would be right at home in a collection of Mint State double eagles. While the surfaces show typical grade-consistent signs of circulation, the overall eye appeal trumps those marks on this lovely double eagle. Less than 100 finer examples appear in the combined NGC and PCGS population reports (2/19). NGC ID# 26A7, PCGS# 8957

**1870 Liberty Twenty, AU58  
Scarce Date in All Grades**

**3366 1870 AU58 PCGS.** From a mintage of 155,150 pieces, the 1870 Type Two Liberty double eagle is a scarce date in all grades today. This brightly lustrous near-Mint example displays just a touch of high-point wear on the well-detailed design elements, with lightly abraded rich-gold surfaces. We note two or three reeding marks on the otherwise smooth fields and devices.  
*Ex: ANA Signature (Heritage, 10/2012), lot 6209, where it brought \$8,225. NGC ID# 26A7, PCGS# 8957*

**1871 Liberty Twenty, AU58  
Scarce Issue, Seldom Offered in Finer Grades**

**3367 1871 AU58 NGC.** The 1871 Liberty double eagle is an elusive Philadelphia Mint issue, from a small mintage of 80,120 pieces. This attractive Near-Mint coin shows just a trace of high-point wear on the strongly impressed design elements. The pleasing orange-gold surfaces retain almost all of their original mint luster, despite a peppering of minor contact marks on both sides. Census: 81 in 58, 14 finer (2/19). NGC ID# 26AA, PCGS# 8960

**1874 Liberty Double Eagle, MS62  
Rare Any Finer**

**3368 1874 MS62 PCGS. CAC.** The 1874 double eagle claims a moderate Philadelphia Mint production of 366,780 pieces. The issue is not difficult to locate in grades from VF through AU, but Mint State coins are elusive and most Uncirculated examples grade no better than MS61. The 1874 is definitely scarce in MS62 condition and finer coins are rare. Demand for all Type Two double eagles is quite strong in today's market, making high-grade specimens, like the present coin, particularly desirable.

This attractive MS62 specimen offers vivid orange-gold surfaces with the expected number of minor contact marks for the grade. The design elements are sharply detailed and vibrant mint luster adds to the outstanding eye appeal. Population: 50 in 62 (1 in 62+), 9 finer. CAC: 7 in 62, 0 finer (1/19). NGC ID# 26AN, PCGS# 8970

**1874-CC Double Eagle, AU53**  
Attractive for the Grade

- 3369** 1874-CC AU53 PCGS. Variety 3-A. The usual wide mintmark variety. A small die lump behind Liberty's eye identifies the obverse. This Carson City issue is relatively plentiful, suitable for collectors seeking a single type coin from this mint. The fields retain glimpses of reflectivity and show minimal abrasions. The design elements are well-defined. Bright, straw-gold coloration warms each side. NGC ID# 26AP, PCGS# 8971

**1874-CC Liberty Twenty, AU55**  
Ever-Popular Branch Mint Type Coin

- 3370** 1874-CC AU55 NGC. Variety 5-A. A substantial mintage of 115,085 Liberty double eagles was achieved at the Carson City Mint in 1874, making the 1874-CC a relatively available date, and a popular issue with branch mint type collectors. This impressive Choice AU specimen offers lightly abraded orange-gold surfaces that retain most of the original mint luster intact. Only light wear shows on the well-detailed design elements. NGC ID# 26AP, PCGS# 8971

**1875-CC Double Eagle, AU55**  
Smooth Surfaces, Some Luster Remains

- 3371** 1875-CC AU55 NGC. Variety 7-A. While the 1875-CC is one of the relatively plentiful Carson City twenties, demand for gold from the Nevada Mint remains strong as ever. This Choice About Uncirculated example retains a measure of mint luster and the surfaces are surprisingly smooth for such a large-size coin carrying the CC mintmark. Pale orange-gold color deepens to tan-gold around the raised elements. Moderate wear exists from a limited stay in circulation, and a tiny die lump on Liberty's neck near the lower curls confirms the die variety. NGC ID# 26AT, PCGS# 8974

**1875-CC Liberty Twenty, AU58**  
Excellent Branch Mint Type Coin

- 3372** 1875-CC AU58 NGC. Variety 1-B. As the most-available of all Type Two Carson City twenties, the 1875-CC is a popular type coin as well as a frequent target for CC-mint specialists. This high-end AU example displays natural antique-gold color, with sharply struck devices. Abrasions are shallow and small, while mint luster glows from the obverse margins and throughout the reverse fields. The eye appeal exceeds that of many Mint State coins. NGC ID# 26AT, PCGS# 8974

**1875-CC Liberty Twenty, AU58**  
Excellent Branch Mint Type Coin

- 3373** 1875-CC AU58 PCGS. CAC. Variety 7-A. A die chip on the neck and a die line above the E in AMERICA are diagnostic markers for this variety. With a relatively high mintage and survival rate for the facility, it is unsurprising the 1875-CC is such a popular issue for type representation. Mixed shades of rose and green-gold grace this well-detailed, surprisingly lustrous double eagle. Numerous marks over each side, as usual. NGC ID# 26AT, PCGS# 8974

1875-CC Double Eagle, MS61  
High-Grade Carson City Type Coin

**3374** 1875-CC MS61 PCGS. Variety 7-A. Ex: The Fairmont Collection. We know of 10 different obverse dies and four reverse dies used to strike 111,151 CC double eagles in 1875. This variety has a die chip on Liberty's neck above the B in J.B.L. and a die line from the rim above the E in AMERICA. The 1875-CC is one of the more collectible Carson City twenties, with survivors being available in the absolute sense through MS61 and even MS62.

Honey-gold color and soft, glowing mint luster characterize this impressive Mint State double eagle. The star radials are almost entirely clear, and the curls and feathers show good detail. The only singular abrasion occurs in the field left of Liberty's nose, though myriad minor marks are scattered over each side. NGC ID# 26AT, PCGS# 8974

1876-CC Double Eagle, Choice AU  
Partly Lustrous, Light Yellow-Gold Surfaces

**3375** 1876-CC AU55 NGC. Variety 3-A. Between the 1875-CC and the 1876-CC double eagles, the former is the more available, while the latter claims the higher mintage (138,441 coins). Both serve as excellent options to represent the type. Partly lustrous with light yellow-gold color, each side of this Nevada mint twenty dollar displays a good impression and remarkably few severe or distracting abrasions. NGC ID# 26AW, PCGS# 8977

1876-CC Twenty Dollar, MS60  
Attractive for the Grade

**3376** 1876-CC MS60 PCGS. Variety 5-B. The reverse die is unique to this variety of 1876 coinage, with the mintmark perfectly centered over the space between the NT in TWENTY. The 1876-CC double eagle is a plentiful date among Carson City gold, but Uncirculated pieces remain scarce. This attractive coin is frosty and lustrous with well-struck design elements. Light surface grazes limit the grade, but none are individually bothersome. NGC ID# 26AW, PCGS# 8977

1876-CC Liberty Twenty, MS60  
Vivid Color, Vibrant Luster

**3377** 1876-CC MS60 NGC. Variety 1-B. The vivid orange-gold surfaces of this Mint State double eagle radiate especially vibrant mint luster on both sides, generating outstanding eye appeal. The design elements are well-detailed and the surfaces show the expected number of minor contact marks for the grade. The 1876-CC represents the final year of the Type Two design. NGC ID# 26AW, PCGS# 8977

**1877-CC Liberty Double Eagle, AU58**  
First Type Three Issue

**3378 1877-CC AU58 NGC. Variety 1-A.** The design of the double eagle was modified to the Type Three motif in 1877, with the denomination spelled out as TWENTY DOLLARS. This was the only major design change that occurred during the Carson City Mint's years of operation. Mintage of double eagles declined somewhat at the Carson City facility in 1877, to 42,565 pieces, and few examples were saved for numismatic purposes. Today, the 1877-S is scarce in the higher ranges of AU, and Mint State specimens are rare.

This attractive near-Mint specimen exhibits just a trace of high-point wear on the sharply detailed design elements. The vivid orange-gold surfaces retain much of their original mint luster and show only a few scrapes and roller marks on the obverse. Overall eye appeal is outstanding for the grade. NGC has graded 24 numerically finer examples (2/19). NGC ID# 26AZ, PCGS# 8983

**1877-S Twenty Dollar, MS62**  
Lustrous, Early Type Three Issue

**3379 1877-S MS62 PCGS. CAC.** While the 1877-S is one of the more available early Type Three twenties, its availability in Mint State condition drops off sharply above MS62. This CAC-endorsed example represents excellent value. The surfaces are bright orange-gold with the usual thick San Francisco mint frost. A number of small abrasions are seen on each side, but the CAC designation speaks volumes about the eye appeal of this coin. PCGS has graded 39 numerically finer examples (1/19). NGC ID# 254B, PCGS# 8984

**1879-S Liberty Double Eagle, MS62**  
None Finer at NGC

**3380 1879-S MS62 NGC.** Despite a substantial mintage of 1.2 million pieces, the 1879-S Liberty double eagle is scarce at the MS62 grade level, and finer coins are decidedly rare. This attractive MS62 specimen is sharply detailed throughout and the vivid orange-gold surfaces show the expected number of minor contact marks for the grade. Vibrant mint luster adds to the considerable eye appeal. Census: 53 in 62, 0 finer (1/19). NGC ID# 26B9, PCGS# 8991

**1880-S Liberty Twenty, MS62**  
Rare Any Finer

**3381 1880-S MS62 NGC.** From a mintage of 836,000 pieces, the 1880-S Liberty double eagle is a scarce issue in MS62 condition, and finer coins are rare. This attractive MS62 example exhibits well-detailed design elements, with just a trace of the usual softness on Liberty's curls. The vivid orange-gold surfaces are lustrous and appropriately abraded for the grade. Census: 54 in 62 (1 in 62+), 10 finer (1/19). NGC ID# 26BB, PCGS# 8993

1882-CC Twenty Dollar, AU50  
Readily Appealing for the Grade

**3382** 1882-CC AU50 NGC. CAC. Variety 1-A. Reverse A is scarcely seen, identified by the first C in the mintmark higher than the second. Original red and olive-gold color is the defining feature of this lovely Carson City double eagle. The coin was briefly put into circulation, but it retains strong detail and hints of mint luster. Readily appealing for the grade, as affirmed by the CAC approval sticker. NGC ID# 26BF, PCGS# 8997

1882-CC Twenty Dollar, AU58  
Straw-Gold Color

**3383** 1882-CC AU58 NGC. Variety 1-B. This die variety features a raised spike in front of Liberty's eye, and the second C in the mintmark is slightly higher than the first. Soft mint luster emanates from the recessed areas of the design. Each side exhibits straw-gold color and crisp detail with minimal evidence of friction. From a paltry mintage of 39,140 coins. NGC ID# 26BF, PCGS# 8997

1883-CC Twenty Dollar, AU55  
Elusive CAC-Recognized Example

**3384** 1883-CC AU55 NGC. CAC. Variety 2-A. Hints of luster remain in the fields of this Choice AU Carson City double eagle, complementing sharp design elements that show only a touch of wear. No obtrusive abrasions are apparent. CAC-endorsed coins in this grade are scarce. This piece is especially appealing as the surfaces are original. NGC ID# 26BH, PCGS# 8999

1883-CC Double Eagle, AU58  
59,962 Coins Struck

**3385** 1883-CC AU58 NGC. Variety 2-A. Carson City Mint employees accomplished a lowly production of 59,962 double eagles in 1883. A fair number of those coins must have been used as payment in foreign trade. This near-Mint representative shows a trace of blending over the stars, curls, and feathers. Remnants of original mint luster glow from the design recesses. Scattered marks are generally superficial. NGC ID# 26BH, PCGS# 8997

1883-CC Double Eagle, AU58  
Partially Prooflike Surfaces

**3386** 1883-CC AU58 NGC. Variety 1-B. Glimpses of reflectivity remain around the obverse stars and date, while the reverse is more extensively prooflike throughout the fields. A touch of wear from circulation and accompanying field chatter account for the AU58 grade. Sharply struck with wheat-gold color and soft mint luster. The 1883-CC ranks among the most available Carson City twenties for Type Three representation in near-Mint or finer grades. NGC ID# 26BH, PCGS# 8999

1883-CC Twenty Dollar, Natural AU58

**3387** 1883-CC AU58 PCGS. CAC. Variety 1-B. A die line between the rim and star 13 and others within the reverse shield confirm the attribution. A number of 1883-CC twenties from overseas importations have hit the market in recent years, but few are as fine as this borderline-Mint State survivor with CAC's approval. Honey and khaki-gold color is entirely natural, blending with frosty luster within the hidden areas of the design. A strongly rendered type coin from the fabled Carson City branch mint. NGC ID# 26BH, PCGS# 8999

**1884-CC Double Eagle, AU58**  
Highly Lustrous Fields

**3388** 1884-CC AU58 NGC. Variety 1-A. A lone die variety is known for the 1884-CC double eagle, despite a mintage in excess of 81,000 coins. This attractive Carson City type coin displays frosty yellow-gold luster in the protected parts of the fields, with light handling marks in the open areas that limit the grade. Barely a brush of friction is evident over the Liberty portrait. NGC ID# 26BK, PCGS# 9001

**1884-CC Twenty Dollar Liberty, AU58**  
Type Three Branch Mint Issue

**3389** 1884-CC AU58 PCGS. Variety 1-A. The 1884-CC twenty dollar Liberty claims a mintage of 81,139 pieces, making it an available issue and a popular choice with type collectors seeking a Type Three example for their collections. This near-Mint specimen shows little wear on the well-detailed design elements, and the orange-gold surfaces are lightly abraded, aside from a couple of horizontal marks on the portrait. NGC ID# 26BK, PCGS# 9001

**1884-CC Double Eagle, Lustrous MS61**

**3390** 1884-CC MS61 PCGS. Variety 1-A. The only known die pair for the 1884-CC double eagle, exhibiting a diagnostic intersection of die lines on the lower neck. A large portion of the 81,139-coin mintage was exported overseas for foreign trade payments, and those coins are slowly making their way back to the U.S. for present-day collectors. The dusky high-point color is frequently encountered on these repatriated gold coins. This lovely Mint State piece exhibits luminous yellow-gold surfaces and rose overtones. Far finer than the average certified grade of AU53. NGC ID# 26BK, PCGS# 9001

**1889-CC Double Eagle, AU53**  
Smooth and Partially Lustrous

**3391** 1889-CC AU53 NGC. Variety 1-A. A popular Carson City date, the 1889-CC double eagle comes from a limited mintage of 30,945 pieces. In AU53 it is usually collectible, but this example has above-average luster in the protected areas, and the olive-gold surfaces are uncommonly smooth. The strike is sharp and wear is light. NGC ID# 26BV, PCGS# 9011

**1889-CC Twenty, AU58**  
Always Popular Carson City Date

**3392** 1889-CC AU58 NGC. Variety 1-A. Both silver dollars and double eagles were struck at the Carson City Mint late in 1889, and both issues had low mintages. Just 30,945 twenty dollar gold pieces were struck. This near-Mint example has far fewer than the expected number of abrasions for the grade, with smooth and attractive straw-gold surfaces and a sharp strike. Soft mint luster glows from both sides. NGC ID# 26BV, PCGS# 9011

**1890-CC Double Eagle, AU58**  
Prooflike Fields

**3393** 1890-CC AU58 PCGS. Variety 1-A. The reverse is lightly lapped, with the eagle's tailfeathers only partially weakened as a result. Later states of this die pair show more extensive lapping of the reverse. This near-Mint 1890-CC double eagle displays honey-gold and yellow coloration with deeply mirrored fields. Light high-point friction and scattered light marks do not overly affect the eye appeal. NGC ID# 26BY, PCGS# 9014

1890-CC Liberty Twenty, AU58  
Sharp Luster, Attractive Western Gold

**3394** 1890-CC AU58 NGC. Variety 1-A. Western gold from old collections tends to be nice, and this near-Mint 1890-CC is no exception. It comes out of the Bernard L. Copeland Collection, sold by Stack's in 1967. More than half a decade later, it still radiates copious mint luster from gleaming, frosted surfaces with (perhaps) a whisper of rub. Marks and abrasions are minimal for the issue, which is always a favorite among Carson City specialists.  
Ex: The Bernard L. Copeland Collection (Stack's, 4/1967), lot 1879, envelope included. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, MS60  
Partially Prooflike Surfaces

**3395** 1890-CC MS60 NGC. Variety 1-A. Substantial reflectivity remains despite moderate abrasions across lustrous, orange-gold surfaces. This popular Carson City issue has sharply struck devices that show no trace of circulation, although numerous tiny bagmarks suggest a long stay in storage with some intervening transit and handling. The eye appeal is excellent for an MS60 coin. NGC ID# 26BY, PCGS# 9014

1890-CC Twenty Dollar, MS61  
Remarkably Lustrous Surfaces

**3396** 1890-CC MS61 PCGS. Variety 1-A. The 1890-CC twenty is typically seen with thick mint luster and numerous abrasions from bag-to-bag transfer in Europe over the past 125 years. This piece shows pleasing reddish-gold patina and the mint luster is bright. Many 1890-CC double eagles are not fully struck, but this one displays bold definition over all the design elements on each side. NGC ID# 26BY, PCGS# 9014

1892-CC Liberty Double Eagle, AU53  
Branch Mint Type Three Issue

**3397** 1892-CC AU53 NGC. Variety 1-A. Despite the small mintage of 27,265 pieces, the 1892-CC is one of the more available issues in the Carson City series. Many coins were used to settle large accounts in foreign trade and later repatriated to augment the supply for collectors. This lightly worn AU53 example exhibits lightly abraded reddish-gold surfaces, with somewhat subdued mint luster. NGC ID# 26C6, PCGS# 9020

1892-CC Liberty Double Eagle, AU55  
Always Popular Carson City Type

**3398** 1892-CC AU55 NGC. Variety 1-A. Considered rare at one time, European repatriates have rewritten the population reports and the 1892-CC twenties are now readily available compared to pre-2000 years. Attractive, Choice examples are still highly sought by collectors of Carson City gold. Strong mint luster remains on this Choice About Uncirculated coin, with a sharp strike and minimal abrasions or marks. The obverse is nicely frosted, while the reverse has prooflike tendencies. NGC ID# 26C6, PCGS# 9020

1893-CC Double Eagle  
Uncirculated Sharpness

**3399** 1893-CC — Cleaned — NGC Details. Unc. Variety 2-A. A past cleaning is noted by NGC, although this attractive final-year twenty shows little evidence of the deed — no tell tale hairlines or other signs of mishandling. Mint State sharpness remains on both sides of this frosted, rich-gold double eagle. Small bagmarks dot the surfaces, but they are widely spaced and tiny, of little consequence. Eye appeal is uncompromised. NGC ID# 26C9, PCGS# 9023

1893-CC Liberty Twenty, MS61  
Final-Year Branch Mint Type Coin

1893-CC Double Eagle, MS62  
Superior Strike, Color, and Luster

**3400 1893-CC MS61 NGC.** Variety 1-A. Only 18,402 Liberty double eagles were struck at the Carson City Mint in 1893, the last year of coining operations at the famous Western facility. Surprisingly, the 1893-CC is much more available in high grade than its nominal production total would suggest. A substantial number of pieces have been repatriated from European holdings in recent times. Although the 1893-CC is still a scarce issue in higher Mint State grades, its status as the final Carson City double eagle makes it especially popular with branch mint type collectors.

The present coin exhibits sharply detailed central design elements, with the slightest softness on some peripheral devices. From an early state of the dies, this piece does not show the usual die cracks through the bottom of the date and the letters TAT in STATES. The orange-gold surfaces radiate vibrant mint luster and are lightly marked for the grade. NGC ID# 26C9, PCGS# 9023

**3401 1893-CC MS62 PCGS.** Variety 2-A. The usual die marriage exhibits a spiked gouge from the base Liberty's neck. Double eagle output at the Carson City Mint came to a close in 1893 with the production of 18,402 coins. Those that survive, on average, fall between AU55 and AU58, while examples at this grade level are scarce. Select Uncirculated representatives are even beyond the reach of most advanced collectors. However, Rusty Goe has noted that the "workers put forth extra effort to produce the highest quality coins possible and collectors today can thank them for this. When beholding just about any problem-free 1893-CC in AU or above, one can see the superiority of the strike, luster, and color." This piece is no exception, featuring rich red-gold color, a razor-sharp impression, and cartwheel mint luster. Abrasions are relatively minor. Only 24 pieces are graded higher at PCGS (2/19). NGC ID# 26C9, PCGS# 9023

1902 Double Eagle, MS62  
Low-Mintage Type Three Issue

**3402** 1902 MS62 PCGS. CAC. A key to the 20th century Liberty Head double eagle subset, the 1902 has a mintage of just 31,140 pieces and it is scarce at the MS62 level or higher. Overall, the issue is rare at the MS64 grade and virtually unobtainable any finer. This frosted, rich-gold MS62 has a few light marks that determine the grade, yet it is sharper and more attractive than normally seen for the grade. The coin is housed in a previous generation green label holder with CAC endorsement. NGC ID# 26CU, PCGS# 9041

1906-D Liberty Double Eagle, MS64+  
First-Year Branch Mint Issue

**3403** 1906-D MS64+ PCGS. The Denver Mint struck an adequate mintage of 620,250 Liberty double eagles in 1906, its first year of coinage operations. Despite the healthy production total, the 1906-D is a rare issue in grades above MS64. This Plus-graded Choice example exhibits sharply detailed design elements and well-preserved peach-gold surfaces, with vibrant mint luster on both sides. PCGS has graded 19 numerically finer examples (1/19). NGC ID# 26D5, PCGS# 9050

1906-S Double Eagle, MS64+  
Scarce CAC-Approved Example

**3404** 1906-S MS64+ PCGS. CAC. Moderately available in MS64, the 1906-S double eagle is a major rarity any finer. This piece, Plus-graded and CAC endorsed, yields luminous, shimmering luster in shades of peach and rose-gold. Well-struck design elements and a lack of bothersome contact marks only increase the eye appeal. Population: 27 in 64+, 5 finer. CAC: 37 in 64, 3 finer (1/19). NGC ID# 26F6, PCGS# 9051

1907 Liberty Head Twenty, MS65  
Top-Grade Rarity

**3405** 1907 Liberty MS65 PCGS. CAC. The 1907 Liberty double eagle, a popular final-year type coin, is rare in MS65, and finer representatives of the date are unknown. This piece is outstanding for the grade, showcasing a sharp strike and satiny tangerine-gold luster. Only a few faint marks on Liberty's cheek prevent an even finer grade. CAC-endorsed in a green label holder. Population: 24 in 65 (1 in 65+), 0 finer. CAC: 4 in 65, 0 finer (1/19). NGC ID# 26D7, PCGS# 9052

## HIGH RELIEF DOUBLE EAGLES

1907 Wire Rim High Relief Twenty, AU Details

**3406** 1907 High Relief, Wire Rim —Damaged — PCGS Genuine. The PCGS number ending in .98 suggests Damage as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an AU specimen that has been damaged and cleaned. The damage appears to be limited to the obverse rim at 9 o'clock where it looks like the rim has been smoothed. The surfaces are overly bright from cleaning, and numerous small marks are peppered across each side. Still, it is a High Relief and friction has diminished only minimal high-point details.

1907 Wire Rim High Relief Twenty, AU53  
Problem-Free for the Grade

1907 Wire Rim High Relief Twenty, MS64  
Modeled After the Nike of Samothrace

**3407 1907 High Relief, Wire Rim AU53 PCGS.** When one looks through the Heritage Auction Archives (which we highly recommend), it is remarkable not so much that AU examples of the High Relief exist, but rather how many net graded High Reliefs there are whose problems drop them down into the AU range. This is definitely not one of those coins. The problem-free nature of this piece was immediate when first seen. There is the expected loss of luster in the fields and over the high points, and slight friction over the highest portions of the design elements, but no problems. The surfaces are bright yellow-gold with the slightest tinge of reddish patina and the only observable flaw is a Mint-made planchet depression on the left side of the sun on the reverse. NGC ID# 26F2, PCGS# 9135

**3408 1907 High Relief, Wire Rim MS64 PCGS.** The figure of Nike that was used by Augustus Saint-Gaudens has classical origins from the island of Samothrace. Nike is the goddess of Victory. In its original placement on Samothrace, the figure was placed on the prow of a ship. The figure was depicted at the moment it alighted, indicating victory. The original placement of the Nike on Samothrace was to celebrate the defeat of Pausias II, who had sailed his fleet down the coast from Bithynia (northern Turkey today), raiding and sacking every sanctuary along the way. There is an ironic duality of message in this story, however; since the shoreline sanctuaries were used by sailors to propitiate the gods not to dash them against the rocks, those same sailors thanked the gods for wrecking enemy sailors against those same rocks. There is a curious duality of message that also exists with Saint-Gaudens' Sherman Group, from which the striding figure of Liberty on the double is derived: Destroy the enemy while saving the Union. The figure of Liberty (Nike) is central to the design and understanding of the 1907 double eagle that was struck in high relief. This particular High Relief twenty shows extraordinary detailing on the figure of Liberty as well as the eagle, and the surfaces display thick, satiny mint luster. This high-end MS64 example also shows an even layer of light reddish patina that is usually encountered on originally preserved High Reliefs. NGC ID# 26F2, PCGS# 9135

1907 Flat Rim High Relief Twenty, MS62+  
Satiny Surfaces

**3409 1907 High Relief, Flat Rim, MS62+ NGC. CAC.** As the first professional sculptor to design U.S. coinage, Augustus Saint-Gaudens' expectations for coin designs were radically different than those of Chief Engraver Charles Barber. Barber was accustomed to producing shallow relief designs that could be struck with one pass through a steam press. Saint-Gaudens, on the other hand, had produced many bas-relief works in his career, but he never had to give consideration to full definition as there was no back side to such works. The few medals he produced were struck multiple times to fully bring up the details, and that is what was ultimately required with his High Relief double eagles: three strikes from a hydraulic press. The Mint's unfamiliarity with coins in high relief initially caused a special problem with a gap left between the die faces and collar, "finning" as it was known to Mint personnel. The Flat Rim High Relief was the answer to this "problem," essentially eliminating "finning." The satiny surfaces on this piece are bright and show just the slightest tinge of reddish patina with no obvious contact marks. NGC ID# 26F2, PCGS# 9136

## SAINT-GAUDENS DOUBLE EAGLES

1908 No Motto Twenty, MS67  
Ex: Wells Fargo Hoard

**3410 1908 No Motto, Wells Fargo Nevada, MS67 NGC.** Ex: Wells Fargo Nevada Gold. Short Rays obverse. A well struck, immaculate, and lustrous peach-gold Superb Gem. A strike-through beneath the I in AMERICA is as made and the sole imperfection. The obverse has a prominent railroad rim near 3 o'clock. The quantity and quality of the Wells Fargo hoard amazed the numismatic hobby upon its late 1990s dispersal.

*Ex: Houston Signature (Heritage, 11/2012), lot 5232, realized \$6,462.50. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142*

1908 No Motto Double Eagle, MS67  
A Wells Fargo Hoard Coin

**3411 1908 No Motto, Wells Fargo Nevada, MS67 PCGS.** Ex: Wells Fargo Nevada Gold. Short rays, as seen only on the No Motto coins of this date and mint. The Wells Fargo Hoard, which was made public in the late 1990s, included nearly 20,000 1908 No Motto double eagles, mostly in Gem or finer condition. This Superb Gem example is an outstanding type coin. Satiny luster illuminates well-struck devices and smooth peach-gold surfaces. Eye appeal is exceptional. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

1908-S Saint-Gaudens Twenty, AU58  
Lowest-Mintage With Motto Issue

**3412 1908-S AU58 PCGS.** The 1908-S is the lowest mintage With Motto Saint-Gaudens double eagle, with a scant mintage of just 22,000 pieces. The San Francisco Mint had trouble adjusting its older equipment to the new double eagle design — most notably, the collar mechanism — since the coins would not stack properly. Double eagle coinage was suspended until the problem was solved in 1909. This lightly abraded, near-Mint State example shows myriad tiny marks but no heavy abrasions. A sharp strike adds to the greenish-gold eye appeal. NGC ID# 26FA, PCGS# 9149

1909/8 Double Eagle, MS64  
FS-301, Guide Book Variety

**3413 1909/8 FS-301 MS64 PCGS.** The date was hubbed on the double eagle by 1909, meaning that this overdate was created by a working die being paired to hubs that bore two different dates during its manufacturing process. The errant 8 is evident in the open loop of the 9. FS-301 is highly sought after as the only major variety in the Saint-Gaudens double eagle series. This Choice example is well-struck and has frosty yellow-gold mint luster. Only a few trivial contact marks are apparent beneath a loupe. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**1910-S Double Eagle, MS66**  
Scarce This Fine, Rare Any Finer

**3414 1910-S MS66 PCGS Gold Shield.** More than five years have passed since we last offered a 1910-S double eagle in the seldom-granted Premium Gem grade. PCGS and NGC have certified a combined 19 examples at MS66, plus only three finer coins. Roger Burdette estimates a total of 9,500 pieces survive from a mintage of more than 2.1 million 1910-S double eagles. About 70-75% of those were repatriated from foreign holdings. Such coins would be an unlikely source for an example of this quality, given the rigors of transit and storage.

This brilliant, medium-gold example is sharply struck, with smoothly frosted surfaces and just a handful of tiny, nondistracting marks. The Large S mintmark has a broad diagonal, and the eagle sports a "Long Eye" from die polishing. Cartwheel mint luster illuminates all aspects of the famous Saint-Gaudens design. The quality of this coin makes one wonder if it was purchased directly from the San Francisco Mint and so-preserved throughout its tenure in collector hands. Population: 10 in 66 (3 in 66+), 2 finer (1/19). NGC ID# 26FH, PCGS# 9156

**1911-D Twenty Dollar, MS66+**  
Few Finer at PCGS

**3415 1911-D MS66+ PCGS Gold Shield.** A minority of the Premium Gem 1911-D double eagle survivorship is Plus-designated, and finer pieces are rare, particularly in PCGS holders. This high-end example showcases sharp definition and satiny wheat-gold cartwheel luster. Only a few light contact marks are apparent beneath a loupe, none distracting. Population: 30 in 66+, 10 finer (1/19). NGC ID# 26FK, PCGS# 9158

**1915 Double Eagle, Sun-Gold MS64**

**3416 1915 MS64 PCGS. CAC.** The population of 1915 double eagles at PCGS drops by almost 50% from MS63 to MS64, and the issue becomes prohibitively scarce in Gem condition. Gleaming mint frost shines from each side, illuminating the eye-appealing sun-gold color and well-struck devices. Two abrasions are hidden within the eagle's feathers. NGC ID# 26FV, PCGS# 9167

**1924 Double Eagle, MS67**  
**Virtually Immaculate Type Coin**  
**One Example Finer at PCGS**

**3417 1924 MS67 PCGS.** About one-quarter of the 4.3 million Saint-Gaudens double eagles struck in 1924 are estimated to survive, having been shipped overseas in massive quantities and held in vaults. Recipients mainly included Germany (part of the Dawes Plan loan), Netherlands, Spain, Argentina, Uruguay, and Ecuador. Over the past few decades, hundreds of thousands of 1924 double eagles have been repatriated, making this one of the most plentiful dates in the series. Even Premium Gems are widely available. The 1924 twenty only becomes elusive in MS67, and finer coins at PCGS (one) and NGC (three) combined can be counted on one hand (2/19).

This virtually immaculate double eagle radiates swirling mint luster over glowing, fully struck, medium yellow-gold surfaces devoid of obvious contact. A finer example to represent the type is unimaginable. NGC ID# 26G7, PCGS# 9177

**1924-S Twenty Dollar, MS62**  
**Heavily Melted Issue**

**3418 1924-S MS62 NGC.** There were 139 deliveries of 1924-S twenties with a total production just shy of 3 million pieces. Almost all were melted into bars, the exceptions being the Assay Commission coins and those pieces stored along with uncirculated gold coins. This is a bright golden-yellow example that shows a few slight marks on the obverse. The reverse is especially notable for its luster and absence of abrasions. NGC ID# 26G9, PCGS# 9179

**1925-S Saint-Gaudens Twenty, MS61**  
**Lustrous, Colorful Surfaces**

**3419 1925-S MS61 NGC.** The 1925-S Saint-Gaudens double eagle claims a large mintage of 3.7 million pieces, but the majority of the coins were melted in the 1930s and the issue is surprisingly scarce in Mint State grades today. This impressive MS61 example displays well-detailed design elements and lustrous yellow-gold surfaces that are lightly marked for the grade. NGC ID# 26GC, PCGS# 9182

**1925-S Saint-Gaudens Twenty, MS62**  
**Lustrous With Excellent Eye Appeal**

**3420 1925-S MS62 PCGS.** Satin-smooth surfaces are remarkably free of abrasions for the assigned grade, while radiant sun-gold surfaces emit volumes of bright mint luster. Some tiny ticks in the rays may account for the MS62 designation, but the overall visual quality of this scarce San Francisco issue suggests a finer grade. The strike is sharp enough, although incomplete at the Capitol dome. NGC ID# 26GC, PCGS# 9182

**1928 Double Eagle, MS67  
Unimprovable Type Coin**

**3421 1928 MS67 PCGS.** Backlit with vibrant reddish-gold hues at the centers, this satin-smooth Superb Gem twenty displays lime-green highlights at the margins for outstanding visual appeal. The strike — while not quite full — is crisp and sharp. Marks are simply a non-issue for this scintillating twenty. Many thousands of the 1928 issue are certified, although the population drops precipitously at the MS67 level, and none are numerically finer at either service (1/19). NGC ID# 34VK, PCGS# 9189

**1928 Double Eagle, Frosty MS67  
A Spectacular Type Coin**

**3422 1928 MS67 PCGS.** The 1928 is the final date in the Saint-Gaudens double eagle series that is generally available in high grade, making it a popular type coin. The finest pieces are in MS67 and MS67+, and these are conditionally scarce. Nonetheless, they are among the most affordable Saints available to collectors in this grade, as few other issues in the series claim a collectible population in Superb Gem condition. The piece offered here is thoroughly lustrous and unabraded, showing all of the quality and eye appeal expected of the MS67 grade. The top of the torch and Liberty's fingers are fully defined, and the fields are virtually flawless. A loupe reveals only a few tiny marks on the highest points of the devices that deny perfection. Each side has mostly yellow-gold color, although centers exhibit a blush of deeper peach-orange. NGC ID# 34VK, PCGS# 9189

**COMMEMORATIVE SILVER**

**1921 Alabama Centennial Half Dollar, MS67  
Unknown in Higher Numeric Grades**

**3423 1921 Alabama MS67 NGC.** The issuance of the Alabama Centennial commemorative half dollar serves as a model for what the series would come to represent in the following decades. The actual 100th anniversary of Alabama's statehood was 1819, so 1919 would have been a more appropriate year to release these half dollars. Additionally, the obverse features portraits of William Wyatt Bibb and Thomas E. Kilby, governors for the state in 1819 and 1919. That Governor Kilby was still alive at the time his likeness was placed upon a coin caused much controversy. Later commemoratives would often raise similar concerns about content and timing.

This Superb Gem blends areas of brilliance with crimson, blue, and violet tones. Strike detail is strong, and abrasions are scant. Most importantly, this is one of the finest Alabama Centennial half dollars at both services combined. Census: 9 in 67 (1 in 67★), 0 finer (1/19). NGC ID# BYF2, PCGS# 9224

**1936 Elgin Half Dollar, MS68  
None Numerically Finer**

**3424 1936 Elgin MS68 PCGS.** The 20,000-coin distribution of the Elgin, Illinois centennial half dollar mirrored that of the Lynchburg, Virginia sesquicentennial halves also issued in 1936. Examples are widely collectible through most grades, but not in MS68, where the Elgin commemorative becomes a significant condition rarity. Typical shades of golden-orange, crimson, and rose adorn this Registry-worthy Superb Gem. Remarkably clean. Population: 8 in 68 (1 in 68+), 0 finer (2/19). NGC ID# BYGL, PCGS# 9303

**1922 Grant Half Dollar, MS65  
Early With Star Impression**

**3425** 1922 Grant With Star MS65 PCGS. CAC. Raised die polish lines appear in the fields on each side of this early Grant With Star half dollar. Pale golden color adorns the satiny silver surfaces, and strike definition is complete on the portrait, frame house, and trees. One of the classic commemorative keys with a small distribution of 4,256 coins. Scarce any finer. NGC ID# BYPP, PCGS# 9307

**1928 Hawaiian Half Dollar, MS65  
Gold CAC Sticker**

**3426** 1928 Hawaiian MS65 PCGS. Gold CAC. Olive-gold patina dominates most of each side, matching the Gold CAC sticker that strongly suggests this coin would get approved at the next highest grade level. The underlying surfaces are softly lustrous and undeniably clean for the Gem assessment. Only 10,000 of these Hawaiian half dollars were distributed. NGC ID# BYGR, PCGS# 9309

**1921 Missouri Half Dollar, MS66  
None Finer at PCGS**

**3427** 1921 Missouri MS66 PCGS. Both variants of the 1921 Missouri half dollar are about equally available. In fact, they are nearly equally scarce in Premium Gem condition, and neither variety is graded higher at PCGS. This richly toned example without 2x4 in the field displays mottled tan-gold and powder-blue patina over satiny surfaces. Population: 55 in 66 (3 in 66+), 0 finer (2/19). NGC ID# BYH2, PCGS# 9330

**COMMEMORATIVE GOLD**

**1905 Lewis and Clark Gold Dollar, MS66  
Seldom Seen in This High Grade**

**3428** 1905 Lewis and Clark Gold Dollar MS66 PCGS. Issued in 1904 and 1905, the Lewis and Clark Exposition gold dollar was marketed under the combined efforts of the Lewis and Clark Centennial and American Pacific Exposition and Oriental Fair Company of Portland, Oregon. Sales were through Farran Zerbe and others. The 1905-dated coins are significantly scarcer than the 1904 pieces. This Premium Gem 1905 is sharp and nearly free of the small marks that often plague the issue. Vibrant mint luster shines from frosted, sun-gold surfaces with exceptional eye appeal. PCGS reports just five numerically finer examples (1/19). NGC ID# BYLG, PCGS# 7448

**MODERN ISSUES**

**3429** Complete 32-Piece 1995-1996 Atlanta Olympics Set NGC. The set includes all clad half dollar, silver dollar, and gold half eagle issues in both proof and Uncirculated format. The half dollar issues are 1995-S Basketball MS70 and PR69 Ultra Cameo; 1995-S Baseball MS70 and PR70 Ultra Cameo; 1996-S Soccer MS69 and PR70 Ultra Cameo; 1996-S Swimming MS70 and PR69 Ultra Cameo. The silver dollar issues are 1995-D Cycling MS69; 1995-P Cycling PR69 Ultra Cameo; 1995-D Gymnastics MS69; 1995-P Gymnastics PR69 Ultra Cameo; 1995-D Paralympics MS69; 1995-P Paralympics PR68 Ultra Cameo; 1995-D Track & Field MS70; 1995-P Track & Field PR69 Ultra Cameo; 1996-D High Jump MS69; 1996-P High Jump PR69 Ultra Cameo; 1996-D Paralympics MS69; 1996-P Paralympics PR69 Ultra Cameo; 1996-D Rowing MS69; 1996-P Rowing PR69 Ultra Cameo; 1996-D Tennis MS69; 1996-P Tennis PR69 Ultra Cameo. The five dollar issues are 1995-W Stadium MS70 and PR70 Ultra Cameo; 1995-W Torch Runner MS70 and PR69 Ultra Cameo; 1996-W Cauldron MS69 and PR70 Ultra Cameo; 1996-W Flag Bearer MS70 and PR69 Ultra Cameo. (Total: 32 coins)

**TERRITORIAL GOLD**

**C. Bechtler Two and a Half, AU Details  
Rare 70G., 20 CARATS, K-13 Variety**

**3430** (1837-42) C. Bechtler Quarter Eagle, 70G. 20 CARATS — Repaired — PCGS. AU Details. K-13, R.6. A rare C. Bechtler two and a half dollar gold issue, seldom offered in any condition. This piece is sharp, showing little wear. However, extensive tooling in the fields has been performed, likely an attempt to repair contact marks. There is no trace of the radial die crack through the T in BECHTLER, although it may have been effaced by the repair work. The coin is satiny and bright with yellow-gold surfaces. Listed on page 393 of the 2019 Guide Book.

(1831-1834) C. Bechtler Five Dollar, AU55

150 G., 20 C., K-15 Variety

Rare Second Series Issue

## 3431 (1831-34) C. Bechtler Five Dollar, 150 G. 20C. AU55

PCGS. K-15, R.7. America's first gold rush took place in the piedmont area of North Carolina and Georgia in the 1820s and '30s. The expanding economy of the region desperately needed a more dependable medium of exchange than the miner's gold dust could provide. To fill this need, Christopher Bechtler, a German-born goldsmith and watchmaker, established a private mint at Rutherford, North Carolina to process gold dust from the region into useful coinage. Beginning in 1831, Bechtler and his family began producing gold coins of simple design that circulated widely in the Southern United States until the Civil War. Bechtler was a competent metallurgist and his accurate assays ensured his coins were of full weight and value. His reputation for honesty was paramount in securing the public trust throughout the region.

Bechtler began marking his coins with their exact weight and/or gold content in carats with his second series of coinage in 1831 (the first "weightless" series was struck during a few months in the summer of that year). The design for his second series five dollar gold piece, later classified as K-15 by Territorial specialist Don Kagin, was described by Henry Chapman in lot 438 of his catalog of the Zabriskie Collection (6/1909):

"(1831-34) \$5. C. BECHTLER, ASSAYER.  
\* RUTHERFORD COUNTY. R. NORTH  
CAROLINA GOLD. \* in center 5 DOLLARS 20.  
CARATS. 150. G. Borders of dots. Edge milled.  
Extremely fine, slight proof surface. Perfectly struck.  
One of the finest known specimens. Excessively rare.  
See plate."

The lot sold for \$420, a strong price for the time. Recent sales include the AU55 PCGS example in lot 5405 of the Riverboat Collection (Heritage, 4/2014), which realized \$82,250.

Bechtler's five dollar coinage was found to include slightly more gold than the standard half eagles struck at the Philadelphia Mint in the 1831-1834 time period. Congress lowered the specifications for U.S. gold coinage in 1834, to prevent the widespread hoarding and melting that had kept gold coins from circulating since 1821. This measure made the second series Bechtler coins even more overweight for their face value. Within a few years, nearly all the second series Bechtler fives had been culled from circulation and melted, making the issue extremely elusive at an early date. On PCGS CoinFacts, Ron Guth notes there are auction citations for 11 different examples known today.

The present coin is an especially attractive Choice AU specimen with bright yellow-gold surfaces that are remarkably free of distractions and show a few hints of olive patina. The fields are slightly prooflike and the design elements are sharply detailed throughout, with just a trace of high-point wear. The beaded border is bold and complete, if just slightly off center. The die alignment is about 160 degrees. This rare second series example should find a home in a fine collection of Territorial gold. Listed on page 393 of the 2019 Guide Book. Population: 6 in 55, 5 finer (2/19).

*Ex: Samuel Berngard Collection (Stack's, 7/2008), lot 2185.  
NGC ID# 2B9L, PCGS# 10118*

A. Bechtler Gold Dollar, MS62  
K-24, 27G., 21C.

**3432** (1842-50) A. Bechtler Dollar, 27G. 21C., Plain Edge MS62 PCGS. K-24, R.3. Orange-rose shades enrich this lovely and evenly struck Bechtler type coin. Magnified examination fails to locate noticeable contact, but a thin line is present on the denomination side border between 1 and 6 o'clock. The fields are semiprooflike and attractive. The Plain Edge variant is the most often seen for this issue, ideal for type collectors. Listed on page 394 of the 2019 Guide Book. Population: 13 in 62, 7 finer (2/19). NGC ID# 2B99, PCGS# 10040

A. Bechtler Gold Dollar, MS63  
Plain Edge, 27G., 21C., K-24

**3433** (1842-50) A. Bechtler Dollar, 27G. 21C., Plain Edge MS63 PCGS. K-24, R.3. A high-grade example of this Bechtler gold dollar issue, showing sharp definition and bright yellow-gold surfaces. The planchet is slightly uneven, evident horizontally across the center. This piece represents the Plain Edge, Kagin-24 variety, the more plentiful of the two edge types. The Reeded Edge variety, Kagin-25, is nearly uncollectible. This piece shows the reverse rotated about 90 degrees counterclockwise. Listed on page 394 of the 2019 Guide Book. NGC ID# 2B99, PCGS# 10040

1849 Mormon Five Dollar, AU50  
Conditionally Scarce K-2 Representative

**3434** 1849 Mormon Five Dollar AU50 NGC. K-2, R.5. Although a few rudimentary Mormon ten dollar gold pieces were made from unalloyed gold dust in December, 1848, the first real mintage of Mormon coinage was at the Deseret Mint in December, 1849. Transplanted silversmith and future die-maker James Madison Barlow is quoted by Mormon Church Historian Orson F. Whitney: "The first dies, consisting of a \$2.50, and \$5 and a \$20 piece, were made by John Kay and an old blacksmith, but were very crude." (Barlow would later make new dies for five dollar Mormon gold pieces dated 1860.)

This example is from the 1849 production using John Kay's dies. The same Clasped Hands and All-Seeing Eye were used from the 1848 design, adapted to the five dollar denomination. The coin is weakly struck in places, and all such pieces show premature wear due to their naturally alloyed green-gold content. A planchet defect is seen at 12 o'clock on the obverse, carrying over to near 6 o'clock on the reverse — typical of the mint's work in those early days. The 1849 Mormon five is seldom seen above VF to XF conditions. All were struck from the Kagin-2 dies, listed on page 409 of the 2019 Guide Book. NGC ID# 2BCE, PCGS# 10262

1861 Clark, Gruber Five Dollar  
PR63 Red and Brown  
Copper Die Trial, K-10b

**3435** 1861 Clark, Gruber \$5 Copper Die Trial PR63 Red and Brown PCGS. K-10b, R.7. A majority of copper die trials of the 1861 Clark, Gruber five were struck with a collar and show a reeded edge (K-10c). The very rare K-10b was struck from regular obverse and reverse dies, but without a collar die. As a result, the present example is broadstruck and has a plain edge. The obverse dentils between 5 and 11 o'clock have a stretched appearance, while the obverse rim is featureless and irregular between 11 and 5 o'clock. The reverse rim shows similar characteristics, except the featureless part of the rim is between 11 and 1 o'clock. Customary for a broadstrike, the centers are well impressed. The peripheral stars and legends are also sharply struck despite minor metal flow toward the border. Toned predominantly deep brown but mint red outlines the stars and fills the legends. Unabraded and impressively preserved. Housed in a first generation holder.  
*Ex: Beverly Hills Signature (Heritage, 11/2014), lot 4220, which realized \$8,812.50. NGC ID# ANLV, PCGS# 10151*

## S.S. CENTRAL AMERICA GOLD INGOTS

Blake & Co. Gold Ingot, 13.35 Ounces  
Ex: S.S. Central America

**3436** Blake & Co. Gold Ingot. 13.35 Ounces. CABG-026. "What is it about treasure that fascinates people so much?" David Lisor posed this question to Dr. Bob Evans, chief scientist and curator of the S.S. Central America recovery project, in an interview for *Coinweek* at the September 2013 Long Beach Expo. Evans replied, "I think treasure is an iconic childhood dream. ... Treasure stories are magic."

To be sure, the discovery of the more than 500 gold ingots, thousands of gold coins, countless amounts of gold dust, and scores of gold nuggets was a dream come true for the members and investors of the Columbus-America Discovery Group, as well as the public at large. The prolonged excitement that the find has generated in numismatic circles, spanning more than 30 years now, is unparalleled in the hobby, and deservedly so. The cache provided collectors with more than 5,000 1857-S double eagles in exceptional states of preservation. Near-Gem and Gem No Motto twenties were available for the first time. The hoard also included an impressive array of pioneer coinage from famous Gold Rush makers like Wass, Molitor & Co., Kellogg & Co., Moffat & Co., and Augustus Humbert (United States Assay Office of Gold).

Arguably the most important and impressive items salvaged from the wreckage 7,200 feet below the surface of the Atlantic were 577 gold bars (532 were originally recovered from 1988-1991, and another 45 pieces were brought up in 2014). Only a handful of Gold Rush ingots were known prior to that point, and many of the pieces on the market were of uncertain origin. The bars retrieved from the *Central America* provide numismatists and collectors with a perfect time capsule and archive for better understanding the hallmarks of genuine California ingots, which served such an important role in the local economy.

There is no doubt that this Blake & Co. gold bar is an iconic relic of the California Gold Rush and a wonderful souvenir of America's Western expansion. In obtaining this piece, the new owner will accomplish something most collectors can only dream of.

All six sides show the usual signs of post-production polishing, an indication that Blake & Co. may have intended their ingots for commercial usage. Three sides are imprinted. One side shows the BLAKE & Co hallmark. The adjoining side states: No 5225 (sideways) / 791 FINE / \$218.28. The third side states the all-important weight: 13.35 Oz. The ingot measures: 69 x 68 x 21 mm. As one can tell from the dimensions, this ingot is slightly trapezoidal, produced from the adjustable length "Twix Bar" mold (so-called by Bob Evans).

*From The Marcello Collection, Part V.*

## Harris, Marchand & Co. Gold Ingot, 17.48 Ounces Ex: S.S. Central America

**3437** **Harris, Marchand & Co. Gold Ingot. 17.48 Ounces.** CABG-126. The town of Herndon, Virginia is situated about 25 miles northwest of Washington, D.C. in Fairfax County. It was first settled in the early 19th century, with the construction of a mill on a stream that travels north-south along the eastern edge of the village. The building of the railroad during the 1850s, including the establishment of a rail depot in 1857, spurred the village's first real population boom. Accordingly, community members decided that year that the previously unnamed town should be called something. They agreed on Herndon in memory of Captain William Lewis Herndon, commander of the *S.S. Central America*.

Captain Herndon was a U.S. Navy veteran with 29 years of experience "in the Mexican War and the Second Seminole War, in the Atlantic and the Pacific, the Mediterranean and the Caribbean Sea. He knew sailing ships and steamers and had handled both in all weather," according to Gary Kinder's *Ship of Gold in the Deep Blue Sea*. Herndon was also an explorer, having spent a year travelling through the Amazon Valley from Lima, Peru to Para, Brazil in 1851-52, vividly cataloging the details of his trip in a best-selling report, *Explorations of the Valley of the Amazon*. Unfortunately, William Herndon is most widely recognized today for being at the helm of the ill-fated *Central America*, which sank off the coast of the Carolinas in September 1857.

By all accounts Herndon was a hero, bravely and resolutely guiding women and children toward the life boats as crew members and male passengers bailed water through the night. According to Ann Small, a passenger:

"Capt. Herndon remained self-possessed, calm and firm throughout. I shall forever think of him with gratitude. I am not surprised to hear that he is among the lost, because I knew by his appearance when I parted from him that he would be the last man to leave the ship."

According to a 2016 article in the *Herndon Patch*, the town's local circular, "Remembering Herndon's History: Why Commander Herndon was a Hero," Superintendent of the U.S. National Observatory, Lieutenant Matthew Fontaine Maury (and Captain Herndon's cousin) explained in a report to the Secretary of the Navy on the sinking of the *S.S. Central America*:

"The law requires every Commander in the Navy to show himself a good example of virtue and patriotism; and never was example more nobly set or beautifully followed. Captain Herndon, by these noble traits which have so endeared his memory to the hearts of his countrymen, and won the respect and admiration of the crew and passengers of that ship in such a degree as to acquire an influence over them that was marvelous in its effects."

In handling the extraordinary treasures preserved amid the wreckage of the *S.S. Central America*, like this gold ingot by the celebrated firm of Harris, Marchand & Co., we should always keep in mind the individual experiences that make the story so tragic, but also so compelling and historically significant.

The firm of Harris, Marchand was the only firm in Gold Rush California to use a coin-like hallmark on their ingots. This small to medium-sized ingot is nearly square with all the inscriptions on the top face. That side is laid out: No 6508 / curved H&M logo / circular H&M coin-like hallmark / 17.48 OZ. / 885. FINE / \$319.78. Most of the surfaces are yellow-gold, except for a patch of iron ore rust from the ship's hull that still adheres to the lower portion of the back side and tiny portions of rust seen on the lower-left corner. The ingot measures: 40 x 50 x 12 mm.

*From The Marcello Collection, Part V.*

JUSTIN & HUNTER

Justh & Hunter Gold Ingot, 185.21 Ounces  
Attractive Smooth Surfaces  
Ex: S.S. Central America

**3438 Justh & Hunter Gold Ingot. 185.21 Ounces.** Emil (or Emanuel) Justh was a follower of Lajos Kossuth, the famous Hungarian freedom fighter. Kossuth took advantage of the general wave of unrest that swept across all of Europe in 1848 to further the cause of Hungarian freedom from Austria. Unfortunately, his movement was crushed by Russian intervention in 1849, and Kossuth fled into exile in the United States and Great Britain. With his political future looking bleak at home, Justh opportunely heeded the siren song of the Gold Rush. He left his home in Verboca, Hungary and made his way to the German port of Hamburg. From there, he boarded ship on the *Gellert* and sailed directly for San Francisco on May 18, 1850. After 159 days at sea, he arrived on November 15 of that same year. Justh was a lithographer by profession in Hungary, and he began his career in San Francisco as a lithographer. In 1852, he and another immigrant named F.I. Goerlitz formed a short-lived general Ship and Customs House Broker business. This partnership lasted less than a month, and apparently Justh then found employment at the new Assay Office as an assayer.

Justh's future business partner, Solomon Hillen Hunter, arrived in San Francisco aboard the steamship *Sonora* on March 3, 1855. Ironically, prior to boarding this ship on the Pacific side of Panama, Hunter was a passenger on the *S.S. George Law*. Shortly thereafter, the *George Law* was renamed the *S.S. Central America*. So, Solomon Hunter was actually on board the famous treasure ship two years before it sank in the Atlantic with more than 80 gold ingots stamped with his name.

In 1855, Justh and Hunter formed a partnership in San Francisco to assay gold. The firm prospered and in the following year they opened a branch office in Marysville. In spite of its good reputation, the partnership only lasted a couple of years and was dissolved on July 10, 1858. Of course, by then millions of dollars in Justh and Hunter ingots, including the present example, as well as bars of numerous other California gold refiners lay at the bottom of the ocean, enough bullion to be a factor in the Panic of 1857.

Solomon Hunter returned to New York in 1858 and was last listed in the *Baltimore City Directory* in 1860. Emil Justh continued to lead a colorful life. In 1861, Justh sold his refinery to Kellogg, Hewston & Co. as he intended to go east. True to his word, Justh sailed to New York City and began a career as a stockbroker. In 1871, Justh had a "complicated" divorce case. The 45-year old stockbroker had the following sordid account of his life included in the *New York Times* from October 21:

"On Wednesday last John T. Burleigh of No. 23 Dey Street, appeared before Judge Shandley, at Jefferson Market Police Court, and stated that several important letters, and a check for \$30, were stolen from his safe by a private detective named A.A. Ackerman, at the instance of Emil Justh, a banker residing at No. 63 Exchange Place. Yesterday Sergt. McComb proceeded to the residence of Mr. Justh, to arrest him on the charge, but the latter refused to accompany him to the Station, and when force was used, presented a revolver at the officer's head. Patrolman Tully witnessed the occurrence, and before the weapon could be discharged wrenched it from his hand. He was then conveyed to the Station, where the letters were found in his possession. These letters, Justh alleges, afford proof of the seduction of his wife by Burleigh, and he desired to use them in proceedings for divorce now pending. Justh was discharged from custody, and Judge Shandley retained the letters in his possession for the present."

Apparently, Justh had retained the spirit of the Wild West in his Eastern life. His temerity in threatening the police with a gun could have ended badly, but the luck of the Gold Rush was still with him. Justh later moved to Paris, where he died in December 1883.

This is a clean, problem-free ingot, with remarkably smooth surfaces. It measures 149 x 71 x 29 mm. The top is impressed: NO. 4146. / Justh & Hunter (curved company imprint) / 185.21 OZS. 876 FINE. /\$3353.87. The inscriptions are attractively laid out in a horizontal pattern, with ample space between the lines. The weight in ounces and the fineness are logically recorded on the same line. The bottom side was unevenly inscribed with the individual ingot number, but only the 46 is visible. The back side of the ingot features a long depressed area often seen on these ingots, the result of the casting process. The depression is filled with a reddish-russet patina, most likely caused by contact with the rusting iron ribs of the ship (see *A California Gold Rush History* for details). This is an important memento from this historic California assayer and refiner. Ex: FUN Signature (Heritage, 1/2010), lot 2360, where it sold for \$322,000.

## CALIFORNIA FRACTIONAL GOLD

1873 Liberty Head Octagonal Quarter Dollar  
BG-728, MS67+  
The Finest at PCGS

- 3439** 1873 Liberty Head Octagonal 25 Cents, BG-728, R.3, MS67+ PCGS. A collectible Period Two octagonal quarter dollar made by Frontier & Bellemere. BG-728 is plentiful overall, although it becomes scarce in MS66 and is a rarity at the Superb Gem level. This Plus-graded coin — the only Plus-designated MS67 at PCGS — is the sole finest example of the variety at that service (2/19). It is well-struck and reflective with bright yellow-gold color. No abrasions are discernible. NGC ID# 2BNA, PCGS# 10555

1859 Liberty Octagonal 50 Cents, MS66  
BG-901, Late 'Blind Head' Die State

- 3440** 1859 Liberty Octagonal 50 Cents, BG-901, High R.6, MS66 PCGS. A star near the tip of the coronet confirms the attribution for this Liberty Octagonal 50 cent piece. Die lapping has removed Liberty's eye, hence the "Blind Head" moniker for this later die state. Surface preservation is the finest PCGS has seen for BG-901. Bright yellow-gold surfaces show noticeable prooflike reflectivity. Population: 1 in 66, 0 finer (2/19). NGC ID# 2BVV, PCGS# 10759

1871 Liberty Round 50 Cents, MS68 Prooflike  
BG-1046, Struck by Hershfield & Mitchell

- 3441** 1871 Liberty Round 50 Cents, BG-1046, Low R.7, MS68 Prooflike NGC. BG-1046 is the only 1871 Round 50 cent variety with a Small H below the flat bust truncation. The Breen-Gillio reference (2003) lists 14 pieces on its roster. No MS68 Prooflike example is included. In fact, the top coin reported is a Gem. This exquisite Hershfield & Mitchell product exhibits profound orange-gold color and dramatic field-device contrast. The centers are well-defined, while the borders are softer. PCGS# 710875

## PATTERNS

1865 With Motto Half Dollar in Silver  
Judd-429, PR65+

- 3442** 1865 Half Dollar, Judd-429, Pollock-502, Low R.7, PR65+ PCGS. The obverse die is the traditional Liberty Seated design adopted for regular coinage in 1865. The reverse features the familiar perched eagle with scroll and motto above that was adopted for regular issues in 1866. Struck in silver with a reeded edge. Unlike previous years when With Motto coinage was produced, some of the 1865 halves may be actual transitional pieces. About a dozen examples are known in silver with a similar number in copper. Much original brilliance remains, especially on the reverse; while each side shows light blue and rose toning as well. Fully struck. NGC ID# 29JF, PCGS# 60614

1867 Quarter Eagle in Copper  
Judd-595, PR65 Red

- 3443** 1867 Quarter Eagle, Judd-595, Pollock-659, R.8, PR65 Red PCGS. The regular issue design for the 1867 Liberty Head quarter eagle. Struck in copper with a reeded edge. This is another so-called "trials piece," which was actually produced solely as an addition to the Mint's rare coin inventory for sale to collectors. The Mint was the only "coin dealer" that could actually manufacture their own inventory. This is a stunning full red example. USPatterns.com estimates that a half-dozen or so pieces are believed to exist. Both sides display deep cherry-red mint luster and brightly reflective fields. The strike definition is complete across both sides. PCGS# 80807

1869 Standard Silver Quarter in Aluminum  
Judd-725, PR64

**3444** 1869 Standard Silver Quarter Dollar, Judd-725, Pollock-806, High R.7, PR64 PCGS. Liberty faces left, and is adorned with a large cap with stars along the lower-front border. IN GOD WE TRUST is featured on a scroll below the portrait. The reverse has a wreath of oak and laurel leaves, with 25 CENTS crowded inside while the date is below and STANDARD SILVER is centered above. Struck in aluminum with a reeded edge. The right obverse field has an area of slightly granular surface, as made, while the reverse has a couple of retained mint-made laminations. A few specks of oxidation are seen on each side. NGC ID# 29S9, PCGS# 60952

1871 Standard Silver Ten Cents in Copper  
Judd-1075, PR63 Red

**3445** 1871 Standard Silver Ten Cents, Judd-1075, Pollock-1211, R.7, PR63 Red PCGS. Longacre's popular Seated Indian Princess motif with conjoined flags behind and Liberty's hand resting on a globe. The reverse has 10 CENTS in the center and is surrounded by a wreath of cotton and corn, the word STANDARD at the top of that side. Struck in copper with a reeded edge. The reverse edge is much wider than the obverse. The color is phenomenal, bright cherry-red across each side. The coin's grade is explained by a few specks of carbon, mostly on the obverse. PCGS# 81334

1872 Three Dollar Dies Trial in Copper  
Judd-1238, PR63 Brown

**3446** 1872 Three Dollar, Judd-1238, Pollock-1380, High R.7, PR63 Brown NGC. A dies trial from the regular-issue 1872 three dollar dies. Struck in copper with a reeded edge. USPatterns.com suggests that fewer than half a dozen examples are known. Only two examples are currently certified (both at NGC). The Bass example was formerly graded by PCGS, but that coin no longer appears in the Population Report. This Select three dollar pattern showcases smooth chocolate-brown surfaces and full definition on the haircurls, headdress, and wreath elements. PCGS# 61510

1874 Ten Dollar Pattern in Copper  
Judd-1379, PR64 Red and Brown

**3447** 1874 Ten Dollar, Judd-1379, Pollock-1524, R.8, PR64 Red and Brown NGC. Judd-1379 was struck in copper, with a reeded edge, using the regular dies for the Liberty eagle of 1874. These may have been regular die trials but, alternatively, they may have been struck to satisfy collector demand and sold as part of complete off-metal sets. Only two or three examples are known in copper (Judd-1379), but a few more were struck in aluminum (Judd-1380). The present coin is a sharply detailed Gem with deeply reflective fields that show no mentionable distractions. The surfaces exhibit a mix of olive-brown, cerulean-blue, and orange-red patina, with outstanding eye appeal.

*Ex: Joe Flynn, Sr., purchased by Harry W. Bass, Jr. on August 10, 1971; Bass Collection, Part I (Bowers and Merena, 5/1999), lot 1398. PCGS# 71683*

## EARLY PROOF SET

1902 Six-Piece Proof Set, PR65-PR66+  
All PCGS-Certified

**3448** 1902 Six-Piece Proof Set, PR65-PR66+ PCGS. This high-grade set includes:

**Cent PR65 Red and Brown.** CAC. reddish-brown and blue coloration is seen over each side.

**Nickel PR66.** CAC. Bright and untoned with only slight contrast evident between the fields and devices.

**Dime PR65.** Deep mauve-gray toning covers each side, but at the right angle the proof mirrors flash through.

**Quarter PR65.** Deep sea-green and russet toning is scattered over each side with strong mirroring present in the fields.

**Half Dollar PR66.** CAC. The mirrored fields are especially bright and vibrant, made all the more apparent by the light toning present on each side.

**Dollar PR66+.** CAC. Deep blue-gray toning subdues the proof mirrors on the obverse, except around the outermost rim. The reverse, however, is rose colored the reflectivity fully flashes through the patina. (Total: 6 coins)

**End of Session One**

## SESSION TWO

### COLONIALS

- 3449** 1652 Oak Tree Sixpence, IN on Reverse — Plugged — PCGS Genuine. VF Details. Noe-16, W-360, Salmon 1-A, R.5. Most of the coin is sharp, but an obverse repair near 9 o'clock also affects the reverse near 3 o'clock. The dusky gray surfaces are evenly granular. A middle die state with failure near the E in MASATHVSETS. Listed on page 51 of the 2019 Guide Book.

**1652 Pine Tree Shilling, VF25**  
Small Planchet, Noe-29

- 3450** 1652 Pine Tree Shilling, Small Planchet, VF25 PCGS. CAC. Noe-29, W-930, Salmon 11-F, R.3. 69.90 gn. A distinctive variety due to the oversized 5 in the date and the crude, inward serifs on the X in XII. The M is widely repunched, and the D in ENGLAND is entered over a reversed D. The golden-brown and gunmetal-surfaced surfaces are attractive. Sharp for the designated grade, except for an area of weakness affecting the NE in NEW and on the dot quartet opposite. Boston Mint clips affect the tops of ASATH. Listed on page 51 of the 2019 Guide Book. NGC ID# 2ARZ, PCGS# 24

- 3451** 1723/2 Hibernia Halfpenny MS63 Brown NGC. M. 4.60-Da.1, W-12850, R.2. A splendid medium brown halfpenny. The surfaces are smooth and satiny, and the strike is good despite minor incompleteness on the raised arm. Two reverses (Da.1 and Db.1) constitute the 1723/2 variety, and both have a prominent overdate. Listed on page 57 of the 2019 Guide Book. NGC ID# 2ATE, PCGS# 183

**1779 Rhode Island Ship Token, AU58**  
No Wreath, Brass, W-1730

- 3452** 1779 Rhode Island Ship Token, No Wreath, Brass, AU58 NGC. Betts-562, W-1730, R.4. NGC assigned a Brown designation to this piece, but recent research concludes the variety was struck only in brass or pewter. A sharply defined token with plentiful glimmers of luster and a few moderate obverse field marks. As on all examples of W-1730, VLUGTENDE has been removed by hand from the obverse exergue. Listed on page 62 of the 2019 Guide Book. NGC ID# 26LC, PCGS# 588

- 3453** 1773 Virginia Halfpenny, No Period MS63 Brown PCGS. N. 4-O, W-1470, High R.4. The period between III and R is closer to the third I, the harp shows seven strings, and the letters in VIRGINIA are evenly spaced. This well-detailed MS63 Brown halfpenny shows the usual die rust, but the surfaces are otherwise smooth and glossy with steel-blue and red-violet tones. A seldom-offered Newman variety for the specialist. Listed on page 57 of the 2019 Guide Book. NGC ID# 2ATL, PCGS# 243

- 1773 Virginia Halfpenny, MS65+ Brown**  
No Period, N. 7-D

- 3454** 1773 Virginia Halfpenny, No Period MS65+ Brown PCGS. N. 7-D, W-1480, R.2. Small die chips at GI of GEORGIVS identify this variety. Extraordinary medium olive-brown surfaces show considerable field reflectivity with delicate blue overtones on each side. Listed on page 57 of the 2019 Guide Book. Population: 14 in 65 (3 in 65+) Brown, 8 finer (2/19). NGC ID# 2ATL, PCGS# 243

- 3455** 1786 Vermont Copper, VERMONTENSIMUM, XF40 NGC. RR-8, Bressett 6-E, W-2030, R.4. A well-defined steel-gray representative. Nicely centered, with complete legends across both borders. Minor flan imperfections affect the plow and the rays near QUARTA, but marks are limited to a few hair-thin lines below the landscape. Listed on page 84 of the 2019 Guide Book. Census: 10 in 40, 18 finer (1/19). NGC ID# 2B57, PCGS# 545

**1787 N. 11-X Fugio Cent, MS64 Brown**  
Pointed Rays

- 3456** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays, MS64 Brown PCGS. N. 11-X, W-6790, R.4. A slightly scarcer variety that was a minor part of the Bank of New York hoard. This Choice Mint State piece has faint blue overtones on its lustrous dark brown surfaces with traces of mint red. Heavy clash marks from the rings are evident on the obverse. Listed on page 99 of the 2019 Guide Book. For all varieties, PCGS has certified only 19 finer examples (2/19). NGC ID# AX5E, PCGS# 883

1787 Fugio Cent, MS64 Brown  
N. 11-B, UNITED STATES, Cinquefoils  
Ex: W. Philip Keller

- 3457 1787 Fugio Cent, UNITED STATES, 4 Cinquefoils, MS64 Brown NGC. N. 11-B, W-6785, R.4. A lovely and glossy ebony brown near-Gem. Both sides are prominently clashed, but the surfaces are essentially devoid of abrasions. Evenly impressed and desirable. Struck moderately off-center toward 10:30. Listed on page 99 of the 2019 Guide Book.  
Purchased from M.L. Kaplan (8/1958); W. Philip Keller Collection - Stamford Coinfest Signature (Heritage, 10/2010, lot 3375, which realized \$9,200. NGC ID# 2B8F, PCGS# 889

1791 Washington Cent, MS65 Brown  
Small Eagle, Baker-16

- 3458 1791 Washington Small Eagle Cent MS65 Brown NGC. Baker-16, W-10630, Musante GW-17, R.3. Designated as Brown by NGC, but the introductory crimson color lingers in protected areas of the reverse. Sea-green undertones emerge when this sharply struck Gem is rotated beneath a light. Exceptionally free from contact, and among the finest survivors of the variety. Listed on page 93 of the 2019 Guide Book. Census: 3 in 65 Brown, 0 finer (1/19). NGC ID# 2B73, PCGS# 705

1792 Washington Born Virginia Cent, VF20  
Baker-60, Musante GW-33, Legend Reverse

- 3459 1792 Washington Born Virginia Cent, Inscribed Reverse, VF20 PCGS. Baker-60, W-10730, Musante GW-33, R.5. Copper, 31mm. Plain Edge. Struck by Jacob Perkins of Newburyport, Rhode Island — the maker of the 1792 Washington President pieces in copper, silver, and gold. Detail is bold throughout the obverse, while the central reverse legend is worn away. A few fine lines appear on that side, as does a rim bump at 5:30. Smooth deep-brown surfaces. Listed on page 94 of the 2019 Guide Book. NGC ID# 2B79, PCGS# 723

Undated Liberty & Security Penny, MS64 Brown  
(1795) Lettered Edge

- 3460 (1795) Washington Liberty & Security Penny, Plain Rims, MS64 Brown PCGS. CAC. Baker-30, W-11050, Musante GW-45, R.2. These large copper pieces date from 1795, the same year as the smaller, dated Liberty & Security coins. Some marks appear on the edge of this Choice Mint State piece that exhibits reflective chocolate-brown surfaces and lovely bluish overtones. Listed on page 96 of the 2019 Guide Book. Population: 25 in 64 (2 in 64+) Brown, 5 finer. CAC: 6 in 64, 2 finer (2/19). NGC ID# 2B7V, PCGS# 767

## HALF CENTS

- 3461 1806 Large 6, Stems, C-4, B-4, R.1, MS61 Brown NGC. Manley Die State 2.0. Lightly clashed below the jaw and above the F in HALF. A chestnut-brown representative that appears unabraded save for wispy marks near the F in OF. The strike shows incomplete areas on portions of the wreath and bust tip, usual for the Cohen variety. Our EAC grade AU50. NGC ID# 222J, PCGS# 35200 Base PCGS# 1099
- 3462 1855 C-1, B-1, R.1, MS65 Red and Brown PCGS. Bright mint orange remains at the margins of this attractive Gem, while rich-brown color overlays the centers. A sharp strike exists throughout both sides, with stars 11 and 13 rounded and some blending of the dentils on each side. A mintage of 56,500 pieces yields only about two dozen Gem or finer Red and Brown representatives (2/19). Our EAC grade MS63. NGC ID# 26YZ, PCGS# 35334 Base PCGS# 1234
- 3463 1857 C-1, B-1, R.2, MS65 Brown NGC. CAC. From a final-year mintage of 35,180 pieces, this attractive Gem exhibits well-detailed design elements, with just a touch of softness on some star centers. The crimson-brown surfaces show no mentionable distractions. Our EAC grade MS62. Census: 11 in 65 Brown, 2 finer (2/19). NGC ID# 26Z3, PCGS# 35339 Base PCGS# 1239

## LARGE CENTS

1798 Second Hair Style Cent  
S-166, Mint State Details

- 3464 1798 Second Hair Style, S-166, B-32, R.1 — Cleaned — NGC Details. Unc. Breen Die State VI. The heavy diagonal crack from the E in UNITED to the fraction is diagnostic for S-166. Struck from misaligned dies, with the impression generally sharp but soft near the bust tip and OF. This satiny cent is recolored in brick-red and olive-green hues, but no spots or marks are apparent. One strike-through near the bust below the LI in LIBERTY. Our EAC grade VF35.

### 1799 S-189 Cent, VG Details

3465 1799 S-189, B-3, R.2 — Environmental Damage — PCGS Genuine. VG Details. Breen Die State indeterminate due to the granularity of the surfaces and advanced wear on the devices and around the borders. Some of the large hair curls remain distinguished in Liberty's portrait, but the wreath is an outline. Most legends are clear on this piece, even though the date is faded at the bottom of the numerals. A few light rim bumps are apparent along the lower-right reverse. Still, a pleasing, collectible example of this key Draped Bust issue with deep ebony-brown color. Our EAC grade Good 5.

### 1805 S-267 Cent, AU53 Clashed Die State

3466 1805 S-267, B-1, R.1, AU53 PCGS. Breen Die State III, clashed. The border dentils are sharp in this die state, although they run off the flan on the obverse from 9 to 12 o'clock. This lightly circulated Sheldon-267 cent displays bold detail and only slight high-point wear. All major details remain visible. Each side has smooth chocolate-brown surfaces and excellent eye appeal. There is one area of reddish color near the Y in LIBERTY. Our EAC grade XF40. NGC ID# 224K, PCGS# 36427 Base PCGS# 1510

### 1814 S-295, B-2 Cent, AU55 Plain 4

3467 1814 Plain 4, S-295, B-2, R.1, AU55 PCGS. Breen Die State IX. A die crack extends from star 11 to the low hair curl and the 8. A small die chip is noted at Liberty's throat, and the tops of ATES are merged into the rim. This lovely dark chocolate-brown cent retains considerable luster with trivial handling marks that are consistent with the grade. Our EAC grade XF45. NGC ID# 224Y, PCGS# 36517 Base PCGS# 1576

3468 1818 N-10, R.1, MS64 Red and Brown NGC. Found in large quantities in the Randall Hoard, the 1818 N-10 cent is a popular variety for date and type collectors, and it is the only variety of 1818 that is frequently encountered with original red mint color. This piece has that color muted with considerable bluish-brown toning. A few scattered marks prevent a higher grade. Our EAC grade MS62. NGC ID# 2253, PCGS# 36629 Base PCGS# 1601

### 1827 N-11 Cent, MS64 Brown A Scarce Mint State Example

3469 1827 N-11, R.1, MS64 Brown PCGS. CAC. An absolutely beautiful example, this cent has full cartwheel luster with intermingled olive-brown and steel surfaces that retain the slightest hints of original red mint color beneath the toning. Although the N-11 cent is a plentiful 1827 variety, only about a dozen examples are finer than this piece. Our EAC grade MS60. NGC ID# 225H, PCGS# 36868 Base PCGS# 1651

3470 1838 N-8, R.1, MS65 Brown NGC. This late die state Gem exhibits heavily flowlined dies with weak peripheral details. The lustrous chocolate-brown surfaces are pristine, save for two small marks on Liberty's cheek. Traces of mint red remain on the reverse. Our EAC grade MS63. NGC ID# 4CYZ, PCGS# 37201 Base PCGS# 1741

3471 1851 N-6, R.1, MS66+ Brown PCGS. Grellman Die State c. Glossy, deeply iridescent shades of brown reveal glimpses of blue and traces of mint color at the borders. Struck from a middle die state, the surfaces are finely granular with flowlines that tend to blur the outer elements and dentils, with faint clash marks at O in ONE and slight repunching on the flag of 5. The central strike remains sharp. Diagnostic lines rise up from the coronet to star 6, and from the top hair strands approaching star 7 — still visible despite the worn dies. This Plus-graded Premium Gem is lustrous and nearly free of marks. We believe it ranks within the Condition Census for N-6. Our EAC grade MS62. NGC ID# 226H, PCGS# 406662 Base PCGS# 1892

3472 1851 N-15, R.4, MS66 Brown PCGS. CAC. Die State b. A plentiful hoard variety in this later die state, where the reverse legend is weakened by metal flowlines. Vibrant luster engulfs each side of the coin, revealing balanced copper-red and steel-blue hues. The coin is on the cusp of a Red and Brown designation. Strike weakness affects the border stars as always. Our EAC grade MS64. Population (normal date varieties): 44 in 66 (3 in 66+) Brown, 2 finer; 17 in 66 (2 in 66+) Red and Brown, 0 finer; 1 in 66 Red, 0 finer. CAC: 28 in 66, 2 finer (1/19). NGC ID# 226H, PCGS# 406689 Base PCGS# 1892

3473 1852 N-3, R.1, MS66 Brown PCGS. CAC. A lovely Premium Gem representing the plentiful N-3 die pair, this piece exhibits full cartwheel luster with traces and splashes of mint red on its chocolate-brown surfaces. Our EAC grade MS63. PCGS# 147235 Base PCGS# 1898

3474 1853 N-25, R.1, MS65 Red and Brown PCGS. CAC. Splashes of bluish-brown toning appear on the obverse and minor toning splashes appear on the reverse of this lovely Gem 1853 cent. Grellman notes the discovery of a large hoard of 1853 N-25 cents, including many with original red mint color as seen on this example. Our EAC grade MS64. NGC ID# 226K, PCGS# 403926 Base PCGS# 1902

**3475** 1854 N-21, R.2, MS66 Brown PCGS. CAC. Die State b. The 185 in the date are repunched on this obverse, which is shared by the rare N-30 variety. N-21 has light clash marks on the reverse, a chief diagnostic. This Premium Gem displays copper-red and steel-blue color on each side in near-equal proportions. Nearly worthy of a Red and Brown designation. Some border stars are weak as usual. Our EAC grade MS63. Population: 27 in 66 Brown, 1 finer; 10 in 66 Red and Brown, 0 finer; 1 in 66 Red, 0 finer. CAC: 14 in 66, 1 finer (1/19). NGC ID# 226L, PCGS# 406118 Base PCGS# 1904

**3476** 1857 Large Date, N-1, R.1, MS65 Brown PCGS. CAC. Grellman Die State a. Sharply struck from an early die state, with smooth fields and die lines from the dentils to the tops NI in UNITED. Glimpses of mint red surround the stars, which are full formed except for minor rounding on stars 12 and 13. Additional areas of red frequent the reverse. Blue overtones join a few faint carbons, although the well-preserved Gem surfaces are nearly free of marks. A lustrous and attractive N-1 cent, tied for finest certified at PCGS (1/19). Our EAC grade MS60. NGC ID# 226P, PCGS# 389634 Base PCGS# 1928

## FLYING EAGLE CENTS

**3477** 1857 MS64 PCGS. Given the substantial price difference between the MS64 and MS65 levels for 1857 cents, this softly lustrous, tan-gold near-Gem seems like a smart alternative for many collectors. Housed in a previous generation green label holder, the coin possesses high eye appeal and Choice surface quality. The strike is sharp and marks are nearly non-existent. The few carbon flecks are microscopic indicators of the natural surfaces. NGC ID# 226P, PCGS# 2016

**3478** 1857 MS64 PCGS Gold Shield. CAC. The tan-gold surfaces of this Flying Eagle cent show a single fleck in the field below the eagle but nothing else to limit the grade. Both sides display a complete impression, including the feathers and lower wreath elements. An interesting die gouge passes through the wing. NGC ID# 226P, PCGS# 2016

### 1857 Flying Eagle Cent, MS65 Type Coin Candidate

**3479** 1857 MS65 NGC. More than 17 million Flying Eagle cents were produced in 1857, the first year of mass production for the nickel-alloy small cent. However, few have survived in the higher levels of Mint State preservation. This Gem remains accessible to collectors, although only 14 finer pieces are reported at NGC. The strike is sharp and the satiny surfaces display pleasing tan-gold luster with no bothersome abrasions. NGC ID# 226P, PCGS# 2016

### 1857 Flying Eagle Cent, MS65

First Year of Regular Issue

**3480** 1857 MS65 PCGS. Soft mint luster issues from tan-gold surfaces. Each side is incompletely struck from clashed and cracked dies, but there are virtually no marks to report on this Gem Flying Eagle cent from the first year of regular issue. While nearly 17.5 million coins were minted, only 20 example are graded numerically finer at PCGS (2/19). NGC ID# 226P, PCGS# 2016

### 1857 Flying Eagle Cent, MS65 Finer Pieces Are Rare

**3481** 1857 MS65 PCGS. CAC. Tawny-gold and pale sea-green hues cover this satiny, unabraded Gem type coin. The strike is sharp on the eagle's tailfeathers and the wreath, producing strong visual appeal. The 1857 Flying Eagle cent is often available in this grade, but finer pieces are rarely offered. PCGS has certified only 20 pieces finer (2/19).

Ex: Long Beach Signature (Heritage, 9/2005), lot 760, which realized \$2,990; Central States Signature (Heritage, 5/2007), lot 1027, which realized \$2,990. NGC ID# 226P, PCGS# 2016

**3482** 1858 Large Letters MS64 PCGS. This is a sharp near-Gem example of the Large Letters Guide Book variety, showing balanced rose-gold, peach-orange, and delicate lilac hues. The obverse has some faint pepper specks in the margins, seen with a loupe. As a type coin, this piece is highly appealing. Finer examples are scarce. NGC ID# 2277, PCGS# 2019

**3483** 1858 Large Letters MS64 PCGS. High Leaves Reverse. Closed E in ONE. Subtle rose-red and sea-green toning endows this lustrous Choice cent. Marks are limited to a field tick below the eagle's head. The obverse is crisply struck, though the upper left portion of the wreath displays minor softness. NGC ID# 2277, PCGS# 2019

**3484** 1858 Large Letters MS64 PCGS. CAC. This is a sharp near-Gem Large Letters type coin, showing satiny golden-peach luster and remarkable eye appeal. A few tiny ticks in the obverse fields are all that prevent Gem classification of this CAC-endorsed Flying Eagle cent. NGC ID# 2277, PCGS# 2019

**3485** 1858 Large Letters MS65 PCGS. Shimmering luster engulfs this Gem Flying Eagle type coin, a Large Letters representative with the AM in AMERICA connected at the bases. The obverse displays peach-gold and orange color, while the reverse has lighter rose-gold hues. Eye appeal is outstanding. NGC ID# 2277, PCGS# 2019

**3486** 1858 Small Letters MS64 PCGS. The AM in AMERICA are separated at the bases on the Small Letters variety, an important Guide Book type for Flying Eagle cent collectors. This Choice example will also serve well as a type coin. It is well-struck and lustrous with reddish bronze-gold surfaces. A fleck is evident on the eagle's tailfeathers, although it disappears from view at certain angles. NGC ID# 2279, PCGS# 2020

- 3487** 1858 Small Letters MS64 PCGS. CAC. Low Leaves Reverse. Open E in ONE hubbed over Closed E, similar to Snow-9 but without rim cuds. A well-preserved Choice cent with consistent wheat-gold color and minimal carbon. STATES OF shows moderate inexactness of strike, but the wreath is sharp, as is the eagle's tail. CAC: 73 in 64, 36 finer (1/19). NGC ID# 2279, PCGS# 2020

## INDIAN CENTS

- 3488** 1862 MS65 PCGS. CAC. Effusive mint luster glistens from nearly pristine copper-gold surfaces. This Gem is well-struck from a later die state, with cracks on each side and rim crumbling above ED STATES. The 1862 copper-nickel cent enjoys a healthy mintage of 28 million coins and is collectible through this high grade. NGC ID# 227H, PCGS# 2064

- 3489** 1862 MS66+ PCGS. Colorful iridescence augments golden surfaces of this high-end Premium Gem cent. Ideal for copper-nickel type, the surfaces are virtually mark free. A loupe reveals scattered carbon flecks, but they are minuscule and largely unseen without the aid of a lens. The strike is sharp throughout, and eye appeal is nothing short of spectacular. Population: 11 in 66+, 14 finer (1/19). NGC ID# 227H, PCGS# 2064

- 3490** 1863 MS66 PCGS. This delightful Premium Gem displays sharply detailed design elements and impeccably preserved copper-red surfaces that radiate vibrant mint luster. Overall eye appeal is terrific. Population: 87 in 66 (23 in 66+), 0 finer (1/19). NGC ID# 229D, PCGS# 2067

- 3491** 1865 Fancy 5 MS66 Red and Brown PCGS. In recent years the Fancy 5 has become another important collectible in the Indian cent series. This example displays a generous amount of mint red on each side (almost complete on the reverse) with a brown center on the obverse. Sharply struck. Population: 10 in 66 Red and Brown, 0 finer (2/19). NGC ID# 227N, PCGS# 2083

1865 Cent, MS66 Red and Brown  
Fancy 5, Beautifully Preserved

- 3492** 1865 Fancy 5 MS66 Red and Brown PCGS. CAC. Both the Fancy and Plain 5 types are relatively available, this one being slightly more plentiful. The ribbon diamonds are clear and the other elements well-struck on this Red and Brown Premium Gem cent. Copper-orange color dominates, but shades of golden-brown, blue, and violet are also present. Lustrous and carefully preserved. Population: 10 in 66 Red and Brown, 0 finer. CAC: 6 in 66, 0 finer (2/19). NGC ID# 227N, PCGS# 2083

- 3493** 1871 MS64 Red and Brown PCGS. Bold N in ONE. Bluish toning appears over the centers, lightening to shades of fiery copper-orange around the margins. The feather tips and ribbon diamonds exhibit a crisp strike. This near-Gem cent is void of mentionable blemishes. NGC ID# 227V, PCGS# 2101

- 3494** 1872 MS65 Brown NGC. CAC. A sharp, beautifully preserved Gem example of this early 1870s issue, easily earning CAC endorsement. The surfaces are satiny and have a uniform burgundy-brown hue, with golden tints evident upon close examination. NGC ID# 227W, PCGS# 2103

- 3495** 1874 MS64+ Red PCGS. CAC. Only three of the 76 MS64 Red PCGS certified examples have earned the Plus designation from that service, and only 58 submissions carry a higher grade (2/19). This is an excellent example for a Set Registry collection, presenting a sharp strike, brilliant orange mint luster, and trivial spots and marks. NGC ID# 227Z, PCGS# 2120

1874 Cent, MS65 Red  
Rare CAC-Approved Example

- 3496** 1874 MS65 Red PCGS. CAC. The 1874 Indian cent is scarce in Gem Red condition, and CAC recognition is a rarity at this level of preservation. The coin offered here is outstanding for the grade. It is sharp, frosty, and aglow with yellowish-orange mint luster. A few faint flecks are only seen with a loupe and do not detract. Population: 44 in 65 (2 in 65+) Red, 14 finer. CAC: 13 in 65, 5 finer (2/19). NGC ID# 227Z, PCGS# 2120

1877 Cent, Unc Sharpness  
Collectible Key-Date Coin

- 3497** 1877 — Obverse Cleaned — NGC Details. Unc. A sharp, glossy example of this key date, showing a mixture of copper-red, burgundy, olive, and russet-gold toning over each side. There is some minor field roughness on the obverse amid UNITED, which may be what prevented a numeric grade from NGC. The surface appearance is otherwise identical to that of the reverse, and eye appeal is pleasing for a Details-graded Indian cent. NGC ID# 2284, PCGS# 2127

1877 Cent, MS62 Brown  
Attractive for the Grade

- 3498** 1877 MS62 Brown NGC. This is a satiny chestnut-brown example of the key Indian cent issue, showing tiny tinges of golden luster emerging in the protected portions of the fields. This piece is well-struck and satiny with minimal abrasions. Eye appeal is pleasing for the grade. Affordable Mint State examples of this issue are in strong demand. NGC ID# 2284, PCGS# 2127

**3499** 1877 XF40 PCGS. An impressive XF representative of this classic key issue, from a mintage of 852,500 pieces. This coin exhibits pleasing olive-brown surfaces that show no large or distracting abrasions and only light wear shows on the well-detailed design elements. NGC ID# 2284, PCGS# 2128

**3500** 1885 MS65+ Red PCGS. The 1885 is a challenging date to find in Gem condition or finer with original, full Red surfaces. This Plus-graded example is a notch better than most, with the usual sharp strike as expected for an 1885, but with blazing deep-orange color and vibrant mint luster. A few microscopic carbon specks are visible under magnification, confirming the natural surfaces. Population: 2 in 65+ Red, 23 finer (1/19). NGC ID# 228C, PCGS# 2153

**3501** 1886 Type One MS64 Red PCGS. The generally pumpkin-gold surfaces display hints of apple-green and fire-red across the obverse field. Sharply struck and lustrous. Free from contact, though the neck shows two tiny spots. Population: 36 in 64 Red, 35 finer (2/19). NGC ID# 228D, PCGS# 2156

1889 Cent, MS65+ Red  
Luminous Surfaces, Rare Finer

**3502** 1889 MS65+ Red PCGS. The Indian cent was heavily circulated throughout its existence. Besides mintages in the eight-figure range, Uncirculated survivors of most dates with original mint red color are scarce in Gem levels of preservation. This Plus-designated 1889 coin is outstanding. Frosty copper-red and orange luster glistens on each side, and there are no bothersome abrasions or major spots. The usual strike weakness affects the feather tips and the wreath bow. Population: 55 in 65 (3 in 65+) Red, 15 finer (2/19). NGC ID# 2732, PCGS# 2174

1894 Cent, MS64 Red and Brown  
Doubled Date, FS-301, CAC Endorsed

**3503** 1894 Repunched Date, Snow-1, FS-301, MS64 Red and Brown PCGS. CAC. Only a few main varieties are collected side-by-side with the regular Indian Head cent issues — the 1867/67, 1869/69, and 1873 Doubled LIBERTY come to mind. The 1894 Doubled Date is another key variety, with wide doubling of the date and legions of collectors wanting a sharp example. This orange-red coin has steel-blue accents on the high points that drift into the nearby fields. A few tiny marks and stray carbon flecks do not detract from the lustrous and attractive Red and Brown surfaces, which display a crisp strike. Population: 16 in 64 (1 in 64+) Red and Brown, 3 finer. CAC: 3 in 64, 0 finer (1/19). PCGS# 37583 Base PCGS# 92188

**3504** 1897 MS67 Red and Brown NGC. The luminous copper-orange surfaces of this Superb Gem exhibit subtle olive overtones on the high points of the devices. No abrasions are seen, neither is there any mentionable carbon spotting. The strike is sharp. This is the single finest Red and Brown 1897 Indian cent certified. Just one MS67 Red coin is arguably finer at NGC (2/19). Housed in a prior generation holder. NGC ID# 228S, PCGS# 2197

**3505** 1908-S MS65+ Red and Brown PCGS. CAC. The 1908-S is popular as the first branch mint issue of the cent denomination, and it is a semikey date in high grade. This high-end Gem Red and Brown coin displays peach-orange and russet-red hues across frosty and lustrous surfaces. The coin is well-struck and shows no bothersome carbon spotting. NGC ID# 2296, PCGS# 2233

**3506** 1908-S MS64 Red PCGS. This important San Francisco issue represents the first cent struck at a branch mint of the United States. The diamonds are clear, though the feather tips are incomplete, and each side exhibits tempered copper-orange color and soft mint luster. Impressively clean for the grade. NGC ID# 2296, PCGS# 2234

## PROOF INDIAN CENTS

**3507** 1859 PR64 PCGS. CAC. This impressive Choice proof displays well-detailed design elements, with just a touch of softness on the feather tips. The well-preserved surfaces show a mix of original red and crimson patina, with reflective fields underneath. PCGS has graded 88 finer coins (1/19). NGC ID# 2299, PCGS# 2247

**3508** 1872 PR65 Red and Brown PCGS. A razor-sharp proof with deeply reflective fields and a hint of obverse cameo contrast. Both sides have copper-orange and lavender color, although the overall appearance leans heavily toward the Red end of the color spectrum. This is an outstanding Red and Brown proof 1872 Indian cent. NGC ID# 229R, PCGS# 2304

**3509** 1878 PR66 Red and Brown PCGS. Brick-red color overlays the fire-orange mirrored fields and frosted devices of this well-preserved 1878 cent. Virtually uncollectible any finer regardless of color designation, the Red and Brown surfaces of this Premium Gem radiate mint luster, with no significant marks or carbon and a razor-sharp strike. Population: 15 in 66 Red and Brown, 1 finer (1/19). NGC ID# 229X, PCGS# 2322

**3510** 1880 PR66 Red and Brown PCGS. CAC. Lemon-yellow and greenish tints cover much of this Premium Gem proof, earning it a Red and Brown designation although no true red or brown colors are visible. It is sharp and CAC endorsed, showing strong visual appeal and modest contrast. NGC ID# 229Z, PCGS# 2328

**3511** 1888 PR66 Red and Brown PCGS. CAC. This glimmering Premium Gem proof displays carbon-free surfaces and uniform amber-orange color that leans toward the Red color category. Localized strike weakness is seen on the top three headdress feathers and the lower-right edge of the shield. A rarity in this grade. Population: 6 in 66 (1 in 66+) Red and Brown, 0 finer. CAC: 4 in 66, 0 finer (1/19). NGC ID# 22AA, PCGS# 2352

## LINCOLN CENTS

1909 VDB Cent, MS67+ Red  
Colorful Registry-Grade Rarity, CAC Endorsed

**3512** 1909 VDB MS67+ Red PCGS. CAC. Razor-sharp definition is apparent on all design elements, including the all-important initials. The apricot-gold and lime-green surfaces are brightly lustrous and nearly unmarked. Nor is carbon seen in any serious manner, with just a handful of random, microscopic specks that appear under scrutiny of a strong loupe. This is one of the finest 1909-VDB cents available to advanced collectors. PCGS has certified only two numerically finer Red coins, and we doubt that either the technical quality or eye appeal could be significantly better than this superlative coin. Population: 43 in 67+, Red, 2 finer. CAC: 61 in 67, 0 finer (1/19). NGC ID# 22AZ, PCGS# 2425

**3513** 1909-S VDB MS63 Brown PCGS. Satiny luster resides in the fields of this Select Brown example, complementing chestnut-brown toning overall. The reverse periphery clings to remnants of vibrant orange-gold color. This well-struck key-date Lincoln cent is housed in a green label holder. Ideal for the traditional date and mintmark collector of this series. NGC ID# BYKW, PCGS# 2426

**3514** 1909-S VDB MS64 Brown PCGS. CAC. Eye appeal is great for this glossy, lustrous Brown key date Lincoln cent with steel-blue accents. Every element of Victor David Brenner's design, including his initials, are strong. A tick above the brow identifies this attractive near-Gem. NGC ID# BYKW, PCGS# 2426

**3515** 1909-S VDB MS64 Red PCGS. CAC. This CAC-endorsed 1909-S VDB Lincoln cent displays glowing peach-orange luster with the faintest traces brass-gold. A few light flecks on each side do not detract. This key date is sought-after in all grades, although Red examples are the most desired. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS65 Red  
Lincoln Series Key**

**3516** 1909-S VDB MS65 Red PCGS. Radiant, frosty golden luster engulfs this Gem Red 1909-S VDB Lincoln cent, complementing sharp design elements and unabraded surfaces. A few flecks on the reverse are the only mentionable imperfection. This is the key date in the series, sought-after in condition such as this. NGC ID# 22B2, PCGS# 2428

**1909-S VDB Cent, MS65 Red  
Essentially Void of Contact or Carbon**

**3517** 1909-S VDB MS65 Red PCGS. The 1909 VDB Lincoln cent from the San Francisco Mint has long been regarded as the series key because of its low mintage and first-year-issue status. This strongly struck Gem with especially bold detail on the initials possesses vibrant cartwheel luster and pleasing rose and copper-orange color. Essentially void of contact or carbon. NGC ID# 22B2, PCGS# 2428

**3518** 1909-S MS66 Red NGC. A high-end Red example of this better-date Lincoln cent, showing luminous, unspotted surfaces that are frosty and radiant. Fire-orange, peach, and rose hues intermingle over each side, providing strong eye appeal. Few finer 1909-S Lincoln cents are known. Census: 65 in 66 (1 in 66★) Red, 6 finer (1/19). NGC ID# 22B4, PCGS# 2434

**1909-S/S Lincoln Cent, MS66+ Red  
S Over Horizontal S**

**3519** 1909-S/S S Over Horizontal S, FS-1502, MS66+ Red PCGS. CAC. The mintmark feature is visible with a 10x loupe. This high-end Red example displays blazing copper-gold luster and well-struck design elements. The surfaces are free of abrasions or carbon spotting. On the reverse, a small planchet lamination on the E in UNITED is peeled back to stand perpendicular to the surface of the coin. A coin of outstanding eye appeal. NGC ID# 22B4, PCGS# 37645 Base PCGS# 92434

**1910-S/S Cent, MS66 Red  
Scarce Cherrypickers' Variety**

**3520** 1910-S/S FS-502, MS66 Red PCGS. Formerly listed as FS-012.7, this Cherrypickers' variety shows the mintmark repunched north. The coin offered here is one of just five Red examples of the variety attributed by PCGS. The strike is sharp and each side has uniform tan-gold mint luster. Finely textured surfaces are similar in appearance to the matte proofs of this era, although the rims lack the squared edges seen on Philadelphia proofs. Population: 2 in 66 (1 in 66+) Red, 1 finer (2/19). NGC ID# 22B6, PCGS# 37651 Base PCGS# 2440

**1914-D Lincoln Cent, MS63 Brown  
Series Key**

**3521** 1914-D MS63 Brown PCGS. CAC. The 1914-D is one of the three historical key date Lincoln cents along side the 1909-S VDB and the 1931-S, although several others could be added to the list, including the 1909-S and the 1955 Doubled Die. This lovely Select Mint State example has lustrous olive-brown surfaces and considerable sky-blue toning with excellent eye appeal. NGC ID# 84BX, PCGS# 2471

**1914-S Cent, MS64+ Red  
Scarce S-Mint, Challenging Any Finer**

- 3522 **1914-S MS64+ Red PCGS. CAC.** A lovely orange-gold representative of an early and conditionally rare branch mint issue. A lens reveals a few minuscule obverse flecks. The strike is good save for blurring near the top of the O in ONE. The dual honors of CAC endorsement and the PCGS Plus designation are important recommendations for this high-end Choice Uncirculated 1914-S. PCGS reports just 51 finer examples. Population: 8 in 64+ Red, 51 finer. CAC: 12 in 64, 7 finer (1/19). NGC ID# 22BJ, PCGS# 2476
- 3523 **1915-S MS65 Red and Brown PCGS. CAC.** A strong Registry Set candidate, this Gem Red and Brown 1915-S is lustrous and sharply struck, with attractive finely grained brick-red surfaces. The strike is razor-sharp through the centers, with only nominal weakness at UNUM. There are virtually no obverse marks seen. Two or three trivial ticks on ONE exist on the reverse, visible under a loupe. CAC endorsement is an important confirmation of high quality. Population: 34 in 65 Red and Brown, 1 finer. CAC: 9 in 65, 0 finer (1/19). NGC ID# 22BM, PCGS# 2484
- 3524 **1917 MS66+ Red PCGS.** Considering the number of collectors who specialize in this series versus the number of examples graded at this level or finer, one would expect a Premium Gem example of the 1917 to be out of reach. But such is not the case. This MS66+ Red cent is an obtainable, Registry-quality coin with crisp detail, coppery-gold color, and lively mint luster. A single fleck appears right of the upper serif of (C)E(NT). NGC ID# 22BS, PCGS# 2497
- 3525 **1923-S MS64 Red and Brown PCGS.** The well-preserved original red surfaces of this impressive Choice example have mellowed to light brown in some areas, with well-detailed design elements and satiny mint luster on both sides. PCGS has graded 25 numerically finer Red and Brown examples (1/19). NGC ID# 22CB, PCGS# 2547
- 3526 **1924-D MS64 Red PCGS.** The 1924-D is a challenging issue in Red condition. This near-Gem is conditionally scarce, and finer Red pieces are seldom located. This piece displays golden-orange borders with lilac-tinged coppery color across the interiors. Strike weakness is visible only on the O in ONE. PCGS reports 48 finer submissions (2/19). NGC ID# 22CD, PCGS# 2554
- 3527 **1926-D MS65 Red PCGS.** A satiny copper-orange Gem Red example of this conditionally challenging Denver issue, showing a bold strike and largely untouched surfaces. A few tiny specks do not detract. Only a handful of finer Red 1926-D cents are known. Population: 74 in 65 (7 in 65+) Red, 5 finer (2/19). NGC ID# 22CK, PCGS# 2572
- 3528 **1929 MS67 Red PCGS.** This spectacular Superb Gem exhibits sharply detailed design elements and impeccably preserved original red surfaces, with vibrant mint luster on both sides. Population: 74 in 67 (9 in 67+) Red, 0 finer (1/19). NGC ID# 22CU, PCGS# 2596

**1931-S Cent, MS66 Red  
Popular Low Mintage Issue**

- 3529 **1931-S MS66 Red PCGS. CAC.** The 1931-S is famous for its low mintage. A scant 866,000 pieces were issued. Speculators soon learned of the minimal production, and set aside rolls. Most examples certified as Red grade between MS63 and MS65. The present lustrous Premium Gem exhibits only a single pinpoint fleck, in the field near the nose. Trivial contact near LIBERTY also preclude perfection. NGC ID# 22D4, PCGS# 2620
- 3530 **1936 Doubled Die Obverse, FS-103, MS66 Red PCGS.** IN GOD WE TRUST and LIBERTY are nicely die doubled. Although less distinctive than FS-101 or FS-102, FS-103 is listed as the scarcest of the three major 1936 doubled die varieties, per *Cherrypickers*. A fire-red Premium Gem with a mark-free appearance and a good strike. Patience is required to locate a couple of pinpoint carbon flecks. NGC ID# 22DE, PCGS# 37756 Base PCGS# 72650

**1940-D Cent, MS67+ Red  
Only One Coin Known Finer**

- 3531 **1940-D MS67+ Red PCGS.** Lovely rose-red luster in the margins cedes to copper-orange interiors on this high-end Superb Gem Red example, an important Registry coin as only one finer piece is reported at PCGS and NGC combined (1/19). The strike is sharp, and the satiny surfaces are devoid of carbon spotting. Population: 18 in 67+ Red, 1 finer (1/19). NGC ID# 22DU, PCGS# 2689

**1943-S Steel Cent, MS68  
Rare Top-Grade CAC Coin  
A Remarkable Type Candidate**

- 3532 **1943-S MS68 PCGS. CAC.** This piece is tied for the finest 1943-S steel cent at PCGS, as not even a Plus-graded coin is reported finer. It is a rarity this fine with CAC endorsement. Satiny silver mint luster is visually flawless, even under a loupe, and the design is fully brought up on each side. An unsurpassable type coin or Registry Set candidate. Population: 87 in 68, 0 finer. CAC: 35 in 68, 0 finer (2/19). NGC ID# 22E8, PCGS# 2717

**1945 Lincoln Cent, MS67+ Red  
Tied for Finest at PCGS  
Beautiful Registry Contender**

**3533 1945 MS67+ Red PCGS.** The 1945 Lincoln cent is occasionally available in Superb Gem Red condition, but this Plus-graded piece is rare and tied for the finest at PCGS. An incredible Registry coin, it showcases a bold strike and satiny luster that yields varying shades of orange-gold, copper-red, and faint greenish color. The coin is virtually flawless and is devoid of carbon. Population: 11 in 67+ Red, 0 finer (2/19). NGC ID# 22EG, PCGS# 2734

**3534 1955 Doubled Die Obverse, FS-101, MS62 Brown NGC.** Olive-green and silvery hues blanket much of this Mint State Brown 1955 doubled die cent, although tinges of luminous burgundy color emerge from the protected areas. Eye appeal is outstanding for the grade on this collectible Mint State example. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 Doubled Die Cent, Luminous MS64 Brown**

**3535 1955 Doubled Die Obverse, FS-101, MS64 Brown PCGS. CAC.** One of the most dramatic doubled dies in United States coinage, the 1955 doubled die obverse cent is also one of the most sought-after issues in the Lincoln cent series. This Choice Brown example is toned in bluish-silver hues over burgundy undertones, with tiny tinges of copper-red in the most protected regions. It is well-struck and free of abrasions. Satiny luster shimmers on each side. NGC ID# 4LNH, PCGS# 37910 Base PCGS# 2825

**1955 FS-101 Cent, MS63 Red and Brown  
The Famous Doubled Die Obverse Variety**

**3536 1955 Doubled Die Obverse, FS-101, MS63 Red and Brown PCGS. CAC.** Is there a more famous double die variety in American numismatics? Probably not. This Select Mint State example of the sought-after 20th century key enjoys lustrous Red and Brown surfaces with attractive steel-blue tones on each side. Lincoln's beard is typically soft but the other elements are strong, and the spread on the obverse legends is dramatic. A couple of marks are trivial for the grade. NGC ID# 22FG, PCGS# 37911 Base PCGS# 2826

**1970-S Lincoln Cent, MS64 Red  
Large Date, Doubled Die Obverse, FS-101**

**3537 1970-S Large Date, Doubled Die Obverse, FS-101, MS64 Red NGC.** Strong doubling is evident on the motto, LIBERTY, and the date, identifying the popular *Cherrypicker's* variety. The 1970-S Doubled Die Obverse is an underrated rarity, actually seen less often than its more famous 1969-S counterpart. This attractive Choice example offers well-preserved original red surfaces, with vibrant mint luster and sharply detailed design elements. Census: 3 in 64 Red, 4 finer (1/19). NGC ID# 22GN, PCGS# 37999 Base PCGS# 2939

**3538 1984 Doubled Ear, FS-101, MS68 Red PCGS.** A flawless orange-gold and salmon-pink specimen. The *Cherrypicker's Guide* credits Richard Allen with the discovery of this dramatic Red Book variety. Lincoln's earlobe and beard are widely die doubled. FS-101 is available in typical Mint State but becomes rare so close to perfection. Encapsulated in a green label holder. Population: 26 in 68 Red, 0 finer (1/19). NGC ID# 22HZ, PCGS# 38088 Base PCGS# 3062

---

**1992-D Close AM Cent, MS65 Red  
FS-901 Guide Book Variety**

- 3539 1992-D Close AM, FS-901, MS65 Red NGC.** The A and M in AMERICA are lightly joined, or nearly so, at their bases. This modified reverse hub is rare in comparison to the normal Wide AM variety. NGC has certified 366 Red 1992-D Lincoln cents, but only 11 of those are the Close AM variety. This piece has brilliant coppery-orange luster with delicate splashes of blue and violet toning. Census: 5 in 65 Red, 0 finer (2/19). NGC ID# 22JJ, PCGS# 391429 Base PCGS# 83101
- 

## PROOF LINCOLN CENTS

- 3540 1909 PR65 Red and Brown PCGS. CAC.** Undeniably a proof, this Gem Red and Brown coin showcases broad, squared rims and razor-sharp central devices. The matte surfaces yield rich copper-orange and amber hues. Under a loupe, a few light flecks on each side are visible, hidden in the autumn-red colors of the fields. NGC ID# 22KS, PCGS# 3304

- 3541 1911 PR65 Red NGC.** The granularity of the matte proof surfaces are in full evidence on this Gem. The obverse has more of a yellow tint, while the reverse is bright red. Only the tiniest flyspecks can be seen with a magnifier, and we see no contact marks on either side. Very scarce with full red surfaces. Census: 5 in 65 Red, 1 finer (2/19). NGC ID# 22KU, PCGS# 3311
- 

**1914 Cent, PR66 Brown  
Beautiful Toning**

- 3542 1914 PR66 Brown PCGS.** Beautiful blue and violet toning covers this Premium Gem Brown proof, illuminated by matte luster. Sharp devices and a lack of contact marks complete the eye appeal. On the obverse Lincoln's portrait is toned blue, while the surrounding fields have a violet tinge. The majority of the reverse is blue. The 1914 proof cent is scarce this fine. Population: 30 in 66 (3 in 66+ Brown, 5 finer (2/19). NGC ID# 22KX, PCGS# 3318
- 

- 3543 1915 PR65 Brown PCGS.** This is a razor-sharp matte proof in Gem condition. Although designated Brown by PCGS, the coin shows no true brown color. Beautiful steel-blue overtones complement burgundy luster on each side, producing exceptional visual appeal. No surface imperfections are noted. NGC ID# 22KY, PCGS# 3321
- 

---

**1936 Cent, PR66 Red  
Satin Finish Registry Candidate**

- 3544 1936 Type One—Satin Finish PR66 Red PCGS.** Satiny surfaces offer modestly reflective fields and sharp devices on this Premium Gem Type One proof, the first proof cent struck in two decades for the Lincoln series. The coin displays pleasing copper-red, lilac, and pinkish hues with a few tiny pepper specks visible upon close examination. An outstanding Registry Set opportunity. Population: 43 in 66 (4 in 66+) Red, 1 finer (1/19). NGC ID# 22L2, PCGS# 3332
- 

**1937 Lincoln Cent, PR67 Red  
Tied for the Finest at PCGS**

- 3545 1937 PR67 Red PCGS.** This amazing Superb Gem proof has fiery orange mint surfaces with deeply mirrored fields around sharply defined devices, providing exceptional eye appeal. As one of just 36 examples graded so fine, with none finer, this is a prime candidate for the PCGS Set Registry program. Population: 31 in 67 Red, 5 in 67 Red Cameo, 0 finer (2/19). NGC ID# 22L7, PCGS# 3338
- 

- 3546 1938 PR67 Red PCGS. CAC.** This spectacular Superb Gem proof exhibits razor-sharp definition on all design elements and the fields are deeply reflective throughout. The virtually pristine surfaces show unbroken original red patina. Population: 55 in 67 (4 in 67+) Red, 0 finer. CAC: 22 in 67, 0 finer (1/19). NGC ID# 22L5, PCGS# 3341

- 3547 1942 PR66 Cameo PCGS.** Ex: Tom Mershon Collection. The 1942 was the final proof Lincoln cent struck until 1950. Red Cameo examples are rare, and only a single Red Deep Cameo coin is reported at PCGS. This Premium Gem Cameo displays vivid fire-orange surfaces with reflective fields. The strike is sharp. A few carbon spots appear between Lincoln's head and IN GOD but are not overly bothersome. Population: 18 in 66 (1 in 66+) Cameo, 4 finer (1/19).

Ex: Baltimore Signature (Heritage, 7/2003), lot 5780; Long Beach Signature (Heritage, 9/2008), lot 502; Long Beach Signature (Heritage, 6/2013), lot 3806; FUN Signature (Heritage, 1/2018), lot 7429; Central States Signature (Heritage, 4/2018), lot 7194. NGC ID# 22L9, PCGS# 83353

## TWO CENT PIECES

- 3548 1864 Small Motto, FS-401, MS65 Brown PCGS. CAC.** Medium brown surfaces maintain original glints of glowing fire-orange color within the recesses that contribute to the terrific aesthetic quality of this Gem Small Motto two cent — the popular first-year type. Boldly struck with myriad interesting die cracks throughout the reverse. NGC ID# 22N8, PCGS# 38232 Base PCGS# 3579

**3549** 1864 Small Motto, FS-401, MS64 Red and Brown PCGS. An impressive Choice example from the first year of the denomination, this coin represents the scarcer Small Motto variety. The lustrous, lightly marked surfaces show a mix of original red and light brown patina, with highlights of crimson and lilac. NGC ID# 22N8, PCGS# 38233 Base PCGS# 3580

**3550** 1865 Plain 5 MS66 Red PCGS. Always elusive at the Premium Gem level with full Red surfaces, this needle-sharp 1865 was struck with lightly clashed dies with no loss of detail on either side. Rich, reddish-orange accents embellish the natural, golden-orange surfaces. Marks are few and carbon is minimal on this solid Plain 5 representative. Population (all varieties combined): 54 in 66 (3 in 66+) Red, 1 finer (1/19). PCGS# 38249 Base PCGS# 3584

**3551** 1867 MS66 Red and Brown PCGS. A carbon-free, sharply struck Premium Gem, this Red and Brown 1867 two cent piece displays a faint dusting of chestnut toning over original copper-orange mint luster. There is not a single notable abrasion. Examples of this date are seldom found so fine. Population: 17 in 66 Red and Brown, 0 finer; 3 in 66 Red, 0 finer (2/19). NGC ID# 22NB, PCGS# 3592

#### 1869 Two Cent, MS66 Red and Brown Beautifully Preserved

**3552** 1869 MS66 Red and Brown PCGS. CAC. A fully struck, luminous Premium Gem example of the 1869 two cent piece, showing rich burnt-orange luster with delicate overtones of burgundy. No more than a few faint flecks are visible with a loupe. The 1869 is rare this fine and unknown finer in the Red and Brown color category. Population: 23 in 66 (2 in 66+) Red and Brown, 0 finer; 4 in 66 (2 in 66+) Red, 1 finer. CAC: 9 in 66, 0 finer (2/19). NGC ID# 22ND, PCGS# 3604

**3553** 1871 MS65 Red and Brown PCGS. CAC. This satiny Gem showcases a luminous blend of burgundy-brown toning and original copper-orange mint luster. There are a few small carbon spots, but they are hidden within the design amid the aforementioned toning so as not to pose a distraction. The strike is sharp, and for the grade this CAC-approved 1871 two cent piece is highly appealing. NGC ID# 22NF, PCGS# 3610

#### PROOF TWO CENT PIECES

**3554** 1864 Large Motto PR65 Brown NGC. CAC. Large Motto, as are most proof 1864 two cent pieces, this Gem is CAC endorsed and has deeply reflective fields. Fire-orange, red, olive, and russet hues cover each side, leaving substantial "red" in the coloration, despite the Brown designation from NGC. NGC ID# 274T, PCGS# 3621

#### 1864 Large Motto Two Cent PR65 Red and Brown Cameo

**3555** 1864 Large Motto PR65 Red and Brown Cameo NGC. The Guide Book provides an italicized mintage of 100+ pieces for the proof 1864 Large Motto two cent piece. The actual production presumably exceeded the silver proof set (470 pieces), since Civil War-era buyers could purchase proof singles. This sharply struck and flashy Gem is principally orange-gold but also displays hints of steel-gray patina.

Ex: FUN Signature (Heritage, 1/2012), lot 11914, which realized \$776.25. NGC ID# 274T, PCGS# 83622 Base PCGS# 3622

**3556** 1872 PR65 Red and Brown NGC. The well-preserved original red surfaces of this attractive Gem have mellowed to chocolate-brown in some areas, with reflective fields and sharply detailed design elements underneath the patina. Census: 78 in 65 (2 in 65+) Red and Brown, 43 finer (1/19). NGC ID# 2752, PCGS# 3649

#### 1872 Two Cent, PR66 Red and Brown Sharp and Reflective

**3557** 1872 PR66 Red and Brown PCGS. A razor-sharp strike complements reflective fields on this Premium Gem Red and Brown proof, showing copper-gold, russet, and olive hues. There is no obtrusive carbon spotting, and in fact, almost no carbon is discernible beneath a loupe at all. A pleasing coin for the grade. Population: 39 in 66 (3 in 66+) Red and Brown, 2 finer (1/19). NGC ID# 2752, PCGS# 3649

#### 1872 Two Cent, PR66 Red and Brown Nearly Full Red Surfaces

**3558** 1872 PR66 Red and Brown PCGS. A sharp Premium Gem proof with delicate greenish accents in the fields atop otherwise uniform copper-orange surfaces. The overall patina is nearly worthy of a Red designation. Only a few tiny flecks are visible with a glass. The 1872 proof in high grade serves as an alternative to the conditionally rare 1872 circulation strike, which is the series key. Population: 40 in 66 (3 in 66+) Red and Brown, 2 finer; 15 in 66 Red, 1 finer (2/19). NGC ID# 2752, PCGS# 3649

**1873 Closed 3 Two Cent, PR63 Brown  
Mottled Toning**

- 3559 1873 Closed 3 PR63 Brown PCGS.** This is a sharp Select proof with reflective fields and minimal marks. Mottled blue-green, gold, russet, and lilac hues cover each side, earning the Brown color designation from PCGS. The Closed 3 proofs are original 1873 coinage, while the Open 3 pieces are considered to be later restrikes. No circulation-issue two cent pieces were produced in 1873. NGC ID# 2753, PCGS# 3651

**1873 Open 3 Two Cent, PR65 Red and Brown  
Well-Balanced Coloration**

- 3560 1873 Open 3 PR65 Red and Brown PCGS.** The Open 3 proof 1873 two cent pieces have long been considered restrikes of the final issue in the series. This issue is essential for a complete date set of two cent pieces, even if proofs are not the focus of that collection. In Gem condition, this Red and Brown example displays a sharp strike and modestly reflective fields. Gold, russet, amber, and greenish hues cover each side. NGC ID# 2754, PCGS# 3655

## THREE CENT SILVER

- 3561 1851 Repunched Date, FS-302, MS65 PCGS.** Struck from cracked and clashed dies, this Gem three cent silver is a scarce Cherrypickers' repunched date. It features a wide spread between the primary and secondary digits, which are readily visible south of 851. Mint luster glows from pearlescent silver-gray surfaces, with bold radial die cracks on the reverse and several obverse planchet striations. PCGS# 38574 Base PCGS# 3664

- 3562 1851-O MS65 PCGS.** A frosty Gem, lacking any mentionable abrasions. Lovely gold, russet, and lilac-blue toning appears on each side, complementing the natural luminance of the surfaces. There is a touch of strike weakness on the central shield of the obverse, while the reverse shows considerable die lapping in the recesses of the C. Population: 61 in 65 (1 in 65+), 35 finer (1/19). NGC ID# 22YY, PCGS# 3665

- 3563 1854 MS64 PCGS.** Struck from clashed dies that show patches and dots of green-brown toning, most visibly at the right obverse and along right-hand margin on the reverse. An attractive mix of pale blue, gold, and green patina settles lightly over each side. Softly lustrous with Choice, original surfaces, this 1854 had a large mintage of 671,000 pieces.

Ex: Boston Signature (Heritage, 8/2010), lot 4057. NGC ID# 22Z3, PCGS# 3670

- 3564 1855 MS64 PCGS.** The 1855 is among the rarest Type Two three cent silver issues, rarely offered finer than MS64. This CAC-approved Choice example displays clash marks in the fields but is boldly struck. Satiny mint luster yields champagne and rose-gold coloration with no major abrasions. Population: 50 in 64, 26 finer (1/19). NGC ID# 22Z4, PCGS# 3671

- 3565 1862/1 FS-301 MS66 PCGS. CAC.** CAC endorsed, this Premium Gem is lustrous and high-end for the issue. A Guide Book variety often collected alongside the regular 1862 issue, the 1862/1 variant is not without controversy. Some feel the underdigit 1 is merely a pair of die scratches, or possibly some other die anomaly. A bold die crack runs through 1 in the date, and an angled die line connects the star point to the top of numeral 6. Struck from boldly clashed dies, and lightly toned with gold and gray accents. Population: 87 in 66 (4 in 66+), 18 finer. CAC: 38 in 66, 7 finer (1/19). NGC ID# CBR7, PCGS# 38580 Base PCGS# 3681

- 3566 1865 MS62 PCGS.** Only 8,000 three cent silver pieces were struck in 1865, the lowest mintage in the series up to that point. High-grade survivors are scarce. This attractive MS62 example displays golden interiors, ceding to deep ocean-blue around the peripheries. The strike is sharp and there are no bothersome contact marks. Housed in a green label holder. Population: 11 in 62, 61 finer (1/19). NGC ID# 22ZF, PCGS# 3685

- 3567 1871 MS64 NGC.** Sharply detailed in most areas, this attractive Choice example shows a touch of softness on the arrows and Roman numerals on the reverse. The well-preserved surfaces show some prooflike reflectivity in the fields. From a mintage of just 3,400 pieces. Census: 29 in 64, 71 finer (1/19). NGC ID# 22ZM, PCGS# 3692

## PROOF THREE CENT SILVER

- 3568 1867 PR64 Cameo NGC.** No Ultra Cameo proof 1876 three cent silver pieces are certified at NGC, making this Choice Cameo all the more important with its modest field-device contrast. Both sides have deep blue-green toning that joins concentric bands of rose-gold, yellow, and violet in the margins. The centers are a delicate champagne hue. Census: 7 in 64 Cameo (1 in 64★), 27 finer (1/19). NGC ID# 27CD, PCGS# 83717

- 3569 1873 PR63 PCGS.** This attractive Select proof exhibits sharply detailed design elements throughout and the lightly marked surfaces include deeply reflective fields, under vivid shades of lavender and pale gold toning. NGC ID# 27CJ, PCGS# 3724

## THREE CENT NICKELS

- 3570 1874 MS66 PCGS.** Attractive powder-blue, wheat-gold, and lilac shades accompany lustrous and uncommonly unabraded surfaces. The strike shows only minor blending at the centers of the first two pillars. Population: 17 in 66 (1 in 66+), 1 finer (2/19). NGC ID# 2759, PCGS# 3742

**1879 Three Cent Nickel, MS67+  
Top-Grade Registry Coin**

- 3571 1879 MS67+ NGC.** A great condition rarity, this high-end MS67 1879 three cent nickel is among the finest examples of this issue certified. Radiant cartwheel luster engulfs the brilliant, silvery surfaces and sharp design elements. No mentionable abrasions are evident. Census: 7 in 67 (1 in 67+, 1 in 67★), 0 finer (1/19). NGC ID# 275Z, PCGS# 3747

**3572** 1885 — Cleaning — PCGS Genuine. AU Details. Some inconspicuous hairlines remain beneath medium, bluish-gray toning that spreads evenly across both sides of this low-mintage three cent nickel. Just 1,000 circulation strikes were issued. Marks are nearly nonexistent on the smooth surfaces, which show only sparse hints of pale-gold luster beneath the placid patina. About Uncirculated sharpness remains.

## PROOF THREE CENT NICKELS

**3573** 1866 PR66 Cameo PCGS. The second-year issue in the proof three cent nickel series is occasionally available in Cameo grades, but Premium Gems are elusive, and finer pieces are rare. This high-end Cameo displays deep mirroring in the fields and frosty luster over sharp devices. Neither side exhibits toning. Population: 23 in 66 (2 in 66+) Cameo, 2 finer; 9 in 66 (1 in 66+) Deep Cameo, 7 finer (2/19). NGC ID# 275L, PCGS# 83762

1866 Three Cent Nickel, PR66  
Elusive Ultra Cameo Example

**3574** 1866 PR66 Ultra Cameo NGC. From an estimated mintage of 725 pieces, the proof 1866 three cent nickel is seldom encountered with Ultra Cameo surfaces. This spectacular Premium Gem exhibits detailed design elements on the obverse, but the reverse shows some incomplete detail, due to lapping. The impeccably preserved surfaces include deeply mirrored fields that contrast profoundly with the frosty devices. Census: 9 in 66 Ultra Cameo (2 in 66★), 9 finer (2/19). NGC ID# 275L, PCGS# 93762

**3575** 1867 PR66+ PCGS. This Plus-graded coin likely ranks among the top five proofs for the date, with glittering mirrored fields and a needle-sharp strike. Lovely shades of lilac and peach-gold vie for attention, while the lightly frosted motifs appear flawless in their execution. There are no distractions to divert attention from the obvious technical quality and eye appeal. Population: 9 in 66 (1 in 66+), 1 finer (1/19). NGC ID# 275M, PCGS# 3763

**3576** 1868 PR66+ Cameo PCGS. CAC. This Plus-graded Premium Gem exhibits razor-sharp definition on all design elements and the impeccably preserved surfaces include deeply reflective fields that contrast boldly with the frosty devices. Population: 30 in 66 (2 in 66+) Cameo, 3 finer. CAC: 23 in 66, 3 finer (2/19). NGC ID# 275N, PCGS# 83764

**3577** 1872 PR66+ Cameo PCGS. Proof 1872 three cent nickels of this caliber are notably rare and virtually unimprovable. Near-brilliant, boldly contrasted surfaces on this high-end Premium Gem Cameo exhibit thickly frosted motifs surrounded by watery fields. There is some minor strike softness in the central reverse. Population: 22 in 66 (2 in 66+) Cameo, 2 finer; 3 in 66 (1 in 66+) Deep Cameo, 0 finer (2/19). NGC ID# 26JT, PCGS# 83768

**3578** 1875 PR66 Cameo NGC. Among the finest Cameos certified, this Premium Gem proof 1875 three cent nickel displays a bold strike and reflective fields that still show die polishing lines. The obverse portrait has several small planchet marks (as-made), including a "shiny" area on Liberty's jaw and mouth. Untoned. Census: 6 in 66 Cameo (1 in 66+, 1 in 66★), 0 finer (1/19). NGC ID# 22NV, PCGS# 83771

**3579** 1880 PR67 Cameo PCGS. This brilliant light gray Superb Gem has fully and deeply mirrored fields that nicely frame its frosty and highly lustrous devices. Bold design definition completes the pretty picture. Population: 12 in 67 (2 in 67+) Cameo, 0 finer (2/19). NGC ID# 5E5S, PCGS# 83776

**3580** 1889 PR67+ NGC. A scarce Superb Gem example of the final-year proof three cent nickel. Delicate pastel toning adorns each side, complementing sharp, satiny devices and modestly reflective fields. A tiny planchet flaw is noted by the U in UNITED. Census: 53 in 67 (2 in 67+, 1 in 67★), 2 finer; 11 in 67 Cameo, 0 finer (1/19). NGC ID# 22NW, PCGS# 3786

## SHIELD NICKELS

**3581** 1866 Rays MS65 PCGS. This is a well-struck Gem Rays type coin, showing champagne-gray surfaces with tinges of iridescence in the fields. There is a spectacular die break on the lower reverse border — a retained cud that has begun to break away from the rest of the die. There is a wide "crack" where the broken piece has split from the die, and the dentils in this area are offset from the rest of the border as the fragment is forced outward. Likely few — if any — further coins were struck from this die pair after the present coin. NGC ID# 22NX, PCGS# 3790

1867 No Rays Shield Nickel, MS66+  
High-End Registry Coin

**3582** 1867 No Rays MS66+ NGC. CAC. The inaugural No Rays Shield nickel is readily available through MS64, and it is only marginally elusive in MS65. Premium Gems, however, are seldom offered, and this issue in almost unknown finer. This Plus-graded, CAC-approved coin displays a bold strike and vibrantly lustrous, untoned surfaces that have more of a silvery hue than the typical nickel-gray. Eye appeal is outstanding. Census: 33 in 66 (3 in 66+, 1 in 66★), 1 finer. CAC: 8 in 66, 0 finer (2/19). NGC ID# 22NZ, PCGS# 3794

1874 Shield Nickel, MS66  
Among the Finest Pieces Certified

**3583** 1874 MS66 PCGS. CAC. This CAC-endorsed Premium Gem is among the finest 1874 Shield nickels certified, an essential acquisition for Registry Set collectors and specialists of the series alike. Delicate lilac hues appear throughout otherwise light golden surfaces, which radiate with softly frosted mint luster. Eye appeal is outstanding on this sharply struck example. Population: 30 in 66 (8 in 66+), 0 finer. CAC: 12 in 66, 0 finer (2/19). NGC ID# 22P9, PCGS# 3803

## PROOF SHIELD NICKELS

### 1869 Shield Nickel, PR67 Delicately Toned, Conditionally Rare

**3584** 1869 PR67 NGC. This Superb Gem proof is among the finest numerically graded at NGC for the date, showing glimmers of reflectivity in the fields with delicate champagne and rose hues. The devices are sharp, producing modest contrast at certain angles. An eye-appealing coin of tremendous quality. Census: 6 in 67, 0 finer; 2 in 67 Cameo, 0 finer (2/19). NGC ID# 276K, PCGS# 3823

**3585** 1873 Closed 3 PR66 Cameo PCGS. CAC. All 1873 proof Shield nickels feature the Closed 3 logotype in the date. This CAC-approved Premium Gem Cameo is among the finer-known representatives of the date. The strike is sharp and strong contrast is apparent on each side. A delicate hint of light golden toning graces each side. Population: 38 in 66 (2 in 66+) Cameo, 3 finer. CAC: 20 in 66, 2 finer (2/19). NGC ID# 276P, PCGS# 83827

### 1877 Shield Nickel, PR66 Cameo Challenging Proof-Only Date

**3586** 1877 PR66 Cameo NGC. 1877 was the first of two consecutive proof-only dates. The mintage for the 1877 was much lower (900 pieces) than its 1878 successor, since the transition between the Trade and Morgan dollars encouraged proof set sales. The present high-grade 1877 nickel displays blushes of olive-gold toning on the lower obverse. The strike is full, the fields are mirrored, and there is no evidence of contact. Certified in a circa-2000 holder. Census: 65 in 66 Cameo (1 in 66+, 5 in 66★), 5 finer; 0 in 67 Ultra Cameo, 1 finer (2/19). NGC ID# 276U, PCGS# 83831

**3587** 1878 PR66 PCGS. A wisp of tan toning enriches this satiny and sharply struck Premium Gem. The coin is essentially devoid of contact or carbon, although a minor retained lamination (as issued) is noted near the first S in STATES. The 1878 is a proof-only issue with just 2,350 pieces struck, and while not as scarce as the 1877 proofs, it is often collected hand-in-hand with that proof-only issue. NGC ID# 276V, PCGS# 3832

## LIBERTY NICKELS

**3588** 1883 No Cents MS67 NGC. Collectors saved large quantities of first-year 1883 Liberty nickels without CENTS on the reverse. This top-graded survivor maintains brilliant surfaces and exhibits a near-complete strike. The left ear of corn shows some softness, as always. Census: 66 in 67 (2 in 67+, 4 in 67★), 0 finer (1/19). NGC ID# 2772, PCGS# 3841

**3589** 1883 With Cents MS66 PCGS. CAC. Satiny, untoned luster engulfs the virtually pristine surfaces of this With CENTS type coin. Slight strike weakness is seen only on the corn ear to the left of the wreath bow. The 1883 With CENTS Liberty nickel is rarely offered finer, with only eight such coins reported by PCGS. CAC: 41 in 66, 2 finer (1/19). NGC ID# 22PH, PCGS# 3844

**3590** 1884 MS66 PCGS. The 1884 is a collectible second-year issue with a mintage of 11.2 million coins. It becomes conditionally scarce in Premium Gem and is prohibitively rare in MS67. This brilliant example displays needle-sharp stars and curls, and above-average detail on the left ear of corn. Three submissions are graded higher at PCGS (1/19). NGC ID# 22PJ, PCGS# 3845

**3591** 1889 MS66 PCGS. CAC. The 1889 Liberty nickel is scarce in MS66, and this CAC-approved coin is among the finest pieces at PCGS. Other than a touch of softness on the lower-left wreath, the design is sharply brought up, and neither side exhibits significant abrasions. A trace of ice-blue tints each side. Population: 44 in 66 (8 in 66+), 0 finer. CAC: 22 in 66, 0 finer (1/19). NGC ID# 2775, PCGS# 3850

**3592** 1890 MS66 NGC. The luster on this Premium Gem 1890 Liberty nickel has a delicate, frosty texture that gives the coin a fresh appearance. A trace of pastel toning accents each side. A conditionally rare example of this otherwise plentiful issue, sharply struck save for on the lower-left portion of the wreath, which is often incompletely defined. Census: 10 in 66, 1 finer (1/19). NGC ID# 22PM, PCGS# 3851

**3593** 1894 MS65 PCGS. CAC. This lovely Gem is boldly impressed in the centers and displays uncommonly vibrant luster for this mid-1890s issue. Delicate peach patina graces much of the obverse, while the reverse is slightly lighter. Population: 64 in 65 (3 in 65+), 45 finer. CAC: 15 in 65, 19 finer (1/19).  
Ex: Dallas Signature (Heritage, 11/2007), lot 242, which realized \$1,265; FUN Signature (Heritage, 1/2013), lot 3403, which realized \$1,410. NGC ID# 2779, PCGS# 3855

**3594** 1912-S MS62 PCGS. Satiny luster covers this San Francisco Liberty nickel. The interiors display muted golden-gray patina, surrounded by deep olive-gray borders. No major abrasions are noted. On the reverse, the usual strike weakness is present on the corn ear to the left of the wreath bow. NGC ID# 277R, PCGS# 3875

## PROOF LIBERTY NICKELS

**3595** 1885 PR66 PCGS. Rare as a circulation strike, the 1885 is less challenging in proof, which was the preferred format for collectors in the 1880s. This Premium Gem proof is sharp and lightly toned in gold hues with a sprinkling of gray patina. Mirrored fields contrast with Liberty's frosted portrait on the obverse, while the reverse is slightly less mirrored at its center. PCGS has certified just 30 finer pieces as regular proofs (2/19). NGC ID# 277T, PCGS# 3883

**3596** 1893 PR65 Deep Cameo PCGS. CAC. Every minute detail of this Gem Deep Cameo proof is fully struck, and cameo contrast is spectacular. The CAC endorsement is well earned. Neither side of this conditionally rare proof 1893 Liberty nickel is toned. Population: 3 in 65 Deep Cameo, 6 finer. CAC: 2 in 65, 5 finer (1/19). NGC ID# 2783, PCGS# 93891

**3597** 1897 PR67 Cameo PCGS. A glittering and well-contrasted mirrored proof, fully struck, with nearly flawless surfaces. The obverse is seemingly pristine, with a translucent-gold crescent at the left margin and ice-blue toning throughout the remaining fields and devices. The reverse shares the same ice-blue color, with a bulls-eye of pale peach-gold at the center. A small cloudy area at the lower-right wreath near the final A in AMERICA appears related to some tiny remnants of mint grease in that area. Population: 20 in 67 (5 in 67+) Cameo, 3 finer (1/19). NGC ID# 2787, PCGS# 83895

## BUFFALO NICKELS

**3598 1913 Type One MS67+ PCGS. CAC.** The denomination is not recessed on the reverse, identifying the popular Type One variety. This Plus-graded Superb Gem represents the first year of the Buffalo design, with sharply detailed design elements and impeccably preserved, lustrous surfaces. A few hints of sea-green and ice-blue toning add to the terrific eye appeal. PCGS has graded 29 numerically finer examples (1/19). NGC ID# 22PW, PCGS# 3915

### 1914/3 Buffalo Nickel, AU58 Popular Guide Book Overdate

**3599 1914/3 FS-101 AU58 PCGS. CAC.** The top bar of an undertype 3 shows near the top of the 4 in the date, identifying the popular Cherrypickers and Guide Book variety. This attractive near-Mint specimen exhibits well-detailed design elements, with just a trace of wear on the high points. The lightly abraded surfaces retain much of their satiny mint luster. Population (for the variety): 17 in 58, 40 finer. CAC: 3 in 58, 13 finer (2/19). NGC ID# 22R4, PCGS# 147844 Base PCGS# 93924

**3600 1915-S MS64 NGC.** Bright satin luster engulfs this near-Gem 1915-S Buffalo nickel and reveals only a trace of light golden color. Trivial strike softness is restricted to the bison's shoulder and the hair above the Indian's braid. The 1915-S is elusive in finer grades. NGC ID# 22R9, PCGS# 3929

**3601 1916-S MS65 PCGS.** An elusive Gem example of this early S-Mint Buffalo nickel. Satiny luster displays warm golden toning, and neither side has bothersome abrasions. The obverse is struck from an eroded, lapped die with two sets of heavy clash marks visible. By contrast, the reverse is from a fresh die. Moderate strike weakness affects the central high points on both sides as usual. NGC ID# 22RC, PCGS# 3933

### 1916-S Buffalo Nickel, MS66 Rarely Seen Finer

**3602 1916-S MS66 NGC.** More than 11.8 million Buffalo nickels were struck at the San Francisco Mint in 1916, but few survivors can match the quality and eye appeal of the present coin. This spectacular Premium Gem exhibits sharply detailed design elements and well-preserved surfaces, with satiny mint luster and highlights of sea-green and ice-blue toning. Census: 16 in 66, 2 finer (2/19). NGC ID# 22RC, PCGS# 3933

**3603 1917-D MS65 PCGS. CAC.** This satiny nickel-gray Gem exhibits clear definition on the hair braid, horn, and legends, though trivial softness occurs on the bison's head. Smooth with an identifying mark above the Indian's brow. Encapsulated in a green label holder. PCGS lists 26 higher grading events. CAC: 20 in 65, 5 finer (1/19). NGC ID# 22RE, PCGS# 3935

### 1917-S Nickel, Satiny Gem

Rarely Offered Finer

**3604 1917-S MS65 PCGS.** The 1917-S is scarce in Gem condition and rarely offered finer. This S-mint nickel is delicately toned in light golden and lilac-blue hues that complement satiny mint luster. Preservation is outstanding for the grade. Trivial softness occurs on the tips of the Indian's feathers and the hair immediately above the braid. The bison's shoulder is also a trifle incomplete. PCGS reports 25 finer submissions (1/19). NGC ID# 22RF, PCGS# 3936

**3605 1918 MS65 PCGS.** Faint hues of peach-orange and powder-blue provide a hint of color to this mostly brilliant Gem nickel. LIBERTY and the reverse legends are well-struck, but the date, braid, and the bison's head and shoulder show normal softness. Ticks are trivial. NGC ID# 22RG, PCGS# 3937

**3606 1918 MS65 PCGS. CAC.** The 1918 Buffalo nickel is occasionally available in Gem condition, but CAC-approved examples are rare. This piece displays satiny golden-gray surfaces with tinges of underlying gold patina. There is a touch of strike weakness in the centers and die erosion in the fields, but the overall sharpness is above average for the issue. NGC ID# 22RG, PCGS# 3937

**3607 1918 MS66 PCGS.** Lavender-gold, ice-blue, and champagne hues merge throughout much of each side, while the obverse borders also show tinges of deeper rainbow toning. This Premium Gem 1918 nickel is beautifully preserved, satiny, and luminous. Trivial strike weakness is seen only on the bison's shoulder and the hair above the Indian's braid. Population: 88 in 66 (4 in 66+), 10 finer (1/19). NGC ID# 22RG, PCGS# 3937

**3608 1918 MS66 PCGS. CAC.** A scarce Premium Gem example of an otherwise plentiful Philadelphia issue, rare with the CAC endorsement. This piece is well-struck and satiny with luminous, golden-toned surfaces and no bothersome abrasions. Higher-grade representatives are rare. Population: 87 in 66 (3 in 66+), 10 finer. CAC: 17 in 66, 2 finer (1/19). NGC ID# 22RG, PCGS# 3937

### 1918/7-D Nickel, CAC-Approved VF20 Collector-Grade Example

**3609 1918/7-D FS-101 VF20 NGC. CAC.** Both sides of this midgrade collector coin display metal flowlines in the fields, with light wear over the devices. The date remains clear, and the devices have good definition. The 1918/7-D Buffalo nickel is a key issue in the series. This piece has original slate-gray color and is problem-free. It is one of just seven coins for the grade with CAC recognition. NGC ID# 22RJ, PCGS# 38446 Base PCGS# 3939

**1918-D Buffalo Nickel, MS65**  
Elusive Gem Registry Candidate

- 3610 1918-D MS65 PCGS.** Like many pre-1930s Denver issues, the 1918-D Buffalo nickel is conditionally scarce in MS65 and rare finer, with high-end coins heavily sought-after among Registry Set assemblers. This Gem displays satiny, well-preserved mint luster and just a hint of light golden toning. Trivial strike softness is evident on the tip of the upper feather on the obverse, and on the bison's shoulder on the reverse. Population: 75 in 65 (5 in 65+), 32 finer (1/19). NGC ID# 22RH, PCGS# 3938
- 3611 1919-D MS64 PCGS.** This satiny near-Gem is boldly struck from fresh dies — that alone would make it highly appealing, although it is also void of major abrasions and has original light-gold toning. Finer 1919-D Buffalo nickels are scarce in Mint State, especially when razor-sharp like this Choice Uncirculated example. NGC ID# 22RM, PCGS# 3942
- 3612 1919-S MS64 PCGS.** The 1919-S is occasionally available in MS64, but finer pieces are scarce. This collectible near-Gem example displays unmarked, satiny luster with a light golden hue. Moderate strike weakness — a staple of the 1919-S — affects the centers and occasional areas of the peripheries, including the date and the bison's head. Eye appeal is pleasing for the grade. NGC ID# 22RN, PCGS# 3943
- 3613 1920-D MS64 PCGS.** The high points are softly struck as always, namely the hair braid, and the bison's head and shoulder. Untoned silver surfaces radiate satin luster and show few obvious abrasions. This near-Gem is far finer than the average certified 1920-D nickel, which grades about AU50. NGC ID# 22RR, PCGS# 3945
- 3614 1920-S MS63 PCGS.** A pleasing Select example of this scarcer San Francisco issue, showing pastel and golden toning over each side. The strike is surprisingly good considering the extent of the die erosion, which leaves the fields flowlined on each side. NGC ID# 22RS, PCGS# 3946
- 3615 1921-S AU58 PCGS. CAC.** The 1921-S is a better date in the Buffalo nickel series, coming from a moderately low mintage of little more than 1.5 million coins. This CAC-endorsed near-Mint example displays light golden toning and satiny luster. A faint trace of high-point friction is all that prevents an Uncirculated grade, although some lightness of strike is noted on the central high points. NGC ID# 22RU, PCGS# 3948
- 3616 1924-D MS64 PCGS. CAC.** The 1924-D is relatively plentiful in MS64, but CAC-approved coins such as this are scarce. Satiny mint luster displays shades of pastel gold, lilac, and blue toning, with no bothersome abrasions. The usual strike weakness is apparent, most notably in the centers and on the bison's head and the upper obverse feather tip. NGC ID# 22RY, PCGS# 3952
- 3617 1924-S MS61 NGC.** The 1924-S nickel is a slightly better date in Uncirculated condition and it is highly sought-after. This piece is the poster child of a mid-1920s branch mint Buffalo nickel, showing heavy die erosion on both sides and corresponding strike weakness on the bison and portrait of the Indian. Uniform olive-gold toning with pastel accents blankets each side. No singular abrasions are noted. NGC ID# 22RZ, PCGS# 3953

- 3618 1925-S MS63 PCGS.** The reverse die was eroded at the time of striking, as is often the case, and both dies were widely spaced, resulting in incomplete detail on 19, UNITED STATES, and much of the bison's head, shoulder, and tail. Mainly nickel-gray color reveals wisps of gold, supplemented by soft mint luster. NGC ID# 22S4, PCGS# 3956

**1926-D Buffalo Nickel, MS65**  
Rarely Seen Finer

- 3619 1926-D MS65 PCGS.** The 1926-D Buffalo nickel was not a well-produced issue and most examples seen are softly struck, with lackluster surfaces. This attractive Gem exhibits a much better-than-average strike, with just a touch of softness on the bison's shoulder. The well-preserved surfaces are lustrous and appealing. PCGS has graded 31 numerically finer examples (2/19). NGC ID# 22S6, PCGS# 3958

**1934 Nickel, Rare MS67**  
Early Die State Registry Coin

- 3620 1934 MS67 PCGS.** This Superb Gem 1934 Buffalo nickel is among the finest certified, and it is conditionally rare as such. Satiny luster illuminates delicate lilac and golden-orange toning, with boldly rendered design elements. The coin is struck from fresh dies with no evidence of deterioration in the fields. Eye appeal is outstanding. Population: 39 in 67 (3 in 67+), 0 finer (2/19). NGC ID# 22SL, PCGS# 3972

- 3621 1937-D Three-Legged, FS-901, MS61 NGC.** A perennial collector favorite, the Three-Legged nickel is a mint error, caused by excessive lapping of the reverse die. All diagnostics of the variety are present, such as a narrow cluster of die lumps below the flank, and a granular appearance on the bison's back leg. The lustrous wheat-gold and stone-gray surfaces display infrequent unobtrusive marks. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

- 3622 1937-D Three-Legged, FS-901, MS62 PCGS.** Die erosion on this Mint State example is not quite as advanced as it is on most Three-Legged Buffalos, suggesting that this piece was struck early after the reverse die was lapped, effacing the bison's leg. Overall sharpness is pleasing for the key date variety, and the satiny surfaces display light golden toning. NGC ID# 22SX, PCGS# 38475 Base PCGS# 3982

**1938-D Buffalo Nickel, MS68  
Top-Grade Final-Year Type Coin**

**3623 1938-D MS68 NGC.** The 1938-D is a popular type coin issue, and it is remarkably collectible in the lofty MS68 grade, even if such coins are scarce. This example displays a bold strike and satiny, unblemished mint luster. Delicate pastel shades of cherry, gold, and lilac-blue toning grace each side. No numerically finer coins are reported. Census: 32 in 68 (1 in 68+, 8 in 68★, 1 in 68+★), 0 finer (2/19). NGC ID# 22T2, PCGS# 3984

**PROOF BUFFALO NICKELS**

**3624 1913 Type One PR64 PCGS. CAC.** A beautifully luminous, matte-surfaced proof Type One Buffalo nickel, showing golden and delicate olive toning with only a few tiny marks. The upper feather tip on the obverse exhibits the only evidence of strike weakness, and it is minor. CAC approved for quality and eye appeal. NGC ID# 278R, PCGS# 3988

**1915 Buffalo Nickel, PR67  
Sharp and Attractive Matte Proof**

**3625 1915 PR67 PCGS.** One of the scarcer matte proof issues. Allegedly, unsold proofs were melted at year's end, further reducing the number of examples available to collectors. Bright, satiny luster has taken on hint of golden toning at the margins, giving the coin the appearance of untampered originality, yet the overall surfaces are a classic grayish-blue color. The strike is pinpoint sharp, as expected on a Superb Gem proof. Population: 74 in 67 (12 in 67+), 7 finer (1/19). NGC ID# 278U, PCGS# 3992

**3626 1936 Type One — Satin Finish PR67 PCGS.** After two decades, proof Buffalo nickels returned with the Satin Finish pieces of 1936, although a return to the brilliant fields of yore was not far behind. This beautifully detailed piece shows elegant peach, blue, and violet shadings that blend subtly on each side. The strike is razor-sharp, and the eye appeal is spectacular. Housed in an old-generation blue label holder with barcode on the back. PCGS has graded 49 finer examples (2/19).

*Ex: Long Beach Signature (Heritage, 2/2009), lot 795. NGC ID# 278X, PCGS# 3994*

**3627 1936 Type Two — Brilliant Finish PR66 NGC.** Rainbow iridescence gleams from the mirrored surfaces, and the razor-sharp visage of the Indian chief has every hair strand in place. The bison is equally sharp, set against gleaming reflectivity that ripples with subtle shades from both ends of the spectrum. A tiny carbon fleck on the forehead is the sole imperfection, largely unnoticed on the otherwise pristine surfaces. NGC ID# 278Y, PCGS# 3995

**1936 Nickel, PR67  
Type Two, Brilliant Finish**

**3628 1936 Type Two — Brilliant Finish PR67 PCGS. CAC.** This was the first year that the Mint resumed proof production after a hiatus of two decades. Two different finishes were used — Satin and Brilliant — with this being the more popular among contemporary collectors. Someone clearly took excellent care of this Superb Gem. There are no signs of handling, and each side maintains original glints of pale gold color over nickel-gray surfaces. PCGS reports 11 finer submissions (1/19). NGC ID# 278Y, PCGS# 3995

**1936 Nickel, PR67  
High-End Brilliant Finish Coin**

**3629 1936 Type Two — Brilliant Finish PR67 PCGS. CAC.** The reflective fields of this Brilliant Finish 1936 proof nickel closely resemble the mirrored finish of the pre-1913 nickels and were more appealing to collectors of the period. The mintage of the 1936 proof (4,420 pieces) includes both of the proof finishes used. This Superb Gem boasts a seldom-seen CAC endorsement. The strike is sharp, and each side offers warm golden toning. PCGS lists only 11 finer submissions (2/19). NGC ID# 278Y, PCGS# 3995

**JEFFERSON NICKELS**

**3630 1941-S MS67 Full Steps PCGS.** The 1941-S Jefferson nickel is occasionally available in Full Steps grades, but almost never finer than MS66. This Superb Gem Full Steps coin is among the finest pieces certified, it is rare, and it is on the radar of Registry Set collectors. Satiny surfaces yield a dusting of light golden toning, and the strike is sharp throughout. No abrasions distract the eye. Population: 11 in 67 Full Steps, 0 finer (2/19). NGC ID# 22TJ, PCGS# 84012

**1946-S Nickel, MS67 Five Full Steps  
A Top-Grade Registry Candidate**

**3631 1946-S MS67 Five Full Steps NGC.** NGC divides the Full Steps population of the 1946-S nickel between coins with Five Full Steps and those with six. Just 56 Five Full Steps coins are reported in all grades, the finest being nine MS67 examples; only one Six Full Steps piece is listed, an MS66 (2/19). This Superb Gem Registry coin displays luminous satin luster and impressively sharp detail. A delicate blush of champagne toning on each side complements unabraded surfaces. NGC ID# 22U4, PCGS# 84030

**PROOF JEFFERSON NICKELS**

**3632 1942 Type One PR68 NGC.** Nickels were struck in a wartime silver composition later in the year, but this spectacular PR68 example was struck in the regular copper-nickel alloy. The design elements are razor sharp throughout and the impeccably preserved surfaces show highlights of greenish-gold toning. Census: 12 in 68, 0 finer (1/19). NGC ID# 27A3, PCGS# 4179

**1971 No S Nickel, PR68 Deep Cameo  
Rarely Offered This Fine**

**3633 1971 No S PR68 Deep Cameo PCGS. FS-501.** Some proof 1971 Jefferson nickels were struck with a die that lacked the San Francisco mintmark. This is a conditionally rare Deep Cameo example of that Guide Book variety. Each side is fully struck, and the mercury-like fields glimmer with a hint of golden toning that complements the frosted devices. Eye appeal is spectacular. Population: 17 in 68 (1 in 68+) Deep Cameo, 18 finer (2/19). NGC ID# 22YN, PCGS# 94204

**EARLY HALF DIMES**

**3634 1796 LIKERTY, V-1, LM-1, R.3 — Bent — NGC Details. VF.** The VF Details grade does not do justice to the sharpness of this LM-1 LIKERTY half dime, which shows noticeable wear only on the bottom of the bust and temple, and on the eagle's breast and the high points of the wreath. The surfaces are uniformly olive-gray and smooth. The bend in the planchet is so slight as to not be readily apparent, although prolonged study of the surfaces locates the slight "warp" in the field behind Liberty's head.

**1800 Half Dime, AU Details  
V-1, LM-1, Early Die State**

**3635 1800 V-1, LM-1, R.3 — Tooled — PCGS Genuine. AU Details.** Little wear is present on this piece, representing the plentiful LM-1 die variety. The die state is early, without machine doubling on the date. Portions of the upper obverse and lower reverse are expertly smoothed, but with little detriment to eye appeal. Each side has pastel shades of lilac-gray, gold, and sea-green. The strike is a trifle uneven, but the central devices are well brought up.

**BUST HALF DIMES**

**3636 1830 V-1, LM-14, R.3, MS65 PCGS.** Dynamic luster and smooth surfaces are the chief attributes of this desirable Gem Capped Bust type coin. Portions of the eagle are incompletely brought up, but peripheral elements such as the stars and legends are well struck. Only a whisper of golden toning precludes full brilliance. NGC ID# 232C, PCGS# 38653 Base PCGS# 4277

**3637 1834 V-1, LM-2, R.1, MS65 PCGS.** Moderate golden-brown patina visits the lower reverse margin, but this coruscating Gem is lightly toned overall. Marks are absent and the eye appeal is exceptional. The strike is crisp except on the left shield border. LM-2 offers a repunched F in OF and wide spacing between stars 9 and 10. NGC ID# 232G, PCGS# 38702 Base PCGS# 4281

**3638 1835 Large Date, Large 5C, V-4, LM-7, R.3, MS64 NGC.** Broad forest-green borders surround small windows of brilliance at the centers. This semiprooflike Choice Bust type coin appears unabraded. Faint parallel roller marks (as produced) cross the high points. NGC ID# 232H, PCGS# 38711 Base PCGS# 4282

**SEATED HALF DIMES**

**1837 No Stars Half Dime, MS65  
Reflective Fields, Small Date Logotype**

**3639 1837 No Stars, Small Date (Flat Top 1) MS65 PCGS. CAC.** A lovely CAC-endorsed Gem, this No Stars type coin displays sharp devices and barely a touch of golden toning. The fields are deeply reflective from die polishing, save for an area of frosty luster below Liberty's right (facing) elbow. Faint striations in the fields remain from the polishing of the die face. The 1837 No Stars, Small Date half dime is scarce in Gem condition and rare finer — rarer still with a CAC green label as seen here. Population: 30 in 65 (1 in 65+), 24 finer. CAC: 18 in 65, 18 finer (2/19). NGC ID# 232M, PCGS# 4312

- 3640** 1840 No Drapery MS65 PCGS. The 1840 is a collectible No Drapery issue, although it is scarce in Gem condition. This piece displays deep lavender-gray and olive-green toning over satiny mint luster. The strike is sharp and no bothersome abrasions are seen. Population: 22 in 65, 25 finer (2/19). NGC ID# 232U, PCGS# 4321

**1840-O Half Dime, AU55  
With Drapery Design**

- 3641** 1840-O Drapery AU55 PCGS. The With Drapery 1840-O half dime is scarcer overall than the No Drapery issue, boasting a smaller mintage of only 240,000 pieces. Attractive AU coins — and Mint State pieces in all grades — are rare. This Choice AU example displays lilac-gray and golden surfaces with light wear on the devices. The coin appears problem-free. Population: 7 in 55, 7 finer (2/19). NGC ID# 232X, PCGS# 4327

- 3642** 1848 Large Date MS63 NGC. Original, mottled toning covers this Select 1848 half dime in gold, olive, and russet hues. Abrasions are minor, hidden beneath the patina. The 1848 is scarce in Mint State, regardless of grade. Housed in a prior generation holder. Census: 4 in 63, 10 finer (1/19). NGC ID# 233A, PCGS# 4339

- 3643** 1853 Arrows MS66 PCGS. This luminous Premium Gem shows sharp relief definition despite moderate die erosion in the fields. Ice-blue luster features warmer olive-gold overtones across the interiors on each side. Finer 1853 Arrows half dimes are rarely offered. Population: 60 in 66 (15 in 66+), 14 finer (2/19). NGC ID# 233Y, PCGS# 4356

- 3644** 1853 Arrows MS66 PCGS. CAC. The 1853 Arrows half dime becomes challenging in MS66 and is scarce any finer. Lustrous surfaces on this piece display freckles of brown toning, more so on the reverse. The design elements are well-struck. A linear mark on Liberty's left (facing) shoulder is mentioned for accuracy. Population: 58 in 66 (14 in 66+), 14 finer. CAC: 14 in 66, 9 finer (1/19). NGC ID# 233Y, PCGS# 4356

**1857 Half Dime, Toned MS67  
Among the Finest at PCGS**

- 3645** 1857 MS67 PCGS. A relatively available date, the 1857 Seated half dime becomes conditionally rare in MS67, and no numerically finer coins are reported by PCGS. This Superb Gem displays luminous mint luster and delicate gold, olive, and lilac toning. The central devices are sharp while the border dentils exhibit minor weakness. Eye appeal is spectacular. Population: 15 in 67 (2 in 67+), 0 finer (2/19). NGC ID# 233S, PCGS# 4365

## PROOF SEATED HALF DIMES

- 1857 Half Dime, Toned PR64  
Rare in All Grades**

- 3646** 1857 PR64 NGC. The mintage of the proof 1857 half dime was unrecorded, although it may have been fewer than 100 coins. PCGS estimates a survivorship of only 50 to 75 pieces, which is likely generous. PCGS and NGC combined list 59 grading events for the issue, including probable resubmissions. Since our Permanent Auction Archives began in 1993, we have handled a proof of this date on 49 occasions, but many of these appearances represent repeated offerings of a handful of coins. It is reasonable that fewer than 50 pieces may survive, which is in agreement with the known survivorship of the proof 1857 half dollar. Both denominations were distributed in proof sets.

This toned near-Gem displays a sharp strike and reflective fields. Golden interiors cede to blue and sea-green borders, producing strong visual appeal. There are no contact marks of note. Census: 8 in 64, 15 finer; 0 in 64 Cameo, 2 finer (2/19). NGC ID# 3X58, PCGS# 4436

**1868 Half Dime, PR66 Cameo  
Delightful Multicolor Toning**

- 3647** 1868 PR66 Cameo PCGS. CAC. The proof half dime mintage for 1868 amounted to 600 pieces. This Premium Gem Cameo is delightfully toned, with golden-orange centers that merge with magenta, violet, and blue colors around the borders without diminishing contrast or field reflectivity. Population: 12 in 66 (2 in 66+) Cameo, 2 finer. CAC: 13 in 66, 0 finer (2/19). NGC ID# 2365, PCGS# 84451

- 3648** 1871 PR66 Cameo PCGS. This delightful Premium Gem proof exhibits sharply detailed, frosty design elements that contrast dramatically with the deeply mirrored fields. The virtually pristine surfaces are mostly brilliant, with a few subtle hints of pale gold toning. Overall eye appeal is terrific. Population: 6 in 66 (2 in 66+) Cameo, 6 finer (2/19). NGC ID# 2368, PCGS# 84454

## BUST DIMES

- 3649** 1809 JR-1, R.4 — Cleaned —NGC Details. AU. This is the first year of issue for John Reich's Capped Bust dime. Examination with a glass reveals the trivial handling marks and faint hairlines associated with a cleaned coin. Just a hint of gold toning appears on the light gray surfaces. NGC ID# 236U, PCGS# 38771 Base PCGS# 4486

**3650** 1822 JR-1, R.4, Good 4 NGC. Only 100,000 Capped Bust dimes were struck in 1822, making this a key date in the series. Only one die pair is known for the issue. This piece is well-worn, although the low grade only serves to make it accessible for collectors who would otherwise find this issue to be out of reach. The smooth slate-gray surfaces have hints of light lavender toning and are appealing for the grade. NGC ID# 236Z, PCGS# 38801 Base PCGS# 4497

**3651** 1825 JR-2, R.2 — Cleaned — PCGS Genuine. Unc Details. A lustrous and lightly toned example. Multiple sets of clash marks are noted above the eagle's head, but no abrasions are remotely consequential. The strike is bold except on the left-side stars. Mildly bright, but unquestionably attractive to many collectors.

**1825 JR-2 Dime, MS64  
Light-Yet-Colorful Toning**

**3652** 1825 JR-2, R.2, MS64 PCGS. Iridescent shades of apple-green and rose-red patina endows the obverse of this attractive Choice dime. The reverse is pearl-gray with gold and olive undertones. This Choice Uncirculated coin is lustrous and well preserved, with an above average strike and imposing eye appeal. The reverse displays at least three sets of clash marks, as produced. Among the finest examples of the JR-2 die marriage. NGC ID# 2374, PCGS# 38808 Base PCGS# 4503

**1835 JR-4 Dime, Toned MS64  
Incredibly Sharp Strike**

**3653** 1835 JR-4, R.2, MS64 NGC. JR-4 shows repunching on the base of the 3 in the date, and the denomination 10 C. is widely spaced on the reverse. This attractive near-Gem is impressively sharp throughout and displays satiny luster in the peripheral fields. Pastel shades of lavender, rose-gold, mint-green, and lilac-gray cover each side. Eye appeal is pleasing. Census (all varieties included): 80 in 64, 31 finer (1/19). NGC ID# 237F, PCGS# 38882 Base PCGS# 4527

**1837 Capped Bust Dime, MS64  
JR-4, Choice Border-Toned Surfaces**

**3654** 1837 JR-4, R.1, MS64 NGC. Bluish-gray toning at the margins of this transitional, near-Gem JR-4 dime lightens to russet-gray fields and silver centers. The obverse displays soft, pearlescent luster and a sharp strike, with a solitary short mark on Liberty's jawline. The brightly lustrous reverse is rotated 45° clockwise, with gold borders that frame a silver center. The date's Fancy 8 immediately identifies the JR-4 die pair, along with a diagnostic die crack that bisects Liberty's portrait rim-to-rim, from the front cap fold to a dentil beneath the lowest curl. Census (all varieties combined): 20 in 64, 20 finer (1/19). NGC ID# 237H, PCGS# 38894 Base PCGS# 4529

**SEATED DIMES**

**3655** 1838-O No Stars, F-102, R.3, AU58 PCGS. The 1838-O No Stars issue is significantly scarcer than the inaugural 1837 No Stars coins, and it was the first of its denomination struck at the New Orleans Mint. This example is richly toned in grayish-blue shades, yielding to gold-gray toning at the centers. This is a well-struck example, with slight weakness at the shield stripes and fine-grained surfaces as always seen for the Fortin-102 variety. Popular as an important two-year type, and challenging any finer. Population: 20 in 58, 38 finer (1/19). NGC ID# 237T, PCGS# 537645 Base PCGS# 4564

**1838 Seated Dime, FS-801, MS65  
Small Stars, Doubled Die Reverse**

**3656** 1838 Small Stars, Doubled Die Reverse, F-101, FS-801, MS65 PCGS. According to Gerry Fortin: "1838 Obverse 1 was mistakenly prepared with [a] small stars punch intended for half dimes." He estimates 200,000 pieces were struck, while Breen suggested a mintage as low as 30,000 coins. Ocean-blue border toning frames golden-orange centers on this lustrous Gem. An impressive example of this first-year type. Population: 11 in 65, 1 finer (2/19). NGC ID# 2TVT, PCGS# 145483 Base PCGS# 4569

**3657** 1838 No Drapery, Large Stars, F-111a, R.3, MS65 NGC. A Top 100 Variety, primarily due to the lengthy die crack across the seated Liberty. A lustrous, crisply struck, and mark-free Gem. Brilliant aside from one small tan-brown spot on the central obverse. Certified in a circa-2000 holder. Census: 44 in 65, 41 finer (1/19). PCGS# 537658 Base PCGS# 4568

- 3658** 1838 No Drapery, Large Stars, F-113, R.4, MS65 PCGS. CAC. A wormlike die flaw in the central reverse field between the N in ONE and the M in DIME aids in identifying this Large Stars variety. The No Drapery Seated dime as a type is highly sought-after in Gem condition. This CAC-approved MS65 coin displays a sharp strike and radiant mint luster. Uniform golden and sea-green toning covers each side, producing excellent visual appeal. PCGS# 537660 Base PCGS# 4568

**1869 Dime, MS66 Prooflike  
Sole Prooflike Coin at NGC**

- 3659** 1869 F-105a, R.4, MS66 Prooflike NGC. This die pair was also used for proof coinage, explaining the deeply prooflike qualities of the fields. A hint of champagne toning graces sharp design elements, and there are no bothersome abrasions. This is the only Prooflike-designated 1869 dime at NGC, although even non-Prooflike pieces are rare this well preserved. Census: 3 in 66 (1 in 66 Prooflike), 4 finer (1/19). NGC ID# 239Y, PCGS# 538243 Base PCGS# 4649

**1869-S Dime, Lightly Toned Gem**

- 3660** 1869-S F-101, R.3, MS65 PCGS. CAC. High level date. With a mintage of 450,000 pieces, the 1869-S is one of the more collectible dimes from this decade struck at the California branch mint. This lightly toned Gem exhibits blended gold and lavender patina over lustrous and minimally marked surfaces. Strike detail is good. Population (all varieties): 15 in 65, 5 finer (2/19). NGC ID# 239Z, PCGS# 538246 Base PCGS# 4650

- 3661** 1877-CC MS65 NGC. Type Two Reverse. A luminous, sharply struck Gem type coin for the Carson City enthusiast, this 1877-CC Seated Liberty dime displays lustrous surfaces with golden interiors. The margins have deeper sea-green and lilac-gray toning. No bothersome abrasions are evident on this Carson City dime. NGC ID# 23AM, PCGS# 4683

## PROOF SEATED DIMES

**1864 Dime, Brilliant PR66 Cameo  
Scarce, Low-Mintage Date**

- 3662** 1864 PR66 Cameo NGC. CAC. Proof dimes from 1864 are best remembered for their low mintage of only 470 pieces. This is a remarkably well-preserved example. The surfaces are brilliant throughout and strong field-device contrast is immediately apparent, as indicated by the Cameo designation. Census: 5 in 66 Cameo, 8 finer. CAC: 4 in 66, 3 finer (2/19).  
Ex: FUN Signature (Heritage, 1/2008), lot 1000, where it sold for \$2,012.50. NGC ID# 23CM, PCGS# 84757

- 3663** 1876 PR64 Cameo PCGS. CAC. F-103, R.4. Type One Reverse. The E in DIME is die doubled. Light wheat-gold toning accompanies this flashy and undisturbed near-Gem. The strike is good aside from the customary incompleteness on the cereal grains of the wreath. White-on-black contrast is especially strong on the reverse. Population: 20 in 64 (1 in 64+) Cameo, 10 finer. CAC: 5 in 64, 3 finer (1/19). NGC ID# 23CZ, PCGS# 84773

- 3664** 1880 PR66 Cameo PCGS. CAC. F-101, R.3. The 1880 was in the middle of a three-year run with very low mintages, since the Mint was compelled to strike unprecedented quantities of silver dollars. This magnificent white-on-black specimen is brilliant save for a small spot within the M in DIME. Population: 17 in 66 Cameo, 9 finer. CAC: 5 in 66, 5 finer (2/19). NGC ID# 23D5, PCGS# 84777

**1884 Dime, PR65 Deep Cameo  
One of Two Deep Cameos at PCGS**

- 3665** 1884 PR65 Deep Cameo PCGS. CAC. PCGS lists only two Deep Cameo examples of the 1884 proof dime — this Gem, and a PR66 coin that is slightly finer. NGC reports a pair of PR67 Ultra Cameo coins, with none in other numeric grades (2/19). This piece is sharp and brilliant, displaying frost-white devices and mirrorlike fields. Eye appeal is outstanding. Population: 1 in 65 Deep Cameo, 1 finer. CAC: 1 in 65, 1 finer (2/19). NGC ID# 23D9, PCGS# 94781

- 3666** 1885 F-101, R.3, PR65 NGC. CAC. The 1885 mintage of 930 proofs started a quick decline in the number of proof Seated dimes struck until series end in 1891. This richly toned example displays vibrant shades of blue, sea-green, and amber-gold, with glassy-mirrored fields and similarly toned, frosted devices. A sharp strike diminishes at the wreath top, although all other motifs are crisply rendered. Scarce with CAC endorsement. Census: 45 in 65 (1 in 65+), 37 finer. CAC: 8 in 65, 24 finer (1/19). NGC ID# 23DA, PCGS# 539056 Base PCGS# 4782

## BARBER DIMES

**3667 1893-S MS65 PCGS.** Sea-green borders encompass silver-gray and straw-gold centers. A lustrous and boldly struck Gem of this early and conditionally challenging San Francisco issue. The fields are smooth and the cheek displays delicate contact. Population: 18 in 65 (1 in 65+), 9 finer (2/19). NGC ID# 23DS, PCGS# 4802

**1898-O Dime, MS65**  
Sharp Strike, Subtle Iridescence  
Bowers' Guide Book Plate Coin

**3668 1898-O MS65 PCGS.** The plate coin in David Bowers' Guide Book of Barber Silver Coins (2015), where the 1898-O is called "one of the handful of top rarities among Barber dimes grading MS-60 or higher." Just 35 to 40 Gem or finer examples are thought to exist. This sharply struck, exquisite Gem is lustrous beneath subtle iridescent colors. There are no marks of any significance, and the eye appeal is extraordinary even for its high grade level. Population: 12 in 65 (2 in 65+), 6 finer (2/19). NGC ID# 23E7, PCGS# 4816

**1906-O Dime, Richly Toned MS67**

**3669 1906-O MS67 NGC.** The surfaces of this later O-mint Barber dime are remarkably reflective under translucent gold, green, blue, and violet patina. The strike is similarly impressive, particularly on the reverse. Add the high degree of preservation, and this is a Superb Gem to remember. Census: 10 in 67 (1 in 67★, 3 in 67+★), 1 finer (2/19). NGC ID# 23EZ, PCGS# 4840

**3670 1908-S MS65 PCGS.** This delightful Gem Barber dime exhibits sharply detailed design elements throughout and the well-preserved, brilliant surfaces radiate vibrant mint luster. A single speck of verdigris is evident on the N in UNITED. Population: 26 in 65, 18 finer (2/19). NGC ID# 23FA, PCGS# 4849

**3671 1909-D MS65 PCGS.** A scarce Gem example of this early Denver issue, showing satiny luster and sharp design elements. A network of russet toning streaks — barely perceptible to the naked eye — appears atop iridescent golden-gray surfaces. No abrasions distract from the eye appeal. Population: 17 in 65, 22 finer (2/19). NGC ID# 23FC, PCGS# 4851

**3672 1911-S MS67 PCGS.** More than 3.5 million Barber dimes were struck at the San Francisco Mint in 1911, but few survivors can match the quality and eye appeal of this spectacular Superb Gem. Sharply detailed design elements, impeccably preserved surfaces, and vibrant mint luster throughout make this coin a Registry Set contender. Population: 11 in 67 (1 in 67+), 0 finer (2/19). NGC ID# 23FL, PCGS# 4859

**3673 1913 MS66+ PCGS. CAC.** Plus-graded with CAC endorsement, this lustrous and frosty Registry Set quality dime is primarily brilliant, with areas of colorful iridescent shades at the borders. Dappled orange and pale bluish-gray hues creep into the obverse fields to emphasize the silver centers. This is an immaculate and high-end Premium Gem, fully struck. PCGS reports just one numerically finer example. Population: 20 in 66+, 1 finer. CAC: 20 in 66, 0 finer (1/19). NGC ID# 23FR, PCGS# 4863

**1913-S Barber Dime, MS66**  
Low-Mintage San Francisco Issue

**3674 1913-S MS66 PCGS. CAC.** The 1913-S is a semikey date in the Barber dime series and one that excites many collectors far more than some realize. This cataloger recalls a coin club acquaintance years ago who made it a collecting goal to fill a full roll of the date in problem-free circulated condition. This Premium Gem is far finer than the average 1913-S, being conditionally rare. Frosty luster and unabraded silvery surfaces complement sharp design elements. Population: 19 in 66, 7 finer. CAC: 10 in 66, 5 finer (1/19). NGC ID# 23FS, PCGS# 4864

**3675 1914-S MS66 PCGS.** This majestic Premium Gem exhibits sharply detailed design elements and impeccably preserved surfaces, under delicate shades of golden-tan toning. Vibrant satiny mint luster shines through the patina. Population: 19 in 66 (2 in 66+), 2 finer (1/19). NGC ID# 23FV, PCGS# 4867

## PROOF BARBER DIMES

**3676 1898 PR66 Cameo PCGS. CAC.** Dramatic peach-gold, rose-red, and ocean-blue toning is present on both sides but more extensive on the reverse. This needle-sharp proof type coin is pristine and eye-appealing. Population: 27 in 66 (4 in 66+) Cameo, 19 finer. CAC: 14 in 66, 23 finer (2/19). NGC ID# 26KV, PCGS# 84882

**3677 1915 PR66 NGC.** This attractively toned Premium Gem proof displays arcs of vivid blue and violet toning along the lower obverse and upper reverse margins, with warm orange-gold elsewhere. The strike is sharp and neither side has contact marks. An eye-appealing proof type coin. Census: 11 in 66, 14 finer; 2 in 66 Cameo, 8 finer (1/19). NGC ID# 7U3S, PCGS# 4899

## MERCURY DIMES

**1916-D Mercury Dime, Fine 15**

**3678 1916-D Fine 15 PCGS.** Only 264,000 Mercury dimes were struck at the Denver Mint in 1916, the first year of the design. The coins were produced late in the year and few high quality examples were saved by contemporary collectors, making the issue an elusive key to the series. The sticks in the fasces are distinguishable on this well-worn example, but the bands show extensive wear. The surfaces are lightly abraded, but show some amber specks in a fingerprint pattern on the obverse. NGC ID# 23GY, PCGS# 4906

### 1916-D Mercury Dime, AU Details

**3679 1916-D — Damaged — PCGS Genuine, AU Details.** A loupe reveals a few short scuffs and marks between R and T of LIBERTY, and some corresponding scratches and small digs on the portrait that prevent a numeric grade by PCGS. Tiny, scattered rim marks are visible with magnification. The reverse is less affected, with a few minor rim nicks but otherwise smooth and attractive fields and devices. Just 264,000 pieces were struck of this key Denver issue, most of which circulated.

**3680 1917-S MS67 PCGS.** Although the 1917-S claims a substantial mintage of 27.3 million coins, Superb Gems are rare with or without Full Bands. Softly frosted luster issues from the brilliant surfaces of this early branch mint Mercury dime. The central hair strands are a touch soft, and the bands, while nearly fully separated, are insufficiently so for a formal designation. Nevertheless, an appealing Registry-quality example. Population: 3 in 67, 0 finer (2/19). NGC ID# 23H4, PCGS# 4914

**3681 1918-D MS63 Full Bands PCGS.** This is a well-struck, softly frosted Select Full Bands example of a better date in the Mercury dime series. Light golden toning graces each side, and there are a few flecks of russet around the borders. The 1918-D is scarce in Full Bands grades. NGC ID# 23H6, PCGS# 4919

**3682 1920-S MS64 Full Bands PCGS.** A sharp strike and well-preserved surfaces earn this 1920-S Mercury dime high marks for appeal, even though they are hidden beneath russet-gold toning on the obverse. The reverse is lighter golden with more radiant luster. Finer Full Bands representatives are scarce (1/19). NGC ID# 23HD, PCGS# 4933

**3683 1920-S MS64 Full Bands PCGS. CAC.** The 1920-S is a better date with Full Bands, especially in Gem condition. This CAC-approved near-Gem displays frosty luster and sharp devices. Golden toning with russet flecks covers each side. On the obverse, an interesting die crack extends from the rim at 6 o'clock into the bust. NGC ID# 23HD, PCGS# 4933

### 1921 Dime, MS65 Full Bands One of the Keys to the Series

**3684 1921 MS65 Full Bands PCGS.** The 1921 issue helps form a trio of scarce, early dates in the Mercury dime series, each of which is always in strong collector demand. Only the 1916-D and 1921-D have smaller mintages, placing the 1921 Philadelphia production of 1.23 million pieces third-lowest in the series. This Gem example is softly lustrous beneath a mantle of original gold and lilac-gray toning. Sharply split horizontal bands and rounded, fully struck diagonals decorate the fasces. A loupe fails to reveal any marks of consequence. Population: 77 in 65 (4 in 65+) Full Bands, 57 finer (1/19). NGC ID# 23HE, PCGS# 4935

### 1921-D Mercury Dime, Radiant MS64

Important Denver Issue

**3685 1921-D MS64 PCGS.** The frosted surfaces of this 1921-D are nearly free of even the tiniest marks. Softness on the lower fasces and on a few letters of the obverse and reverse legends prevents Full Bands recognition. Still, the attractive surfaces exude eye appeal, with a veil of pale, reddish-gold toning, a sharp date, and a bold portrait of Liberty. Population: 43 in 64, 36 finer (1/19). NGC ID# 23HF, PCGS# 4936

### 1921-D Mercury Dime, MS64 Full Bands Low-Mintage Denver Key Date

**3686 1921-D MS64 Full Bands PCGS.** While Mercury dimes still appeared in pocket change as late as the 1950s, the 1921-D had been effectively removed from circulation by collectors early in that decade. Mint State examples were scarce from the get-go. This near-Gem Full Bands example is a favorite collector grade, with Gem and Premium Gem coins scarce and expensive. Brilliant, sharply struck surfaces are smooth and lustrous, with no marks to mention aside from a few tiny ticks on the lower fasces diagonal. NGC ID# 23HF, PCGS# 4937

**3687 1924-D MS65 Full Bands PCGS. CAC.** Contrary to the norm, the Mint State 1924-D Mercury dimes are actually more plentiful with Full Bands than without, although all are scarce in Gem or better condition. This piece is well-struck, with satiny luster and just a blush of pale pastel toning. There are no bothersome abrasions. Ex: ANA Signature (Heritage, 8/2014), lot 7473, which realized \$1,057.50; New York Signature (Heritage, 10-11/2015), lot 4159, which realized \$1,175. NGC ID# 23HK, PCGS# 4945

**3688 1925 MS67 Full Bands NGC.** Frosted mint luster coruscates on both sides of this finely grained Superb Gem dime. The strike is sharp for a 1925 — expected at the MS67 level with Full Bands, but not always seen. Brilliant surfaces emit a hint of lilac, while marks are limited to a couple of tiny nits on the fasces' diagonals. No Full Bands coins are finer at NGC. Census: 5 in 67 Full Bands, 0 finer (1/19). NGC ID# 23HM, PCGS# 4949

**1926 Dime, MS67 Full Bands  
Registry-Grade Condition Rarity**

- 3689 1926 MS67 Full Bands PCGS.** Most Uncirculated 1926 Mercury dimes have Full Bands sharpness, but such coins are conditionally scarce in MS67, and they are unknown numerically finer. This piece is sharp and satiny. Delicate champagne toning graces the interiors, surrounded by peripheral flecks of russet. The surfaces are devoid of abrasions. Population: 32 in 67 (2 in 67+) Full Bands, 0 finer (2/19). NGC ID# 23HR, PCGS# 4955

**1927-D Dime, MS64+ Full Bands  
Rare CAC-Approved Example**

- 3690 1927-D MS64+ Full Bands PCGS. CAC.** A sharp, satiny Full Bands example of this better Denver issue, showing mostly untoned surfaces. Some olive-green and gold toning traces the border regions, and a few scattered marks are apparent across the interiors. Eye appeal is good, earning a CAC endorsement. Population: 56 in 64 (1 in 64+) Full Bands, 53 finer. CAC: 7 in 64, 10 finer (1/19). NGC ID# 23HV, PCGS# 4963

- 3691 1930-S MS66 Full Bands PCGS.** While the 1930-S with Full Bands is moderately available in Premium Gem grade, it is rare any finer, and ranks among the more challenging issues from the early 1930s. This is a silky-smooth example with pale golden toning and an overall sharp strike. Coruscating mint luster flows across each side. PCGS reports just 24 numerically finer pieces (1/19). NGC ID# 84NT, PCGS# 4981

- 3692 1944 MS67+ Full Bands PCGS. CAC.** The 1944 is an overlooked strike rarity in the Short Set of dimes, overshadowed by the 1945. This is not only a fully struck example, but it also possesses exceptional color on each side and radiant mint luster. NGC ID# 23KB, PCGS# 5051

**PROOF MERCURY DIMES**

- 3693 1936 PR67 PCGS.** A brilliant Super Gem example of the first proof Mercury dime issue, showing a full strike and exceptional preservation. The 1936 boasts the smallest mintage in the proof series at 4,130 pieces. Population: 93 in 67 (7 in 67+), 3 finer (1/19). NGC ID# 27DG, PCGS# 5071

- 3694 1941 PR68 NGC.** The proof 1941 Mercury dime is scarce in this lofty grade, and only two finer pieces are known. This example is fully struck and brilliant, showing virtually flawless preservation. Ideal for Registry purposes. It is worth noting that a lone Cameo example of this issue is certified by NGC, graded PR67. Census: 62 in 68 (1 in 68+, 11 in 68★), 2 finer (2/19). NGC ID# 27DM, PCGS# 5076

**ROOSEVELT DIME**

**1953-S Dime, Lustrous MS68  
Top-Grade Registry Set Rarity**

- 3695 1953-S MS68 PCGS.** This incredibly lustrous, high-end Superb Gem is tied with three others as the finest 1953-S Roosevelt dime at PCGS. It is a Registry Set must-have for the series specialist. Daubs of olive-gold and sea-green toning leave interiors of silvery brilliance on each side, and the surfaces are without abrasion. We have previously handled only one other PCGS coin in this grade. Population: 4 in 68, 0 finer (2/19). NGC ID# 23LA, PCGS# 5105

**TWENTY CENT PIECES**

**1875-CC Twenty Cent Piece, MS63  
Only Collectible Carson City Issue**

- 3696 1875-CC MS63 PCGS. BF-2, R.1.** A collector-grade Mint State example of the only available Carson City issue in the twenty cent series. Satiny luster resides beneath lilac-gray and gold toning, and abrasions are minimal. Strike softness affects the eagle's upper left (facing) wing and breast, as well as the obverse shield. Population: 79 in 63, 165 finer (2/19). NGC ID# 23R6, PCGS# 5297

- 3697 1875-S MS64 PCGS. BF-14, R.1.** A highly lustrous Choice Seated type coin. Close to brilliant, though the right obverse field displays a smattering of minute gray freckles. A few faint luster grazes deny classification as a full Gem. BF-14 is a misplaced date variety, with the top of an 8 embedded in the dentils below the 8, per Brunner and Frost. NGC ID# 23R7, PCGS# 5298

## PROOF TWENTY CENT PIECE

1876 Twenty Cent, PR64 Cameo  
Strong Obverse Contrast

- 3698** 1876 PR64 Cameo PCGS. BF-1, R.4. An often-seen variety among proof coinage, showing minor die doubling on the reverse legends. The 1876 proof twenty cent piece is scarce this fine with cameo contrast, and Deep Cameos are rare. The strike is sharp, complementing deep reflectivity in the fields. The central obverse is brilliant, allowing for strong contrast, with russet toning around the border. The reverse is uniformly golden-russet in color with little contrast. Population: 32 in 64 Cameo, 24 finer; 4 in 64 (2 in 64+) Deep Cameo, 2 finer (1/19). NGC ID# 27H3, PCGS# 85304

## EARLY QUARTERS

- 3699** 1805 B-3, R.1 — Surfaces Smoothed — PCGS Genuine. XF Details. Tompkins Die State 5/2, heavily clashed with peripheral cracks on both sides. This is a well-detailed late die state type coin, showing lavender-gray and bluish toning overall. PCGS notes smoothing of the surfaces, and the appearance is that of a whizzed coin, with microgranularity evident overall. All major design elements are clear.

1805 B-3 Quarter, XF45  
Draped Bust Type Coin

- 3700** 1805 B-3, R.1, XF45 PCGS. Tompkins Die State 5/3, both dies heavily clashed with peripheral cracks. This lightly circulated B-3 Draped Bust quarter will serve as an excellent type coin, showing good detail and partial luster. Both sides have warm golden toning, which deepens to amber around the obverse border. NGC ID# 23RC, PCGS# 38925 Base PCGS# 5313

- 3701** 1806/5 B-1, R.2, VF30 PCGS. Tompkins Die State 2/3, as usual. Clash marks appear on both sides, and there is a thin crack along the top of the UNI in UNITED. The overdate feature of B-1 is visible to the naked eye. This attractive VF30 example displays deep olive-gray patina and strong detail. A small rim nick near the U in UNITED is the only mentionable flaw. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

## 1806/5 B-1 Quarter, XF40

Popular Overdate Variety

- 3702** 1806/5 B-1, R.2, XF40 PCGS. Tompkins Die State 2/3. The usual clashed and cracked die state. Glimpses of luster fill the legends and curls of this attractive better-grade early quarter. Free from any remotely distracting contact. B-1 is the sole 1806 overdate variety, and it displays an obvious underdigit that can be seen with the unaided eye.  
Ex: FUN Signature (Heritage, 1/2015), lot 4527, which realized \$3,525. NGC ID# 23RE, PCGS# 38938 Base PCGS# 5315

1806 B-3 Quarter, AU50  
Colorful Toning, Early Die State

- 3703** 1806 B-3, R.1, AU50 ANACS. Tompkins Die State 2/2. B-3 shows a die line connecting the right foot of the R in AMERICA to the olive branch. On the obverse, the I in LIBERTY and the 1 in the date were entered with defective punches. This satiny About Uncirculated Draped Bust type coin displays strong central detail but is slightly weak on the peripheral stars. Blue, lavender, and gold toning covers much of each side. NGC ID# 23RD, PCGS# 38929 Base PCGS# 5314

## BUST QUARTERS

1821 B-1 Quarter, AU58  
CAC Approved and Lustrous

- 3704** 1821 B-1, R.3, AU58 PCGS. CAC. Tompkins Die State 1/1. Luster dominates the borders and devices. This cream-gray and powder-blue near-Mint Bust quarter is refreshingly smooth save for a brief line northwest of star 12. Strike inexactness is mostly limited to the LU in PLURIBUS. B-1 is available in VF but surprisingly scarce in grades approaching Mint State.  
Ex: Set Shahabian, M.D. Collection (Bowers and Merena, 1/1996), lot 1386; Chief Paduke Collection - Denver Signature (Heritage, 8/2006), lot 1082, which realized \$3,450; Denis W. Loring Capped Bust Quarter Collection; to the present consignor; FUN Signature (Heritage, 1/2019), lot 3165, which realized \$2,280. NGC ID# 23RM, PCGS# 38963 Base PCGS# 5331

**3705** 1821 B-4, R.3, XF45 PCGS. Tompkins Die State 1/2, with a crack through the E in UNITED. The heavy clash marks diagnostic of later die states have not yet formed. This Choice XF B-4 quarter displays strong detail and smooth, satiny surfaces. Deep olive and russet toning surrounds the obverse margin and much of the reverse, leaving the central obverse lilac-gray. NGC ID# 23RM, PCGS# 38966 Base PCGS# 5331

**3706** 1828 B-1, R.1, XF45 PCGS. Tompkins Die State 1/2 with fine die cracks above the P in PLURIBUS. A pleasing pearl-gray Choice XF example. No marks are remotely consequential, and wear is both moderate and even. The B-1 obverse die also struck B-2 and B-3. The B-1 reverse die earlier struck the very rare original 1827 quarters. Ex: Dallas Signature (Heritage, 10/2016), lot 3676, which realized \$1,527.50. NGC ID# 23RV, PCGS# 38976 Base PCGS# 5342

## SEATED QUARTERS

**3707** 1840-O No Drapery MS62 PCGS. Briggs 1-A, Flynn RPD-001. The 8 in the date is lightly repunched south. The 1840-O is the first New Orleans issue, and the only issue from the Louisiana facility of the No Drapery subtype. Briggs documents two No Drapery and three Drapery varieties, with similar scarcity in Mint State despite a much lower Guide Book mintage for the 1840-O Drapery quarter. This steel-gray and chestnut-brown example is nicely struck and exhibits smooth, satiny surfaces. NGC ID# 23SG, PCGS# 5393

**3708** 1856-O MS63 PCGS. Briggs 1-A. The 1856-O Seated Liberty quarter is a rarity in Mint State. This Select example offers satiny luster and has only light contact marks. Deep blue and violet border toning cedes to golden interiors, producing pleasant eye appeal. Population: 3 in 63, 8 finer (1/19). NGC ID# 23TC, PCGS# 5439

**3709** 1857 MS65 PCGS. Briggs 2-B. Satiny, shimmering mint luster shows no bothersome abrasions on this Gem No Motto Seated quarter. A light golden hue warms each side, but no other toning is seen. This is a nicely struck type coin with pleasing eye appeal. NGC ID# 23TE, PCGS# 5442

**3710** 1860-S Fine 12 PCGS. Briggs 1-A. A small mintage of 56,000 pieces ensures the scarcity of the 1860-S quarter in all grades, and the issue is nearly unknown in Mint State. The Fine 12 coin offered here is ideal for most collecting purposes. The smooth olive-gray surfaces show no bothersome abrasions, and all of LIBERTY is legible. An appealing coin for the grade. Population: 8 in 12, 44 finer (1/19). NGC ID# 442R, PCGS# 5453

**3711** 1861 MS65 NGC. Type Two Reverse. A hint of straw-gold toning adorns this lustrous and well-preserved Civil War type coin. The strike is sharp and the eye appeal is commendable. The fields display interesting clash marks, as coined. Census: 31 in 65 (1 in 65★), 19 finer (2/19). NGC ID# 23TT, PCGS# 5454

**3712** 1873 Closed 3 XF45 PCGS. Briggs 2-B. The 1873 Closed 3 quarter had a mintage of just 40,000 coins. Briggs wrote in 1991 that this date was “much harder to find than its mintage would indicate due to many pieces being melted at the Mint. Mostly seen in lower grades.” This pearl-gray example is sharper than the typical survivor. The surfaces are unblemished aside from a slender mark in the field above Liberty’s head. Population: 7 in 45, 14 finer (2/19). NGC ID# 23UU, PCGS# 5484

### 1875-S Seated Quarter, MS65

Conditionally Rare

**3713** 1875-S MS65 PCGS. Briggs 3-C. Type Two Reverse, Medium S mintmark. The reverse is heavily cracked throughout the periphery. Gleaming peach-gold and lilac toning plus a sprinkling of russet and pale-blue accents give this Gem quarter tremendous eye appeal. The satiny surfaces radiate mint luster beneath the attractive patina. Liberty’s head is sharply struck, as are the left-side stars, while the right-side stars lack their central details. The reverse displays an amazing series of die cracks that interconnect the legends. Population: 11 in 65 (1 in 65+), 3 finer (2/19). NGC ID# 23UZ, PCGS# 5500

**3714** 1878-S XF45 PCGS. With a mintage of 140,000 pieces, the 1878-S is surprisingly scarce in all grades. Apparently large numbers of this issue were melted in order to provide even more silver for the first-year Morgan dollars. The fields are deep blue-green while the devices are either brilliant or several shades lighter in color. No obvious abrasions are seen on either side. Population: 4 in 45, 28 finer (2/19). NGC ID# 23VA, PCGS# 5510

**3715** 1879 MS65 NGC. Briggs 1-A. Rich apple-green and lavender-red shades endow this unabraded and lustrous Gem. The shield displays a blush of golden-tan toning. The strike is bold except on star 8. Mintages of Seated coinage tumbled with the advent of the Morgan dollar. Only 13,600 quarters were struck for commerce in 1879. NGC ID# 23VB, PCGS# 5511

**3716** 1885 MS64 PCGS. Briggs 2-A. The Philadelphia Mint struck 17,787,800 silver dollars in 1885, but quarter dollar production that year was limited to 930 proofs and 13,600 business strikes. The present snow-white example appears conservatively assessed by PCGS, since marks of any notice are absent. The right-side stars are lightly brought up. Population: 24 in 64 (1 in 64+), 38 finer (2/19). NGC ID# 23VH, PCGS# 5517

**3717** 1891 MS65 PCGS. The 1891 quarter was the final year of issue and it was set aside in sufficient quantities, making it one of the most available of all Seated quarters. This is a bright, lustrous example that is brilliant except for occasional golden-russet toning around the margins. Population: 75 in 65, 37 finer (1/19). NGC ID# 23VR, PCGS# 5524

## PROOF SEATED QUARTERS

1858 Quarter, PR64 Cameo  
Toned and Modestly Contrasted

- 3718** 1858 PR64 Cameo NGC. Pinkish-gray toning dominates each side of this sharply struck near-Gem. The reverse shows a small die crack from arrowhead 2 to 3 that fades into the field above the O in DOL. The small mintage (estimated in the *Guide Book* at 300 coins) was from the first year that the Mint began publicly offering proof coins for sale to collectors. Census: 1 in 64 Cameo, 8 finer (2/19). Ex: ANA Signature (Heritage, 8/2007), lot 659; Long Beach Signature (Heritage, 6/2018), lot 3667. NGC ID# 23WK, PCGS# 85554

1864 Quarter Dollar, PR66  
Beautifully Toned

- 3719** 1864 PR66 NGC. Briggs 3-C. Vivid ocean-blue, violet, mint-green, and orange-gold hues adorn each side of this Premium Gem proof, complementing sharp design elements and deeply reflective fields. Modest cameo contrast is apparent on the obverse. The 1864 proof quarter is rare in this grade. NGC lists a handful of Cameos in the same condition or finer but no Ultra Cameos. This is a high-end coin with spectacular eye appeal. Census: 10 in 66, 5 finer (2/19). NGC ID# 23WS, PCGS# 5560

- 3720** 1871 PR64 PCGS. Briggs 1-A. Color transitions from pale silver and gold to deeper powder-blue and ice shadings on both sides of this reflective near-Gem proof quarter. Just a few faint hairlines preclude an even finer designation. Population: 39 in 64, 11 finer (1/19). Ex: ANA National Money Show (Heritage, 3/2011), lot 3531, where it brought \$1,162.65. NGC ID# 23X4, PCGS# 5570

- 3721** 1876 PR64 Cameo PCGS. CAC. Briggs 8-H. Type One Reverse. A light tan-brown streak crosses Liberty's raised arm, but most of the obverse is brilliant. The reverse is diagonally divided into approximately equal areas of snow-white and autumn-brown. Proof set sales rose in 1876 because they were offered at the Mint booth at the Centennial Exhibition in Philadelphia. Population: 14 in 64 Cameo, 19 finer. CAC: 8 in 64, 10 finer (1/19). NGC ID# 23X8, PCGS# 85577

1880 Quarter, PR66+ Cameo  
CAC Approval, Golden Border Toning

- 3722** 1880 PR66+ Cameo PCGS. CAC. Briggs 2-B. Type One Reverse, with wide feet on the A in STATES and a die scratch through the left reverse shield border. With silver returning from abroad and resources being directed mainly toward Morgan dollar production, the Mint only struck 13,600 quarters for circulation in 1880, plus 1,355 proofs for collectors. This is a starkly contrasted, high-end Premium Gem with delicate golden toning around brilliant centers. The Cameo effect is highly appealing. NGC ID# 23XC, PCGS# 85581

- 3723** 1882 PR65 Cameo PCGS. Briggs 2-B. Medium lilac-red, wheat-gold, and mint-green toning confirms the originality of this fully struck and flashy Gem. One small spot near star 2 provides the sole relevant imperfection. Proof set sales between 1879 and 1883 were higher than neighboring years, due to the presence of proof-only Trade dollars. NGC ID# 23XE, PCGS# 85583

- 3724** 1883 PR65 PCGS. CAC. Briggs 1-A, Flynn-MPD-001. The tops of two date digits (an 88 or 83) are embedded in the dentils below the date, as seen on all proof 1883 quarters. This sharply struck Gem displays iridescent apple-green, lilac, and butter-gold toning, with a narrow band of deep lavender across portions of UNITED STATES. Certified in a first-generation "rattler" holder. CAC: 10 in 65, 22 finer (1/19). NGC ID# 23XF, PCGS# 5584

1886 Seated Liberty Quarter, PR66  
Small Total Mintage

- 3725** 1886 PR66 PCGS. CAC. Briggs 2-B. Only 5,000 business-strike Seated Liberty quarters were struck in 1886. The paucity of high-grade regular-issue coins has always put extreme pressure on the small supply of proofs (886 examples struck) to satisfy the demand from date collectors. This delightful Premium Gem exhibits well-detailed design elements, with just a touch of softness on some star centers. The well-preserved surfaces include deeply mirrored fields, under shades of cerulean-blue and pale gold toning. Population: 32 in 66 (1 in 66+), 11 finer. CAC: 5 in 66, 8 finer (2/19). NGC ID# 23XJ, PCGS# 5587

## BARBER QUARTERS

- 3726** 1892 MS67 NGC. Type Two Reverse. A first-year Superb Gem Barber type coin. The strike is needle-sharp, and the reverse is essentially pristine. Cream-gray toning dominates the obverse, while the iridescent reverse displays peripheral tan-brown and blue-green patina. Census: 23 in 67 (2 in 67+, 2 in 67★), 6 finer (2/19). NGC ID# 23XT, PCGS# 5601

**3727** 1894-S MS64+ PCGS. This semiprooflike 1894-S Barber quarter is fully struck and toned light golden with sea-green daubs around the border. A few small marks on Liberty's portrait prevent Gem classification. The 1894-S is a rarity in finer condition. Population: 56 in 64 (2 in 64+), 24 finer (1/19). NGC ID# 23Y3, PCGS# 5609

**3728** 1897-O MS64 PCGS. The 1897-O quarter is scarce in all Mint State grades. This near-Gem example displays fully prooflike mirroring in the fields and frosted, untoned devices. Tinges of gold cling to the peripheries. Several obverse stars are weak, but the center is sharp on each side. Population: 15 in 64, 30 finer (1/19). Ex: FUN Signature (Heritage, 1/2005), lot 6501, which realized \$2,300. NGC ID# 23YB, PCGS# 5617

**3729** 1901-S — Environmental Damage — PCGS Genuine. Good Details. Affordable examples of the 1901-S Barber quarter are in high demand. This piece is well-circulated with mostly light gray color. The obverse rim is complete, while the reverse rim merges with the legends slightly in some places. Two swaths of dark corrosion appear on the coin, down to the right across the center of the obverse and down to the left across the center of the reverse, denying this piece a numeric grade from PCGS.

**3730** 1905-O MS64 PCGS. This near-Gem 1905-O Barber quarter showcases razor-sharp definition across both sides with slight reflectivity in the fields. Sea-green and russet border toning surrounds near-brilliant centers. Finer examples of this issue are rare. Population: 27 in 64 (1 in 64+), 24 finer (1/19). NGC ID# 23Z3, PCGS# 5640

**3731** 1907-D MS65 PCGS. The well-preserved surfaces of this attractive Gem are blanketed in pleasing shades of lavender-gray and golden-tan toning, with satiny mint luster underneath. The design elements are well-detailed, with a trace of the usual softness on the arrow fletchings. Population: 15 in 65, 7 finer (2/19). NGC ID# 23Z9, PCGS# 5646

**3732** 1907-O MS65 NGC. Attractively toned in shades of blue, reddish-brown, and pale-gold, this Gem 1907-O is sharper than usually seen for the issue. Well-struck motifs sit on lustrous, smooth surfaces, with only a couple of tiny marks visible under a loupe. The recent *Guide Book of Barber Silver Coins* estimates just 70 to 85 pieces survive in Gem or finer condition from a mintage of more than 4.5 million pieces. Census: 16 in 65, 9 finer (2/19). NGC ID# 23ZA, PCGS# 5647

#### 1908-S Quarter, Lustrous MS65 Seldom Seen This Fine

**3733** 1908-S MS65 PCGS. Autumn-gold shades yield to bright, silver centers across the unmarked surfaces of this lustrous, Gem Uncirculated quarter. The 1908-S is surprisingly scarce in all Mint State grades from a mintage of 784,000 pieces. The strike is needle-sharp, with eye appeal that easily exceeds expectation. Population: 15 in 65 (1 in 65+), 10 finer (1/19). NGC ID# 23ZF, PCGS# 5652

**3734** 1909 MS66 PCGS. A conditionally rare Premium Gem example of this Philadelphia issue, showing satiny luster and just a hint of light golden toning. The strike is sharp and no bothersome abrasions are seen. Population: 22 in 66 (3 in 66+), 3 finer (1/19). NGC ID# 23ZG, PCGS# 5653

**3735** 1909-D MS66 NGC. The 1909-D Barber quarter is rare in MS66, and only a few finer pieces are known. This Premium Gem offers a sharp strike and softly frosted mint luster. Both sides have attractive greenish-gold and peach hues, although the reverse displays an additional dusting of amber-red overtones in a mottled pattern. Census: 3 in 66, 1 finer (1/19). NGC ID# 43NY, PCGS# 5654

**3736** 1916-D MS66+ PCGS. CAC. The 1916-D is a plentiful issue in the Barber quarter series, and its status as the final-year issue also makes it popular as a type coin. CAC-endorsed, this Plus-graded Premium Gem displays blazing mint luster that is brilliant across the interiors, with light golden border toning. Typical of the issue, there is slight strike weakness on a few obverse stars and on the eagle's right (facing) talons and wing junction. PCGS lists only 18 finer examples (2/19). NGC ID# 2426, PCGS# 5674

## PROOF BARBER QUARTERS

#### 1892 Quarter, PR67 Cameo Moderate Original Patina

**3737** 1892 PR67 Cameo PCGS. Type Two Reverse. Splashes of sea-green and golden-brown toning grace this pristine Superb Gem, although portions of the reverse remain white, and cameo contrast is apparent on both sides. An intricately struck and virtually unimprovable proof Barber type coin. Population: 16 in 67 (1 in 67+) Cameo, 4 finer (2/19). NGC ID# CEF4, PCGS# 85678

#### 1894 Quarter, PR67 Cameo Registry-Grade Condition Rarity

**3738** 1894 PR67 Cameo NGC. The proof 1894 Barber quarter is a rarity in Superb Gem Cameo grades, and no Ultra or Deep Cameo pieces are certified this fine. The present coin is a Registry Set essential. Brilliant surfaces yield frosty devices and liquidlike fields, with appreciable contrast. The strike is needle-sharp. Census: 16 in 67 Cameo (2 in 67+, 2 in 67★, 1 in 67+★), 2 finer (1/19). NGC ID# 2429, PCGS# 85680

1900 Barber Quarter, PR67

Dramatic Toning Accents

- 3739 1900 PR67 NGC. From a mintage of 912 pieces, the 1900 proof Barber quarter is quite scarce in Superb Gem condition. The present coin is a sharp example, with deep mirrors and a bold strike. The reflective surfaces are enhanced by areas of green and lavender toning, with occasional spots of deep russet. Census: 19 in 67 (3 in 67★), 8 finer; 15 in 67 (2 in 67★) Cameo, 6 finer (1/19).  
Ex: PNG Invitational Signature (Heritage, 2-3/2015), lot 3647, which realized \$2,820. NGC ID# 43VN, PCGS# 5686

- 3740 1913 PR65 NGC. A lovely, glimmering Gem proof with a light golden hue across each side. Although not a Cameo, this attractive late-series proof does have modest field-device contrast on each side. The strike is a trifle weak only on the eagle's right (facing) talons. NGC ID# 242V, PCGS# 5699

## STANDING LIBERTY QUARTERS

- 3741 1917 Type One MS66 Full Head PCGS. A sharply detailed Premium Gem from the final year of the short-lived Type One design, with Full Head definition and well-preserved, lustrous surfaces. Shades of lavender, slate-gray, and russet toning visit both sides. NGC ID# 242Z, PCGS# 5707

- 3742 1917 Type One MS66+ Full Head PCGS. CAC. A Plus-graded Premium Gem representative of the popular Type One design, this coin offers sharply detailed design elements, with Full Head definition. The brilliant surfaces are impeccably preserved and vibrant mint luster adds to the outstanding eye appeal. NGC ID# 242Z, PCGS# 5707

- 3743 1918 MS65 Full Head PCGS. Light gold toning appears on both sides of this attractive, sharply defined Gem that exhibits full head details and nearly complete shield details on the obverse. The surfaces are frosty and lustrous with excellent eye appeal. PCGS has only certified 72 numerically finer submissions (2/19). NGC ID# 2437, PCGS# 5721

- 3744 1918-D MS64 Full Head PCGS. The strike on this Choice Full Head 1918-D quarter belies the reputation of this issue for being weak in the centers. Liberty's head is sharp, as are the date numerals, and the shield rivets and gown lines are virtually full. On the reverse, the leading edge of the eagle's left (facing) wing is bold. A hint of light golden toning graces the satiny surfaces of this well-preserved 1918-D quarter. Apparently struck from a fairly early die state. NGC ID# 3TWU, PCGS# 5723

- 3745 1920 MS65 Full Head PCGS. Frosty, shimmering mint luster illuminates this Gem Full Head 1920 Standing Liberty quarter. Traces of light champagne toning are visible on each side. Liberty's temple and the shield rivets are sharp, although the central gown folds exhibit minor softness as usual. The date is clear. NGC ID# 243E, PCGS# 5735

- 3746 1920-D MS65 PCGS. CAC. Even though the 1920-D has a relatively high mintage, it is uncommon in Gem condition. This coin lacks total high-point definition that would make it a Full Head, but it is exceptionally close. The mint luster is frosted and shows only the slightest hint of patina on each side. NGC ID# 243F, PCGS# 5736

- 3747 1923-S XF40 PCGS. Many collectors seek an XF-level 1923-S quarter for their collections but have difficulty finding a coin with good eye appeal that is accurately graded. This XF40 coin may fill the bill. Its uniform pewter-gray surfaces are original, and only light wear is evident on Liberty's leg, the breast, and the shield. The date is clear and most feathers on the eagle are visible. NGC ID# 243K, PCGS# 5744

- 3748 1923-S AU53 NGC. Well-struck with modest high-point wear on the predominantly silver-gray surfaces. Elements of olive and golden-brown visit the margins, and the lower right obverse field shows a patch of similar patina. The date numerals and Liberty's temple are sharp on this AU coin, although weakness in the area of the ear prevents a Full Head designation. NGC ID# 243K, PCGS# 5744

- 3749 1923-S AU58 NGC. Satiny surfaces show gold and light russet toning on this near-Mint 1923-S quarter, a coin squarely within the grade range of a host of Standing Liberty quarter collections. Light wear is visible only on the highest points of Liberty's figure and the eagle. Eye appeal is good. NGC ID# 243K, PCGS# 5744

- 3750 1923-S — Cleaned — NGC Details. Unc. This is an impressively sharp 1923-S quarter dollar, showing well-defined shield rivets, a sharp date, and bold eagle feathers. Liberty's temple is sharp, although the ear area is slightly weak. Both sides are bright silver-white in color from being cleaned, although they remain pleasing with satiny luster. NGC ID# 243K, PCGS# 5744

## 1923-S Quarter Dollar, MS65+ Nearly Full Head Detail

- 3751 1923-S MS65+ PCGS. Original mint luster is brilliant across much of this high-end Gem, although daubs of pale sea-green and some golden hues are visible around the borders. Liberty's head shows nearly full detail while the shield rivets are predictably soft — an almost unavoidable characteristic on the 1923-S. A tiny reed mark on Liberty's stomach is the only abrasion of note. NGC ID# 243K, PCGS# 5744

- 3752 1924-S MS65 PCGS. Like the 1920-D above, this is another Gem that is remarkably close to Full Head status. The right side of the obverse displays an irregular splash of deep russet toning. Obviously an original coin. NGC ID# 243N, PCGS# 5750

- 3753 1927-S AU50 PCGS. From a low mintage of 396,000 pieces, this impressive AU specimen shows just a touch of wear on the well-detailed design elements. Shades of sea-green and lavender-gray toning visit the lightly abraded surfaces, which retain traces of original mint luster. NGC ID# 243W, PCGS# 5764

- 3754 1928-S MS66 Full Head NGC. Small S mintmark. Hints of lemon color grace the borders. This lovely premium Gem has flashy luster and impressive preservation. The head and waist are well-struck for the issue. Finer Full Head 1928-S quarters are scarce.  
Ex: Long Beach Signature (Heritage, 6/2004), lot 8271, which realized \$1,380. NGC ID# 243Z, PCGS# 5771

- 3755 1928-S MS66 Full Head PCGS. Original, glistening mint luster is the hallmark of this Premium Gem 1928-S quarter, although the level of preservation certainly makes a contribution to the outstanding appearance of that luster. Liberty's head just qualifies for an FH designation, while the shield rivets are predictably weak. This coin is essentially untoned. PCGS lists just 28 finer submissions of Full Head coins (2/19). NGC ID# 243Z, PCGS# 5771

- 3756** 1930 MS67 Full Head NGC. The 1930 Standing Liberty quarter in MS67 Full Head is just as sought-after as a type coin as the 1917 Type One issue. However, examples are scarce this fine. Offered here is a luminous, frosty coin with delicate champagne toning and virtually flawless surfaces. The shield rivets and the eagle's wing are soft, but Liberty's head is remarkably sharp. Census: 33 in 67 (1 in 67+ Full Head, 1 in 67★), 0 finer (1/19). NGC ID# 2445, PCGS# 5779

## WASHINGTON QUARTERS

- 3757** 1932-D MS64 PCGS. A satiny, luminous near-Gem example of this key Denver issue, showing a dusting of light champagne toning on each side that cedes to flecks of russet and olive at the borders. No significant abrasions are present. An ideal coin for the date and mintmark collector, and one that will fit in well with an otherwise Gem collection. NGC ID# 2448, PCGS# 5791

- 3758** 1943-S "Goiter," FS-401, MS65 PCGS. Die failure on the obverse below Washington's chin creates a noticeable bulge at the throat, earning this variety the "Goiter" moniker. The *Cherrypickers'* reference states: "This variety has been known for decades, but it is apparently rare, as few have surfaced." Offered here is one of the finer-known FS-401 coins at PCGS. It is boldly struck and well-preserved with frosty mint luster. Light golden toning covers each side, producing olive flecks around the obverse border. Population (FS-401): 6 in 65 (1 in 65+), 1 finer (1/19). PCGS# 511572 Base PCGS# 5822

- 3759** 1950-D/S FS-601 MS64 PCGS. The *Cherrypickers'* reference states: "The upper left curve of the underlying S is evident west and north of the D." This is also a *Guide Book* variety. The Choice example offered here displays satiny, unabraded mint luster cast in a tinge of delicate champagne toning. The strike is sharp and eye appeal is outstanding. NGC ID# 245T, PCGS# 145638 Base PCGS# 5843

- 3760** 1950-S/D FS-601 MS66 NGC. The overmintmark feature is clear on this *Guide Book* variety. This Premium Gem example is well-struck and thickly frosted, showing a delicate golden tint overall and unabraded surfaces. Eye appeal is outstanding. Census (FS-601): 16 in 66 (2 in 66★, 1 in 66+), 9 finer (1/19). NGC ID# 245V, PCGS# 145639 Base PCGS# 5845

- 3761** 1955-D MS67 NGC. A practically pristine Superb Gem that boasts dynamic cartwheel sheen and a sharp central strike. Faint apple-green, lilac-red, and honey-gold toning visits the obverse. Certified in a circa-2000 holder. Census: 37 in 67 (1 in 67★, 2 in 67+★), 0 finer (1/19). NGC ID# 246A, PCGS# 5859

## PROOF WASHINGTON QUARTER

- 3762** 1938 PR68 NGC. Pastel lime-green and straw-gold toning denies full brilliance, but this intricately impressed and immaculate specimen remains highly desirable. The 1938 has the third-lowest proof mintage of the series. Census: 15 in 68 (4 in 68★), 0 finer (2/19). NGC ID# 27HR, PCGS# 5977

## EARLY HALF DOLLARS

- 1794** Flowing Hair Half, VF Details  
Better Overton Variety O-104

- 3763** 1794 O-104, T-11, R.5 — Reverse Scratched, Improperly Cleaned — NCS. VF Details. Tompkins Die State 2/3. A nicely detailed example of the first-year and low-mintage 1794 half dollar. The pale-gray surfaces are hairlined, and several crude thin scratches are noted on the eagle. The reverse also exhibits numerous adjustment marks, as made. The obverse is prominently clashed near LIBERTY and above the nose, a die state characteristic that is undescribed in the Tompkins reference.

- 1795** Half Dollar, VF20  
O-108a, Two Leaves  
Problem-Free Surfaces

- 3764** 1795 2 Leaves, O-108a, T-17, R.4, VF20 NGC. Tompkins Die State 3/2. Attractive slate-gray toning yields to light-gray patina on the high points and glimpses of gold across smooth, minimally marked surfaces. This example is sharply struck despite a mid-to-late die state, with faint cracks along the tops of the reverse legend, and a trio of tiny cracks at star 13 — one of which connects to the adjacent point of star 12. A small reverse rim break below the below the right ribbon helps confirm the O-108a (T-17) variety, with 9x8 berry configuration and berries below the wings 2-inside, 1-out (left) and 2-inside, 0-out (right). A pleasing and problem-free Flowing Hair half for the grade. NGC ID# 24E7, PCGS# 39226 Base PCGS# 6052

- 3765** 1795 2 Leaves, O-117, T-3, R.4 — Environmental Damage — PCGS Genuine. VF Details. Tompkins Die State 2/1. Deep steel-blue and lavender patination embraces this minimally abraded Flowing Hair type coin. Faint adjustment marks are confined to the reverse margin near 3 o'clock. Sharply detailed for the VF level, and more attractive than the PCGS disclaimer suggests.

- 3766** 1795 2 Leaves, O-125, T-13, R.4 — Cleaned — PCGS Genuine. VF Details. Tompkins Die State 2/2. The borders are strong on this VF-level Flowing Hair half dollar, and the central devices are well-defined for the grade. The interiors are satiny and bright from an old cleaning, while the borders show a tint of blue-gray and lavender toning. Scattered light marks are apparent on each side when viewed beneath a loupe.

- 3767** 1802 O-101, T-1, R.3 — Cleaned, Obverse Rim Filed — NGC Details. XF. Only one die variety is known for the 1802 Draped Bust half dollar. Although lightly cleaned, this sharply detailed example retains elements of luster in the protected portions of the fields and design recesses. A touch of golden toning covers each side. This piece is well-struck save for on the obverse border stars which are slightly weak. The rim filing is old, located above the RT in LIBERTY. NGC ID# 24EE, PCGS# 39269 Base PCGS# 6065

- 3768** 1803 Large 3, Small Reverse Stars, O-102a, T-2, High R.3, XF40 PCGS. CAC. Tompkins Die State 3/4, with clash marks in the ear from the shield lines and clash marks at the bottom of the reverse from BERTY. Lightly worn and lightly abraded, this attractive specimen is from a late state of the dies, with an extensive network of die cracks and clash marks on the reverse. NGC ID# 24EF, PCGS# 39272 Base PCGS# 6066
- 3769** 1803 Large 3, Large Reverse Stars, O-103, T-3, R.3, XF40 PCGS. CAC. Tompkins Die State 2/2, with the horizontal clash marks in the ear and some crumbling in the rim above the second S in STATES. Light wear shows on the design elements, but much interior detail remains intact. The lavender-gray surfaces are lightly abraded. NGC ID# 24EF, PCGS# 39273 Base PCGS# 6066
- 3770** 1805 O-112, T-2, R.2, XF45 PCGS. Tompkins Die State 1/1, with the retained cud at STATES. This pleasing Choice XF specimen exhibits only light wear on the design elements and the lavender-gray surfaces are lightly abraded throughout. The A punch is complete, indicating the reverse die was first used in 1803. NGC ID# 24EG, PCGS# 39286 Base PCGS# 6069
- 3771** 1806 Pointed 6, Stem, O-115a, T-17, R.2, XF40 PCGS. Tompkins Die State 4/2. A gunmetal-gray Draped Bust type coin with pearl-white high points aside from a blush of ebony on Liberty's shoulder. The portrait and right obverse field display wispy marks, but the reverse is unblemished, and the overall eye appeal is attractive. NGC ID# 24EJ, PCGS# 39318 Base PCGS# 6071
- 3772** 1806 Pointed 6, Stem, O-116, T-20, R.3, XF45 PCGS. Tompkins Die State 3/4. A gunmetal-gray Choice XF example with blushes of autumn-brown in reverse recesses. Well defined and uncommonly free from marks. A brief streak of granularity extends from obverse star 12 to the bust. NGC ID# 24EJ, PCGS# 39319 Base PCGS# 6071
- 3773** 1807 Draped Bust, O-102, T-8, R.2, XF40 PCGS. Tompkins Die State 2/2. Ample mint luster illuminates recessed areas of this pleasing pearl-gray final-year type coin. The surfaces are clashed, but non-trivial marks are confined to a small rim nick on the reverse at 7 o'clock. NGC ID# 24EM, PCGS# 39339 Base PCGS# 6079
- 3774** 1807 Draped Bust, O-105, T-4, R.1 — Altered Surfaces — PCGS Genuine. AU Details. Tompkins Die State 2/2. Struck from multiply clashed dies. A middle die state, with reverse die cracks above STATES OF, but without additional die cracks that appear in later die states. O-105 (Tompkins-4) is readily available in all but the high Uncirculated grades. This example displays silver-gray surfaces with mint luster remaining along the obverse margin, and throughout the reverse devices. PCGS notes altered surfaces, with obverse tooling visible under magnification. Marks are generally small except for a short vertical scrape to the right of the date.
- 3775** 1807 Draped Bust, O-110a, T-3, R.2 — Cleaned — PCGS Genuine. AU Details. Tompkins Die State 3/3. A network of advanced die cracks exists on both sides, lacking only a final crack from U in UNITED to the eagle's tail that identifies the latest Tompkins die state. The surfaces are a bit glossy from cleaning, but retain some pleasing golden-gray toning that deepens at the borders. A sharp strike accounts for the About Uncirculated sharpness designation by PCGS. An attractive Draped Bust half despite the cleaning, which resulted in some delicate obverse hairlines.
- BUST HALF DOLLARS**
- 
- 3776** 1807 Capped Bust Half Dollar, XF Details O-111b, Bearded Goddess Variety
- 
- 3777** 1807 Capped Bust, Bearded Goddess, O-111b, R.5 — Cleaned — PCGS Genuine. XF Details. The famous and popular "beard" die crack that runs from above Liberty's eye, through the mouth and chin, and across an open expanse to the chest is a little sparse but fully connected to earn the O-111b die state and a PCGS XF Details grade. The designated cleaning hides behind deep, battleship-gray toning that blankets both sides. Golden undertones peak through, especially on the reverse. The strike is sharp and marks are few.
- 3778** 1811 Small 8, O-109, R.2, AU58 PCGS. Readily attributed by the heavy radial die crack through the left edge of the first S in STATES. Light almond-gold and stone-gray toning accompanies partly lustrous and well-defined surfaces. Marks are trivial aside from minor vertical lines west of the eagle's beak. NGC ID# 24EU, PCGS# 39433 Base PCGS# 6097
- 3779** 1812 Large 8, O-109a, R.2, MS60 NGC. Blurry die lumps above the olive leaves are characteristic of Overton-109a. A predominantly silver-gray Bust half dollar with glimpses of tan-gold near the rims. The obverse displays hints of powder-blue. A slender, curved streak of pearl-white passes over the eagle's beak. NGC ID# 24EW, PCGS# 39456 Base PCGS# 6100
- 3780** 1813 O-107a, R.1, AU55 PCGS. Dusky gunmetal-gray toning accompanies this original Choice AU Bust half dollar. Marks are absent except for a scuff at the crest of the left (facing) wing. The late die state with numerous cracks on both sides and peripheral elements drawn toward the rims. Struck a few degrees off center toward 11 o'clock. NGC ID# 24EZ, PCGS# 39468 Base PCGS# 6103
- 3781** 1814 O-103, R.1, AU58 NGC. A heavy vertical die line connects the left end of the reverse scroll to the eagle's left (facing) wing, readily identifying the Overton-103 die variety. This near-Mint coin is heavily clashed on both sides, diagnostic of a late die state. Luster glistens in the fields and recesses, and light russet toning warms each side. Barely a trace of high-point friction is discernible. NGC ID# 24F3, PCGS# 39477 Base PCGS# 6105
- 3782** 1831 O-103, R.1, MS62 PCGS. Dappled golden-brown, powder-blue, and sea-green toning encompasses lustrous and lightly marked surfaces. The strike is good, although the high points of the hair are incomplete, as are the feathers west of the shield. A collectible Overton variety identified by its repunching on the stand of the 5 in 50 C. NGC ID# 24FV, PCGS# 39839 Base PCGS# 6159
- 3783** 1832 Small Letters, O-103, R.1, MS62 PCGS. A small die defect on the drapery fold above the 18 and repunching on the 5 in 50 C. identify this plentiful Small Letters variety. The present example is sharp and radiantly lustrous, showing eye appeal beyond its grade. Light golden interiors cede to russet and lilac margins. NGC ID# 24FW, PCGS# 39860 Base PCGS# 6160
- 3784** 1833 O-105, R.2, MS62 PCGS. The widely repunched second S in STATES is the pick-up point for Overton-105. This sea-green and chestnut-brown Capped Bust type coin has unmarked fields, though we note a slight rim bump near the second arrowhead. Selected peripheral elements are incompletely impressed. NGC ID# 24FX, PCGS# 39892 Base PCGS# 6163

- 3784** 1834 Small Date, Small Letters, O-121, R.3, MS62 NGC. A chestnut-gold representative with smooth surfaces and good eye appeal. The left-side stars are incompletely brought up, but other design elements are sharp. The obverse is semiprooflike and the reverse exhibits cartwheel luster. NGC ID# 4EK5, PCGS# 39926 Base PCGS# 6166

## REEDED EDGE HALF DOLLAR

- 3785** 1836 Reeded Edge, GR-1, R.2 — Scratches, Cleaned — NGC Details. AU. Detail is sharp on this example, with little wear evident over the high points of the design. Although lightly cleaned in the past, this piece has since acquire pleasing olive-gray patina on each side. The obverse has additional, deeper russet toning in the left field and on Liberty's portrait. Under a loupe, a few old, thin pinscratches are discernible in the fields.

## SEATED HALF DOLLARS

- 3786** 1847 WB-101 MS63 NGC. CAC. Ex: "Col." E.H.R. Green. Preserved for decades in a kraft envelope, this attractive Select example shows areas of bright, semi-reflective fields commingled with rich, cobalt-blue toning. Die polish in the fields still flashes strongly through the color. Sharply struck throughout, a few small marks determine the grade, yet the originality of the surfaces and the eye appeal are outstanding. CAC endorsed, housed in a special-labeled NGC holder with the E.H.R. Green/Eric P. Newman pedigree. Census (all varieties included): 7 in 63, 10 finer. CAC: 3 in 63, 4 finer (1/19).  
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33710, which realized \$3,290; PNG Invitational Signature (Heritage, 2-3/2015), lot 3822, which realized \$1,410; Central States Signature (Heritage, 4-5/2016), lot 3502, which realized \$1,410. NGC ID# 24HA, PCGS# 572054 Base PCGS# 6257

### 1849 WB-103 Half Dollar, MS64 Repunched Date

- 3787** 1849 Repunched Date, WB-103, Die Pair 9, R.3, MS64 PCGS. The 1 and 8 are clearly repunched on this variety, with several reverse die cracks. This lovely Choice Mint State half dollar has brilliant ivory at the centers and rich peripheral blue and gold toning. The 1849 half dollar is conditionally rare, despite a substantial mintage and large number of die varieties. Population: 29 in 64 (2 in 64+), 2 finer (2/19). PCGS# 572070 Base PCGS# 6262

- 3788** 1858 Type One Reverse, WB-101, MS64 PCGS. Light straw-gold and cream-gray toning accompanies this lustrous and pleasing Choice half dollar. A tiny spot is below star 8. The obverse displays bold clashmarks beneath the raised elbow, but the reverse is perfect except for a crack through the TES in STATES. NGC ID# 24HV, PCGS# 572108 Base PCGS# 6293

### 1862 Half Dollar, Lustrous MS64+ Conditionally Scarce War Issue

- 3789** 1862 WB-101 MS64+ PCGS. This is a brilliant example with frosted mint luster that dazzles the eye. The obverse strike is needle-sharp, while the reverse is a touch less flamboyant, yet almost equally bold. Mint-made striations run vertically on the obverse (as struck), capturing light and adding to the coruscating mint luster. The 1862 had a relatively low mintage of 253,000 pieces, and was hoarded during the Civil War. It is a scarce Philadelphia issue in Choice Uncirculated or finer conditions. Population: 15 in 64 (2 in 64+), 16 finer (1/19). PCGS# 572151 Base PCGS# 6307

### 1871-CC Seated Half Dollar, VF35 WB-101, Semiskey Carson City Issue

- 3790** 1871-CC WB-101, Die Pair 6, R.4, VF35 NGC. The 1871-CC half dollar is scarce in all grades. Only 153,950 coins were produced, and most of that production was lost to attrition. This issue becomes increasingly difficult to locate as one climbs the grade ladder. This Choice VF example is an ideal collector coin. Natural olive-gray surfaces complement strong detail for the grade, and the smooth patina lightens on the high points of the devices. An eye-appealing collector coin. Census: 5 in 35, 17 finer (1/19). NGC ID# 646D, PCGS# 572196 Base PCGS# 6331

- 3791** 1875-CC WB-101, Die Pair 2, R.4, AU58 PCGS. Light golden-brown and apple-green toning visits the borders, but the interiors remain brilliant. This nicely struck Carson City type coin shows few marks, and luster dominates the margins and motifs. PCGS# 572227 Base PCGS# 6350

1875-S WB-101 Half Dollar, MS65

Condition Rarity

- 3792 1875-S Very Small S, WB-101, Die Pair 8, R.3, MS65 PCGS. The reverse exhibits extensive peripheral die cracks through most of the letters in the legend and in the denomination. This original Gem has exceptional eye appeal, displaying delicate gold and iridescent toning over lustrous silver surfaces. Population: 58 in 65 (3 in 65+), 29 finer (2/19). NGC ID# 24KF, PCGS# 572229 Base PCGS# 6351

- 3793 1876 Open Bud, WB-101, MS64 NGC. Light to medium straw-gold and silver-gray toning enriches this thoroughly lustrous Centennial-year half dollar. The sharply struck surfaces show only inconsequential signs of contact. Although the 1876 has a high mintage and is available in better Mint State grades, it is always in demand as a representative of the Seated type. NGC ID# 645N, PCGS# 572234 Base PCGS# 6352

- 3794 1876 Closed Bud, WB-102, MS64+ PCGS Gold Shield. All business-strike 1876 half dollars have the Closed Bud reverse. This high-end near-Gem displays a sharp strike and softly frosted luster beneath original green-gold, blue, and lavender-gray toning. A few light contact marks are only seen with a loupe. Population: 56 in 64 (1 in 64+), 29 finer (1/19). NGC ID# 3KUE, PCGS# 506151 Base PCGS# 6352

### 1878 Half Dollar, MS65

- 3795 1878 WB-101 MS65 PCGS. CAC. The 1878 was the final issue of the series with a mintage that exceeded 200,000 pieces. However, a lower percentage of the issue was saved in Mint State. This nicely struck and thoroughly lustrous Gem displays light peripheral russet-brown toning. A lens shows only unimportant and infrequent contact. Population: 11 in 65, 5 finer. CAC: 4 in 65, 3 finer (2/19). NGC ID# 24KN, PCGS# 572256 Base PCGS# 6358

## PROOF SEATED HALF DOLLARS

- 3796 1863 PR62 Cameo NGC. This attractive Cameo comes from a notably low mintage of only 460 proofs. Relatively few of the survivors have been certified with contrast. This is a mostly brilliant coin that exhibits stark white-on-black contrast. Light hairlines account for the grade. Census: 2 in 62 Cameo, 15 finer (1/19). NGC ID# 27TP, PCGS# 86417

- 3797 1874 Arrows PR62 PCGS. Warm golden-russet toning covers much of this pleasing lower-end proof Arrows type coin, with tinges of sky-blue evident around the borders. The design elements are sharp, and no significant contact marks are seen. Eye appeal is pleasing for the grade. NGC ID# 27UV, PCGS# 6435

- 3798 1876 "C" in Neck, FS-401, PR63 PCGS. CAC. The top of a small C emerges from Liberty's chest just below her neck. Perhaps a punch intended for Carson City dies was inadvertently dropped on the obverse die. All dies were made at Philadelphia during the 19th century. This specimen displays moderate white-on-black contrast, though it is undesignated as Cameo. Light plum-red, ocean-blue, and straw-gold toning visits the borders. NGC ID# 27UA, PCGS# 413733 Base PCGS# 6437

- 3799 1879 PR64 PCGS. CAC. A lovely Choice proof, this Seated half dollar displays traces of bluish toning over brilliant-silver surfaces, which combine for excellent eye appeal. Deeply mirrored fields frame the satiny devices, imparting slight contrast. Population: 98 in 64 (2 in 64+), 52 finer. CAC: 8 in 64, 19 finer (2/19). NGC ID# 27UE, PCGS# 6440

## BARBER HALF DOLLARS

- 3800 1892 MS65 PCGS. Rich fire-red, forest-green, and slate-gray toning encompasses this satiny and refreshingly unabraded Gem. A good strike despite a hint of incompleteness on the right shield corner. The 1892 was set aside as the first of its type, but high-quality examples are always in demand. NGC ID# 24LF, PCGS# 6461 Base PCGS# 6461

### 1895-S Half Dollar, MS65 Important Condition Rarity

- 3801 1895-S MS65 PCGS. Although the mintage of 1895-S half dollars exceeded 1.1 million coins, the typical survivor is well circulated. In fact, the average certified grade is just XF45. This Gem example has highly lustrous ivory surfaces and splendid gold toning. It is fully original and spectacular. Population: 11 in 65 (1 in 65+), 6 finer (2/19). NGC ID# 24LU, PCGS# 6473

- 3802 1897-O — Cleaned — PCGS Genuine. Unc Details. The '97-O is one of the rare Barber halves in all grades. It is especially challenging in XF or AU conditions, and only marginally available in Mint State grades. This example has reflective, silver-gray fields that are slightly foggy from a light cleaning, with faint hairlines visible under a loupe. Traces of golden-gray toning remain along the reverse margin. The strike is sharp except along the eagle's right (facing) side. Despite its lack of a numeric grade, the coin fits well either in a collection of high-grade circulated Barber halves, or as part of a Mint State set.

- 3803 1898-O MS62 Prooflike NGC. A nearly brilliant New Orleans representative with a trace of straw-gold toning and a few tiny charcoal freckles on the reverse. The 1898-O has a reasonable mintage but is very scarce in Mint State. NGC has certified only three 1898-O half dollars as Prooflike; two in the MS62 grade, and one as MS67 ★. PCGS# 76481 Base PCGS# 6481

**1901-O Half Dollar, MS64 Prooflike  
Sole Prooflike Coin at NGC**

- 3804 **1901-O MS64 Prooflike NGC.** This near-Gem is the only 1901-O half dollar at NGC with a Prooflike designation. The coin is brilliant and well-preserved, showing a few light marks and lines on Liberty's cheek that are not bothersome to the unaided eye. Considerable strike weakness affects the obverse stars and the reverse eagle, but the fields are undeniably mirrored, generating considerable eye appeal. Census: 16 in 64 (1 in 64+, 1 in 64 Prooflike), 8 finer (2/19). NGC ID# 24MD, PCGS# 6490

**1903-S Barber Half Dollar, MS64+  
Sole Plus-Graded Near-Gem at PCGS**

- 3805 **1903-S MS64+ PCGS.** David Lawrence described the 1903-S half dollar in his *Complete Guide to Barber Halves*: "comes well struck with nice luster." That certainly applies to this high-end Choice Uncirculated representative, showing full details on the obverse and nearly as strong definition on the reverse. Frosty mint luster glistens across the mostly brilliant surfaces. Golden tones color the rims. There are a few wispy lines on Liberty's portrait, but they pose no distraction. Population: 24 in 64 (1 in 64+), 16 finer (1/19). NGC ID# 24ML, PCGS# 6497

- 3806 **1904-O — Altered Surfaces — PCGS Genuine, Unc Details.** This lustrous and pleasing 1904-O has few marks and an above average strike. The obverse periphery shows pale shades of golden-brown and ruby-red toning, while the reverse displays pastel lilac and aqua hues. The 1904-O is scarce in all Mint State conditions. Although this example did not receive a numeric grade, any surface alteration is hard to discern. A glossy low spot on the neck below the jawline may have caught the attention of PCGS, and a few faint obverse hairlines require patience to locate.

- 3807 **1906-O MS64 PCGS. CAC.** This satiny, near-brilliant Choice 1906-O half dollar displays a hint of light golden color in the margins. The eagle's right (facing) wing junction shows the usual strike softness, but the coin is otherwise well-detailed. No distracting abrasions are visible. Population: 28 in 64, 18 finer. CAC: 2 in 64, 13 finer (2/19). NGC ID# 24MW, PCGS# 6506

- 3808 **1908-D MS65 PCGS.** Wheat-gold and forest-green toning is relegated to the borders of this lustrous and nicely struck Barber half. Patience is required to locate minor obverse contact. The 1908-D is regarded as a type issue, but Gems are very scarce. Housed in a green label holder. Population: 32 in 65 (1 in 65+), 21 finer (2/19). NGC ID# 24N5, PCGS# 6513

- 3809 **1908-O MS65 PCGS.** Wisps of peripheral gold toning appear along the left obverse and reverse borders of this otherwise brilliant, untoned Gem Barber half dollar. The strike is excellent, especially for a New Orleans issue, with a short die crack through the tip of Liberty's bust. Population: 41 in 65 (1 in 65+), 37 finer (2/19). NGC ID# 24N6, PCGS# 6514

- 3810 **1909 MS65 PCGS.** A lustrous and lovely Gem that provides smooth surfaces and original eye appeal. Golden-brown, lavender-red, and forest-green shades endow the obverse border. The strike is above average, with the fletchings fully defined. Certified in a green label holder. Population: 64 in 65 (1 in 65+), 17 finer (1/19). Ex: Long Beach Signature (Heritage, 5-6/2007), lot 1157, which realized \$2,530. NGC ID# 24N8, PCGS# 6516

- 3811 **1911 MS65 PCGS.** Warm golden and lilac-gray toning covers this softly frosted Gem 1911 Barber half dollar. Some of the usual strike softness is noted on the eagle's right (facing) talons and wing junction, but the overall eye appeal is outstanding. Population: 51 in 65 (1 in 65+), 13 finer (1/19). NGC ID# 24ND, PCGS# 6521

**1912-D Half Dollar, Lustrous MS66**

- 3812 **1912-D MS66 PCGS. CAC.** With a mintage exceeding 2.3 million pieces, the 1912-D is readily available in lower grades but it is scarce in Gem Uncirculated and finer conditions. A faint speckling of olive-gray patina is seen over intensely lustrous, frosted-silver surfaces. The strike, while mostly sharp, shows brief weakness from stars 11 to 13 and along the eagle's right (facing) shield edge, leg, and talons. Few pieces are certified finer. Population: 18 in 66 (4 in 66+), 1 finer. CAC: 14 in 66, 0 finer (2/19). NGC ID# 24NH, PCGS# 6525

- 3813 **1913 AU55 NGC.** The 1913, 1914, and 1915 Barber halves have unusually low mintages, particularly when compared with their San Francisco cousins. The present briefly circulated Philly half dollar has faint olive-gold and chestnut-tan toning. No marks are consequential across the partly lustrous surfaces. NGC ID# 24NK, PCGS# 6527

- 3814 **1913 MS63+ PCGS. CAC.** The 1913 Barber half dollar is a slightly better date, struck to the extent of only 188,000 pieces. CAC-approved Mint State coins such as this Plus-graded example are rare. Traces of champagne color tint the frosty, radiant surfaces, complementing a lack of major abrasions. The usual strike softness is noted on the fletchings and the eagle's right (facing) wing junction. Population: 21 in 63 (1 in 63+), 59 finer. CAC: 2 in 63, 13 finer (1/19). NGC ID# 24NK, PCGS# 6527

1913 Half Dollar, Near-Gem  
Low-Mintage Philadelphia Issue

3815 1913 MS64 PCGS. As a low mintage issue, the 1913 commands a premium in all grades. The present lustrous near-Gem displays light to medium wheat-gold and ice-blue toning. The surfaces are smooth save for a solitary tick on the cheekbone. The strike exhibits minor blending on the fletchings and right shield corner. Population: 33 in 64, 27 finer (2/19). NGC ID# 24NK, PCGS# 6527

3816 1913-S MS62 NGC. The 1913-S Barber half dollar claims a small mintage of 604,000 pieces. This impressive MS62 specimen is sharply detailed in most areas, with just a touch of softness on the shield point and arrow fletching. The lightly marked surfaces radiate vibrant mint luster, with outstanding eye appeal. Census: 13 in 62, 64 finer (1/19). NGC ID# 24NM, PCGS# 6529

## PROOF BARBER HALF DOLLARS

3817 1896 PR64 PCGS. Gold, olive, lavender, and midnight-blue toning covers this Choice proof 1896 half dollar. The design elements are sharp, and minor grade-limiting hairlines and marks are hidden by the rich patina. NGC ID# 24NY, PCGS# 6543

1899 Half Dollar, PR65 Cameo  
Golden Accents Over Watery Fields

3818 1899 PR65 Cameo PCGS. The final year of 19th century proof production in the Barber half dollar series reached 846 coins. This Gem Cameo offers faint golden accents over mostly brilliant, markedly contrasted surfaces. Watery fields and frosted motifs are highly appealing. Population: 13 in 65 (2 in 65+) Cameo, 25 finer (2/19). NGC ID# 24P3, PCGS# 86546

3819 1901 PR65 PCGS. This is a pleasing Gem proof example of a date popular with 20th century type collectors. Light contrast is noted between the sharply defined devices and the mirrored fields. The toning includes shades of forest-green, gold, russet, and peach-orange. Population: 29 in 65, 39 finer (2/19).  
*Ex: Dallas Signature (Heritage, 3/2013), lot 3593, which realized \$2,500.40; Summer FUN Signature (Heritage, 7/2013), lot 5035, which realized \$2,585.* NGC ID# 24P5, PCGS# 6548

1914 Barber Half Dollar, PR66  
Only 380 Examples Struck

3820 1914 PR66 PCGS. Only 380 proof Barber half dollars were struck in 1914, as proofs were becoming increasingly unpopular with collectors in that era. This delightful Premium Gem exhibits sharply detailed design elements throughout and the virtually pristine surfaces include deeply mirrored fields, with highlights of pale gold toning. Population: 24 in 66 (2 in 66+), 16 finer (2/19). NGC ID# 24PJ, PCGS# 6561

## WALKING LIBERTY HALF DOLLARS

3821 1916 MS65 PCGS. CAC. The inaugural 1916 Walking Liberty half dollar is always popular with collectors, enjoying the added benefit of a lower mintage (608,000 coins). This well-saved issue can be found without too much trouble through MS65. Both sides are frosty and mostly brilliant with splashes of gold and gunmetal color. Well-struck and showing minimal central softness. NGC ID# 24PL, PCGS# 6566

1916 Walking Liberty Half, MS66  
First Year of Issue for This Popular Series

3822 1916 MS66 PCGS. CAC. Only 608,000 pieces were struck of this first-year issue, and many were set aside as mementoes. While numerous examples are known in MS66, few are finer. This piece is distinguished by its glowing mint luster, which is abundantly evident beneath the light layer of pale golden and lilac toning. Exceptionally well struck for an early Walker with no mentionable abrasions. NGC ID# 24PL, PCGS# 6566

3823 1916-D MS64+ PCGS. CAC. A satiny, high-end near-Gem with boldly rendered design elements and touches of light golden toning. No distracting abrasions are seen. Although plentiful overall, the 1916-D Walker is scarce in this grade with CAC endorsement. The present example has an interesting planchet crack (mint made) on the rim below the date. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

3824 1916-D MS65+ NGC. An incredibly sharp, Plus-designated Gem example of the first-year Denver issue, showing mottled gold, russet, and lilac-gray toning. Only a few small contact marks are visible beneath a loupe. This Walking Liberty half dollar issue is scarce in finer grades. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

3825 1916-D MS65 PCGS. CAC. From a first-year mintage of just over 1 million pieces, the 1916-D Walking Liberty half dollar is somewhat scarce at the MS65 grade level, and finer coins are decidedly elusive. The well-preserved, lustrous surfaces of this attractive Gem are blanketed in shades of golden-brown and lavender toning, with a sharp strike and outstanding eye appeal. NGC ID# 24PM, PCGS# 6567 Base PCGS# 6567

- 3826 1916-D/D FS-501 MS65 PCGS.** A luminous, russet-gold and olive Gem example of this first-year Denver issue, showing frosty mint luster and well-struck design elements. Finer examples are scarce. FS-501 is a noteworthy Repunched Mintmark variety. The *Cherrypickers'* reference states: "This dramatic RPM has yet to yield many specimens." The secondary mintmark is offset south of the primary. NGC ID# 4R6D, PCGS# 145780 Base PCGS# 6567

**1916-D/D Half Dollar, MS65+  
Repunched Mintmark, FS-501**

- 3827 1916-D/D FS-501 MS65+ PCGS.** The mintmark is repunched southwest, although undesignated as such on the PCGS insert. NGC and PCGS have graded a combined 27 pieces as FS-501 (as of 1/19) with the single finest as MS65, which would make the present piece the highest-graded example. The sharply struck and surprisingly unabraded surfaces display dappled autumn-brown and aquamarine peripheral patina. NGC ID# 4R6D, PCGS# 145780 Base PCGS# 6567

- 3828 1916-S AU55 PCGS.** An attractive Choice AU example of this low-mintage, first-year issue, with just a trace of wear on the high points of the design elements and lightly abraded surfaces that retain considerable amounts of original mint luster. NGC ID# 24PN, PCGS# 6568

**1916-S Half Dollar, MS64  
Attractive, Pale-Gold Toning**

- 3829 1916-S MS64 PCGS.** Pale-gold toning deepens slightly at the borders to a light-orange hue, spread evenly throughout both sides of this Choice Uncirculated half dollar. Liberty's branch hand shows thumb and finger detail to indicate a sharp strike for the inaugural S-mint Walking Liberty representative. The eagle's leg feathers are well-defined for the issue, while rich satin luster radiates from the centers of this essentially unmarked and wonderfully preserved first-year half. NGC ID# 24PN, PCGS# 6568

**1916-S Walking Liberty Half Dollar, MS64  
Low-Mintage Inaugural Issue**

- 3830 1916-S MS64 PCGS.** Only a glimmer of reddish-gold toning creeps onto the smooth, satinlike surfaces of this Choice Uncirculated first-year San Francisco half. Liberty's head is relatively well-struck, with lesser definition on the branch hand. Likewise, the eagle's leg and breast feathers show limited details, a characteristic of the inaugural issue. Eye appeal is terrific thanks to bold mint luster and virtually mark-free surfaces. Just 508,000 pieces were struck — the scarcest 1916 Walking Liberty issue from the three mints. NGC ID# 24PN, PCGS# 6568

- 3831 1917-D Obverse MS64 PCGS.** An attractive Choice example of this important issue, the last date to feature the prominent mintmark on the obverse. The lightly abraded centers are surrounded by shades of lavender and golden-brown toning, with satiny mint luster throughout. The well-detailed design elements show a touch of the usual softness on the central obverse. NGC ID# 24PR, PCGS# 6570

- 3832 1917-D Reverse Mintmark MS64 PCGS.** Full Gem examples of the 1917-D with a Reverse Mintmark are scarce, and as a result near-Gem examples represent the optimal collector grade for an advanced set of Walkers. This beautifully patinated example is sharp and glows with satiny luster. A deep band of bluish-gray toning at the upper-left obverse mingles into shades of amber and pale honey-gold. The usual sharp strike exists for this Denver issue, with nice definition on Liberty's facial features and surprisingly strong thumb and finger detail on the branch hand. The reverse displays similar coloration and exceptionally sharp feather detail. NGC ID# 24PS, PCGS# 6571

- 3833 1917-D Reverse Mintmark MS64 PCGS.** Like most examples seen, this attractive Select specimen shows some softness on the central design elements. The surfaces are lightly marked, with satiny mint luster under shades of lavender-gray and golden-brown toning. From the first year with the mintmark on the reverse. NGC ID# 24PS, PCGS# 6571

- 3834 1917-S Obverse Mintmark AU55 PCGS.** An impressive Choice AU specimen of this low-mintage early series issue, with the prominent mintmark on the obverse. Lightly worn and lightly abraded, traces of original mint luster remain intact in sheltered areas. NGC ID# 26G7, PCGS# 6572

- 3835 1917-S Reverse Mintmark MS64 PCGS.** A well-struck, satiny example of the inaugural Reverse Mintmark San Francisco issue, showing golden obverse toning and lighter champagne reverse color. A thin halo of lavender-blue surrounds the extreme outer obverse periphery. Eye-appealing and well-preserved. NGC ID# 24PU, PCGS# 6573

- 3836 1917-S Reverse Mintmark MS64 PCGS. CAC.** A dusting of lilac-gold toning warms the frosty surfaces of this CAC-endorsed 1917-S half dollar. Minor strike softness in the centers is not bothersome. The Reverse Mintmark issue is occasionally available in this grade but scarce finer. NGC ID# 24PU, PCGS# 6573

**3837** 1918 MS64 NGC. CAC. Ex: "Col." E.H.R. Green. A crisply struck and lustrous near-Gem example of this high-mintage — but conditionally challenging — issue. Marks are refreshingly absent, and the borders display glimpses of sea-green, ruby-red, and caramel-gold patina.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$15.00; Eric P. Newman Numismatic Education Society; Eric P. Newman Collection, Part II (Heritage, 11/2013), lot 33847, which realized \$2,173.75. NGC ID# 24PX, PCGS# 6574

**1918-D Half Dollar, MS64  
Rarely Offered Finer**

**3838** 1918-D MS64 PCGS. The design elements of this attractive Choice Uncirculated coin are unusually sharply detailed for the Denver issue. Minimally marked surfaces radiate vibrant mint luster, with translucent highlights of lavender-gray, tan-gold, and sea-green toning at the margins. PCGS reports just 32 numerically finer pieces (1/19). NGC ID# 24PW, PCGS# 6575

**3839** 1918-S MS64 PCGS. A collectible Choice example of this early San Francisco Walker, yielding frosted, untoned mint luster and well-preserved surfaces. The usual strike weakness affects Liberty's branch hand and head, as well as the eagle's trailing leg. PCGS lists only 37 finer submissions (1/19). NGC ID# 24PX, PCGS# 6576

**3840** 1918-S MS64 ANACS. Rich, iridescent hues emerge from bluish-bronze toning when angled in light, giving this Choice Uncirculated 1918-S a bold and compelling patina. Royal-blue, forest-green, and reddish-gold shades provide most of its component colors, which are best viewed on the reverse. The strike shows brief central weakness, about average for the issue. Housed in an early generation, small ANACS holder. NGC ID# 24PX, PCGS# 6576

**1919 Half Dollar, MS64  
Excellent Strike**

**3841** 1919 MS64 PCGS. Delicate splashes of pale blue and light gold toning appear on part of the obverse of this Choice Mint State half dollar that features a bold strike with a fully outlined thumb at the center of the obverse. This piece has brilliant cartwheel luster and excellent eye appeal. NGC ID# 24PY, PCGS# 6577

**1919-S Half Dollar, AU58  
Elusive San Francisco Semikey**

**3842** 1919-S AU58 PCGS. The 1919-S is a scarce date in the Walking Liberty half dollar series, especially in Mint State. Offered here is a collectible but still lustrous AU58 example, showing satiny surfaces and well-struck design elements. A brush of high-point friction affects the devices, and each side has light golden toning overall. An eye-appealing coin for the grade. NGC ID# 24R2, PCGS# 6579

**1920 Walking Liberty Half, MS65  
Underrated Philadelphia Issue**

**3843** 1920 MS65 PCGS. Among all of the early Walking Liberty Half Dollars (those struck before 1934), the 1920 Philadelphia issue is one of the more underrated examples, and is seldom encountered in Gem quality. There are many other dates in the series that are much more highly regarded. The strike is sharp for the issue, with above-average definition on the branch hand and at the eagle's leg feathers, and there is no evidence of toning on either side. It is a pristine coin that will be appreciated by the specialist. PCGS reports just 23 numerically finer pieces (2/19). NGC ID# 24R3, PCGS# 6580

**1920-S Half Dollar, MS64  
Elusive in Finer Grades**

**3844** 1920-S MS64 PCGS. Satiny luster joins warm yellow-gold toning on each side of this Choice 1920-S half dollar. Strike softness affects the high points of Liberty's figure and the eagle's trailing leg, as usual for the issue. The 1920-S is occasionally available in this grade, but higher-end examples are seldom offered. NGC ID# 24R5, PCGS# 6582

**3845** 1921-D VF25 PCGS. CAC. An excellent midgrade collector coin, showing smooth battleship-gray surfaces and even wear. The CAC endorsement is well-earned. Mid-level circulated 1921-D Walkers are rarely found so eye-appealing. NGC ID# 24R7, PCGS# 6584

**1928-S Half Dollar, MS64  
Brilliant Mint Luster**

**3846 1928-S MS64 PCGS.** No fully struck 1928-S halves are reported, and bagmarks can be a problem for the issue, too. This brilliant and satin-smooth example displays vibrant mint luster and terrific eye appeal, despite some softness at the branch hand and on the eagle's trailing leg. Marks are limited to a few tiny marks seen with a loupe. PCGS reports just 74 numerically finer examples. NGC ID# 24RB, PCGS# 6588

**3847 1929-D MS65 PCGS.** Powder-blue devices cede to caramel-gold borders. This lustrous and lower-mintage half dollar has a separated thumb on the branch hand. A delicate mark or two above the designer's monogram, but otherwise well preserved. NGC ID# 24RC, PCGS# 6589

**3848 1929-S MS63 PCGS.** The 1929-S Walking Liberty half dollar is known as something of a strike rarity, and this impressive Select example shows some of the usual softness on the centers, but the peripheral devices are sharper. Highlights of violet, gold, and amber toning visit the lightly marked surfaces. NGC ID# 24RD, PCGS# 6590

**3849 1929-S MS64 PCGS.** This impressive Choice example exhibits a typical strike for the issue, with a touch of softness on the wreath hand and eagle's leg. The lightly marked surfaces radiate satiny mint luster, under highlights of grayish-gold toning. NGC ID# 24RD, PCGS# 6590

**1929-S Half Dollar, MS65+  
Elusive in Finer Condition**

**3850 1929-S MS65+ PCGS.** The 1929-S Walker is usually available in MS65, but only nine such pieces are Plus-graded at PCGS (1/19). This example is well-struck with original mint luster and only a few minute contact marks. Mottled bronze-gold toning covers portions of the obverse, leaving the reverse light golden. NGC ID# 24RD, PCGS# 6590

**3851 1933-S MS63 PCGS.** Light golden toning warms softly frosted luster on this Select 1933-S half dollar, complementing well-struck design elements. This is a better date in Uncirculated condition, but it is collectible in the current grade level. NGC ID# 24RE, PCGS# 6591

**3852 1933-S MS64 PCGS.** Half dollar mintages were curtailed by the Great Depression, resuming with the 1933 San Francisco issue. This is a richly frosted, silver-white near-Gem — lustrous and sharply struck — with only a few microscopic marks that deter an even finer grade. The eye appeal is exceptional. NGC ID# 24RE, PCGS# 6591

**3853 1934-S MS66 PCGS.** A scarce Premium Gem example of the 1934-S half dollar, second to a small group of just 10 finer coins at PCGS (1/19). This Registry candidate displays a bold strike and shimmering luster. Mottled russet, gold, and deep lavender toning covers much of each side. NGC ID# 24RH, PCGS# 6594

**3854 1935 MS67 NGC.** The 1935 Walking Liberty half dollar is scarce in MS67, and there are only two coins finer at NGC and PCGS combined. This Superb Gem displays frosty luster and medium golden toning. The usual minor strike weakness is seen on the branch hand and eagle's leg. Census: 31 in 67 (2 in 67+, 1 in 67★), 1 finer (1/19). NGC ID# 24RJ, PCGS# 6595

**3855 1935-D MS66 PCGS.** Frosty luster glistens on each side of this Premium Gem 1935-D half dollar, complemented by warm golden toning that emerges from the obverse periphery. Some lightness of strike is noted in the centers, but there are no bothersome abrasions at this grade level. This is among the finest pieces certified by PCGS (1/19). NGC ID# 24RK, PCGS# 6596

**3856 1935-D MS66 PCGS.** This Premium Gem is among the finest 1935-D half dollars certified by PCGS (2/19). Frosty luster is brilliant and unabraded. Only a touch of weakness is visible on Liberty's branch hand and the eagle's trailing leg, while Liberty's head is well-defined. NGC ID# 24RK, PCGS# 6596

**3857 1935-S MS65 PCGS.** A thin veneer of golden toning appears over frosty luster on this Gem 1935-S half dollar. The "skin" is particularly fresh, likely contributing to the Gem grade. Under a loupe, a horizontal line that bisects the obverse from 9 to 3 o'clock is the only mentionable imperfection. Liberty's branch hand and the eagle's trailing leg exhibit strike weakness. NGC ID# 24RL, PCGS# 6597

**1935-S Half Dollar, MS66  
Only Three Finer at PCGS**

**3858 1935-S MS66 PCGS.** An above average strike and pristine surfaces are evident on this lovely Premium Gem that features brilliant, frosty silver luster and no evidence of toning on either side. A glass reveals trivial marks that prevent a higher grade, although they are invisible to the unaided eye. PCGS has only certified three finer examples of this issue (2/19). NGC ID# 24RL, PCGS# 6597

**3859 1937 MS67+ NGC.** More than 9.5 million pieces were struck, making the 1937 eminently available in high grades through the Premium Gem level. It only becomes scarce in high-end Superb Gem grades, such as this dazzling MS67+. A hint of golden, translucent toning is a testament to surface originality, but for all purposes the coin is brilliant and supremely lustrous. NGC has seen just three numerically finer coins. Census: 9 in 67+, 3 in 67★, 1 in 67+★, 3 finer (1/19). NGC ID# 256A, PCGS# 6601

**3860 1937 MS67 PCGS. CAC.** Subtle shades of gold and ice-blue waft across satinlike, lustrous surfaces of this CAC-endorsed Superb Gem 1937 half. The strike is razor-sharp, and this coin waits for an even finer grade thanks to its high technical merit and the outstanding eye appeal. PCGS reports just five numerically finer examples (1/19). NGC ID# 256A, PCGS# 6601

**3861** 1938-D MS66+ PCGS. CAC. Fewer than a half-million 1938-D half dollars were minted, but many high-grade examples were saved by speculators, explaining the issue's relative availability through MS66. Glittering silver surfaces shimmer with satin luster. The faintest traces of rose-gold adorn each carefully preserved side. This Plus-graded Premium Gem has CAC endorsement that confirms its outstanding eye appeal and surface quality. Population: 62 in 66+, 51 finer. CAC: 149 in 66, 26 finer (2/19). NGC ID# 24RV, PCGS# 6605

**1938-D Half Dollar, MS67**  
None Numerically Finer at Either Service

**3862** 1938-D MS67 NGC. The 1938-D is a low-mintage, high-survival issue in the Walking Liberty series, although at the Superb Gem level only a few coins are certified (none finer than the MS67 category). This is a brilliant MS67 example with sparkling satin-smooth luster and a sharp strike rim-to-rim. A few glimpses of faint-gold toning appear on nearly brilliant-white, pristine surfaces. A glass reveals die polish lines that are invisible to the unaided eye. Census: 24 in 67 (1 in 67+, 4 in 67★), 0 finer (2/19). NGC ID# 24RV, PCGS# 6605

**3863** 1939-S MS67 PCGS. CAC. Blazing mint luster engulfs this Superb Gem 1939-S half dollar, which boasts CAC endorsement. It is well-struck and virtually pristine with no toning. The 1939-S is occasionally available in this grade, but only two finer coins are reported at the leading certification services (1/19). NGC ID# 24RY, PCGS# 6608

**1939-S Walking Liberty Half, MS67+**  
Registry-Grade Condition Rarity

**3864** 1939-S MS67+ PCGS. CAC. The Plus designation sets this magnificent coin apart from the many MS67 coins certified, earning it recognition as a Registry candidate. Only one finer coin is listed at PCGS. This piece is CAC endorsed and satiny with good definition. Light golden toning warms each side. Population: 14 in 67+, 1 finer. CAC: 160 in 67, 0 finer (1/19). NGC ID# 24RY, PCGS# 6608

**3865** 1941-S MS66+ PCGS. A Plus-graded Premium Gem representative of this popular issue, this coin shows sharp peripheral detail, but just a touch of the usual softness is evident on the centers. The lustrous surfaces exhibit colorful highlights of violet, sea-green, and pale gold toning. PCGS has graded nine numerically finer examples (2/19). NGC ID# 24S5, PCGS# 6613 Base PCGS# 6613

**1945-S Walking Liberty Half, MS67**  
Among the Finest Certified

**3866** 1945-S MS67 PCGS. This available late-series issue survives in quantity in grades through MS66, but becomes impressively scarce in MS67. This piece shows exceptionally preserved surfaces combined with above-average striking definition. A blush of gold toning lightens toward the center on each side, while the obverse also exhibits deeper sea-green and amber toning around the borders. Population: 50 in 67 (2 in 67+), 0 finer (2/19). NGC ID# 24SH, PCGS# 6626

**3867** 1946-S MS67 PCGS Gold Shield. One of the keys to a high-grade short set of Walkers, the 1946-S appears only infrequently at the Superb Gem level. Weak strikes are usually the culprit, although this example is sharp for the issue. Pale iridescent colors frame lustrous and unmarked silver centers. Neither PCGS nor NGC have certified a numerically finer piece (1/19). NGC ID# 24SL, PCGS# 6629

**3868** 20-Piece 1941 to 1947 PDS Walking Liberty Half Dollar Short Set, MS65 PCGS. CAC. The coins are individually housed in older blue-label PCGS holders with a common numeric grade of MS65 and CAC endorsement. The 1942-S is in a green label holder, and the 1943 is in an older green label holder. Strikes range from sharp on the 1941 to moderately weak in the centers on the 1944-S. Most coins are brilliant, although a few have light golden toning. A well-matched set with tremendous quality for the grade. (Total: 20 coins)

**PROOF WALKING LIBERTY HALF DOLLARS**

**3869** 1936 PR64 PCGS. This near-Gem proof 1936 Walker could very well earn a Cameo designation were only the obverse considered — that side is brilliant and well-contrasted. The reverse is also untoned, but contrast is more subdued. Eye appeal is spectacular. NGC ID# 27V4, PCGS# 6636

**1936 Half Dollar, Nicely Toned PR65**

**3870** 1936 PR65 NGC. The surfaces are toned mostly in ice-blue patina, showing a few streaks of complementary crimson and gold color. The underlying fields are remarkably bright and reflective, though field-device contrast is limited, as almost always seen on this first-year issue. NGC ID# 27V4, PCGS# 6636

1939 Half Dollar, PR68

Exceptional Quality, Great Eye Appeal

- 3871 1939 PR68 PCGS. A nearly brilliant and immaculately preserved Superb Gem proof, with glimpses of clear-gold toning over the glassy-mirrored, silver surfaces. The strike is fully detailed on the raised elements, with faint mint frost on the eagle and portions of Liberty's gown. This coin ranks among the finest graded at PCGS. Population: 47 in 68 (1 in 68+), 0 finer (2/19). NGC ID# 5ESU, PCGS# 6639

- 3872 1942 PR68 NGC. The impeccably preserved surfaces of this sharply detailed PR68 specimen feature deeply mirrored fields with a few delicate hints of pale jade toning. The holder commemorates the Guide Book and is signed by Ken Bressett. NGC has graded eight numerically finer examples (2/19). NGC ID# 282G, PCGS# 6642

- 3873 1942 PR68 NGC. A stunning PR68 example, from a mintage of 21,120 pieces, this coin exhibits virtually pristine brilliant surfaces, with fully struck design elements and deeply mirrored fields. Overall visual appeal is terrific. NGC has graded eight numerically finer examples (2/19). NGC ID# 282G, PCGS# 6642

## FRANKLIN HALF DOLLARS

1948 Franklin Half Dollar, MS67

Registry Grade Full Bell Lines Example

- 3874 1948 MS67 Full Bell Lines PCGS. The Franklin half dollar made its debut in 1948, with a mintage of just over 3 million pieces. This spectacular Superb Gem is among the finest survivors, with sharply detailed design elements that show full definition on the bell lines. The impeccably preserved surfaces are lustrous and appealing, under shades of lavender-gray and golden-tan toning. Population: 17 in 67 (1 in 67+) Full Bell Lines, 0 finer (2/19). NGC ID# 24SR, PCGS# 86651

- 3875 1949-D MS66 Full Bell Lines PCGS. The 1949-D half is readily available through the Gem level of preservation, even with Full Bell Lines; however, the certified population drops significantly at the Premium Gem level. This piece displays scattered light toning in hues of olive-green, gold, and orange with hints of red-pink. A minute spot is present beneath the N in UNUM on the reverse. Population: 94 in 66 (10 in 66+) Full Bell Lines, 0 finer (2/19). Ex: New York Signature (Heritage, 2/2014), lot 3976, which realized \$2,467.50. NGC ID# 5HWE, PCGS# 86654

1950-D Franklin Half Dollar, MS66+

Full Bell Lines Definition

- 3876 1950-D MS66+ Full Bell Lines PCGS. This Plus-graded Premium Gem Franklin half dollar is among the finest survivors from a mintage of more than 8 million pieces. The design elements are sharply detailed throughout, with Full Bell Lines definition, and the impeccably preserved surfaces are lustrous and lightly toned. Neither service has certified any coins in higher grades (1/19). NGC ID# 24SX, PCGS# 86657 Base PCGS# 86657

1952 Franklin Half, MS67 Full Bell Lines  
Top-Grade CAC Coin

- 3877 1952 MS67 Full Bell Lines PCGS. CAC. Original rainbow toning on the obverse of this frosty Superb Gem complements lavender and rose-gold on the reverse. The coin is well-struck and devoid of the usual abrasions that appear on the high points of the devices. The 1952 Franklin half is rare this fine and unknown in a higher grade. Population: 30 in 67 (1 in 67+) Full Bell Lines, 0 finer. CAC: 12 in 67, 0 finer (1/19). NGC ID# 6L2U, PCGS# 86661

- 3878 1952-S MS67 PCGS. CAC. Incredible, frosty mint luster illuminates the faintly toned pastel surfaces of this CAC-endorsed Superb Gem Registry coin. Sharpness is lacking on the lower bell, but the obverse is well-defined. Among the finest-known non-Full Bell Lines examples of this San Francisco issue. Population: 31 in 67 (4 in 67+), 0 finer. CAC: 19 in 67, 0 finer (1/19). NGC ID# 24T5, PCGS# 6663

1953 Franklin Half Dollar, MS67  
Vivid Multicolor Toning

- 3879 1953 MS67 PCGS. Attractive shades of sea-green, lavender-gray, and cerulean-blue toning blanket the impeccably preserved surfaces of this delightful Superb Gem, with vibrant mint luster underneath. The design elements are well-detailed, with just a touch of the usual softness on the hair and bell lines. Eye appeal is outstanding. Population: 2 in 67, 0 finer (2/19). NGC ID# 24T6, PCGS# 6664

3880 1954-S MS67 PCGS. CAC. Pastel rainbow toning appears on the obverse of this Superb Gem, while the reverse exhibits full, untoned brilliance. Although undesignated, the bell lines are nearly complete on this piece. Population: 8 in 67 (1 in 67+), 4 in 67 FBL, 0 finer. CAC: 7 in 67, 0 finer (2/19). NGC ID# 24TB, PCGS# 8669

3881 1956 MS67 Full Bell Lines PCGS. CAC. An extraordinary Superb Gem that exhibits lovely "mint set" toning, this piece has full underlying cartwheel luster with gold, violet, and iridescent toning. No examples have earned a finer grade from PCGS or NGC. Population: 47 in 67 (3 in 67+) Full Bell Lines, 0 finer. CAC: 39 in 67, 0 finer (2/19). NGC ID# 6L33, PCGS# 86671

#### 1958 Franklin Half, MS67 Full Bell Lines Registry Grade Example

3882 1958 MS67 Full Bell Lines PCGS. The immaculate surfaces of this spectacular Superb Gem are lightly toned in pleasing shades of lavender and sea-green, with vibrant mint luster that shines through the patina. The design elements are sharply detailed throughout and the bell lines show full definition. Overall eye appeal is terrific. Population: 23 in 67 (2 in 67+) Full Bell Lines, 0 finer (2/19).

#### 1959 Franklin Half, MS66+ Full Bell Lines Only One Finer Coin at PCGS

3883 1959 MS66+ Full Bell Lines PCGS. This Plus-graded Premium Gem displays vivid highlights of magenta and sea-green toning at the peripheries. The virtually pristine surfaces radiate vibrant mint luster and the sharply detailed design elements exhibit full definition on the bell lines. Overall eye appeal is terrific. Population: 79 in 66 (8 in 66+) Full Bell Lines, 1 finer (2/19). NGC ID# 24TJ, PCGS# 86676

3884 1961-D MS66 Full Bell Lines NGC. The impeccably preserved surfaces of this delightful Premium Gem radiate vibrant mint luster, under delicate shades of lavender and pale gold toning. The sharply detailed design elements exhibit full definition on the bell lines. Census: 5 in 66 Full Bell Lines, 0 finer (2/19). NGC ID# 24TP, PCGS# 86681

3885 1961-D MS66 Full Bell Lines PCGS. Full Bell Lines examples of the 1961-D half dollar usually are found in near-Gem condition and very scarcely in MS65. Premium Gems of this quality are rare. Satiny luster emanates from smooth surfaces lightly toned in pale gold. Magnification reveals a few trivial marks on the portrait and a couple of reeding marks on the bell. Population: 33 in 66 (1 in 66+) Full Bell Lines, 0 finer (2/19). NGC ID# 24TP, PCGS# 86681

3886 1962-D MS66 Full Bell Lines PCGS. A Registry-grade Premium Gem Full Bell Lines example of the 1962-D Franklin half dollar, showing a dusting of pastel colors on the obverse and a light golden hue across the reverse. Sharp design elements show no bothersome abrasions and the fields are satiny. No finer pieces are certified. Population: 46 in 66 (1 in 66+) Full Bell Lines, 0 finer (2/19). NGC ID# 24TS, PCGS# 86683

#### 1963-D Franklin Half Dollar, MS66+ Full Bell Lines Example

3887 1963-D MS66+ Full Bell Lines PCGS. A Plus-graded Premium Gem from the final year of the Franklin design, this coin exhibits sharply detailed design elements throughout, with full definition on the bell lines. The virtually pristine surfaces are blanketed in shades of golden-tan and magenta toning, with vibrant mint luster underneath. PCGS has graded a single example finer (1/19). NGC ID# 24TU, PCGS# 86685

### PROOF FRANKLIN HALF DOLLARS

3888 1950 PR67 PCGS. A spectacular, brilliant Superb Gem proof with modest obverse contrast. The reverse lacks contrast, but both sides are beautifully preserved and sharp. Eye appeal is outstanding on this first-year proof Franklin. NGC ID# 27VA, PCGS# 6691

3889 1953 PR66 Ultra Cameo NGC. The proof 1953 Franklin half dollar is scarce in Ultra Cameo grades, and few pieces are known finer than this Premium Gem. Sharp devices showcase frost-white luster, complementing brilliant, liquidlike reflectivity in the fields. Census: 15 in 66 Ultra Cameo, 11 finer (1/19). NGC ID# D9VF, PCGS# 96694

3890 1954 PR67 Ultra Cameo NGC. A pristine snow-white specimen that demonstrates exemplary distinction between the darkly mirrored fields and the frosty motifs. Only a minute percentage of 1954 proofs offer comparable contrast. Census: 26 in 67 Ultra Cameo, 16 finer (2/19). NGC ID# 27VE, PCGS# 96695

3891 1956 Type One PR69 NGC. The low relief on the eagle's feathers identifies the scarcer Type One variety. This sharply detailed PR69 example offers impeccably preserved brilliant surfaces with deeply mirrored fields and terrific eye appeal. No type One examples have been certified in higher numeric grades (1/19). NGC ID# 24TW, PCGS# 6686

3892 1959 PR68 Cameo PCGS. Non-Cameo proof 1959 half dollars are plentiful in PR68, but Cameos are rare, and PCGS lists only a single Deep Cameo in this grade. Numerically finer pieces are rare regardless of contrast level. This PR68 Cameo displays brilliant, glimmering fields and sharp, softly frosted devices. Eye appeal is outstanding on this Registry Set contender. Population: 71 in 68 Cameo, 1 finer; 1 in 68 Deep Cameo, 1 finer (2/19). NGC ID# 27VJ, PCGS# 86700

3893 1960 PR68 Deep Cameo PCGS. Occasionally seen in PR68 Deep Cameo, the 1960 proof Franklin is a rarity any finer. This piece is brilliant and starkly contrasted with liquidlike mirroring in the fields. Neither side exhibits mentionable toning. PCGS reports 10 finer representatives (2/19). NGC ID# 24TY, PCGS# 96701

## EARLY DOLLARS

**1795 Flowing Hair Dollar, VG10  
B-1, BB-21, Two Leaves**

**3894** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VG10 PCGS Gold Shield. This BB-21 dollar will serve well as a Flowing Hair type coin. The Two Leaves reverse is also a *Guide Book* variety. This example has smooth, evenly worn surfaces with complete border dentils on each side. On the reverse, faint adjustment marks are noted by the ED in UNITED and to the right of OF. The olive-gray surfaces have golden and lilac undertones that emerge at certain angles. A few tiny ticks in the right obverse field and a faint rim bump below the 5 in the date are the only imperfections. NGC ID# 24WZ, PCGS# 39986 Base PCGS# 6853

**3895** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Repaired — PCGS Genuine. Fine Details. Bowers Die State III, as usual. This is an evenly struck example with moderate wear. Both sides exhibit complete borders, and partial detail remains on the eagle and Liberty portrait. No adjustment marks are apparent. Some smoothing is noted in the fields and on the eagle's right (facing) wing. Bright slate-gray surfaces are uniformly colored.

**3896** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Environmental Damage — PCGS Genuine. Fine Details. Bowers Die State III, as often seen. A few faint adjustment marks are seen along the left-hand obverse border, but the dentils remain complete around each side. This Three Leaves type coin has pleasing detail on the devices. Deep olive-gray, russet, and greenish toning covers each side, with mostly smooth underlying surfaces. Some granularity in a few places prevents a numeric grade.

**3897** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Damaged, Cleaned — NGC Details. Fine. Bowers Die State II, as usual. This is a well-detailed Flowing Hair dollar with complete border dentils and no discernible adjustment marks. The surfaces are smooth with slate-gray color, although tinges of olive, gold, and peach-orange appear in the margins when tilted beneath a light. Cleaning was performed long ago and is not visually bothersome. However, several hits on the obverse portrait are immediately apparent — the largest one is on Liberty's neck.

**1795 Flowing Hair Dollar, Fine 15  
B-5, BB-27, Three Leaves Reverse**

**3898** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 PCGS. Bowers Die State II, the earliest die state that is usually available, showing a die line from the tip of the left wreath stem toward the rim but not connecting to it. This is an evenly worn, collector-grade Three Leaves type coin, an essential aspect of *Guide Book* collectors' cabinets. The relief elements have light steel-gray color, contrasting with deeper gunmetal-gray in the fields and forming a circulation cameo effect. The coin is evenly struck, well-centered, and devoid of adjustment marks. NGC ID# 24WZ, PCGS# 39977 Base PCGS# 6852

**3899** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Plugged — PCGS Genuine. VF Details. Bowers Die State I. An important *Guide Book* variety, showing the bust of Liberty off-center to the left in the obverse die. This VF-level coin has partial hair detail and some feather definition in the wings. A plugged hole is evident at the BE in LIBERTY, the letters reengraved. This piece has bright slate-gray surfaces with no major abrasions.

**3900** 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Scratches — NGC Details. VG. A couple of hair-thin marks on the right obverse field and Liberty's lower neck account for the designation. The reverse has slight rim knocks at 10 and 12 o'clock. Nonetheless, a collectible example of the first-year Draped Bust dollar. Stone-white high points contrast with russet and olive-gray fields.

**1796 Large Date, Small Letters Dollar  
B-5, BB-65, VF20**

**3901** 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF20 PCGS. Die State II, with a large die lump above I in AMERICA that has not yet enlarged to the point of touching the C or the rim above. The 6 in the date is doubled. As noted in the Bowers-Borckardt reference: "... this is visible at the underside of the top of 6 and the upper inside of the bottom loop." This is a pleasingly original VF example with natural rose-gray toning over both sides. Obverse stars 2 and 3 are weak, as are the STA of STATES on the upper reverse, all due to a die bulge. Evenly worn with few marks on either side. Ex: Baltimore Signature (Heritage, 3/2009), lot 2315, which realized \$3,881.25. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

**1796 Large Date Dollar, VF20  
B-5, BB-65, Small Letters**

**3902** 1796 Large Date, Small Letters, B-5, BB-65, R.2, VF20 ANACS. Bowers Die State III, with the die chip between the IC in AMERICA far advanced. This Small Eagle type coin has complete border dentils around each side and no planchet adjustment marks. Wear is consistent with the grade, although a satiny luminance in the fields is typically reserved for higher-grade pieces. This coin displays olive-gold and lilac-gray toning over smooth surfaces, with most major details still visible. NGC ID# 24X3, PCGS# 40002 Base PCGS# 6861

1797 10x6 Stars Dollar, VF25  
Large Letters Reverse, B-3, BB-71

3903 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, VF25 PCGS. Bowers Die State III. The obverse has 10 stars crowded to the left of Liberty and 6 stars squeezed in to the right. A faint die dot to the right of the first 7 in the date is obvious under a glass and makes the date appear to be 17.97. The strike is about average for the variety at the VF25 grade. This example shows a mix of medium-gray and gold toning, contrasted by the high points of Liberty in a light shade of gray. Numerous adjustment marks angle across the reverse. Scattered light abrasions define the grade, and a faint pinscratch through Liberty's hair and neck is noted. Still, a charming old-time example of this interesting variety.

Ex: Long Beach Signature (Heritage, 9/2006), lot 2369; Long Beach Signature (Heritage, 9/2008), lot 2380; Chicago Signature (Heritage, 10/2018), lot 3076. NGC ID# 24X4, PCGS# 40004 Base PCGS# 6865

1798 Draped Bust Dollar, VF30  
Large Eagle, B-21, BB-107

3904 1798 Large Eagle, Pointed 9, 10 Arrows, B-21, BB-107, R.5, VF30 PCGS. Bowers Die State II, with the "Tadpole" die break above the date. This impressive VF30 specimen shows light-to-moderate wear, with the left side of the drapery worn, but still visible. The lavender-gray surfaces are lightly abraded throughout, with a few hints of original mint luster still intact. The overall presentation is most attractive. NGC ID# 24X6, PCGS# 40024 Base PCGS# 40018

3905 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, VF25 PCGS. Bowers Die State II. The high 8 in the date and a crack through OF confirm the variety as Bolender-27. This cream-gray early dollar shows few marks, though the reverse has a hint of granularity above the eagle's left (facing) shoulder and across the middle of the shield. NGC ID# 24X6, PCGS# 40030 Base PCGS# 40018

1798 B-28, BB-118 Bust Dollar, XF40  
Near-Terminal Reverse Die State

3906 1798 Large Eagle, Pointed 9, Close Date, B-28, BB-118, R.3, XF40 ANACS. Bowers Die State V. This stone-gray BB-118 example is in its next-to-final die state for the variety, with both the obverse and reverse heavily cracked. The reverse die failed striking BB-118, while the wounded obverse die soldiered on for one more use striking the scarce BB-119. Bits of deep-gray toning surround the raised devices, with smooth wear throughout both sides showing numerous small marks across the mostly bright surfaces. NGC ID# 24X6, PCGS# 40035 Base PCGS# 40018

1798 Draped Bust Dollar, XF45  
Large Eagle, Pointed 9, Close Date, B-9, BB-121  
In-Demand 'Amateur Die Cutter's Reverse'

3907 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, XF45 NGC. Bowers Die State II. This is a relatively plentiful 1798 variety, although always in demand for its "Amateur Die Cutter's Reverse." The intended arc star pattern of field stars is curiously irregular, with several stars misarranged and strangely aligned. The reverse die is further identified by the leaf below the right tail of R in AMERICA. BB-121 is the sole use of the obverse and reverse dies. Pleasing silver-gray surfaces show pale-rose toning on the design highpoints. A few faint obverse and reverse marks are consistent with the Choice XF grade. NGC ID# 24X6, PCGS# 40038 Base PCGS# 40018

3908 1798 Large Eagle, Pointed 9, Close Date, B-25, BB-123, R.4 — Harshly Cleaned — NGC Details. XF. Bowers Die State II. A nicely defined Heraldic Eagle dollar. The pearl-gray surfaces are hairlined, but consequential contact is limited to a mark below the right (facing) claw. Luster fills the wings and shield. The "blundered stars" reverse with points of the uppermost two stars embedded in clouds.

1799 Draped Bust Dollar, XF40

Scarce B-7, BB-156 Variety

- 3909 1799 7x6 Stars, B-7, BB-156, R.4, XF40 NGC. Bowers Die State III. A network of faint die cracks encircles the reverse legend and passes through the outer motifs to confirm the late die state. The obverse has no cracks, but die clashing exists from its earliest stages through the late state, visible as "waves" over the date. This is a richly toned example of BB-156, with smooth and deeply iridescent fields, plus a sharp strike. Wear is light for the XF40 designation, and only a few light marks suggest time spent in circulation. NGC ID# 24X7, PCGS# 40048 Base PCGS# 6878

- 3910 1799 7x6 Stars, B-5, BB-157, R.2 — Improperly Cleaned — NGC Details. XF. Bowers Die State III. Forest-green and golden-brown patina alternates across this inoffensively abraded early dollar. Liberty's shoulder and the eagle's breast exhibit moderate wear, but traces of luster emerge throughout. Although NGC passed on a numerical grade, many collectors would be proud to own the present piece.

- 3911 1799 7x6 Stars, B-16, BB-158, R.2, VF25 NGC. Bowers Die State III. The top-left berry is weak, with die clashing visible on both the obverse and reverse. Numerals 1 and 7 in the date are close, while star 7 is distant from L of LIBERTY (more so than any other 1799 variety). Rich slate-gray toning lightens to silver-gray on design high points. Abrasions are relatively few and minor for the VF grade, and a pair of inconsequential rim bumps are visible at 3 and 7 o'clock on the reverse. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

**1799 7x6 Stars Dollar, XF40  
B-16, BB-158, Beautiful Color**

- 3912 1799 7x6 Stars, B-16, BB-158, R.2, XF40 PCGS. Bowers Die State II, with a lightly lapped reverse. This is a 7x6 Stars variety, which falls under the Normal Date Guide Book listing and is popular as a type coin. Only light wear is present on this coin — all design elements and the open areas of the fields exhibit perceivable rub, but there is no loss of detail. Lovely bluish hues intermingle across otherwise lilac-gray surfaces, complementing the bold detail and uniform strike. No adjustment marks are present. Typical of early dollars, this Draped Bust coin has a few minor surface marks, including some old, light scratches on Liberty's head and shoulder. On the reverse, a thin pinscratch arcs from the rim at 7 o'clock through the eagle to the rim beyond the right (facing) wing tip. NGC ID# 24X7, PCGS# 40050 Base PCGS# 6878

- 3913 1799 8x5 Stars, B-23, BB-159, R.3, VF25 NGC. Bowers Die State II. The sole early silver dollar die marriage with an 8x5 obverse star arrangement, a minor engraving blunder. This evenly circulated but problem-free steel-gray representative will satisfy most who collect by Guide Book variety. All letters in E PLURIBUS UNUM are at least partly present. NGC ID# 24X7, PCGS# 40063 Base PCGS# 6881

- 3914 1799 7x6 Stars, B-12, BB-160, R.3, Fine 12 NGC. Bowers Die State III. Chestnut-gold and sea-green toning adorns the borders of this minimally marked and mildly bright early silver dollar. Bolender-12 is known for its advanced obverse cracks, evident on the present piece near the date and lower field. NGC ID# 24X7, PCGS# 40051 Base PCGS# 6878

- 3915 1799 7x6 Stars, B-9, BB-166, R.1, VF20 PCGS. Bowers Die State IV. A die break east of the upper serif of the second S in STATES is diagnostic for the "Apostrophe" variety, Bolender-9. The diagonal die crack through the tip of the chin provides another identifier. This silver-gray representative shows few marks given its service in early American commerce. About half of E PLURIBUS UNUM remains. NGC ID# 24X7, PCGS# 40057 Base PCGS# 6878

- 3916 1800 AMERICAI, B-19, BB-192, R.2 — Repaired — PCGS Genuine. VF Details. Bowers Die State II. Powder-blue, tan-brown, and silver-gray toning encompasses this mid-grade Heraldic Eagle dollar. The surfaces appear nearly unabraded to the unaided eye, but close inspection reveals that both sides have been whizzed. Still a nicely detailed example of the popular AMERICAI Guide Book variety.

- 3917 1800 12 Arrows, B-17, BB-196, R.1 — Repaired — PCGS Genuine. XF Details. Bowers Die State IV. A diagonal die line west of the base of the 1 in the date attributes B-17. A well-defined pearl-gray representative of this popular variety. A large plus sign was apparently entered on Liberty's face at one time, but has been repaired. The field near Liberty's nose is unobtrusively smoothed.

- 3918 1802 Narrow Date, B-6, BB-241, R.1 — Repaired — NGC Details. VF. Bowers Die State III. A rim knock near the RI in AMERICA is filed, and both sides of this stone-white dollar have a cloudy appearance from hairlines. A few minor marks are concealed in Liberty's upper hair, but abrasions are minor overall. An affordable example of the popular crown-sized early type.

**1802 Narrow Date Dollar, VF35  
B-6, BB-241, Sharp for the Grade**

- 3919 1802 Narrow Date, B-6, BB-241, R.1, VF35 PCGS. Bowers Die State III, lapped, as usual for the variety. BB-241 is often represented in type collectors' cabinets due to its general availability in circulated grades. This Choice VF example displays a bold strike and even wear. A few faint adjustment marks are visible around the borders with a loupe. Olive-gray and gunmetal-blue toning covers the reverse and leaves only small areas of silvery luster on the obverse. NGC ID# 24XB, PCGS# 40088 Base PCGS# 6895

### 1803 Silver Dollar, AU Details

Large 3, B-6, BB-255

- 3920 1803 Large 3, B-6, BB-255, R.2 — Surfaces Smoothed — PCGS Genuine. AU Details. Bowers Die State III. A hint of honey-gold patina visits this partly lustrous and richly detailed early type coin. High points such as Liberty's shoulder show only slight wear. The surfaces appear remarkably free from contact, but are slightly bright and faintly hairlined. More desirable than implied by its PCGS designation.

## SEATED DOLLARS

- 3921 1843 AU58 PCGS. OC-3, R.2. Osburn-Cushing Die State d/a. The strongly impressed design elements of this attractive near-Mint specimen show just a trace of wear on the high points and the pleasing lavender-gray surfaces are lightly abraded throughout. Traces of original mint luster shine through the patina. Population: 52 in 58, 56 finer (1/19). NGC ID# 24YD, PCGS# 6929

- 3922 1857 — Cleaned — NGC Details. AU. OC-2, R.3. Osburn-Cushing Die State a/a. This partially prooflike 1857 dollar was formerly housed in an AU58 ICG holder (label included), and now resides in an NGC Details holder with AU sharpness confirmed. The cleaning is apparent under strong light, where hairlines mingle with signs of die polishing. Faint golden-gray toning provides a pleasing backdrop for the otherwise smooth and minimally marked surfaces. As usual, this challenging date shows minor strike weakness at Liberty's head and the adjacent stars. NGC ID# 24YW, PCGS# 6945

- 3923 1859-O MS61 PCGS. OC-1, R.1. Osburn-Cushing Die State a/a. From an early state of the dies, the brilliant surfaces of this impressive Mint State example show prooflike reflectivity in sheltered areas. The design elements are well-detailed, with a touch of the typical softness on the stars and Liberty's head. NGC ID# 24YY, PCGS# 6947

- 3924 1859-S XF45 NGC. OC-1, R.2. Osburn-Cushing Die State a/b. The sole No Motto San Francisco issue has a tiny mintage of 20,000 pieces, and survivors are scarce in all grades. This well-defined representative features medium wheat-gold and powder-blue patina. A cluster of marks on the field near the knees provides an identifier. NGC ID# 24YZ, PCGS# 6948

- 3925 1860-O MS60 NGC. OC-1, R.1. Osburn-Cushing Die State d/c. Attractive shades of grayish-gold and lavender toning blanket the lustrous surfaces of this impressive Mint State example. This piece shows the minimum number of minor contact marks for the grade. NGC ID# 24Z3, PCGS# 6950

- 3926 1860-O MS61 PCGS. OC-2, R.1. Osburn-Cushing Die State b/c. This attractive Mint State example exhibits well-detailed design elements, with a touch of the typical softness on the star centers. The lustrous, brilliant surfaces are lightly marked for the grade. NGC ID# 24Z3, PCGS# 6950

- 3927 1860-O MS62 PCGS. OC-2, R.1. Osburn-Cushing Die State a/c. The central design elements are sharply detailed, but some softness is evident on the star centers. The lustrous surfaces are lightly marked, but there is an extensive network of faint die cracks through the reverse legends. NGC ID# 24Z3, PCGS# 6950

- 3928 1872-CC — Cleaned — NGC Details. VG. OC-1, High R.3. Osburn-Cushing Die State a/a. The desirable combination of being a low mintage date and a Carson City issue from the early 1870s makes the '72-CC an important Seated dollar. Just 3,150 pieces were struck. This example has muted, stone-gray surfaces with plenty of wear. A couple of small rim dings and a mark between Liberty's head and star 8 exist on the obverse. The reverse shows only smooth wear, although both sides show signs of cleaning.

- 3929 1872-CC — Graffiti — PCGS Genuine. Fine Details. OC-1, High R.3. This is the only die variety of the 1872-CC Seated dollar, identified by date and mintmark placement. The 1872-CC boasts a scant mintage of 3,150 pieces and is sought-after in all grades. This moderately worn coin displays smooth olive-gray surfaces that lighten toward the centers. A couple of X's are scratched into the left and right obverse fields, preventing a numeric grade from PCGS.

## PROOF SEATED DOLLARS

### 1864 Seated Dollar, Toned PR63 Rare Die Pairing

- 3930 1864 PR63 ANACS. OC-P3, High R.6. Osburn-Cushing Die State a/a. This is a rare proof, not only because of the small mintage of 470 pieces, but also because of the die pairing. The obverse die is the only use of Obverse P3, and it is combined here with the second and final use of Reverse 1863 PB from the previous year. The fields are remarkably bright and reflective, even through the deep, variegated blue, golden, and gray toning. NGC ID# 252J, PCGS# 7007

- 3931 1868 — Artificial Toning — NGC Details. Proof. OC-P2, High R.3. Osburn-Cushing Die State a/b. Repunching shows at the underside of the flag on 1, and beneath the base of that numeral as well. The 8 is lightly repunched inside the lower loop. This fully struck proof is reflective and attractive, although NGC has determined the blue, violet, and peach-gold toning was artificially applied. Substantial eye appeal remains.

- 3932 1869 — Questionable Color — PCGS Genuine. Proof, Unc Details. OC-P2, R.4. Deep cherry-red and violet toning occupies the obverse, while the reverse has a golden-brown field and a blue-green border. The extravagant colors have been declared suspect by PCGS, but the underlying surfaces are unblemished. The strike is good, though slightly incomplete on the eagle.

## TRADE DOLLARS

- 3933 1874-CC AU58 NGC. Micro CC. Period after FINE. An attractive near-Mint representative. Light powder-blue toning is mostly limited to the borders. Luster is especially prevalent on the reverse. Abrasions are relatively minor, and the strike is fairly sharp. NGC ID# 2532, PCGS# 7035

- 3934 1874-CC — Artificial Toning — NGC Details. Unc. Small CC mintmark. Period after FINE. This unworn Carson City Trade dollar displays lustrous surfaces and minimal abrasions. Slight strike weakness is evident on Liberty's head and the adjacent stars. Near-brilliant interiors cede to a ring of violet in the margins with deep ocean-blue toning around the border. NGC feels that the toning was applied deliberately to enhance the coin, and thus denies this piece a numeric grade. NGC ID# 2532, PCGS# 7035

**1874-CC Trade Dollar, MS62**  
Lustrous and Peripherally Toned

3935 **1874-CC MS62 PCGS.** Breen-5786. Micro CC. Period after FINE. Light golden-brown borders frame brilliant centers. Sharply struck and attractive with a smooth reverse and only minor obverse marks. A die line through the D in DOLLAR may be of interest to the specialist. The 1874-CC is moderately scarcer than the 1875-CC, and lustrous examples are always in demand. NGC ID# 2532, PCGS# 7035

3936 **1875-S Type One Reverse MS64 PCGS.** Large S. An impressive Choice representative of this popular type issue, with well-detailed design elements that show a touch of the usual softness on the star centers. The lightly marked surfaces radiate vibrant mint luster. PCGS has graded 41 numerically finer examples (1/19). NGC ID# 2536, PCGS# 510101 Base PCGS# 7039

3937 **1876-CC Type Two Reverse — Cleaned — NGC Details.** Unc. Tall CC. This brown, gunmetal-gray, and olive Carson City type coin has a good strike and satiny mint luster. No bagmarks are apparent, but a loupe reveals faint horizontal hairlines near Liberty's raised arm. Nonetheless, an impressive Carson City Trade dollar. NGC ID# 4EML, PCGS# 40113 Base PCGS# 7042

3938 **1876-S Type One Obverse, Type One Reverse, MS63 NGC.** Large S. Dusky olive-gray toning embraces coruscating and crisply struck surfaces. The reverse is well-preserved, while the obverse field has a few minor marks, and a couple of small spots are concealed west of the L in LIBERTY.  
Ex: Long Beach Signature (Heritage, 1-2/2015), lot 3977; Dallas Signature (Heritage, 10/2016), lot 3956, which realized \$1,116.25. NGC ID# 4EMM, PCGS# 40114 Base PCGS# 7043

3939 **1877-S MS64 NGC.** Large S. A fully struck cream-gray and steel-blue Choice silver type coin. The satiny surfaces display only unobtrusive contact on the left obverse field. Trade dollar mintages peaked in 1877, as many U.S. employers paid workers in Trade dollars purchased at a discount to face. NGC ID# 253E, PCGS# 7046

3940 **1878-S MS64 PCGS.** Dappled shades of sea-green, slate-gray, and magenta toning blanket the well-preserved surfaces of this impressive Choice specimen, with well-detailed design elements underneath. PCGS has graded 48 numerically finer examples (1/19). NGC ID# 253G, PCGS# 7048

## PROOF TRADE DOLLARS

3941 **1874 PR60 PCGS.** The usual weak points on the obverse — the border stars, Liberty's head, and the foot — are sharp on this proof Trade dollar, although Liberty's right (facing) breast is incompletely brought up due to weakness on the reverse at the eagle's right (facing) leg. The coin is untoned and has deep mirrors. Scattered hairlines on each side define the grade. Housed in a green label holder. NGC ID# 27YK, PCGS# 7054

**1875 Trade Dollar, PR64 Cameo**  
Rich Toning Over Glassy Mirrors

3942 **1875 PR64 PCGS.** Type Two Reverse. Period after FINE. The 1875 Trade dollar has the lowest circulation-strike mintage for this mint, putting pressure on the 700 proofs sold. The example offered here maintains pronounced Cameo contrast despite pleasing original blue, gold, and violet toning. Liberty, the eagle, and the peripheral elements, including the stars and legends, are frosty with glassy mirrors all around. NGC ID# 27YL, PCGS# 87055

**1876 Trade Dollar, Toned PR64**  
Beautiful Coloration

3943 **1876 PR64 PCGS.** Type One Obverse, Type Two Reverse. No berry under claw. The proof 1876 trade dollar is a popular type coin. This near-Gem example displays sharp definition throughout the stars and the devices. The glimmering fields showcase beautiful blue, violet, and gold border toning, with a dusting of champagne and greenish hues across the interiors. Eye appeal is outstanding. NGC ID# 27YM, PCGS# 7056

**1878 Trade Dollar, PR64**  
Proof-Only Issue, 900 Pieces Struck

3944 **1878 PR64 PCGS. CAC.** An unbeatable combination of a sharp strike and outstanding surface quality makes this deeply toned 1878 proof a prize for the Trade dollar specialist. Deep lavender-gray patina covers both sides as viewed head-on, but viewed in light and turned at an angle, a vibrant mix of colors decorate the mirrored surfaces — dazzling ivory-gold, cerulean-blue, violet, and royal-purple hues float on glassy-smooth fields and imbue the frosted devices. There are no meaningful imperfections to note on this CAC-endorsed, near-Gem proof. Population: 75 in 64, 28 finer. CAC: 7 in 64, 14 finer (2/19). NGC ID# 27YP, PCGS# 7058

3945 **1880 PR62 PCGS.** From a proof-only mintage of 1,987 pieces, this lightly marked PR62 specimen shows some of the typical softness on the star centers, but other devices are sharply detailed. The deeply mirrored fields display highlights of golden-tan toning. NGC ID# 27YS, PCGS# 7060

**End of Session Two**

## SESSION THREE

### MORGAN DOLLARS

- 3946** 1878 8TF Flake on Ear, VAM-14.7, AU53 PCGS. A Hit List 40 Variety. VAMWorld.com states “ultra-rare with only seven confirmed examples.” Die chips near the ear are diagnostic, along with a vertical crack through the right base of the 1 in the date, and a die lump below the corner of Liberty’s eye. Orange-gold and rose-red toning adorns the borders. The fields and devices are stone-white and display unobtrusive contact. NGC ID# 253H, PCGS# 133802 Base PCGS# 7072
- 3947** 1878 8TF Wild Lips, VAM-14.16, Hot 50, AU50 PCGS. A Hot 50 Variety, VAM-14.16 is distinctive for bold die doubling on Liberty’s profile. This About Uncirculated example displays sharp detail, showing mainly just handling friction on the slate-gray surfaces. The fields remain reflective, with russet and golden border toning. An old toning streak connects Liberty’s chin and neck. Appealing for the grade. NGC ID# 253H, PCGS# 133811 Base PCGS# 7072
- 3948** 1878 8TF Boll Lines, VAM-14.20 — Graffiti — PCGS Genuine. XF Details. A Hit List 40 Variety. Parallel diagonal die lines between the stems of the cotton bolls provide the diagnostics for this important eight tailfeather variety. Other important obverse identifiers include radial die cracks from the rim near the 1 in the date and the L in PLURIBUS. VAMWorld.com calls VAM-14.20 “ultra rare with less than two dozen known. A huge premium coin.” This cream-gray example displays several scratches about the date digits but provides a significant opportunity for the 8TF completist.
- 3949** 1878 7TF Reverse of 1878 MS65+ PCGS. CAC. Original, untoned mint luster glistens as it cartwheels around each side of this high-end Gem 1878 Morgan. The strike is sharp, and neither side has significant abrasions. Eye appeal is spectacular, as the CAC endorsement suggests. Higher-grade Reverse of 1878 coins are scarce. NGC ID# 2TY3, PCGS# 7074
- 3950** 1878 7TF Reverse of 1879 MS65 PCGS. The slanting top arrow feather identifies the Reverse of 1879. This impressive Gem exhibits sharply detailed design elements and well-preserved, lustrous surfaces, under shades of lavender and pale gold toning. PCGS has graded 35 numerically finer examples (1/19). NGC ID# 253L, PCGS# 7076
- 3951** 1878 7TF Reverse of 1879 MS65 PCGS. A brilliant, frosty example with bold design elements and untoned surfaces. Only a few trivial surface grazes are discernible, none particularly bothersome. Finer seven tailfeathers Reverse of 1879 coins are rare. NGC ID# 253L, PCGS# 7076
- 3952** 1878 7TF Reverse of 1879 MS65 PCGS. The Reverse of 1879 (slanted upper arrow feather and rounded eagle’s breast) carries a premium over the Reverse of 1878 (parallel upper arrow feather, flat-breasted eagle). Dramatically toned borders yield to silver centers of this sharply struck and lustrous Gem. PCGS reports just 36 numerically finer Reverse of 1879 certifications. NGC ID# 253L, PCGS# 7076
- 3953** 1878-CC MS64 Prooflike PCGS. VAM-2B. A brilliant and nicely mirrored near-Gem. This first-year Carson City Morgan has attractive surfaces and excellent eye appeal. The strike is intricate throughout. VAM-2B has a long nock reverse and a “spiked wheat leaf” obverse. Encapsulated in a green label holder. NGC ID# 253M, PCGS# 7081
- 3954** 1878-CC MS65 Prooflike PCGS. Sharply struck with strong contrast between frosted motifs and reflective fields, this Gem Prooflike 1878-CC shows only a few light abrasions and a clean cheek on Liberty. Brilliant surfaces add to the eye appeal for those who prefer untoned Morgans. The issue is scarce in MS65 Prooflike and almost never available any finer — PCGS has certified just a dozen prooflike pieces in finer grades (1/19). NGC ID# 253M, PCGS# 7081

1878-CC Morgan, MS65 Prooflike  
Brilliant Cameo With CAC Approval

- 3955** 1878-CC MS65 Prooflike PCGS. CAC. Prooflike 1878-CC Morgan dollars are scarce in Gem condition and rare finer. Deep Mirror Prooflike pieces are rare this fine. Offered here is a brilliant, cameo-contrasted Gem Prooflike coin with CAC recognition. The strike is tack-sharp, and Liberty’s cheek is clean save for a light graze below the eye. Visual appeal is outstanding. NGC ID# 253M, PCGS# 7081

- 3956** 1878-CC MS64 Deep Mirror Prooflike PCGS. This first-year Morgan dollar exhibits razor-sharp definition on the frosty design elements and the deeply mirrored prooflike fields show only minor signs of contact. Eye appeal is outstanding. PCGS has graded 39 numerically finer Deep Mirror Prooflike specimens (1/19). NGC ID# 253M, PCGS# 97081

- 3957** 1878-S MS66+ PCGS. CAC. This first-year Morgan displays glittering semiprooflikeness even through the substantial russet toning seen over much of each side. Fully struck, of course. NGC ID# 253R, PCGS# 7082

- 3958** 1879 MS66 PCGS. CAC. Orange-gold, ocean-blue, lime-green, and plum-red patina invigorates both sides of this second-year Morgan dollar. Although not designated Prooflike, the fields are flashy, particularly on the reverse. The strike is complete and no marks are consequential. The 1879 is conditionally challenging at the MS66 level. NGC ID# 253S, PCGS# 7084

1879 Morgan Dollar, MS66+  
Attractive, Multicolor Toning

- 3959** 1879 MS66+ PCGS. CAC. The obverse of this lovely Premium Gem has rich gold, blue, and iridescent toning, while the reverse has light champagne toning inside peripheral iridescence. Both sides exhibit frosty luster and sharp design motifs. PCGS has only certified seven finer examples of this issue (1/19). NGC ID# 253S, PCGS# 7084

**1879-CC Capped Die Morgan, Unc Details  
VAM-3, A Top 100 Variety**

- 3960** 1879-CC Capped Die, VAM-3 — Altered Surfaces — PCGS Genuine. Unc Details. A Top 100 Variety. Small die chips around the mintmark remain from an attempt to efface an errant small CC mintmark from around the primary CC, the diagnostic of the VAM-3 Capped Die variety. This tan-gold example is well-struck and shows minimal abrasions, although the surfaces are finely textured when viewed beneath a loupe, earning the Details grade from PCGS. Still, a pleasing example of this challenging issue.

**1879-O Silver Dollar, MS65+  
Frosty Luster, Rarely Offered Finer**

- 3961** 1879-O MS65+ NGC. An uncommonly frosted, beautifully preserved Gem 1879-O Morgan dollar, showing sharp central detail than many New Orleans coins do. Warm golden border toning surrounds essentially brilliant interiors. Only a few faint luster grazes are visible with a loupe. This is an eye-appealing collector coin. NGC has seen only nine finer non-Prooflike pieces (1/19). NGC ID# 253X, PCGS# 7090

**1879-O Silver Dollar, MS65+  
Highly Lustrous**

- 3962** 1879-O MS65+ PCGS. This amazing Gem features brilliant and untoned silver surfaces with full frosty cartwheel mint luster. Both sides are pristine and present outstanding eye appeal. While PCGS has certified more than 500 examples of this issue in MS65, just 48 of those carry the Plus designation, and only 33 have earned a finer grade (2/19). NGC ID# 253X, PCGS# 7090

- 3963** 1879-S Reverse of 1878, VAM-51, MS63+ PCGS. A Top 100 Variety. The simplest pickup point for this variety is the die crack above the mintmark that extends through the leaves. The obverse stars are doubled or tripled, and several gouges appear in the eagle's right (facing) wing. This brilliant Select dollar has an overt semiprooflike appearance and minor chatter. NGC ID# 253W, PCGS# 133867 Base PCGS# 7094

- 3964** 1879-S Reverse of 1878, VAM-51, MS64 PCGS. The parallel top arrow feather identifies the Reverse of 1878. This lightly marked Choice example exhibits well-detailed design elements and much prooflike reflectivity in the fields, under shades of lavender and sea-green toning. PCGS has graded 64 numerically finer examples (1/19). NGC ID# 253W, PCGS# 133867 Base PCGS# 7094

- 3965** 1879-S MS67+ PCGS. A perfect option for type collectors, this lovely Superb Gem dollar features an overlay of speckled multicolor toning over each side that deepens toward the borders. Frosty luster shines through uninhibited, and the centers display needle-strong definition. NGC ID# 253X, PCGS# 7092

- 3966** 1879-S MS67+ PCGS. CAC. Truly dazzling mint luster engulfs this untoned Superb Gem in a radiant cartwheel effect, producing a touch of reflectivity in the fields. The strike is sharp, and the surfaces are flawless aside from a faint graze in the left obverse field that only appears at certain angles. An outstanding CAC-approved type coin. NGC ID# 253X, PCGS# 7092

**1879-S Silver Dollar, MS68  
Colorfully Toned, None Finer**

- 3967** 1879-S MS68 NGC. This outstanding Morgan dollar features intense cartwheel luster, nearly pristine surfaces, and stunning toning that enhances its high technical quality and visual appeal. Light, lemon-gold hues ring the obverse margin, ceding to dappled, golden-gray accents toward the centers. The reverse displays pinwheel-like rainbow iridescence that is as pleasing and naturally colorful as any we have seen in quite some time. This is a fully struck Superb Gem that fully deserves the attention it is certain to receive from bidders. None are certified numerically finer at either NGC or PCGS (1/19). NGC ID# 253X, PCGS# 7092

- 3968** 1880 MS66 PCGS. This Premium Gem 1880 Morgan dollar is among the finest examples of the date at PCGS, although the MS66 population includes a handful of coins in Prooflike and Deep Mirror Prooflike grades (1/19). This piece is brilliant and frosty, showing a bold strike and radiant luster. A few faint grazes on the obverse are all that deny an even finer grade. NGC ID# 253Y, PCGS# 7096

- 3969** 1880 MS66 NGC. This early Philadelphia Morgan is available in grades through MS65, but Premium Gems are moderately elusive and the date is unknown in higher numeric grades (2/19). This non-Prooflike coin displays untoned, frosty mint luster and well-struck design elements. Liberty's cheek and the field are pristine. The holder commemorates the Guide Book and is signed by Ken Bressett. Census: 41 in 66 (1 in 66+, 1 in 66★), 0 finer (2/19). Ex: Long Beach Signature (Heritage, 2/2006), lot 1816, which realized \$3,737.50. NGC ID# 253Y, PCGS# 7096

**1880 Dollar, MS65 Deep Mirror Prooflike  
Scarce Issue With Such Reflectivity**

**3970** 1880 MS65 Deep Mirror Prooflike PCGS. Ex: Naples II. Flashy fields, a good strike, and minimal marks confirm the high quality of this impressive silver dollar. Only a hint of gold toning is present. The Naples II set of Morgan dollars was purchased intact by Legend Numismatics in 2000. Population: 34 in 65 (4 in 65+) Deep Mirror Prooflike, 2 finer (2/19).  
Ex: Los Angeles Signature (Heritage, 8/2009), lot 1843, where it sold for \$3,737.50. NGC ID# 253Y, PCGS# 97097

**3971** 1880/79-CC Reverse of 1878, VAM-4, MS64 PCGS. A Top 100 Variety. The last two date digits are clearly punched over an underlying 79, and the reverse features the parallel fletchings and Small CC mintmark used in 1878. Thick mint frost cartwheels over brilliant, sharply rendered surfaces and design elements. Minor chatter in the fields and on the upper cheek prevent an even higher grade. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**3972** 1880/79-CC Reverse of 1878, VAM-4, MS65 PCGS. A Top 100 Variety. The overdate is distinct on this Gem example, especially within the 8. Faint traces of golden toning visit the lower obverse margin, while the splendid reverse remains generally brilliant. A highly lustrous Gem of the popular Second Reverse Carson City variety. NGC ID# AP7P, PCGS# 133876 Base PCGS# 7108

**3973** 1880/79-CC Reverse of 1878, VAM-4, MS64 Prooflike PCGS. A Top 100 Variety. Designated Prooflike, this white-on-black cameo almost qualifies as Deep Mirror Prooflike. The borders show traces of russet toning. Sharp, frosty design elements and deeply reflective fields reveal only light marks. A popular Carson City date that often collected by VAM variety. NGC ID# AP7P, PCGS# 41131 Base PCGS# 7109

**3974** 1880-CC 8 Over High 7, VAM-5, MS65 Prooflike PCGS. A Top 100 Variety. Prominently reflective fields and well struck devices ensure the eye appeal of this Carson City Gem. Hints of autumn-brown toning visit both centers, but the lightly abraded surfaces are mostly white. NGC ID# 2542, PCGS# 41133 Base PCGS# 7103

**3975** 1880-CC MS66 PCGS. A spectacular Premium Gem from the Carson City Mint, this coin exhibits sharply detailed design elements and impeccably preserved surfaces, with vibrant mint luster on both sides. Delicate hints of golden-tan toning add to the terrific eye appeal. NGC ID# 2542, PCGS# 7100

**3976** 1880-CC MS66 PCGS. CAC. The frost-white, glistening mint luster of this CAC-approved Premium Gem is a hallmark of high-grade Carson City dollars, and this coin demonstrates pronounced eye appeal and impressive sharpness. No toning is present on either side. Finer 1880-CC Morgans are elusive. NGC ID# 2542, PCGS# 7100

**3977** 1880-CC MS65+ Prooflike PCGS. VAM-10. The Carson City Mint — plagued by a shortage of silver bullion — managed only a low net mintage of 495,000 pieces in 1880 (after another 96,000 coins struck failed to meet legal standards). Nearly a quarter of the surviving mintage was offered in GSA sales. This is a well-mirrored Gem Prooflike example, with bold contrast between the reflective fields and frosted devices. A sharp strike adds to the excellent eye appeal. Just 17 pieces exceed the MS65 Prooflike grade at PCGS, all varieties combined (1/19). NGC ID# 2542, PCGS# 7101

**3978** 1880-O MS64 PCGS. The New Orleans Mint struck more than 5.3 million silver dollars in its second year of post Civil War coinage operations. This coin represents the upper-end of quality achieved by the Southern Mint in 1880, with not too many bagmarks and a mostly smooth, frosted cheek on Liberty. The strike is sharp for an 1880-O, while much reflectivity in the fields adds to its eye appeal. A brilliant and lustrous near-Gem — PCGS shows just 48 numerically finer certifications (1/19). NGC ID# 2543, PCGS# 7114

**3979** 1880-O MS64+ PCGS. Micro O. New Orleans silver dollar collectors know that it is a great challenge to obtain the 1880-O as a full Gem, but the present piece comes very close. The strike is good, the brilliant surfaces are lustrous, and the fields are exceptionally smooth. NGC ID# 2543, PCGS# 7114

**3980** 1880-S MS67+ PCGS. CAC. The only silver denomination produced at the San Francisco Mint in 1880 was the silver dollar — 8.9 million pieces were struck, most of them of exceptionally high quality. This brilliant and lustrous Superb Gem is fully struck, with deeply frosted motifs and semireflective fields. Abrasions are limited to a few light grazes in the left obverse field and a couple of tiny ticks. Eye appeal is terrific, earning the PCGS Plus designation and CAC endorsement. NGC ID# 2544, PCGS# 7118

**3981** 1880-S MS67 Prooflike NGC. The 1880-S dollar may be plentiful in virtually any grade, but its availability is much more restricted in MS67 Prooflike. Frosted, fully struck motifs and reflective fields produce eye-catching contrast. A reed mark near the mouth is the only notable abrasion. The NGC insert is signed by Guide Book Editor Emeritus Kenneth Bressett. NGC ID# 2544, PCGS# 7119

**1880/9-S VAM-11 Dollar  
MS66+ Deep Mirror Prooflike**

**3982** 1880/9-S VAM-11 MS66+ Deep Mirror Prooflike PCGS. A Hot 50 Variety. Medium S. Reflective fields contrast with icy motifs. A crisply struck high-grade example of the popular Guide Book variety. Thorough inspection reveals infrequent minor field marks and delicate grazes on the cheek. As of (2/19), PCGS has certified 2 as MS66+ DMPL with three finer as MS67 DMPL. PCGS# 41508 Base PCGS# 97123

**1880/9-S Morgan Dollar, MS66  
Deep Mirror Prooflike VAM-11**

**3983** 1880/9-S VAM-11 MS66 Deep Mirror Prooflike PCGS. CAC. A Hot 50 Variety. Medium S. The remnants of an undertype 9 are visible below the final digit in the date, identifying the popular VAM-11. This spectacular Premium Gem exhibits razor-sharp definition on the design elements and the deeply mirrored prooflike fields contrast boldly with the frosty devices. The terrific eye appeal and outstanding technical quality are confirmed by the CAC sticker. Population: 11 in 66 (2 in 66+) Deep Mirror Prooflike, 3 finer. CAC: 2 in 66, 0 finer (2/19). PCGS# 41508 Base PCGS# 97123

**3984** 1881 MS65 Prooflike PCGS. Mirrored fields surround frost-white devices of this sharp and attractive Gem dollar. Liberty's cheek and neck are smooth and unabraded, and only some light, minor grazes in the right obverse field deter an even finer grade. The 1881 is particularly rare in high grades with Prooflike or Deep Prooflike contrast, and this example ranks highly among the few examples certified by either service. PCGS Population: 17 in 65 Prooflike, 1 finer (1/19). NGC ID# 2546, PCGS# 7125

**3985** 1881 MS64 Deep Mirror Prooflike PCGS. Deep Mirror Prooflike examples of the 1881 Morgan dollar are scarce in MS64 and rare finer. This near-Gem is fully contrasted, untoned, and razor-sharp. Only a few tiny marks in the fields are noted. Population: 71 in 64 (3 in 64+) Deep Mirror Prooflike, 10 finer (1/19). NGC ID# 3RG7, PCGS# 97125

**3986** 1881-CC MS66 PCGS. VAM-2. Splendid autumn-gold and aquamarine patina endows the reverse. A crisply struck and lustrous Premium Gem of the popular low-mintage Carson City issue. Only minor facial contact precludes an even finer designation. NGC ID# 2549, PCGS# 7126

**3987** 1881-CC MS66+ PCGS. CAC. VAM-2. Diagnostic marks for VAM-2 include doubled 8s in the date, with a bar in the upper loop of the second 8, and a die scratch that connects the olive branch to the leaves on the reverse. Total brilliance and a full impression define this exceptionally clean Carson City dollar. Cartwheel frost rolls over each side. NGC ID# 2549, PCGS# 7126

#### 1881-CC Silver Dollar, Frosty MS67 Spectacular Carson City Type Coin

**3988** 1881-CC MS67 NGC. A virtually flawless example of the popular 1881-CC Morgan dollar, showing brilliant, frosted mint luster and a bold strike. The cartwheel effect is mesmerizing, showcasing the quality of the surfaces and the strength of the eye appeal. 1881-CC dollars in this grade are occasionally available for a price, but NGC lists only four numerically finer representatives, all non-Prooflike pieces (2/19). NGC ID# 2549, PCGS# 7126

**3989** 1881-O MS65+ PCGS. Vibrant cartwheel luster engulfs this high-end Gem in untoned brilliance, highlighting uncommonly well-struck design elements for this New Orleans issue. A few faint grazes are visible, but the preservation is generally outstanding. The 1881-O is conditionally rare any finer. NGC ID# 2548, PCGS# 7128

**3990** 1881-O MS64+ Deep Mirror Prooflike PCGS. CAC. A better New Orleans date, many 1881-O Morgans saw at least moderate circulation. Gem Uncirculated examples are scarce in all formats, including Deep Mirror Prooflike coins. This borderline Gem has the PCGS Plus designation and CAC endorsement. Brilliant surfaces show strong contrast between the mirrored fields and frosted devices. Abrasions are few and the strike is razor-sharp. Population: 65 in 64+ Deep Mirror Prooflike, 19 finer. CAC: 116 in 64, 5 finer (2/19). NGC ID# 2548, PCGS# 97129

**3991** 1881-S MS67★ NGC. This satiny Superb Gem exhibits brilliant silver over the left half of the obverse, with rainbow toning to the right. The reverse has a crescent of gold toning along the right border, with the balance fully brilliant and untoned. A lovely example. NGC ID# 2549, PCGS# 7130

#### 1881-S Morgan Dollar, MS68

##### Lustrous and Appealing

**3992** 1881-S MS68 NGC. Glittering fields and glistening devices deliver a dazzling cartwheel effect on this virtually flawless, blazingly lustrous 1881-S Morgan type coin. The interiors are brilliant, yielding to ribbons of gold, violet, and blue around the obverse border. Well-struck design elements add to the appeal. The 1881-S is famously available in this lofty grade for a price and is popular among type collectors. NGC lists a single finer non-Prooflike piece (2/19). NGC ID# 2549, PCGS# 7130

**3993** 1881-S MS66 Deep Mirror Prooflike PCGS. This brilliant-white Premium Gem displays richly frosted devices that are fully struck and set against deeply mirrored fields, with strong white-on-black contrast. Only a few tiny abrasions exist on the smooth, attractive surfaces. Scarce in MS66 Deep Mirror Prooflike, the 1881-S is seldom seen any finer in this format. VAM enthusiasts will note a dash beneath the second 8 in the date. Population: 92 in 66 (6 in 66+) Deep Mirror Prooflike, 7 finer (2/19). NGC ID# 2549, PCGS# 97131

**3994** 1882 MS66+ PCGS. CAC. Vivid shades of sea-green and lavender toning blanket the well-preserved surfaces of this Plus-graded Premium Gem, with vibrant mint luster underneath. The design elements are sharply detailed and eye appeal is terrific. NGC ID# 254A, PCGS# 7132

**3995** 1882-CC MS66+ PCGS. Spectacular cherry-red, forest-green, and lemon-gold toning endows the reverse. The obverse shows only a hint of apricot patina. Lustrous and well struck with a smooth cheek and minor grazes on the upper left obverse field. A popular Carson City type issue. NGC ID# 254S, PCGS# 7134

**3996** 1882-CC MS65 Deep Mirror Prooflike PCGS. This delightful Gem exhibits sharply detailed, richly frosted design elements and well-preserved surfaces that include deeply mirrored, prooflike fields. The 1882-CC Morgan dollar is a scarce issue in grades above MS65, with Deep Mirror Prooflike surfaces. NGC ID# 254B, PCGS# 97135

**3997** 1882-CC MS65 Deep Prooflike NGC. Autumn-brown toning graces the borders, but the flashy fields and boldly struck devices remain brilliant. Appreciable cameo contrast will delight the beholder. Exceptionally preserved, and an outstanding Carson City type coin. Encapsulated in a former generation holder. NGC ID# 254B, PCGS# 97135

**3998** 1882-CC MS65 Deep Mirror Prooflike PCGS. A flashy, radiant, deeply contrasted Gem example of this popular Carson City issue. A few minor reeding marks appear on Liberty's cheek and neck consistent with the grade, but this piece boasts lots of eye appeal and will find a ready home in a nice set of Deep Mirror Prooflike dollars. NGC ID# 254B, PCGS# 97135

**1882-O Morgan Dollar, MS66**

Incredibly Well-Preserved

- 3999 1882-O MS66 NGC.** The preservation of this piece surpasses that of some other MS66 coins that we have seen, earning this 1882-O dollar high marks for eye appeal and quality. The coin is brilliant and well-struck, and a vibrant cartwheel effect is easily produced in hand. The 1882-O is scarce this fine and almost uncollectible in higher grades. Census: 13 in 66 (2 in 66★), 1 finer (2/19). NGC ID# 254C, PCGS# 7136

- 4000 1882-S MS65 Deep Mirror Prooflike NGC.** The 1882-S is readily available in high grades, but it is surprisingly scarce with Deep Mirror Prooflike fields. This boldly struck Gem example displays dappled, translucent gold toning that deepens to golden-gray at the margins, with mirrorlike fields that contrast nicely with frost-white devices. Just a few light marks exist near stars 8 and 9 plus a tiny mark above the eyebrow. Census: 72 in 65 (1 in 65+) Deep Mirror Prooflike, 8 finer (1/19). NGC ID# 254F, PCGS# 97141

- 4001 1883 MS67 PCGS.** More than 12 million 1883 silver dollars were struck by the Philadelphia Mint, most of which were minted simply to comply with demands of the Bland-Allison Act. This Superb Gem example is untoned with strong cartwheel mint luster and only a few faint marks on the smooth, frosted surfaces. A sharp strike adds to the bold eye appeal. PCGS reports just five numerically finer examples (1/19). NGC ID# 254G, PCGS# 7142

- 4002 1883 MS67 PCGS.** The 1883 Morgan dollar is a condition rarity in grades above the MS67 level. This delightful Superb Gem is well-detailed and impeccably preserved, with vibrant mint luster that shines through shades of lavender and sea-green toning. PCGS has graded just five numerically finer examples (2/19). NGC ID# 254G, PCGS# 7142

- 4003 1883-CC MS65 Deep Mirror Prooflike PCGS. CAC.** The sharply detailed, frosty design elements of this delightful Gem Morgan dollar contrast boldly with the deeply mirrored prooflike fields. The pleasing surfaces are well-preserved, with a few hints of greenish-gold toning at the peripheries. NGC ID# 254H, PCGS# 97145

**1883-O Morgan Dollar, MS67**

Registry Set Contender

- 4004 1883-O MS67 PCGS.** The 1883-O Morgan dollar is an available issue, from a mintage of 8.7 million pieces, but few examples can match the quality and eye appeal of the present coin. This magnificent Superb Gem exhibits sharply detailed design elements and virtually flawless surfaces that radiate vibrant mint luster throughout. Population: 93 in 67 (10 in 67+), 0 finer (2/19). NGC ID# 254J, PCGS# 7146

- 4005 1883-S MS61 NGC.** A pleasing lower-end Uncirculated example of this challenging San Francisco issue, showing vibrant luster and sharp design elements. Although tinges of deep crimson, violet, and sea-green toning appear around the outer peripheries, the majority of this MS61-graded 1883-S dollar is deep golden in color. NGC ID# 254K, PCGS# 7148

- 4006 1883-S MS63 PCGS.** The 1883-S is a conditionally scarce semikey, though examples are far more accessible than the S-mint issue that follows. This example features a bold impression at the extreme centers and on the talons. The obverse shows scattered marks in the left field and on the cheek, while the reverse is comparatively clean. NGC ID# 254K, PCGS# 7148

- 4007 1884 MS66★ NGC. CAC.** Toning transitions from pale green and gold along the left obverse border to ice-blue, violet, magenta, and orange near Liberty's profile. The rest of that side and virtually the entire reverse are brilliant. The appealing effect explains the Star designation and CAC approval sticker, while the MS66 grade reflects the outstanding preservation of this 1884 dollar. NGC ID# 254L, PCGS# 7150

**1884-CC Silver Dollar, Frosty MS67**

Exceptional Carson City Type Coin

- 4008 1884-CC MS67 NGC.** Frosty, shimmering mint luster glistens across each side of this Superb Gem 1884-CC Morgan dollar. The coin is well-struck and beautifully preserved, with even the high points of the devices being free of minor contact marks. The obverse is brilliant, while the reverse showcases a wide crescent of lilac, sky-blue, gold, and amber toning along the lower and left-hand margins. NGC lists only one numerically finer non-Prooflike coin (1/19). NGC ID# 8BBF, PCGS# 7152

- 4009 1884-CC MS66 Prooflike PCGS.** Although plentiful overall since the GSA sales of the 1970s, the 1884-CC Morgan dollar is seldom found in MS66 with Prooflike fields, and higher-grade Prooflike coins are rare. This piece displays a dazzling balance of cartwheel luster and reflectivity. The strike is sharp and the coin is brilliant. NGC ID# 254M, PCGS# 7153

- 4010 1884-CC MS66 Deep Mirror Prooflike PCGS. VAM-7.** A brilliant Carson City type coin that offers icy motifs and glassy fields. Well struck and refreshingly smooth. A die flaw on the cheekbone is of mint origin, and the same is true for the dappled appearance of the eagle. NGC ID# 254M, PCGS# 97153

- 4011 1884-S AU58 NGC.** The 1884-S is famous for its difficulty to secure in Mint State. Borderline Uncirculated examples are comparatively affordable, and show a mere whisper of wear at the centers. This pearl-gray representative displays cartwheel luster and only a modicum of minor marks. NGC ID# 254P, PCGS# 7156

- 4012 1885-CC MS66 PCGS. VAM-3.** Well-known as the lowest mintage Carson City Morgan dollar, the 1885-CC is always popular among collectors. High-grade examples are especially in demand. This lustrous and essentially brilliant Premium Gem has a good strike and attractive surfaces. NGC ID# 254S, PCGS# 7160

- 4013 1885-CC MS66 NGC.** A sharp, beautifully preserved Premium Gem example of this popular Carson City issue. Both sides are uniformly toned in lavender-gray, gold, amber, and sea-green hues, and there are no bothersome abrasions beneath the patina. Seldom seen finer.

Ex: Long Beach Signature (Heritage, 9/2015), lot 4706. NGC ID# 254S, PCGS# 7160

- 4014** 1885-CC MS65 Prooflike PCGS. A delightful Gem from the famous Carson City Mint, this coin exhibits sharply detailed design elements and deeply mirrored, prooflike fields that contrast boldly with the frosty devices. The surfaces are well-preserved and appealing. PCGS has graded 57 numerically finer prooflike examples (1/19). NGC ID# 254S, PCGS# 7161
- 4015** 1885-CC MS64 Deep Mirror Prooflike PCGS. VAM-3. The deeply reflective prooflike fields of this attractive Choice specimen create an intense cameo effect with the well-detailed, frosty design elements. Only minor contact marks and hairlines are evident. NGC ID# 254S, PCGS# 97161
- 4016** 1885-CC MS65 Deep Mirror Prooflike PCGS. VAM-3. A brilliant Gem with dazzling field reflectivity and a solid strike. Inspection beneath a lens is required to confirm unimportant contact. The GSA holdings made the low mintage '85-CC available in quality Mint State, to the benefit of today's collectors. NGC ID# 254S, PCGS# 97161
- 4017** 1885-S MS65+ PCGS. The interior portions of the obverse and reverse maintain their brilliance, surrounded by dappled violet, blue, and gold toning at the margins. Typically frosty for a high-grade San Francisco dollar, this Gem also presents strong definition and a dearth of abrasions. NGC ID# 254U, PCGS# 7164
- 4018** 1886-O MS62 NGC. Softly frosted luster illuminates a dusting of light golden toning on this Mint State 1886-O Morgan dollar. There are remarkably few signs of surface contact for the grade, although some strike softness is noted on the eagle's breast and the hair above Liberty's ear. This is a better date in Uncirculated condition, despite a mintage of more than 10.7 million coins. NGC ID# 254W, PCGS# 7168
- 4019** 1886-O MS62 PCGS. The 1886-O Morgan is a better date in Uncirculated grades but is yet collectible by many enthusiasts at the present MS62 grade level. Well-struck design elements and satiny, untoned luster are the chief visual attributes of this piece, and grade-limiting marks on the cheek are light and unobtrusive. NGC ID# 254W, PCGS# 7168
- 4020** 1886-O MS62 PCGS. CAC. Melting under the Pittman Act of 1918 may account for the scarcity of the 1886-O in Mint State conditions, since the mintage was a robust 10.7 million pieces. No large Treasury releases are known for the issue. Uncirculated examples that survive cannot meet the demand of collectors. This is a high-end MS62 example, with only minor weakness above Liberty's ear and lustrous, brilliant-white surfaces. Marks are minimal for the grade. CAC endorsed. NGC ID# 254W, PCGS# 7168
- 4021** 1889-CC — Cleaned — ANACS. XF40 Details. Silver-gray toning deepens slightly at the borders of this well-defined 1889-CC. Angled hairlines disclose an old cleaning, yet pleasing color remains and marks are consistent for the assigned XF sharpness. We note a small reverse rim bump below D of DOLLAR.

#### 1889-CC Silver Dollar, AU Details

- 4022** 1889-CC — Cleaned — NGC Details. AU. The 1889-CC is popular in all grades as one of the major key dates in the Morgan dollar series, although AU-level pieces are especially sought-after. This piece is cleaned, as noted by NGC, with bright stone-white surfaces. Nonetheless, the coin is well-detailed and pleasing. Scattered contact marks are not out of line for the grade. NGC ID# 2559, PCGS# 7190

#### 1889-O Silver Dollar, MS65 Brilliant and Well-Preserved

- 4023** 1889-O MS65 NGC. From some angles, the MS65 grade seems conservative for this coin, as a few faint grazes on the obverse that limit it to an MS65 designation disappear from view on occasion as a cartwheel effect is produced in hand. The coin is brilliant and radiantly lustrous, showing a clean cheek and a bold strike. Census: 57 in 65 (2 in 65+), 6 finer; 3 in 65 Prooflike, 0 finer; 3 in 65 Deep Prooflike, 0 finer (2/19). NGC ID# 255A, PCGS# 7192
- 4024** 1889-S MS65 PCGS. The well-preserved surfaces of this attractive Gem display vibrant mint luster on both sides, with faint traces of lavender and pale gold toning at selected angles. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 255B, PCGS# 7194
- 4025** 1890 MS65+ PCGS. Lovely sea-green, blue, gold, and lavender toning graces the radiantly lustrous surfaces of this attractive high-end Gem. The coin is well-struck and devoid of bothersome abrasions. PCGS lists only five finer non-Prooflike pieces (1/19). NGC ID# 255C, PCGS# 7196
- 4026** 1890-CC MS64 PCGS. VAM-7. VAM-7 features a repunched left C in the mintmark, and a misplaced date digit within the dentils below the 0. This lustrous and brilliant Carson City dollar offers smooth fields and only minor contact on the cheek. A bold strike further ensures the eye appeal. NGC ID# 255D, PCGS# 7198
- 4027** 1890-CC Tail Bar, VAM-4, MS63 PCGS. A Top 100 Variety. The popular and aptly named Tail Bar variety exhibits a massive die gouge from the junction of the tailfeathers and fletchings that extends down to the wreath. This is an appealing Select dollar with radiant mint frost and delicate lavender-gold patina over the obverse. The reverse remains brilliant. Marks of any notice are limited to the eagle's breast. NGC ID# 255D, PCGS# 133934 Base PCGS# 87198
- 4028** 1891 MS65 PCGS. Vivid shades of lavender-gray and sea-green toning visit the pleasing surfaces of this impressive Gem, with vibrant mint luster and well-detailed design elements underneath. Only minor signs of contact are evident. PCGS has graded three numerically finer examples (2/19). NGC ID# 255G, PCGS# 7204
- 4029** 1891-CC MS64+ NGC. This is a sharp 1891-CC Morgan dollar with brilliant, satiny mint luster and remarkably clean surfaces for the grade. Were the luster a little more vibrant, a full Gem designation might have been awarded. This piece is outstanding for the grade, hence the Plus designation. NGC ID# 255H, PCGS# 7206

**1891-CC Silver Dollar, MS65**

Seldom Seen Finer

**4030 1891-CC MS65 NGC.** A minimally marked, brilliant-white Gem, with bright cartwheel luster beneath a mantle of frost that blankets both sides. The strike is sharp for the issue, which remains a favorite among Carson City dollar collectors. A few high-point luster grazes and a few tiny rim ticks are the only abrasions — there are no heavy marks, and the eye appeal is substantial. NGC reports just 11 numerically finer pieces (2/19). NGC ID# 255H, PCGS# 7206

**4031 1891-CC Spitting Eagle, VAM-3, MS64+ PCGS. CAC.** A Top 100 Variety. No mention of the well-known Carson City die pair is indicated on the insert. A die lump below the beak is the source of the nickname. A brilliant, lustrous, and nicely struck near-Gem that boasts smooth fields and only delicate grazes on the cheek. NGC ID# 255H, PCGS# 133937 Base PCGS# 7206

**4032 1891-O MS64+ NGC. CAC.** The population of certified 1891-O dollars declines by nearly 80% in higher grades, making MS64 an ideal collecting level. All-brilliant and aglow in shimmering satin mint luster, this near-Gem New Orleans representative features remarkable quality for the grade, as affirmed by NGC and CAC. Typically struck. NGC ID# 255J, PCGS# 7208

**1892 Morgan Dollar, MS65**  
Impressively Toned

**4033 1892 MS65 PCGS.** A prize for collectors who appreciate original surfaces, this Gem 1892 Morgan dollar offers pastel toning with orange-red hues prevailing against gold, jade, and blue tints with lighter silver over the high points of the devices. Fields and devices alike share pristine preservation with no mentionable distractions. An elusive issue in finer grades: PCGS reports only nine Premium Gems and none certified finer (1/19). NGC ID# 255L, PCGS# 7212

**1892 Dollar, Richly Toned MS65**

Sharply Struck

**4034 1892 MS65 PCGS.** Waves of intense blue-green and burgundy color cover the obverse while the reverse retains a silver center surrounded by russet and blue-green. A few stray marks on Liberty's lower chin detract neither from the grade nor the strong eye appeal. The centers display a much stronger strike than usually seen on this issue. The 1892 Morgan dollar becomes conditionally elusive in Gem grade, and finer examples are all but unobtainable. NGC ID# 255L, PCGS# 7212

**4035 1892-CC MS62 NGC.** This Carson City issue saw part of its 1.3 million-piece mintage circulate, while many Mint State coins were released in the 1950s and 1960s. No Mint State coins were left in storage for the GSA sales of the 1970s. This is a brilliant and frosted 1892-CC with bold mint luster. Light abrasions exist on Liberty's cheek and in the left obverse field near the chin. The strike shows minor weakness over the ear and at the eagle's breast and legs. NGC ID# 255M, PCGS# 7214

**4036 1892-CC MS62+ NGC. CAC.** A hint of reflectivity in the fields and a strong cartwheel effect earn this coin a Plus designation and CAC endorsement. Scattered abrasions on the obverse prevent a finer grade. Typical of the 1892-CC, this coin displays strike weakness at the centers. Eye appeal is pleasing. NGC ID# 255M, PCGS# 7214

**4037 1892-CC MS63 PCGS.** A brilliant, well-struck Select example of this better Carson City issue, which was not well represented in the GSA sales of the 1970s. Central sharpness is above average and the satiny luster exhibits only light abrasions. NGC ID# 255M, PCGS# 7214

**4038 1892-CC MS63 NGC.** The design elements of this impressive Select specimen are well-detailed, with just a trace of the usual softness in the hair above the ear. The lightly marked surfaces radiate vibrant mint luster, with vivid highlights of sea-green and magenta toning at the peripheries. NGC ID# 255M, PCGS# 7214

**4039 1892-CC MS63 NGC. VAM-4B, CC/CC Down.** A nearly brilliant and frosted example of the VAM-4B variety, with recutting visible below the mintmark and multiple obverse die clashes. The reverse is cracked above STATES OF, with tilted field to the right of the second S in STATES. A beveled bar sits atop the wing below "In." The obverse shows a bit of dappled, foggy-gray toning and some strike weakness above the ear. Light marks and luster grazes account for the Select Uncirculated grade. NGC ID# 255M, PCGS# 7214

**4040 1892-CC MS63 PCGS. VAM-10A, Misplaced Digit in Dentils.** The Wide CC mintmark and a misplaced 9 (or 2) in the dentils below those two digits, with triple die clashing seen on the obverse, defines the VAM-10A variety. It is described as R.6 according to VAMWorld. This is a brilliant Select Uncirculated example, sharply struck, with bold cartwheel luster and lightly abraded surfaces. NGC ID# 255M, PCGS# 7214

**4041 1892-CC MS63 PCGS.** A few hints of sea-green toning visit the peripheries of this impressive Select specimen. The design elements are well-detailed, with just a trace of blending on the hair above the ear, and the lustrous surfaces show the expected number of minor contact marks for the grade. NGC ID# 255M, PCGS# 7214

**4042** 1892-CC MS63 NGC. The 1892-CC Morgan dollar is always in demand because of the charismatic mintmark. This attractive Select specimen exhibits sharply detailed design elements and lightly marked, lustrous surfaces with just a trace of peripheral toning. NGC ID# 255M, PCGS# 7214

**4043** 1892-CC MS63 PCGS. VAM-8. A sharply struck and thoroughly lustrous scarcer date Select Carson City Morgan dollar. Nicely struck and essentially brilliant with a smooth reverse and minor facial grazes. VAM-8 is attributed by die chips within the 89 in the date. NGC ID# 255M, PCGS# 7214

**4044** 1892-CC MS64 PCGS. Natural shades of pinkish-gray toning visit the lightly marked surfaces of this pleasing Choice example, with strong mint luster and sharply detailed design elements underneath. The 1892-CC Morgan dollar is always popular because of the charismatic CC mintmark. NGC ID# 255M, PCGS# 7214

**4045** 1892-CC MS64 PCGS. Morgan dollars from the Carson City Mint are always in demand, and this attractive Choice example displays well-detailed design elements and vibrant mint luster throughout, with a few hints of prooflike reflectivity in some areas. Nice contrast exists between the fields and the frosted motifs. The surfaces show only minor signs of contact and eye appeal is outstanding. Ex: Houston Signature (Heritage, 12/2013), lot 4184; Dallas Signature (Heritage, 4/2017), lot 16397. NGC ID# 255M, PCGS# 7214

**4046** 1892-CC MS64 PCGS. CAC. VAM-8. Potent luster, a good strike, and a hint of olive-gold toning ensure the eye appeal of this Choice Carson City dollar. Only minor grazes on the cheek and fields deny an even finer grade. VAM-8 is attributed by die chips within the 89 in the date. Housed in a green label holder. NGC ID# 255M, PCGS# 7214

**4047** 1892-S AU50 NGC. Smooth, silver-gray surfaces retain bits of mint luster around the stars and reverse lettering, with traces of reflectivity at the margins. Abrasions are few, and those that exist are muted by brief circulation. Worn areas above the ear and at the eagle's breast suggest the strike was weak in those areas, but it is of little concern at the AU50 level. The 1892-S is seldom offered in full Mint State conditions, making About Uncirculated examples the go-to grade for many collectors. NGC ID# 255P, PCGS# 7218

#### 1892-S Morgan Dollar, AU55 Rarely Seen in High Grade

**4048** 1892-S AU55 PCGS. The San Francisco Mint was responsible for the production of 1.2 million Morgan dollars in 1892. The issue is notoriously difficult in high grades with the average grade awarded falling just shy of XF40. Untoned surfaces are bright with hints of luster emanating from the legends and other hidden areas. Faint central softness occurs on each side, accounting for the Choice AU grade. NGC ID# 255P, PCGS# 7218

**4049** 1893 MS63 PCGS. CAC. VAM-3. Golden-brown toning is confined to the reverse periphery. A lustrous and nicely preserved example of the low mintage Philadelphia issue. The centers display minor blending, but the eye appeal surpasses the numerical grade. NGC ID# 255R, PCGS# 7220

**4050** 1893 MS64 PCGS. VAM-2, Repunched 3. Repunching at the top of 3 in the date and an open 3 confirm the VAM-2 variety. Liberty's profile is meekly doubled, most visible at the chin. This is a brilliant near-Gem example, with smooth and minimally marked surfaces and strong cartwheel luster. Just 389,000 pieces were struck, and the 1893 is scarce in Gem or finer conditions. NGC ID# 255R, PCGS# 7220

**4051** 1893-CC AU53 PCGS. A collector-grade AU53 example of the final-year Carson City Morgan dollar, showing remnants of luster in the fields beneath dusky ash-gray and light golden toning. This is a well-struck example with only slight high-point wear. No major abrasions disrupt the eye appeal. NGC ID# 255S, PCGS# 7222

**4052** 1893-O AU58+ PCGS. A satiny, virtually Uncirculated example of this better New Orleans issue, showing brilliant interiors with russet-gold borders. No major abrasions are evident. The usual strike weakness affects the eagle's breast and the hair above Liberty's ear. NGC ID# 255T, PCGS# 7224

#### 1893-O Morgan Dollar, MS61 Low-Mintage Branch Mint Issue

**4053** 1893-O MS61 PCGS. The repeal of the Sherman Silver Purchase Act resulted in low silver dollar mintages at all U.S. Mints in 1893. Accordingly, only 300,000 Morgan dollars were struck at the New Orleans facility. This lustrous Mint State example is well-detailed and appropriately marked for the grade. Housed in a green label holder. NGC ID# 255T, PCGS# 7224

**4054** 1893-S — Obverse Graffiti — NGC Details. Good. Two pinscratched letters are noted on the field near the profile, and another two larger letters are pinscratched on Liberty's cheek and neck. All legends are bold, and the silver-gray surfaces are otherwise untroubled. The key date of the business series.

#### 1893-S Morgan Dollar, VG8 Collector-Grade Example

**4055** 1893-S VG8 NGC. A collector-grade example of the Morgan dollar key, this VG8 1893-S will appeal to collectors assembling date and mintmark sets in raw, circulated condition — the sort of collection that is the easiest and most affordable to assemble for this series. This piece has even wear and light golden patina with daubs of deeper amber toning also on the obverse. NGC ID# 255U, PCGS# 7226

**1893-S Dollar, Fine Sharpness  
Lowest Mintage of the Series**

**4056 1893-S — Altered Surfaces — PCGS Genuine, Fine Details.** Few Morgan dollar issues are as sought-after as the 1893-S, with its series-low mintage of 100,000 coins. This example displays reddish-brown and steel-gray surfaces that suggest the coin was cleaned at some point, and subsequently retoned. The result is nonetheless pleasing, and most of the design elements remain relatively bold, except for exposed high points of the design. A small mark appears on Liberty's jaw.

**1893-S Morgan Dollar, Fine 12  
Key Circulation Strike Issue**

**4057 1893-S Fine 12 PCGS, CAC.** This famous Morgan dollar rarity attracts collectors regardless of grade. Circulated examples with problem-free surfaces and original, old-silver color are always in demand. This CAC-endorsed '93-S has minimally abraded, smoothly worn surfaces that retain sharp definition for the Fine 12 grade. More than 70% of the eagle's wing feathers are visible, while the rims are strong and Liberty's cheek shows only minuscule marks. Eye appeal is exceptional. NGC ID# 255U, PCGS# 7226

**1893-S Morgan, VF Details  
Smooth Surfaces**

**4058 1893-S — Cleaned — NGC Details, VF.** Satiny slate-gray surfaces have a hint of golden emerging from the protected regions on this VF-level 1893-S dollar. Detail is pleasing for the grade, and an old cleaning is the only negative characteristic — a minor observation at that. The 1893-S dollar is sought-after in all grades as the key date in the series. This piece will fit in well with an otherwise problem-free collection. NGC ID# 255U, PCGS# 7226

**1894 Morgan Dollar, MS62  
Low-Mintage Philadelphia Issue**

**4059 1894 MS62 PCGS.** The 1894 Morgan dollar claims the second-lowest mintage of the series, at a meager 110,000 pieces. This attractive MS62 specimen exhibits sharp definition on all design elements and the lightly marked surfaces display vibrant cartwheel mint luster on both sides. Highlights of golden-tan toning enhance the considerable eye appeal. NGC ID# 255V, PCGS# 7228

**4060 1894-O MS61 PCGS.** Any 1894-O with a measure of eye appeal is in demand among Morgan dollar collectors. David Bowers called the issue "wretched in appearance" and even the well-mannered Miles Standish called it "the least visually inspired" dollar in the series. This example has flash and a large amount of charisma. The strike is soft over the ear (after all, it is an 1894-O) but the brilliant surfaces are lustrous and frosted with surprisingly few marks for the assigned grade. NGC ID# 255W, PCGS# 7230

**1894-O Silver Dollar, MS63  
Appealing for the Grade**

**4061 1894-O MS63 PCGS Gold Shield.** Luster is brilliant on this Select 1894-O Morgan dollar, and the only abrasions that prevent a finer grade are a few light marks on Liberty's cheek. Typical of mid-1890s New Orleans issues, this piece shows a touch of softness on the hair above Liberty's ear, but the overall eye appeal of the coin is outstanding for the grade. NGC ID# 255W, PCGS# 7230

**4062 1894-S MS63 NGC. VAM 1A "Worm Eye," R.5.** Numerous die gouges help identify the VAM 1-A variety. The most prominent gouge is a curvy one that winds down across the eye to the side of the nose, thus the cringe-worthy nickname "Worm Eye." This is a sharp Select Uncirculated example, brilliant and lustrous with semi-reflective surfaces and minimally marked fields and devices. NGC ID# 255X, PCGS# 7232

**4063 1894-S MS63 PCGS.** This impressive Select Morgan dollar exhibits well-detailed design elements, with sharp definition in most areas and just a trace of blending on the hair above the ear. The lightly marked surfaces are lustrous and appealing. NGC ID# 255X, PCGS# 7232

**4064 1894-S MS63 PCGS.** A hint of field reflectivity on the reverse and satiny cartwheel luster on obverse earn this Select 1894-S Morgan high points for eye appeal within this grade. Only a touch of strike weakness is evident on the hair above Liberty's ear, and grade-limiting abrasions are trivial. NGC ID# 255X, PCGS# 7232

**4065 1895-O AU55 PCGS.** A partially lustrous Choice AU example of this better New Orleans issue, showing champagne-gray surfaces and strong detail. Enough luster remains to produce a modest cartwheel effect on each side. The 1895-O comes from a mintage of only 450,000 pieces, a result of decreased silver dollar coinage after the Sherman Silver Purchase Act was repealed in late 1893. NGC ID# 255Y, PCGS# 7236

**4066 1895-S AU53 NGC.** With a low mintage of just 400,000 pieces and a well-deserved reputation for surface abrasions, the 1895-S remains the coin most frequently selected to fill out date collections. This AU53 example shows fewer marks than expected for the grade, while silver luster frequents the margins and accents the well-struck motifs. The most noticeable mark is a small spot of deep toning near star 2. Light, silver-gray toning is consistent on both sides for sharp eye appeal. NGC ID# 255Z, PCGS# 7238

#### 1895-S Morgan Dollar, AU58

Virtually Mint State

**4067 1895-S AU58 PCGS Gold Shield. CAC.** This brilliant, radiantly lustrous 1895-S dollar is what once may have been referred to as a "slider" — there is barely a trace of friction in the obverse portrait, and the overall eye appeal rivals that of many low-end Mint State coins. The CAC endorsement is well-earned. This coin is well-struck and shows only a few minor contact marks. NGC ID# 255Z, PCGS# 7238

**4068 1896 MS67 NGC. VAM-2.** Regarded as among the most prevalent Philadelphia issues in Mint State, the 1896 becomes very scarce as a Superb Gem. This nearly brilliant specimen offers exceptional preservation and only minor inexactness of strike at the centers. Certified in a circa-2000 holder. Census: 76 in 67 (1 in 67+, 7 in 67★, 1 in 67+★), 5 finer (1/19). NGC ID# 2562, PCGS# 7240

**4069 1896 MS67 PCGS.** Attractive mahogany-brown and lilac shades dominate the obverse, though the field near the profile displays butter-gold and navy-blue toning. The reverse displays similar colors but they are relegated to the margin. A splendidly preserved and well-struck Superb Gem. NGC ID# 2562, PCGS# 7240

**4070 1896-O MS62 PCGS.** The 1896-O was not one of the Southern Mint's better efforts, and as a result it is rare in Choice Uncirculated or finer grades. This lively and near-brilliant MS62 has a few wisps of gold toning and a bold strike for the issue. Cartwheel luster illuminates frosted surfaces that show a minimum number of marks for the assigned grade. Eye appeal is exceptional for an 1896-O at this grade level. NGC ID# 27ZU, PCGS# 7242

**4071 1896-O MS62 PCGS.** Satiny mint luster emanates from silvery surfaces. The centers are incompletely struck, as usual for the issue, but the remainder of the devices are well-detailed. The cheek is moderately abraded. The 1896-O is a better date in Uncirculated condition. Ex: Long Beach Signature (Heritage, 6/2002), lot 6175. NGC ID# 27ZU, PCGS# 7242

#### 1896-S Dollar, Radiant MS61 Elusive CAC-Approved Example

**4072 1896-S MS61 PCGS. CAC.** This better San Francisco issue is elusive in Mint State compared to most other dates in the series, and CAC-approved coins are especially scarce. This example displays grade-appropriate abrasions but is yet eye-appealing, with radiant cartwheel luster and untoned surfaces. The usual central strike softness is apparent. NGC ID# 2564, PCGS# 7244

#### 1896-S Dollar, MS63 Scarce Late-Date, S-Mint Issue

**4073 1896-S MS63 PCGS.** The mintage was a healthy 5 million pieces, but the Pittman Act of 1918 claimed most of San Francisco's production. Those 1896-S silver dollars that escaped Pittman Act melting pots mostly circulated. A relatively low number of Mint State examples make the 1896-S a semikey issue when Uncirculated, with most examples seen in the MS62 to MS64 grades. This Select Uncirculated example is remarkably free of bagmarks for the issue, with a sharp strike and a sparse dappling of golden-gray toning. Brilliant mint luster radiates from smooth, semireflective surfaces. NGC ID# 2564, PCGS# 7244

**4074 1897-O MS60 PCGS. CAC.** Light to medium olive-gold toning graces this lustrous Mint State New Orleans dollar. The centers show inexactness of strike, but no marks are of singular relevance. The 1897-O is plentiful in circulated grades, but examples without tell-tale central high point wear are elusive. Certified in an old green label holder. CAC: 7 in 60, 89 finer (2/19). NGC ID# 2565, PCGS# 7248

**4075 1897-O MS62 PCGS.** Tinges of golden-russet and sea-green toning accent the borders on this piece, while the interiors show lighter champagne color. No singular abrasions are present. The strike is good save for blending on the hair above the ear. A conditionally challenging New Orleans issue. NGC ID# 2565, PCGS# 7248

**4076 1897-O MS62 PCGS.** Well-struck, untoned, and lustrous. This Mint State 1897-O Morgan displays scattered abrasions but remains appealing for the grade. Similar to the 1896-O, this New Orleans issue has a mintage of more than 4,000,000 pieces, but is nonetheless scarce in nice Mint State. NGC ID# 2565, PCGS# 7248

**4077 1897-O MS62 PCGS. CAC.** A lustrous, CAC-approved Mint State example of this better New Orleans issue, showing natural smoke-gray surfaces that have a tinge of gold throughout. The coin is well-struck for a New Orleans product of the 1890s, and grade-limiting abrasions are light and scattered. NGC ID# 2565, PCGS# 7248

**4078 1897-S MS66+ PCGS. CAC.** Luminous, frosty mint luster engulfs this high-end 1897-S Morgan dollar, illuminating a hint of field reflectivity. The obverse is light golden in color, while the reverse displays deeper sun-orange, lilac, green, and silver-blue patina. The usual strike weakness is noted above Liberty's ear, but it is minor on this coin. CAC: 89 in 66, 5 finer (2/19). NGC ID# 2567, PCGS# 7250

**4079 1898-O MS67 PCGS. CAC.** An impressively well-struck and remarkably well-preserved Superb Gem example of this late 19th century New Orleans issue, recognized by CAC as outstanding for the grade. A few truly faint luster grazes on the cheek are all that deny perfect on this brilliant Registry Set contender. Among the finest pieces certified at PCGS (1/19). Ex: Central States Signature (Heritage, 5/2004), lot 8722, which realized \$1,897.50. NGC ID# 2569, PCGS# 7254

**4080 1898-S MS65 PCGS. VAM-7.** The mintmark serifs are lightly repunched. A brilliant and lustrous Gem that exhibits a good strike and well-preserved fields. Wispy contact on the cheek denies a higher assessment. NGC ID# 256A, PCGS# 7256

**4081 1899 MS66 PCGS.** Widely known for its low mintage of 330,000 coins, the 1899 dollar proves more accessible than its reported production total suggests. It only becomes genuinely difficult to locate in MS67. Frosty, unabraded surfaces are delicately toned in violet, blue, and green patina. PCGS has seen 24 finer submissions (1/19). NGC ID# 256C, PCGS# 7258

**4082** 1900-O/CC VAM-8, MS65+ PCGS. A Top 100 Variety. An unusually early die state without chips inside the G in GOD. This lustrous Gem displays delicate wheat-gold toning, mostly near the rims. The cheek is smooth and the eye appeal is commendable. Coinage ended at Carson City Mint in 1893, and leftover Morgan dollar reverse dies were eventually overmintmarked and shipped to New Orleans as an economy measure. NGC ID# 256G, PCGS# 133960 Base PCGS# 7268

**4083** 1900-O/CC VAM-8A, Top 100, MS65+ PCGS. CAC. A Top 100 Variety. One of the 10 1900-O/CC varieties, VAM-8A exhibits rust lumps around the mintmark. This CAC-approved Gem boasts unfettered brilliance and radiant mint luster without any singularly distracting abrasions. Slightly soft at the centers. NGC ID# 256G, PCGS# 133961 Base PCGS# 7268

**4084** 1901 MS61 PCGS. The 1901 Philadelphia issue is a better date in Uncirculated condition. This MS61 coin is an ideal collector-grade example, and abrasions are minimal for the grade. Well-struck with a hint of light golden toning and satiny mint luster. NGC ID# 256J, PCGS# 7272

**4085** 1901 Doubled Die Reverse, VAM-3, AU53 PCGS. A Top 100 Variety and a WOW! Morgan VAM. The so-called "Shifted Eagle" reverse, showing the tailfeathers die doubled south, reminiscent of the 1878 doubled tailfeather varieties. Other design elements are also doubled. This briefly circulated example displays noticeable luster along with the expected quantity of minor marks. NGC ID# 256J, PCGS# 133965 Base PCGS# 7302

**4086** 1901-S MS64 PCGS. CAC. The 1901-S is a better date in Uncirculated grades, scarcely seen in MS64 or finer levels with CAC endorsement. This near-Gem displays a sharp strike and brilliant, satiny mint luster. A few small marks on the cheek are all that limit the grade.

Ex: Houston Signature (Heritage, 12/2015), lot 7991, which realized \$1,292.50. NGC ID# 256L, PCGS# 7276

**4087** 1902-S MS65 PCGS. This is a luminous Gem example of a better San Francisco issue, showing frosty, untoned interiors surrounded by amber and blue-green borders. The usual strike weakness is visible on the central high points where roller marks are visible, but abrasions and bagmarks are minimal. PCGS reports a mere 62 numerically finer certifications (2/19). NGC ID# 256P, PCGS# 7282

**4088** 1903-O MS66+ PCGS. The high-end Premium Gem surfaces display a sharp strike (many 1903-Os are flatly struck) and natural eye appeal, with narrow bands of border toning encircling both sides — amber-orange on the obverse, and dappled blue and gold patina on the reverse. Smooth, satin luster glows from the unabraded surfaces. Once considered a rarity in the Morgan dollar series, the 1903-O turned out to be plentiful when New Orleans dollars were released from their Philadelphia Mint storage in 1962. Today it is scarce only in high grades. Population: 77 in 66+, 95 finer (2/19). NGC ID# 256S, PCGS# 7286

**4089** 1903-O MS66 PCGS. CAC. A beautifully preserved, satiny Premium Gem example of this better New Orleans issue, CAC endorsed for quality and eye appeal. Neither side shows mentionable toning, and the surfaces are remarkably clean. Slight strike weakness on the hair above Liberty's ear is typical of the issue. NGC ID# 256S, PCGS# 7286

**4090** 1903-O MS66 PCGS. CAC. This former rarity (pre-1962) is now available in Gem and finer grades. This is a bright, satiny example that is devoid of color. Sharply detailed with no obvious abrasions. NGC ID# 256S, PCGS# 7286

### 1904-S Morgan Dollar, MS63

#### Better Date in High Grade

**4091** 1904-S MS63 PCGS. Brilliant, frosty luster shows only minimal abrasions on this Select 1904-S Morgan dollar. Minor strike weakness occurs on the eagle's breast and the hair above Liberty's ear as normal. The 1904-S is a better date in Uncirculated condition and is almost never seen with reflective fields. This frosty Select example displays the traditional look of the issue. NGC ID# 256W, PCGS# 7294

## PROOF MORGAN DOLLARS

**4092** 1883 — Altered Surfaces — PCGS Genuine. Unc Details. Faint, inconspicuous hairlines suggest that this proof was lightly buffed at one time. Even, pale-gold toning covers both sides. The strike is razor-sharp, as often seen on proof Morgan dollars from the 1880 to 1885 years. Considerable eye appeal remains throughout the mirrored fields, which retain slight contrast with lightly frosted motifs.

### 1904 Morgan Dollar, Toned PR64 Among 650 Proofs Struck

**4093** 1904 PR64 PCGS. Mixed golden-brown and violet patina blankets the surfaces of this proof Morgan dollar. Intermittent accents of powder-blue color appear throughout. The rich toning subdues field-device contrast but also serves to minimize the few signs of contact. Only 650 Morgan dollar proofs were manufactured in 1904. NGC ID# 2824, PCGS# 7339

### 1904 Morgan Dollar, PR64 Dappled Multicolor Patina

**4094** 1904 PR64 PCGS. CAC. Iridescent blue, green, and lavender toning adorns this sharply struck and flashy near-Gem. Rotation beneath a light reveals only a few stray field lines below the chin. A total of 650 pieces were struck for the final year of regular Morgan dollar proof production. NGC ID# 2824, PCGS# 7339

## PEACE DOLLARS

- 4095 1921 MS65 PCGS.** The high relief of the design resulted in some softness on Liberty's hair and the eagle's shoulder, but this attractive Gem shows more detail in those areas than most examples we have seen. The well-preserved, lustrous surfaces are lightly toned in golden-tan hues. PCGS# 7356
- 4096 1921 MS65 PCGS.** A luminous, golden-toned Gem example of the one-year High Relief type, this 1921 Peace dollar displays above-average central definition and is devoid of bothersome abrasions. Finer High Reliefs are scarce and may be out of reach for the typical Peace dollar collector. PCGS# 7356
- 4097 1921 MS65 PCGS.** Struck in high relief, this impressive Gem exhibits well-detailed design elements, with just a touch of the usual softness on Liberty's hair. The well-preserved, lustrous surfaces are lightly toned in shades of lavender and pale gold. PCGS# 7356
- 4098 1921 Matte Proof Dies, VAM-1F, MS65 PCGS.** An Elite 30 Variety. A couple of diagnostic markers identify the matte proof dies, which were also used to coin business strikes. They include a hook line above TRVST and polish lines near WE. This characteristically struck Gem is satiny and untoned. The variety is undesigned on the PCGS insert. Housed in a first generation holder. PCGS# 518799 Base PCGS# 7356
- 4099 1921 Matte Proof Dies, VAM-1F, MS65 PCGS.** An Elite 30 Variety. Dappled gold toning is prominent on the obverse and less obvious on the reverse. The VAM-1F die pair was used to strike Matte proofs prior to its use for circulation strikes. An extremely important opportunity for the advanced collector. PCGS# 518799 Base PCGS# 7356
- 4100 1922 Tripled Die Reverse, Wing Break, VAM-5B, MS65 PCGS.** A Top 50 Variety. VAMworld.com displays dramatic late die state photographs for the VAM-5B, noted for a series of prominent breaks on the eagle's front wing. The present coin is a middle die state that shows a lengthy crack with two relatively small breaks. A thoroughly lustrous Gem bathed in light butter-gold and ice-blue toning. Population: 2 in 65, 0 finer (2/19). NGC ID# 257C, PCGS# 133825 Base PCGS# 7357
- 4101 1922-S MS65 PCGS.** The 1922-S Peace dollar is plentiful in MS65, but PCGS has seen only 13 numerically finer submissions (1/19). This Gem displays frosty luster with a light golden hue. Some lightness of strike is noted in the centers, but it is not bothersome. NGC ID# 257E, PCGS# 7359

### 1922-S Peace Dollar, MS65★ High-End for the Grade

- 4102 1922-S MS65★ NGC.** The 1922-S Peace dollar is usually available in MS65, but Plus-graded and Star-designated coins are rare, and higher-grade pieces are equally elusive. NGC lists only two "Star" coins in MS65, plus seven "Plus" pieces. The same service reports a mere 17 Premium Gems finer (1/19). This Star-designated Gem displays a hint of reflectivity in the fields amid otherwise satiny luster, and it is well-preserved. No mentionable toning is present. Typical of the issue, modest strike softness is evident in the centers. NGC ID# 257E, PCGS# 7359

- 4103 1923 MS67 NGC.** This highly lustrous Superb Gem exhibits frosty surfaces with dappled champagne and gold toning. An impressive, well-preserved piece with original surfaces, housed in an NGC Renaissance Era holder. Neither service reports a numerically finer example. Census: 116 in 67 (1 in 67+, 1 in 67★), 0 finer (1/19). Ex: Central States Signature (Heritage, 4/2016), lot 5409. NGC ID# AMPA, PCGS# 7360

- 4104 1923 Whisker Cheek, VAM-1D, MS65 PCGS. CAC.** A Top 50 Variety. A high grade example of the heralded Peace Dollar VAM. Reminiscent of the 1888-O "Scarface" silver dollar, the 1923 "Whisker Cheek" variety features an impressive diagonal die break on Liberty's cheek. This lustrous Gem has an intricate strike and pleasing light lime-green and plum-mauve toning. Population: 3 in 65, 0 finer (2/19). NGC ID# 5HF6, PCGS# 133755 Base PCGS# 7360

### 1924 Peace Dollar, MS67 Registry-Grade Blazer

- 4105 1924 MS67 NGC.** A faint champagne tint warms the frosty, nearly pristine surfaces of this Superb Gem type coin. Under a loupe, faint metal flowlines in the margins appear as a result of die wear and contribute to the vibrancy of the cartwheel effect. Only two finer coins are reported at NGC and PCGS combined. Census: 92 in 67 (2 in 67+, 1 in 67★), 1 finer (1/19). NGC ID# 257J, PCGS# 7363

### 1926-S Peace Dollar, MS66 Rarely Encountered Finer

- 4106 1926-S MS66 PCGS.** Subtle violet and amber toning appears on the highly lustrous and fully brilliant surfaces of this lovely Peace dollar that ranks near the top of the population charts for this issue. PCGS has only examined two numerically finer examples, and NGC has never seen a finer piece. Population: 99 in 66 (2 in 66+), 2 finer (2/19). NGC ID# 257R, PCGS# 7369

- 4107 1927 MS65 PCGS.** A frosty Gem example of this better Philadelphia issue. With a mintage of only 848,000 pieces, the 1927 boasts the second-lowest production total in the series. This piece is well-struck, unabraded, and appealing. PCGS has seen 16 finer submissions (1/19). NGC ID# 257S, PCGS# 7370

- 4108 1927 MS65 PCGS.** A well-struck Gem, this coin displays impressive cartwheel luster throughout mostly brilliant surfaces. A sprinkle of speckled, charcoal-colored patina rests on both obverse and reverse, visible with magnification. There are only a few contact marks and light luster grazes scattered throughout. A highly collectible example of this popular, low-mintage date. PCGS reports just 16 numerically finer examples (1/19). NGC ID# 257S, PCGS# 7370

- 4109** 1927 MS65 PCGS. Brilliant with a faint hint of pale-gold, this sharp 1927 Gem radiates intense silver luster throughout both sides. The sharp strike on Liberty's hair translates to equally bold definition on the reverse motifs. The 848,000-piece mintage is on the low side for the series, and finer coins are rare at either service. PCGS reports just 16 numerically finer examples (1/19). NGC ID# 257S, PCGS# 7370
- 4110** 1927 Doubled Motto, VAM-2, MS65 PCGS. A Top 50 Variety. The designer's monogram and selected other obverse design elements are nicely die doubled. The variety is undesigned on the PCGS insert. But any Gem 1927 silver dollar is desirable, since the low-mintage issue is usually encountered in AU55 through MS64 grades. The lustrous olive-green surfaces display unimportant marks. NGC ID# 257S, PCGS# 133776 Base PCGS# 7370
- 4111** 1927-S MS64+ PCGS. CAC. This borderline Gem radiates silver luster beneath a natural speckling of golden-gray patina with crescents of amber-orange toning above LIBERTY and beneath the eagle. The 1927-S is a slightly scarcer series issue, which becomes rare in full Gem or finer conditions. This original Choice Uncirculated example with the PCGS Plus designation and CAC endorsement sits on the cusp of an even higher grade. NGC ID# 26J6, PCGS# 7372

**1928 Peace Dollar, MS65**  
Ex: Eliasberg

- 4112** 1928 MS65 NGC. Ex: Eliasberg. The Eliasberg collection of Peace dollars was offered as a single lot in the 1997 Bowers and Merena catalog. The 1928 coin was described: "1928 MS-63. Lowest mintage of the series." Clearly, the grade assigned to the raw coin was conservative. This Gem key-date Peace dollar displays a bold strike and satiny mint luster. Each side has a dusting of russet toning, and there is a faint ribbon of deeper olive color across the upper obverse. NGC lists only five finer examples of the 1928 Peace dollar (2/19).

Ex: Louis E. Eliasberg, Sr. Collection (Bowers and Merena, 4/1997), part of lot 2327. NGC ID# 257V, PCGS# 7373

**1928 Peace Dollar, MS65**  
Key Issue, Seldom Finer

- 4113** 1928 MS65 PCGS. A satiny Gem example of the traditional series key, showing a blush of light olive-gold toning over each side. The strike is sharp, and were it not for a faint graze on Liberty's cheek a finer grade might have been achieved at PCGS. Nonetheless, this Gem represents the finest level of preservation at which the 1928 Peace dollar is typically available. PCGS reports only 21 finer submissions (2/19). NGC ID# 257V, PCGS# 7373

- 4114** 1934 MS66 PCGS. Fewer than 1 million Peace dollars were struck at Philadelphia in 1934, making this a better date overall. Premium Gems are scarce, and PCGS and NGC each list only six finer representatives (2/19). This example is sharp and satiny with exceptional preservation. A trace of champagne color graces each side. NGC ID# 257Y, PCGS# 7375

- 4115** 1934 MS66 PCGS. The 1934 Peace dollar is conditionally scarce in MS66, and fewer than a dozen finer pieces are known. This Premium Gem displays vibrant luster and yellow-gold toning. Neither side exhibits bothersome abrasions. PCGS lists only six Superb Gems finer (2/19). NGC ID# 257Y, PCGS# 7375
- 4116** 1934-S AU58 PCGS. This near-Mint example of the key issue retains most of its bright, silver luster beneath a sheer veil of golden-gray toning. The 1934-S can be challenging to find with any measure of eye appeal, but this briefly circulated piece is undeniably attractive. We note a number of small marks when viewed with a loupe, plus a small, circular gray toning spot above IN. A touch of central wear exists on the typically weak hair strands over the ear. NGC ID# 257Z, PCGS# 7377

**1934-S Peace Dollar, MS61**  
Better Date in Uncirculated Condition

- 4117** 1934-S MS61 PCGS. A trifle more than 1 million silver dollars were struck at San Francisco in 1934, a small production figure for the series. Mint State examples of this date are scarcer than any other Peace dollar. The lower-end Uncirculated coin offered here represents an excellent opportunity for the date and mintmark collector. It is well-struck and satiny with light golden toning. The surfaces are surprisingly smooth for the grade. NGC ID# 257Z, PCGS# 7377

- 4118** 1935 MS66 PCGS. The 1935 Peace dollar is a prime condition rarity in grades above MS66. This delightful Premium Gem is well-detailed and well-preserved, with lustrous, brilliant surfaces. PCGS has graded no coins in higher numeric grades (1/19). NGC ID# 2582, PCGS# 7378

**1935-S Silver Dollar, MS66**  
Three Rays Reverse

- 4119** 1935-S MS66 PCGS. Just three rays appear below ONE on the reverse of this Premium Gem 1935-S Peace dollar. An important condition rarity at this level, as PCGS has certified only three finer examples (2/19). This lovely silver dollar exhibits frosty and highly lustrous silver surfaces with no trace of toning on either side. NGC ID# 2583, PCGS# 7379

### 1935-S Peace Dollar, MS66

Rarely Encountered Finer

- 4120 1935-S MS66 PCGS. Three rays below ONE. The beautifully preserved, frosty luster of this Premium Gem 1935-S Peace dollar is firmly within the MS66 grade level. The strike is bold, and olive-gold toning adds character to each side. This final-year San Francisco issue is elusive in MS66 and is rarely seen finer, with PCGS having so-graded only three coins (2/19). NGC ID# 2583, PCGS# 7379

## EISENHOWER DOLLAR

- 4121 1974-D MS67 PCGS. CAC. Exceptional quality for clad coinage issues from the last 50 years are elusive, and most are from Mint sets. This Superb Gem has a bold strike, full luster, and lovely delicate gold and pale blue toning. Population: 33 in 67 (4 in 67+), 0 finer. CAC: 11 in 67, 0 finer (2/19). NGC ID# 258E, PCGS# 7416

## GOLD DOLLARS

- 4122 1849-C Closed Wreath XF40 PCGS. Variety 1. Nearly all 1849-C gold dollars are of the Closed Wreath design type. Some light wear shows on the high points of this attractive XF specimen, but much interior detail remains intact. The reddish-gold surfaces retain traces of original mint luster, with a few shallow scratches in the left obverse field the only marks of note. Population: 16 in 40, 92 finer (2/19). NGC ID# 25BC, PCGS# 7505

### 1849-D Gold Dollar, AU55 Variety 1-A, Mintmark Left

- 4123 1849-D AU55 NGC. Variety 1-A. The mintmark is left of center in the space between the ribbon ends on the reverse of this variety. Both known die marriages are from a single obverse die. This Choice AU example has wisps of pale blue toning on its rich honey-gold surfaces. NGC ID# 25BD, PCGS# 7507

### 1852-D Gold Dollar, AU55

Low Mintage Issue

- 4124 1852-D AU55 PCGS. Variety 4-F. Only 6,360 pieces were struck and there are 125-175 estimated extant in all grades. This is a solid AU example that exhibits bright yellow-gold surfaces. As usually seen, the strike is less-than-complete. There are also numerous small abrasions peppered across both sides, but none warrant individual mention. Population: 20 in 55, 38 finer (2/19). NGC ID# 25BS, PCGS# 7519

### 1853 Gold Dollar, MS65 CAC-Approved Type Coin

- 4125 1853 MS65 PCGS. CAC. A sharp Gem type coin, this CAC-approved 1853 gold dollar displays luminous yellow-gold surfaces that are free of bothersome abrasions. The 1853 is among the more plentiful Type One gold dollars, readily collectible in Gem condition. However, it becomes scarce in finer grades. This piece is highly appealing. NGC ID# 25BU, PCGS# 7521

### 1853 Gold Dollar, MS66 Frosty and Bold Type One Example

- 4126 1853 MS66 PCGS. More than 4 million gold dollars were struck by the Philadelphia Mint in 1853, by far the largest mintage of the series. This example shows faint die clashing but only minor die wear at the borders. The centers are razor-sharp — especially the portrait — with vertical striations that radiate mint luster. The lemon-gold surfaces show pleasing orange and rose-gold accents. Marks are few, with an oval of grease that was struck into the reverse at the time of manufacture between N and I of UNITED. Population: 72 in 66 (9 in 66+), 12 finer (1/19). NGC ID# 25BU, PCGS# 7521

- 4127 1855 Type Two MS62 PCGS. An attractive MS62 specimen of the short-lived Type Two design, with well-detailed design elements and pleasing orange-gold surfaces that are lightly marked for the grade. Vibrant mint luster adds to the considerable eye appeal. NGC ID# 25C4, PCGS# 7532

- 4128** 1855-O AU50 PCGS. Variety 2, with a lapped reverse die. This New Orleans issue is the only Type Two gold dollar struck at that facility, making it highly popular in all grades. Only 55,000 pieces were produced. This About Uncirculated coin displays natural greenish-gold surfaces and satiny remnants of luster. A few daubs of amber appear along the upper right obverse border. NGC ID# 25C7, PCGS# 7535

**1856-S Gold Dollar, AU55**  
The Only Type Two Produced This Year

- 4129** 1856-S Type Two AU55 PCGS. The 1856-S is the “forgotten” Type Two gold dollar. It was the only issue of this type struck in 1856, and a paltry 24,600 pieces were produced. This scarce Choice AU example displays deeper rose-gold and lilac patina on each side. The strike details are remarkably strong for a Type Two, and the only mark of note is located in the right obverse field. Population: 34 in 55 (1 in 55+), 58 finer (2/19). NGC ID# 25C8, PCGS# 7536

- 4130** 1856-D — Cleaned — NGC Details. AU. Variety 8-K. The Type Three design in general was not well-struck at the Dahlonega Mint, although the 1856-D displays a better strike than the 1857-D and 1861-D. This example has the usual weak U in UNITED and filled O in DOLLAR, as well as a weak 5 in the date. Liberty’s portrait is sharp except for the high points of the hair, partially from wear. One of the lowest mintages among the D-mint dollars, the 1856-D had a mintage of just 1,460 pieces. This example shows muted khaki-gold surfaces from an old cleaning, with faint hairlines, although traces of luster remain at the borders.

**1859-C Gold Dollar, XF40**  
In an Old Green Label Holder

- 4131** 1859-C XF40 PCGS. Variety 1. The 1859-C is popular as the final gold dollar struck at the Charlotte Mint, boasting a mintage of only 5,235 pieces. The issue is relatively scarce today. Doug Winter estimates that fewer than 250 pieces are extant. This lightly circulated coin displays glossy orange-gold surfaces and sharp detail for the grade. Scattered light abrasions are not bothersome. Housed in an old green label holder. NGC ID# 25CM, PCGS# 7552

- 4132** 1862 MS65 PCGS. This impressive Gem is sharply detailed in most areas, with just a touch of softness on the upper wreath. The well-preserved orange-gold surfaces radiate vibrant mint luster with outstanding eye appeal. PCGS has graded 46 numerically finer examples (2/19). NGC ID# 25CW, PCGS# 7560

- 4133** 1873 Open 3 MS65+ PCGS. CAC. Ample space appears between the upper and lower loops of the 3 on this Open 3 variety that was struck after complaints that the Closed 3 looked too much like an 8. This lovely Gem has frosty luster and brilliant light yellow surfaces with excellent eye appeal. Population: 66 in 65 (5 in 65+), 18 finer. CAC: 29 in 65, 9 finer (2/19). NGC ID# 25DB, PCGS# 7573

- 4134** 1877 MS62 Prooflike NGC. As with many denominations from 1877, the gold dollar also has a low mintage; in this case only 3,900 pieces were produced. Of the survivors, there are a few dozen Prooflike examples known. The fields on this piece are deeply reflective with numerous surface scuffs that account for the MS62 grade. NGC ID# 25DF, PCGS# 77578

**1882 Gold Dollar, MS67**  
Rare Any Finer

- 4135** 1882 MS67 PCGS. Despite its low 5,000-coin mintage, the 1882 gold dollar is usually available in Mint State. Nonetheless, Superb Gems are scarce. This frosty yellow-gold example is almost untouched on the surfaces, showing only a few truly faint lines in the central reverse fields that prevent an even finer grade. The strike is sharp, and eye appeal is pleasing. Population: 35 in 67 (4 in 67+), 11 finer (1/19).  
Ex: Dallas Signature (Heritage, 10/2016), lot 3262, which realized \$4,582.50. NGC ID# 25DL, PCGS# 7583

**1888 Gold Dollar, MS67**  
Green CAC, Green Label Holder

- 4136** 1888 MS67 PCGS. CAC. A sharp coin with luminous rose-gold, peach, and yellowish hues that form swirls in the luster on each side. A loupe fails to reveal notable abrasions, and the CAC endorsement is well-earned. The 1888 gold dollar is scarce in this grade and rare with the CAC green label. Finer pieces, with or without CAC, are rare. Housed in a green label holder. Population: 57 in 67 (6 in 67+), 6 finer. CAC: 26 in 67, 4 finer (1/19). NGC ID# 25DT, PCGS# 7589

- 4137** 1889 MS66 PCGS. The 1889 is a popular issue to target because of its low mintage, final-year status, and excellent production quality. This gleaming, fully struck Premium Gem displays small coppery alloy spots on the obverse and a more colorful spot above the headdress. A shallow planchet flaw (mint-made) occurs below ER. NGC ID# 25DU, PCGS# 7590

- 4138** 1889 MS67 PCGS Gold Shield. A collectible Superb Gem example of the final-year gold dollar, an ideal type coin in this lofty grade. Sharp design elements complement radiant yellow-gold luster on each side. Although plentiful in this grade, PCGS has seen only 10 finer 1889 gold dollars (1/19). NGC ID# 25DU, PCGS# 7590

## EARLY QUARTER EAGLE

1802/'1' Quarter Eagle, BD-1, AU Details

- 4139 1802/'1' BD-1, R.4 — Plugged — PCGS Genuine. AU Details. Bass-Dannreuther Die State b/c, with a die crack on the reverse from the rim through the final A in AMERICA. The PCGS insert calls this coin an 1802/'1', the 1 in quotes, as the overdate status has long been questioned. In *Early U.S. Gold Coin Varieties*, John Dannreuther writes: "The fact that there were no quarter eagles dated 1799, 1800, or 1801 should lend credence to the overdate status of the 1802, but most researchers have come to the conclusion that whatever is under the 2 is not the vestiges of a 1." This AU-level coin is well-detailed with bright yellow-gold surfaces. There is a plugged hole above Liberty's cap, although it is difficult to see without the aid of a loupe.

## CLASSIC QUARTER EAGLES

1836 Classic Quarter Eagle, MS61  
Variety 11, Head of 1835

- 4140 1836 Script 8 MS61 NGC. Breen-6143, Variety 11, R.2. Head of 1835. An impressive Uncirculated peach-gold Classic type coin. The original surfaces show only unimportant marks. The strike is generally good, although the centers exhibit incompleteness. Ex: FUN Signature (Heritage, 1/2010), lot 3811, which realized \$2,300. NGC ID# 25FU, PCGS# 7694

1839-C Classic Head Quarter Eagle, VF30  
Overdate, Variety-23

- 4141 1839-C VF30 NGC. Breen-6149, Winter-1, Variety-23, R.3. The 1839-C Classic Head quarter eagle boasts a mintage of just 18,140 pieces, with three known die varieties. Surprisingly, the date is reasonably available today. The present coin shows the remnants of a numeral 8 under the 9 in the date, characteristic of Variety 23. Much original detail remains on this specimen, with the obverse less worn than the reverse. Doug Winter estimates a surviving population of 300-400 examples, with 125-150 specimens extant in VF grades. NGC ID# 25G4, PCGS# 7699

## LIBERTY QUARTER EAGLES

1840-C Two and a Half, AU50  
Low-Mintage Early Charlotte Issue

- 4142 1840-C AU50 PCGS. CAC. Variety 1. Traces of mint luster and glimpses of reflectivity remain at the margins of this pleasing, About Uncirculated early Charlotte quarter eagle. Faint-orange accents enliven a green-gold hue across minimally marked fields and devices. This 1840-C is well-struck — as often seen in comparison to other early Charlotte issues — with strong central definition except where grade-consistent, high-point wear appears. CAC endorsement reinforces the readily apparent surface quality and eye appeal. Population: 24 in 50, 62 finer. CAC: 4 in 50, 14 finer (1/19). NGC ID# 25GB, PCGS# 7718

1840-O Quarter Eagle, Choice AU  
Scarce in All Grades, Bold Borders

- 4143 1840-O AU55 PCGS. Variety 2. The 1 and the 8 are centered over the space between dentils, and the Small O mintmark is entirely left of the fraction bar on this rare variety. According to Winter: "The 1840-O is scarce in all grades and it is a rare issue in properly graded AU55 and above." Roughly 125 to 175 pieces are believed extant. Central softness is typical, and the strike is much stronger around the borders of this partly lustrous, rich orange-gold representative. NGC ID# 54TU, PCGS# 7720

- 4144 1844-D — Altered Surfaces — PCGS Genuine. AU Details. Variety 5-I. The usually encountered variety of 1844-D quarter eagles with peripheral roughness on both sides. Still an attractive example, this Dahlonega piece shows nearly full green-gold luster and sharp details. Prominent clash marks are noted on the reverse.

**1844-D Two and a Half, AU55  
Scarce Die Marriage**

**4145** 1844-D AU55 NGC. Variety 5-J. Struck from the scarcer of two die pairs, where the D mintmark touches 1 in the fraction below. Small areas of tan-gold toning visit the greenish-gold surfaces of this lightly abraded, Choice About Uncirculated example. Tiny marks are dispersed across both sides, but few are located on Liberty's portrait and most require a lens to view. Traces of mint luster remain at the borders. Census: 37 in 55 (1 in 55+★), 57 finer (2/19). NGC ID# 25GV, PCGS# 7736

**4146** 1846-D XF40 PCGS. Variety 8-M. The mintmark is level, and the upright is centered over the top of the fraction bar. Five die marriages are known despite a meager mintage of 19,303 pieces. This honey-gold XF example has a sharply detailed obverse and a typical strike on the eagle. Marks are minimal aside from a few unimportant rim ticks. NGC ID# 25H3, PCGS# 7742

**4147** 1847-C XF40 PCGS. CAC. Variety 1. The most collectible Charlotte Mint quarter eagle was struck to the extent of 23,226 pieces. This all-original olive-gold representative exhibits remaining luster and good detail with moderate rub. Housed in an old green label holder. CAC: 4 in 40, 30 finer (1/19). NGC ID# 25H6, PCGS# 7745

**4148** 1847-C — Cleaned — NGC Details. AU. Variety 1. The 1847-C quarter eagle is a relatively plentiful issue among Charlotte gold, suitable for collectors seeking a single coin from this mint. This AU-level example displays little wear and is moderately well-struck. Scattered light contact marks are characteristic of Charlotte gold in general. The olive-gold surfaces are slightly glossy from an old cleaning. NGC ID# 25H6, PCGS# 7745

**4149** 1847-D VF20 NGC. Variety 9-N. A circulated but minimally abraded example of this scarce Dahlonega issue. Just 15,784 pieces were issued, less than one-fourth the production of the 1847-D five dollar. The obverse dentils are sharp, and many stars show centrils, although the portrait and eagle show softness due to wear and a typical strike. NGC ID# 25H7, PCGS# 7746

**4150** 1850 MS62 NGC. Available in circulated grades, the 1850 quarter eagle is scarce at all Mint State levels. This collectible MS62 example displays prooflike fields and uniform straw-gold color. The usual strike weakness is evident on the eagle's left (facing) leg, but the obverse is sharp. Census: 35 in 62 (1 in 62+), 20 finer (1/19). NGC ID# 25HG, PCGS# 7755

**1851-D Two and a Half, AU55  
Scarce Dahlonega Issue**

**4151** 1851-D AU55 NGC. Variety 15-N. The 1851-D quarter eagle is scarce, boasting a survivorship of only 100 to 125 coins in all grades from a mintage of 11,264 pieces. This Choice AU example is high-end for the date. Hints of luster remain in the protected portions of the fields, complementing pale yellow-gold patina. Slight strike softness on the eagle's left (facing) leg is not bothersome. Scattered abrasions are typical of Charlotte gold from all years. Census: 19 in 55, 24 finer (2/19). NGC ID# 25HN, PCGS# 7761

**1851-O Two and a Half, MS60  
A Rare Issue in Mint State**

**4152** 1851-O MS60 PCGS. Variety 1, distinctive for repunching on the 5 and final 1 in the date. The 1851-O quarter eagle is a rare issue in Mint State. Winter estimates 300 or 400 pieces survive in all, with 12 to 15 coins in mint condition. This lower-end example is appealing for the grade. Moderate strike softness on the eagle's left (facing) leg is typical, but remarkably few singular abrasions are present. Satiny straw-gold luster illuminates each side. Population: 6 in 60, 20 finer (2/19). NGC ID# 25HP, PCGS# 7762

**1852-O Quarter Eagle, MS62  
Rarely Offered This Fine**

**4153** 1852-O MS62 NGC. Variety 2. Although the New Orleans Mint struck 140,000 quarter eagles in 1852, few survive in Uncirculated condition. This MS62 coin is rare, and just a handful of finer pieces are known. Satiny luster reveals no major abrasions, just light handling marks in the fields and on the devices. Liberty's hair curls are weakly struck behind the ear, as is the eagle's left (facing) leg — typical of New Orleans gold of this period. Census: 7 in 62, 4 finer (2/19). NGC ID# 7HX8, PCGS# 7766

**1854-C Quarter Eagle, AU53+  
Better Charlotte Date, 7,295 Pieces Struck**

**4154** 1854-C AU53+ NGC. Variety 1, The Sole Die Pair. The 1854-C quarter eagle is scarcer than the certified population reports would suggest. Likely only 105 to 145 examples are known in all grades, these more or less evenly distributed throughout the VF, XF, and AU grade ranges. In Mint State, this issue is genuinely rare. The present Plus-graded About Uncirculated coin displays medium olive-gold patina with minimal abrasions. Weakness on the central eagle and the hair curls around Liberty's face is due to strike rather than significant wear. Census: 1 in 53+, 69 finer (1/19). NGC ID# 7J2P, PCGS# 7790

**4155** 1855-C — Altered Surfaces — PCGS Genuine. AU Details. A rare Charlotte issue with a stingy mintage of 3,677 pieces. The present green-gold example has a typical strike but minimal circulation wear. The surfaces are mildly bright. Smoothing is evident near star 7, and myriad delicate pinscratches affect the fields, most apparent above the arrowheads.

**1856-D Liberty Quarter Eagle, Fine Details  
Only 874 Pieces Struck**

**4156** 1856-D — Plugged, Improperly Cleaned — NCS. Fine Details. Variety 20-N. The 1856-D Liberty quarter eagle claims a series-low mintage of 874 pieces, making it the rarest coin of any denomination ever struck at the Dahlonega Mint. The surviving population numbers no more than 40-50 examples in all grades. Unfortunately, this example was holed and plugged at 12 o'clock on the obverse, probably for use in jewelry. The design elements are complete in outline and some interior detail remains intact, but the smooth surfaces have been polished, creating an unnaturally bright appearance.

**4157** 1861 Old Reverse, Type One, AU53 PCGS. The arrowheads are larger on the Old Reverse type. This About Uncirculated coin displays little wear and has natural greenish-gold patina with scattered light abrasions. Some minor strike softness is evident on the eagle's left (facing) leg, as usual. A scarce issue in high grade. Population: 6 in 53, 55 finer (2/19). NGC ID# 25JX, PCGS# 97794

**4158** 1861 New Reverse, Type Two, MS63 NGC. The arrowheads of the Type Two reverse are narrow and separated. This type accounts for the majority of the surviving 1861 quarter eagle population and is ideal for date collectors. Frosty yellow-gold luster shows minimal abrasions on this Select example, which has good eye appeal. Strike weakness is noted on the lower portion of the eagle and around Liberty's brow. NGC ID# 25JX, PCGS# 7794

**4159** 1861 New Reverse, Type Two, MS64 PCGS. CAC. The scarcer New Reverse variety is easily identified by the slimmer, widely separated arrow heads and the rounded shape of the O in OF. This impressive Choice example exhibits sharply detailed design elements throughout, and the well-preserved orange-gold surfaces radiate vibrant mint luster, with terrific eye appeal. PCGS has graded 51 numerically finer examples (2/19). NGC ID# 25JX, PCGS# 7794

**1866 Quarter Eagle, XF40  
Luster Remains, Only 3,080 Pieces Struck**

**4160** 1866 XF40 PCGS. An extremely scarce post Civil War quarter eagle, one of just 3,080 pieces made. The coin is well struck save for an area of softness on the eagle's left leg. Clearly, the scarcity of this date exceeds even what the low mintage would suggest, with just 60 to 75 pieces known in all grades according to PCGS CoinFacts. Smooth, attractive, and partially reflective orange-gold fields retain a generous amount of mint luster for the XF grade. Population: 6 in 40, 23 finer (1/19).

Ex: Long Beach Signature (Heritage, 9/2005), lot 4348. NGC ID# 7FRZ, PCGS# 7803

**4161** 1866-S AU55 PCGS. Tougher to find than its mintage of 38,960 pieces suggests, the 1866-S is a great rarity in Mint State, with only four Uncirculated pieces certified as such by PCGS. Those collectors willing to attempt this challenging series often opt for a Choice AU example such as the present coin (which is rare in its own right). Crisply struck, the honey-gold surfaces are generally smooth, with only a few tiny marks and considerable remaining mint luster. Population: 9 in 55, 15 finer (1/19). NGC ID# 25K8, PCGS# 7804

**4162** 1870-S AU58 PCGS. CAC. Likely no more than 150 to 175 1870-S quarter eagles survive in all grades, and fewer than 10 are known in Mint State. The issue claims a mintage of only 16,000 pieces, and this example is 10 grade points higher than average. Those with CAC approval are even more elusive. Partial luster illuminates warm yellow-gold surfaces and sharp, virtually unworn devices. NGC ID# 25KG, PCGS# 7812

**4163** 1886 MS61 NGC. Only 4,000 quarter eagles were struck in 1886, all in Philadelphia. This is a scarce Mint State survivor. Each side is sharp and lustrous with natural yellow-gold hues. Grade-limiting abrasions are trivial. Census: 34 in 61, 37 finer (1/19). NGC ID# 25LA, PCGS# 7838

**4164** 1889 MS64+ PCGS. CAC. Softness is confined to the forecurls and the eagle's left (facing) leg feathers on this well-struck, high-end MS64+ quarter eagle with CAC's endorsement. Frosty mint luster merges with peach-gold color, delivering great eye appeal. Population: 65 in 64 (5 in 64+), 15 finer. CAC: 16 in 64, 6 finer (1/19). NGC ID# 7JTT, PCGS# 7841

**4165** 1898 MS66 PCGS. The 1898 quarter eagle is available in Mint State despite a small mintage of 24,000 coins, but high-end examples are conditionally scarce. This Premium Gem displays sharp definition and original wheat-gold luster. The frosty surfaces shimmer when rotated beneath a light. On the reverse, a thin, spindly die crack stretches from the rim near the U in UNITED into the field toward the eagle's talons. Finer pieces are rare. Population: 52 in 66 (4 in 66+), 14 finer (2/19). NGC ID# 25LN, PCGS# 7850

**4166** 1899 MS66 PCGS. The apricot-gold surfaces of this extraordinary Premium Gem radiate satiny mint luster throughout, and no mentionable distractions are evident. The design elements are sharply detailed and eye appeal is top notch. Population: 35 in 66 (5 in 66+), 10 finer (2/19). NGC ID# 25LP, PCGS# 7851

**1901 Two and a Half, MS67  
Colorful Type Coin**

**4167** 1901 MS67 PCGS. A popular type coin issue, the 1901 Liberty quarter eagle is relatively plentiful in Gem condition and is frequently available. However, few examples have earned Superb Gem grades at the certification services. This MS67 coin displays a sharp strike and smooth, luminous mint luster. Rich rose and orange-gold interiors cede to yellow-gold margins, producing strong eye appeal. A faint graze beneath the E in AMERICA is all that prevents absolute perfection. Population: 25 in 67, 1 finer (2/19). NGC ID# 25LS, PCGS# 7853

**4168** 1905 MS66 PCGS. CAC. A delightful Premium Gem representative of this popular type issue, with razor-sharp definition on the design elements and virtually pristine peach-gold surfaces that radiate vibrant mint luster and outstanding eye appeal. NGC ID# 267S, PCGS# 7857

**1907 Two and a Half, MS67  
Final Year Liberty Head Type Coin**

**4169** 1907 MS67 PCGS. This satiny Superb Gem glistens with peach-gold and yellow hues across untouched surfaces. The quarter eagle denomination circulated little by this time, allowing for the seemingly impossible preservation of high-grade examples such as this. The coin is sharp and eye-appealing. PCGS has seen a single finer representative (2/19). NGC ID# 2688, PCGS# 7859

**INDIAN QUARTER EAGLES**

**4170** Six-Piece Lot of Philadelphia Mint Indian Quarter Eagles, MS63 NGC. A well-matched six-piece set of Indian quarter eagles, including the dates 1908, 1909, 1910, 1912, 1913, and 1914. All the coins are from the Philadelphia Mint and each is graded MS63, with lustrous, lightly marked orange-gold surfaces. All are sharply detailed in most areas, but the 1908 shows just a touch of softness on the eagle's shoulder. (Total: 6 coins)

**4171** 1908 MS64 PCGS. CAC. CAC endorsed, this Choice 1908 Indian quarter eagle has eye appeal beyond that of many MS65 coins that we have seen. A loupe reveals some faint hairlines in the reverse fields, which may have prevented a Gem designation. The strike is sharp and each side displays luminous greenish-gold color. NGC ID# 288Y, PCGS# 7939

**4172** 1908 MS65 PCGS. The 1908 Indian quarter eagle was well-saved at the time of issue, being the first of its kind in circulation. As a result, high-grade examples are relatively plentiful for type collectors. This Gem displays a sharp strike and attractive lemon-gold and greenish hues across each side. No distracting abrasions are present. NGC ID# 288Y, PCGS# 7939

**4173** 1909 MS64 PCGS. An impressive Choice example of this early series issue with sharp design elements throughout the well-preserved, orange-gold surfaces. Vibrant mint luster radiates on both sides. Eye appeal is outstanding. NGC ID# 288Z, PCGS# 7940

**1910 Quarter Eagle, MS65  
Elusive in High Mint State Grades**

**4174** 1910 MS65 NGC. This is a pleasing Gem 1910 quarter eagle, a challenging coin to find in attractive Gem condition or finer. This example displays straw-gold color, bolstered by unimpaired mint luster and minimally abraded surfaces. The strike is sharp throughout all of the motifs. NGC reports just 17 numerically finer examples (2/19). NGC ID# 2892, PCGS# 7941

**4175** 1911-D Weak D AU55 NGC. This is a Weak D coin that actually shows the faint ghost of a mintmark when viewed with a loupe. The surfaces are smooth, lightly worn, with a bronze-gold hue. Eye appeal is outstanding for the grade. NGC ID# 2895, PCGS# 7954

**4176** 1911-D — Altered Surfaces — PCGS Genuine. XF Details. Strong D. Wear is light on this key-date Indian quarter eagle, and the mintmark remains visible with a loupe. The diagnostic wire rim along the right-hand obverse is prominent on this piece. PCGS labels this coin with altered surfaces, although the overall appearance is that of a heavily cleaned example that is unnaturally bright yellow-gold in color.

**1911-D Two and a Half, AU53  
Clear Mintmark, Pleasing Color**

**4177** 1911-D AU53 PCGS. The mintmark is sharp on this About Uncirculated example despite light friction over each side. All details are visible, just lightly "rubbed" on the high points. Each side has pleasing honey-gold color with deeper tinges of amber in the design crevices. Eye appeal is outstanding for the grade, and 1911-D quarter eagles this attractive are rarely found in the AU levels. NGC ID# 7KR7, PCGS# 7943

1911-D Quarter Eagle, AU58  
Partial Wire Rim, Lightly Circulated

4178 1911-D AU58 NGC. The D mintmark is fully visible, but not particularly bold on this Strong D coin. The surfaces show brief high point weakness on the uppermost headdress elements and the eagle's shoulder, yet the fields are relatively smooth and have only a few small marks. Soft mint luster glows beneath pleasing straw-gold surfaces. Just 55,680 pieces were struck, the unquestioned key to the Indian Head quarter eagle series. NGC ID# 7KR7, PCGS# 7943

1911-D Two and a Half, AU58  
Faint but Discernible Mintmark

4179 1911-D AU58 NGC. The all-important mintmark is faint but its outline is easily seen with a magnifier. Always eagerly sought-after by collectors of this short, completable series, the key-date 1911-D is relatively easy to acquire in AU but grows increasingly challenging in Uncirculated grades. This is a lightly marked example that would blend well in an otherwise Uncirculated set. NGC ID# 7KR7, PCGS# 7943

4180 1925-D MS65+ PCGS. Although the 1925-D is not a particularly well-struck issue, this high-end Gem example is above average in that regard, with a sharp mintmark and only slight weakness at the lower headdress feathers. Eye appeal is exceptional, with lustrous, coppery-gold surfaces and variegated lilac and orange accents. The surfaces are free of all but a few minor marks. Population: 43 in 65+, 39 finer (1/19). NGC ID# 7KRD, PCGS# 7949

4181 1926 MS65 PCGS. CAC. Splendid orange-gold and sea-green shades intermingle throughout this attractive Indian type coin. The strike is good despite minor blending on the headdress. The fields display delicate grazes appropriate for the grade. Encapsulated in a green label holder. CAC: 81 in 65, 1 finer (2/19). NGC ID# 7KRE, PCGS# 7950

### THREE DOLLAR GOLD PIECES

4182 1854 MS62 NGC. As a first year of issue coin, the 1854 was well-saved by collectors and the public, and it trails only the 1878 for availability in Uncirculated grades. This Mint State example displays the typical (and attractive) finely grained satin luster seen on high-grade coins. A sharp strike carries over to both sides. A few hair-thin marks near Liberty's forehead that are visible with a loupe. Eye appeal is strong. NGC ID# 25M3, PCGS# 7969

1854-O Three Dollar Gold, XF45  
Popular Mintmarked First-Year Issue

4183 1854-O XF45 NGC. CAC. Variety 2. Struck from the usual heavily lapped reverse die, with resultant loss of detail on the bow above the knot on the lower reverse. This Choice XF shows a few small planchet flakes that did not strike out of the obverse at the time of manufacture. Otherwise, lightly marked with attractive reddish-tinted surfaces. NGC ID# 25M5, PCGS# 7971

4184 1856-S AU50 NGC. Medium S, with a small die break below the LL in DOLLARS, as usual. A pleasing About Uncirculated example of this San Francisco issue, surviving from a mintage of 34,500 pieces. The bright yellow-gold surfaces are only lightly marked and have well-detailed design elements. NGC ID# 25M9, PCGS# 7975

4185 1857-S — Altered Surfaces — PCGS Genuine. XF Details. Just 14,000 pieces were struck, and most of the mintage circulated extensively on the West Coast. Mint State examples are rare, and surviving pieces number only a few hundred coins in all grades combined. Orange-gold surfaces of this example show scattered small marks, their severity somewhat muted by buffing, which accounts for the lack of a numeric grade by PCGS.

1860-S Three Dollar Gold, XF45  
Collectible Example of This Scarce Date

4186 1860-S XF45 PCGS. Only 7,000 examples of the 1860-S were struck, one of the lower mintages among branch mint three dollar gold pieces. The date has a limited survivorship, with only a handful of coins in Uncirculated condition. This Choice XF coin is within the reach of ordinary collectors. The coin is well-struck with a brush of wear, and it displays medium yellow-gold patina. Scattered light contact marks appear beneath a loupe but do not detract. NGC ID# 7K5M, PCGS# 7981

**1862 Three Dollar Gold, AU50  
Smooth Surfaces**

**4187 1862 AU50 PCGS.** Only 5,750 three dollar gold pieces were struck in 1862, a period when gold coinage was seldom preserved in Mint State for numismatic purposes. The 1862 is rare in Uncirculated condition. This collectible AU coin displays smooth peach-gold and olive-toned surfaces with strong detail. There are no distractions. NGC ID# 7K5P, PCGS# 7983

**4188 1868 AU55 NGC.** A touch of friction on the highest points of the curls and wreath, slightly subdued mint luster, and lightly scattered marks define the technical grade. Otherwise, this Choice AU three dollar gold piece is attractive with reddish-gold color and a pinpoint-sharp impression. A single obvious abrasion occurs between (UNITE)D S(TATES). Only 4,850 three dollar gold coins were struck in 1868. NGC ID# 25MP, PCGS# 7989

**4189 1868 AU55 NGC.** An attractive lemon-gold example. The curls and wreath confirm a short stint in commerce, but there are no distracting abrasions. Only 4,850 three dollar pieces were coined for commerce during 1868, and few were saved in Mint State relative to subsequent dates such as the 1888. NGC ID# 25MP, PCGS# 7989

**4190 1870 — Cleaned — NGC Details. AU.** From a business-strike mintage of 3,500 pieces, the 1870 three dollar gold piece is seldom seen in high grade. This lightly abraded orange-gold specimen shows AU sharpness on the design elements but the luster is somewhat dimmed by the noted cleaning. NGC ID# 7K8F, PCGS# 7991

**1872 Three Dollar Gold, AU55  
Scarce-to-Rare Issue in All Grades**

**4191 1872 AU55 NGC.** The 1872 three dollar gold piece is an elusive issue, from a small mintage of just 2,000 pieces. This impressive Choice AU specimen shows just a touch of wear on the well-detailed design elements and the lightly abraded orange-gold surfaces exhibit prooflike reflectivity in the sheltered areas of the design. The overall presentation is most attractive. NGC ID# 25MV, PCGS# 7994

**1878 Three Dollar Gold, MS64  
Lustrous and Appealing**

**4192 1878 MS64 PCGS.** This lustrous Choice type coin displays sharper design definition than is often seen on the 1878 three dollar gold piece. The only mentionable weakness is on the center of the wreath bowknot. Characteristic of the issue, this piece has shimmering luster and outstanding eye appeal. An ideal type coin. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar Gold, MS64  
Shimmering, Unabraded Surfaces**

**4193 1878 MS64 NGC.** This is a well-struck near-Gem with remarkably unabraded surfaces and luminous, shimmering mint luster. Under a loupe, some faint evidence of contact on the cheek and in the fields is all that prevents Gem classification. The peach-gold surfaces are eye-appealing, and this is easily a high-end coin for the grade. Perfect for type purposes. NGC ID# 25MZ, PCGS# 8000

**1882 Three Dollar, MS61  
Only 1,500 Pieces Produced**

**4194 1882 MS61 PCGS.** The three dollar gold series is popular with collectors not only because of the unusual denomination, but also because of the almost universally low mintages; very few issues were struck in any substantial numbers. Only 1,500 strikes for circulation were produced of the 1882. This is a reddish-lilac tinted example that displays the often-seen moderate reflectivity in the fields. Very few post-strike defects are seen on this piece. NGC ID# 25N5, PCGS# 8004

**1887 Three Dollar, Prooflike MS61**  
Attractive for the Grade

**4195 1887 MS61 PCGS.** Deeply prooflike fields produce incredible eye appeal on this Mint State 1887 three dollar gold piece, a common characteristic of this denomination from the 1880s due to the low mintages of the period. The 1887 boasts a mintage of only 6,000 coins, but it was well-saved at the time of issue. This is a collectible MS61 example with remarkably few significant abrasions and strong eye appeal for the grade. The strike is sharp and yellow-gold coloration encompasses each side. NGC ID# 25NA, PCGS# 8009

**1887 Three Dollar Gold, MS63+**  
Lustrous Orange-Gold Example

**4196 1887 MS63+ PCGS.** From a mintage of 6,000 pieces, the 1887 three dollar gold piece is surprisingly difficult to locate in both circulated and Uncirculated grades. Only 140 to 180 Uncirculated coins are believed known today. This example has light orange-gold surfaces and the usual mint frost that is interspersed with semiprooflike reflectivity. A few small marks are scattered over each side.  
Ex: Long Beach Signature (Heritage, 9/2011), lot 4285, realized \$4,600; New York Signature (Heritage, 12/2011), lot 4526, realized \$6,900. NGC ID# 25NA, PCGS# 8009

## EARLY HALF EAGLES

**4197 1800 BD-5, High R.3 — Damaged — ANACS. XF 45 Details.** Bass-Dannreuther Die State d/a. An early die state for the variety, which is seldom seen without die cracks on both the obverse and reverse. Both feet of the A touch the nearby claw, and field star 13 touches the eagle's neck. This example displays myriad small marks and some surface roughness and pitting that may be environmental damage. Pleasing deep, brassy-gold color remains, with XF sharpness. The BD-5 variety is among the more readily available 1800 varieties, but certainly not in this early die stage, and desirable as such.

**1809/8 BD-1 Half Eagle, AU Details**  
Incredibly Sharp

**4198 1809/8 BD-1, High R.3 — Repaired — PCGS Genuine. AU Details.** Bass-Dannreuther Die State b/b, cracked through the left-hand stars. Only one die variety is known for the 1809 half eagle, showing a clear 9/8 overdate feature. To the benefit of collectors, a large number of 1809/8 half eagles survive — as many as 325 coins, according to John Dannreuther in *Early U.S. Gold Coin Varieties*. However, date and type collector demand keeps many high-grade examples off the market in private collections. This AU-level coin has all the detail of a near-Mint piece and likely would have earned an AU58 grade at least were it not repaired. Both sides are granular — etched in a fashion that resembles the sandblast matte proof finish of the early 20th century. The effect of the surface alteration is that any abrasions on the coin are eradicated. However, the sharpness of the design is in and of itself appealing.

**1813 BD-1 Half Eagle, AU Details**  
Attractively Lustrous

**4199 1813 BD-1, R.2 — Edge Damage — NCS. AU Details.** Bass-Dannreuther Die State a/a, unclashed. This is the more plentiful 1813 Capped Head Left variety, and it is a popular type coin as such. This is one of the most appealing Details-graded 1813 half eagles that we have seen. Each side is well-detailed and lustrous with rich tangerine-orange and peach-gold hues in the protected areas. The only mentionable surface imperfections visible are a couple of curved pinscratches in the right obverse field. NCS notes edge damage. The edge is hidden by the holder insert, although a loupe reveals what may be rim damage on the obverse below the date. NGC ID# 25PM, PCGS# 519907 Base PCGS# 8116

## CLASSIC HALF EAGLES

**4200 1834 Plain 4 AU55 PCGS. Breen-6502, McCloskey 2-A, R.1.** A lemon-gold introductory-year type representative. The strike shows blending on the forehead curls and vertical shield stripes, but luster illuminates design elements, and no marks are of any import. NGC ID# 25RR, PCGS# 8171

**4201 1834 Plain 4 AU55 PCGS. Breen-6501, McCloskey 3-B, R.1.** A pumpkin-gold first-year Classic five with partial glowing luster in the recesses. Wear is slight, and the eye appeal is attractive. Mentionable marks are confined to a single horizontal line on the cheek. The unevenly spaced date indicates the digits were separately entered. NGC ID# 25RR, PCGS# 8171

**1834 Half Eagle, MS60**

Plain 4, Vertical Die Crack on Cheek

- 4202 1834 Plain 4 MS60 NGC.** McCloskey 3-B, R.1. A vertical die crack extends downward from the upper left corner of the eye to the cheek and chin on this obverse die. This Mint State piece has satiny yellow-gold luster and trivial, grade-consistent marks. McCloskey 3-B is one of the usually encountered varieties of 1834 Classic Head half eagles. NGC ID# 25RR, PCGS# 8171

**1834 Classic Five, MS61**

Plain 4, Second Head

- 4203 1834 Plain 4 MS61 NGC.** Breen-6502, McCloskey 4-C, R.2. Second Head. A scarcer die variety with a Block 8 in the date and the 4 positioned very close to the bust. A sun-gold first-year gold type coin with pleasing sharpness and substantial luminous luster. A loupe reveals hair-thin marks at the base of the nose and a subdued abrasion beneath OF.

Ex: Baltimore ANA Signature (Heritage, 8/2008), lot 2973; FUN Signature (Heritage, 1/2012), lot 6328; Long Beach Signature (Heritage, 6/2017), lot 4803. NGC ID# 25RR, PCGS# 8171

- 4204 1837 AU50 NGC.** Breen-6513, McCloskey 3-C, R.4. The usual 1837 half eagle has a Large Date with a Block 8, but the scarce McCloskey 3-C has a Small Date with a Script 8. The Guide Book refers to the two varieties, though it does not provide a separate line entry. This straw-gold representative displays light wear and lacks relevant marks.

Ex: Goshen Collection (Stack's, 2/1978), lot 1102, which realized \$180. NGC ID# 25RZ, PCGS# 8175

- 4205 1838 AU58 NGC.** Breen-6514, McCloskey 1-A, R.2. Large Arrows, Small 5. Original green-gold toning drapes this lightly circulated Classic type coin. Luster dominates the borders, eagle, and curls. Small marks are scattered, and the obverse field is slightly granular near the L in LIBERTY. NGC ID# 25S4, PCGS# 8176

- 4206 1838 — Graffiti — PCGS Genuine. Unc Details.** McCloskey 1-A, R.2. Large Arrows, Small 5. The letter H has been lightly pinscratched east of the date. Otherwise, this sharply struck and lustrous final-year Classic half eagle is only minimally abraded. Sun-gold centers are bounded by chestnut borders.

## LIBERTY HALF EAGLES

- 4207 1839 AU55 NGC.** A boldly struck example with glossy pumpkin-gold surfaces. A mark on Liberty's jaw merits mention, but field abrasions are few. Luster fills the legends, outlines the stars, and emerges from the curls and plumage. A single year subtype with a sleepy-eyed Liberty. NGC ID# 25S7, PCGS# 8191

**4208 1839-C — Cleaned — NGC Details. XF Variety 1.** The 1839-C is important among Charlotte gold as the only Liberty Head half eagle struck with the mintmark on the obverse. The Charlotte and Dahlonega Mints, in 1838, were the first branch mints to strike this denomination. The mintmark was placed on the obverse above the date for the Classic Head type, and that position was carried over to Gobrecht's Liberty Head design in 1839. In 1840, the mintmark was moved to the reverse, where it remained. This 1839-C half eagle shows mild strike softness on Liberty's hair curls and the border stars but is sharp on the eagle. The bright yellow-gold surfaces are cleaned and lightly abraded. NGC ID# 25S8, PCGS# 8192

- 4209 1840-O Narrow Mill AU55 NGC.** Variety 3. Small O mintmark. An almond-gold Choice AU example of this early and lower mintage New Orleans issue. The strike is above average, and mentionable contact is limited to a cluster of wispy marks west of the eagle's neck. Census: 31 in 55, 45 finer (1/19).  
Ex: A.J. Amato Collection, Part II (New England Rare Coin Auctions, 11/1978), lot 1473, which realized \$350. NGC ID# 25SK, PCGS# 8200

**1841 Half Eagle, Semiprooflike AU58  
Rarely Offered This Fine**

- 4210 1841 AU58 NGC.** An accurately graded near-Mint coin with semiprooflike fields and sharp design elements. Scattered surface chatter accompanies trivial high-point friction on the devices, and each side has pleasing straw-gold color. The 1841 half eagle is rare this fine, and higher-grade pieces are seldom seen. Census: 13 in 58, 18 finer (1/19).

Ex: Greater New York Convention Sale (Stack's 5/1978), lot 1487. NGC ID# 25SN, PCGS# 8202

**1845 Five Dollar, MS62  
Smooth, Attractive Surfaces**

- 4211 1845 MS62 PCGS.** The mintage was large for a mid-1840s half eagle (417,099 pieces), yet Uncirculated examples of the 1845 Philadelphia five are scarce. This sharply struck MS62 has impressive, finely grained fields and strong eye appeal. The coin shows only a few tiny marks, except for one small but notable scrape above the eagle's head that, no doubt, influences the assigned grade. All else is sharp and lustrous. Flashy orange-gold color with deep-orange accents suggest an even finer Mint State designation. Population: 21 in 62 (2 in 62+), 21 finer (2/19). NGC ID# 25TB, PCGS# 8223

4212 1845-D XF40 NGC. CAC. Variety 13-H. Original peach-gold and olive-green toning embrace this lightly circulated and minimally marked Dahlonega type coin. A premium bid will be required to secure the present lot for its next fortunate owner. Certified in a prior generation holder. CAC: 4 in 40, 22 finer (1/19). NGC ID# 25TC, PCGS# 8224

4213 1845-D — Altered Surfaces — PCGS Genuine. AU Details. Variety 13-H. As perhaps the most readily available Dahlonega half eagle from the 1840s in circulated conditions, the 1845-D makes a good D-mint type coin. This example is sharply defined with About Uncirculated details. We note light hairlines throughout both sides that may account for the Altered Surfaces designation, while pleasing brassy-gold color covers fields that are remarkably free of abrasions or marks.

4214 1849-C — Cleaned — PCGS Genuine. AU Details. Variety 1. Doug Winter considers the 1849-C “the most available Charlotte half eagle produced prior to 1850,” and this truth makes it an ideal choice for type collectors seeking a single C-mint representative. This AU-level coin displays straw-gold surfaces that are slightly bright from a mild cleaning. Strike weakness affects the hair curls around Liberty’s face and the eagle’s left (facing) leg and adjacent fletchings.

4215 1852-C XF40 NGC. Variety 2. Between 85% and 90% of all 1852-C half eagles are Variety 1, which shows the date entered northeast relative to Variety 2. On the rare Variety 2, the date is left-aligned with the bust tip and does not touch the bust. This pleasing caramel-gold Charlotte type coin is devoid of distractions. Housed in a former generation holder. NGC ID# 25UB, PCGS# 8251

**1854-O Half Eagle, AU58**  
Smooth, Reflective Fields

4216 1854-O AU58 NGC. Variety 1. The mintmark is almost entirely over the V in FIVE. The New Orleans Mint struck 46,000 half eagles in 1854, but most circulated extensively, as gold typically did in the South prior to the Civil War. Uncirculated examples of this issue are rare, and high-end AU coins are scarce. This near-Mint coin boasts remarkably smooth yellow-gold surfaces with moderate reflectivity in the protected portions of the fields. There is some minor strike softness on the hair curls around Liberty’s face, but the coin is otherwise well-defined. Census: 37 in 58, 11 finer (2/19). NGC ID# 25UM, PCGS# 8259

4217 1856-C — Scratches, Cleaned — NGC Details. AU. Variety 1. In *Gold Coins of the Charlotte Mint*, third edition, Doug Winter considers the 1856-C “underrated and undervalued.” The Southern gold expert estimates the survivorship at only 150 to 200 coins in all grades. This AU-level coin displays impressively sharp detail and has little evidence of wear aside from the rub produced by a light cleaning. Hairline scratches are apparent beneath a loupe, but there is one vertical scrape in the left obverse field that is individually mentionable. NGC ID# 25UW, PCGS# 8267

**1856-O Half Eagle, AU50**  
Scarce New Orleans Issue

4218 1856-O AU50 NGC. Variety 2. Only 10,000 half eagles were struck at New Orleans in 1856, and the majority of the mintage was lost to attrition. The date is scarce overall, and in Mint State it is rare. This About Uncirculated coin displays even honey-gold color and bold detail. No major abrasions are seen. Census: 6 in 50, 23 finer (1/19). NGC ID# 25UY, PCGS# 8269

4219 1861 MS61 NGC. The 1861 is one of the more frequently encountered No Motto fives with a substantial mintage of 688,150 pieces. The grade is limited only by scattered, tiny field chatter since the strike and luster could hardly be sharper/stronger. Bright, sun-gold color makes this coin appear mint-fresh and a great selection for No Motto type. NGC ID# 25VK, PCGS# 8288

**1875-CC Five Dollar, VF30**  
Elusive Carson City Issue, CAC

4220 1875-CC VF30 PCGS. CAC. Variety 2-C. A few VF-XF 1875-CC coins magically appeared in the mid-1990s to lessen the rarity of this challenging Carson City half eagle, yet it remains popular in all grades and nearly unknown in full Mint State condition. This solid VF example is smoothly worn with weakly struck centers (as usual for the issue). Deep, orange-gold coloration and CAC endorsement attest to the coin’s substantial eye appeal and overall quality. Population: 10 in 30, 49 finer. CAC: 2 in 30, 7 finer (1/19). NGC ID# CFHH, PCGS# 8337

4221 1876-S — Cleaned — NGC Details. Fine. San Francisco concentrated on double eagle production in 1876. The facility struck only 4,000 half eagles, and none were saved by collectors until many years later. NGC has certified just one example as Mint State, and it is likely that fewer than 100 pieces have survived. This slightly glossy apricot-gold representative displays a diagonal mark near star 4. NGC ID# 25WY, PCGS# 8341

**1879-CC Half Eagle, AU50  
Sharp Strike, Light Wear**

**1890-CC Five Dollar, MS62  
Lustrous and Well-Struck**

**4222** 1879-CC AU50 PCGS. Variety 2-A. Scarce but available from a mintage of 17,281 pieces, the 1879-CC half eagle is the most obtainable Carson City half eagle from the 1870s. This is a bright-yellow representative, peppered with tiny marks and faint hairlines, but it has no heavy abrasions. The coin is sharply struck throughout the motifs. Light high-point wear accounts for the AU50 grade. Population: 17 in 50, 54 finer (1/19). NGC ID# 25X8, PCGS# 8349

**4223** 1879-S MS62 PCGS. The 1879-S half eagle is much scarcer in Mint State than its mintage of more than 426,000 coins would suggest. This piece displays lustrous, lightly abraded honey-gold surfaces. Strike weakness affects the hair curls around Liberty's face and the eagle's neck and talons. NGC ID# 25X9, PCGS# 8350

**4224** 1879-S MS63 NGC. CAC. A lustrous, boldly struck example of this scarce half eagle issue from San Francisco. A few wispy marks are found under magnification but they seem minimal for the Select Uncirculated grade assignment. Census: 22 in 63, 6 finer. CAC: 3 in 63, 2 finer (1/19).  
Ex: Long Beach Signature (Heritage, 9/2014), lot 4443, which realized \$1,997.50. NGC ID# 25X9, PCGS# 8350

**4225** 1880-S MS62+ Prooflike NGC. The field reflectivity is the hallmark of this Plus-graded 1880-S half eagle, as the date is otherwise plentiful in this grade. Prooflike pieces are rare. The strike is sharp, and the rose-gold surfaces offer modest cameo contrast. Scattered light abrasions determine the grade, but they are surprisingly unobtrusive. Census: 19 in 62 (1 in 62+ Prooflike, 1 in 62 ★, 1 in 62 Deep Prooflike), 8 finer (1/19). NGC ID# 25XC, PCGS# 78353

**4226** 1881/1880 FS-301 MS61 NGC. The faint vertical vestige of an underdigit 0 is above the right foot of the final 1 in the date. The 188 is repunched south. The 1881 is common, but the 1881 overdate is scarce in Mint State. This butter-gold example has a good strike and the expected number of individually small abrasions. Census: 16 in 61, 33 finer (2/19). NGC ID# 25XD, PCGS# 145714 Base PCGS# 8355

**4227** 1890 AU58 NGC. A lustrous, semiprooflike near-Mint example of the 1890 half eagle, surviving from a mintage of only 4,240 pieces. Some strike weakness affects the hair curls around Liberty's face and the eagle's neck, but grade-limiting abrasions are minimal. Census: 23 in 58, 21 finer (1/19). NGC ID# 25Y2, PCGS# 8375

**4228** 1890-CC MS62 PCGS. Variety 1-A. Scattered light abrasions determine the grade of this 1890-CC half eagle, but none are individually mentionable. Satiny yellow-gold luster illuminates sharp design elements, and eye appeal is pleasing. The 1890-CC comes from a mintage of 53,800 coins, and survivors grading finer than the current example are scarce. NGC ID# C5XF, PCGS# 8376

**4229** 1891-CC MS61 NGC. Variety 2-A. The flag of the second 1 in the date is repunched. An attractive pumpkin-gold example of the popular Carson City type issue. No marks are consequential, and luster is effusive throughout the margins and motifs. NGC ID# 25Y5, PCGS# 8378

**1892-CC Half Eagle, MS62  
Difficult to Upgrade, Late-Date Issue**

**4230** 1892-CC MS62 PCGS Gold Shield. Variety 1-A. With 82,968 pieces struck, the 1892-CC is much scarcer than the preceding 1891-CC, which has a mintage in excess of 200,000 coins. Anything finer than this softly lustrous MS62 representative is conditionally rare. Each side is boldly struck over the centers with light chatter in the fields. A pleasing Carson City half eagle. Population: 48 in 62 (2 in 62+), 19 finer (1/19). NGC ID# 25Y7, PCGS# 8380

**1893-CC Five Dollar, MS61  
Final-Year Carson City Issue**

**4231** 1893-CC MS61 NGC. Variety 1-A. Abrasions are small and infrequent on this Uncirculated Carson City eagle, which usually comes heavily marked and abraded. Mint luster intensifies at the margins across frosted, wheat-gold surfaces. Always popular as the final-year CC eagle, this coin offers great eye appeal for the assigned grade and a razor-sharp strike, with above-average quality. NGC ID# 25YB, PCGS# 8384

4232 1893-O MS62 PCGS. Variety 1. Fine peripheral die cracks on both sides and date placement identify this New Orleans half eagle variety. Lustrous yellow-gold surfaces reveal tinges of deeper orange color in the centers, with pleasing sharpness overall. Light, scattered abrasions determine the grade. Population: 56 in 62 (1 in 62+), 17 finer (1/19). NGC ID# 25YC, PCGS# 8385

4233 1899-S MS64+ PCGS. CAC. This otherwise plentiful San Francisco issue is scarce in MS64 and rare finer. Offered here is a coveted Plus-graded, CAC-approved near-Gem with outstanding luster and eye appeal. The strike is sharp and luster is frosty. On the obverse, rich orange-gold interiors cede to lighter yellow-gold margins, while the reverse displays greenish-gold and rose interiors amid butter-gold borders. Population: 68 in 64 (11 in 64+), 14 finer. CAC: 15 in 64, 3 finer (2/19). NGC ID# 25YT, PCGS# 8399

**1900 Five Dollar, MS66  
Two Coins Finer at PCGS**

4234 1900 MS66 PCGS. From a mintage of 1.4 million coins, the 1900 five dollar gold piece is one of the most plentiful issues in the series. However, it is much more elusive than one might expect at the MS66 grade level, and only a few coins are known finer. Luminous yellow-gold surfaces radiate frosty mint luster throughout. Bold and expectedly clean, particularly on the cheek. Population: 13 in 66 (1 in 66+), 2 finer (1/19). NGC ID# 25YV, PCGS# 8400

**1903 Five Dollar, MS66  
High-End Condition Rarity**

4235 1903 MS66 PCGS. Like most 20th century Liberty Head issues, the 1903 five is a plentiful type coin issue in most grades. However, it is conditionally rare in MS66 and almost uncollectible any finer. This Premium Gem is sharp and frosted with vibrant peach-gold luster that shimmers beneath a light. The surface preservation is nearly flawless. Population: 15 in 66, 1 finer (2/19). NGC ID# 25ZZ, PCGS# 8407

4236 1903-S MS65+ NGC. Brilliant and lustrous with radiant sun-gold surfaces, this richly frosted 1903-S will highlight any collection of 20th century gold. Any marks are microscopic and a needle-sharp strike exists throughout both sides. A high-end Gem example, poised near the next-highest grade, with great eye appeal. Census: 4 in 65+, 50 finer (1/19). NGC ID# 25Z3, PCGS# 8408

## INDIAN HALF EAGLES

**1908 Indian Half Eagle, MS64+  
Frosty Luster, CAC Endorsed**

4237 1908 MS64+ PCGS. CAC. A Plus-graded, CAC-endorsed first-year coin for the type collector. Frosty yellow-gold luster illuminates well-struck design elements on the attractive 1908 Indian Head five. The fields show only a few trivial marks. Available overall, the 1908 was well-saved at the time of issue due to the novelty of Bela Lyon Pratt's sunken relief design. NGC ID# 28DE, PCGS# 8510

4238 1908-S AU55 NGC. Olive-gold color is an unusual characteristic for a 1908-S, yet it is dispersed evenly throughout both sides of this Choice About Uncirculated example. Light wear and a few small marks account for the assigned grade. Subdued mint luster glows from the deepest recesses of the incuse design. NGC ID# 65K3, PCGS# 8512

4239 1909-D MS64 PCGS. CAC. The mintmark tilts to the left on this piece. More than 3.4 million half eagles were struck at Denver in 1909, making this issue plentiful and popular among type collectors. The CAC-approved MS64 coin displays sharp details and satiny honey-gold luster. Light contact marks are visible with a loupe. NGC ID# 28DJ, PCGS# 8514

4240 1909-D MS64 NGC. CAC. The luminous surfaces of this CAC-approved near-Gem display rich orange-gold luster with tinges of pale greenish color in the fields. The strike is sharp and no individually significant abrasions are apparent. The 1909-D is plentiful and popular as a type coin, although it is seldom found finer than the present coin. NGC ID# 28DJ, PCGS# 8514

4241 1911 MS64+ PCGS. This is a well-struck piece with luminous original luster and greenish-gold and yellow color. Only a few small abrasions are evident beneath a loupe, earning this piece the coveted Plus designation from PCGS. NGC ID# 28DP, PCGS# 8520

4242 1911-D AU50 NGC. The low mintage 1911-D is typically a five-figure purchase in Mint State, but lightly circulated examples are much more affordable. The mintmark has low relief but its outline and interior are evident. The almond-gold surfaces display only infrequent minor marks. NGC ID# 28DR, PCGS# 8521

**1911-D Five Dollar Indian, AU58  
Fifth Scarest Issue in the Series**

4243 1911-D AU58 NGC. Always noteworthy because of the low mintage of only 72,500 pieces, the 1911-D ranks fifth in overall scarcity out of the 24 issues in the five dollar Indian series. The surfaces are bright and exhibit deeper reddish-gold and lilac toning over each side. Well struck also with no obvious or mentionable abrasions. NGC ID# 28DR, PCGS# 8521

**4244** 1913 MS64 PCGS. A slightly better date in high grade, the 1913 Indian half eagle is seldom found in Gem condition. This collectible near-Gem displays a bold strike and original peach-gold luster that glistens on each side. No major abrasions are present. NGC ID# 28DT, PCGS# 8525

**4245** 1914 MS63 PCGS. A slightly better date in high grade. This Select 1914 half eagle displays bright brass-gold luster and well-struck design elements. Light field scuffs are all that limit the grade, as no singular abrasions are noted. NGC ID# 28DU, PCGS# 8527

**4246** 1914-D MS63 PCGS. An attractive Select example of this popular branch mint issue, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate vibrant mint luster from both sides. Eye appeal is outstanding. NGC ID# 28DV, PCGS# 8528

#### 1915 Half Eagle, Sharp MS64+

**4247** 1915 MS64+ PCGS. The headdress and eagle's feathers are tack-sharp on this honey-gold half eagle. Soft mint luster glistens over each side. There are a couple of minute ticks on and around the cheek and a mark through the E in WE, which must be the only flecks preventing a full Gem assessment. NGC ID# 28DX, PCGS# 8530

**4248** 1916-S MS62 PCGS. The San Francisco Mint struck 240,000 half eagles in 1916, the only mint to produce this denomination that year. Examples are sought-after in all grades. This piece is quite a bit more appealing than the MS62 grade suggests, showing satiny peach-gold surfaces with delicate olive tinting in the fields and on the high points of the design. No singular abrasions are worthy of mention. NGC ID# 28DY, PCGS# 8532

### LIBERTY EAGLES

#### 1839/8 Ten Dollar, AU Details Large Letters, Type of 1838

**4249** 1839/8 Large Letters — Scratched, Cleaned — ANACS. AU Details. Net XF40. Type of 1838, with a more ornate Liberty portrait than is found on subsequent issues. Liberty's hair style is different, and the curvature of the bust truncation is more pronounced. This short-lived subtype is popular in all grades. The present coin is well-detailed but unnaturally bright from a vigorous cleaning. A short scratch is evident behind Liberty's eye, and there is a minor rim bump at 4 o'clock on the reverse.

Ex: Central States Signature (Heritage, 5/2004), lot 9717. NGC ID# 54XF, PCGS# 8576

#### 1843 Ten Dollar, Choice AU Breen-6861, Triple-Punched Date

**4250** 1843 AU55 PCGS. Breen-6861. The bases of all four date digits show slight tripling. The 1843 is an underappreciated Philadelphia issue. From a mintage of only 75,462 pieces, the grading services have certified fewer than 300 pieces, including many resubmissions over the past three decades. A well-defined sun-gold Choice AU example. The borders display noticeable luster, and moderate marks are distributed. Population: 5 in 55, 4 finer (2/19). NGC ID# 262P, PCGS# 8588

**4251** 1844-O XF45 NGC. Variety 5. A unique proof 1844-O ten exists, but most New Orleans collectors must settle for a business example of the issue. The present almond-gold Choice XF eagle retains most of its plumage detail, and marks are minor except near the arrowheads and on the obverse rim at 3 o'clock. NGC ID# 554G, PCGS# 8591

#### 1847 Liberty Ten, MS61 Elusive Issue in Mint State

**4252** 1847 MS61 NGC. Despite a substantial mintage of 862,258 pieces, the 1847 Liberty eagle is an elusive issue in all Mint State grades today. This impressive MS61 example offers well-detailed design elements, with just a touch of the usual softness on some star centers. The yellow and rose-gold surfaces show the expected number of minor contact marks and chatter for the grade, with traces of prooflike reflectivity clinging to protected areas. Census: 33 in 61 (1 in 61+, 1 in 61★), 14 finer (2/19). NGC ID# 262Z, PCGS# 8597

**4253** 1850 Small Date XF45 PCGS. A Choice XF example of the scarcer Small Date variety, with some light wear on the well-detailed design elements and typically abraded orange-gold surfaces that retain traces of original mint luster in sheltered areas. NGC ID# 2638, PCGS# 8604

**1850-O Ten Dollar, AU53**  
**Attractive and Partially Lustrous**

**4254** 1850-O AU53 PCGS. CAC. Variety 2. Original luster clings to the protected regions of the fields on this About Uncirculated 1850-O eagle, complementing attractive olive-gold and orange patina. Detail is sharp on the devices despite light wear. The 1850-O is scarce this fine, and it is rare with CAC endorsement. Only a few Mint State pieces are known. Population: 15 in 53, 23 finer. CAC: 2 in 53, 7 finer (1/19). NGC ID# 2639, PCGS# 8605

**4255** 1851-O AU55 NGC. Variety 2. Increased gold finds in California resulted in increased gold coinage production in the New Orleans mint in 1851. The result is the 1851-O is the second most frequently encountered No Motto ten. The surfaces on this piece are definitely original, and significant mint luster remains, but each side is choppy with abrasions. Rich green-gold color with occasional dabs of reddish patina. NGC ID# 263B, PCGS# 8607

**4256** 1851-O AU55 NGC. Variety 1. The apricot-gold surfaces are well defined and show ample luster. Minor marks are distributed but none are of individual importance. A shield ring is present above the second vertical stripe, as always for this New Orleans type issue. Ex: A.J. Amato Collection, Part II (New England Rare Coin Auctions, 11/1978), lot 1579, which realized \$300. NGC ID# 263B, PCGS# 8607

**4257** 1853 AU58 PCGS. Just a trace of wear shows on the high points of the well-detailed design elements of this impressive near-Mint specimen and the lightly abraded orange-gold surfaces retain much of their original mint luster. Population: 44 in 58, 37 finer (1/19). NGC ID# C82G, PCGS# 8610

**4258** 1854-O Large Date XF45 PCGS. Variety 2. The oversized date is unmistakable on this New Orleans issue, filling the area beneath the bust truncation, with the 1 just touching the bust tip. Bright, yellow-gold surfaces show light field chatter and small abrasions, with traces of mint luster among the stars. Struck from a late die state, the coin has brief die erosion outside of the left-hand stars and a bold die crack to the hair bun between stars 10 and 11. The strike is soft at the centers but sharp elsewhere, with minor wear for the Choice XF level. Population: 14 in 45, 80 finer (1/19). NGC ID# 263J, PCGS# 98614

**4259** 1854-S Misplaced Date, FS-301, XF45 PCGS. The Cherrypicker's variety is unlisted on the holder. A popular first-year San Francisco issue. Some light wear is evident on Liberty's hair and some star centers, but most interior detail remains intact. The lustrous orange-gold surfaces exhibit the expected number of minor abrasions for the grade. NGC ID# 384M, PCGS# 145725 Base PCGS# 8615

**4260** 1856-S AU53 PCGS. CAC. The Medium S mintmark is placed further left than usual, and is centered over the space between the E and N in TEN. This pleasing AU representative exhibits scattered marks as expected for the grade. Considerable luster remains visible on both sides. Population: 40 in 53, 55 finer. CAC: 6 in 53, 20 finer (2/19). NGC ID# 263S, PCGS# 8621

**4261** 1860 XF45 PCGS. The 1860 Liberty ten is elusive in all grades, coming from a mintage of only 15,055 pieces. This collectible Choice XF example displays olive and orange-gold patina with well-defined devices. Scattered abrasions accompany light wear. Population: 26 in 45, 73 finer (1/19). NGC ID# 2644, PCGS# 8631

**4262** 1861 AU53 NGC. The blatant originality of this sharp olive-gold 1861 Liberty eagle earns it high marks as a No Motto type coin. Wear is light and there is light, uniform surface chatter on each side. Hints of luster remain in the protected regions of the fields. NGC ID# 2647, PCGS# 8633

**4263** 1861 AU55 NGC. The natural olive-gold and peach surfaces of this Choice AU example display a balance of natural patina and luster. The strike is sharp, and light wear produces only light, scattered abrasions on the surfaces, none of which are detrimental to eye appeal. NGC ID# 2647, PCGS# 8633

**4264** 1872 — Repaired — PCGS Genuine. VF Details. Among the unheralded Philadelphia Mint rarities of the 1870s, the 1872 ten dollar has a tiny mintage of 1,620 pieces. The few gold collectors of the era purchased proofs. PCGS estimates only 40 to 60 survivors. The present coin ranks among the most affordable examples, since the butter-gold surfaces have been thoroughly polished.

**4265** 1876-CC — Ex-Jewelry — PCGS Genuine. XF Details, Variety 1-A. As is the case with all Carson City tens from the 1870s, the 1876-CC is rare in all grades. From a mintage of 4,696 pieces, approximately 200 have survived. The present lemon-gold example has bright surfaces and exhibits myriad small marks associated with loose jewelry box storage.

**1879 Ten Dollar, MS63**  
**Luminous Original Surfaces**

**4266** 1879 MS63 PCGS. A scarce Select Mint State example of this better Philadelphia issue, showing a sharp strike and shimmering orange-gold mint luster. Surprisingly few abrasions are discernible for this grade. The 1879 Liberty ten is scarce in MS63 and rarely offered finer. Population: 35 in 63, 17 finer (1/19). NGC ID# 265M, PCGS# 8683

**1881-O Ten Dollar, AU55**  
**Scarce Any Finer**

**4267** 1881-O AU55 NGC. Variety 1. Only 8,350 Liberty eagles were struck at New Orleans in 1881, making this issue scarce in high grade today. The present Choice AU coin displays sharp detail with light friction over the high points of the devices and chatter in the fields. Each side retains moderate yellow-gold cartwheel luster. Census: 35 in 55, 49 finer (1/19).

Ex: Robert E. Branigan Estate (Bowers and Ruddy, 8/1978), lot 1559. NGC ID# 265Y, PCGS# 8693

**1881-O Ten Dollar, AU55  
Underrated O-Mint Issue**

**4268** 1881-O AU55 PCGS. Variety 1. Only 8,350 pieces were struck and most apparently entered circulation and stayed there. Only a few dozen AU examples are known. This is a bright example with glittering, semiprooflike fields (apparently the initial die polish had not worn off when this piece was struck). Sharply detailed with numerous small abrasions scattered over each side. Population: 21 in 55, 19 finer (2/19). NGC ID# 265Y, PCGS# 8693

**4269** 1885 MS63 PCGS. CAC. Although several small hoards or hoardlets of this date have appeared in recent years, nearly all of those coins are in lower Mint State grades. MS63 or finer examples are difficult to locate. This Select representative is frosty and fully lustrous with excellent eye appeal. The strike is bold and the surfaces are bright yellow. Population: 52 in 63, 14 finer. CAC: 6 in 63, 2 finer (1/19).

Ex: Los Angeles Signature (Heritage, 8/2009), lot 2600. NGC ID# 266D, PCGS# 8706

**4270** 1886-S MS64 PCGS. Just a touch of softness is evident on a few star centers, but this attractive Choice specimen is sharply detailed in other areas. The pleasing orange-gold surfaces are lustrous and lightly marked. Population: 47 in 64 (8 in 64+), 4 finer (1/19). NGC ID# 554Y, PCGS# 8709

**4271** 1887 MS62 PCGS. The ten dollar denomination was struck by the millions at Philadelphia during the early 1880s, but by 1887 the business mintage had declined to 53,600 pieces. The pleasing orange-gold surfaces of this impressive MS62 specimen are lustrous and appealing, with the expected number of minor contact marks for the grade. The design elements are well-detailed and eye appeal is outstanding. Population: 27 in 62, 8 finer (1/19). NGC ID# 266H, PCGS# 8710

**1887 Liberty Eagle, MS63  
Only Two Finer Coins at PCGS**

**4272** 1887 MS63 PCGS. Ex: Simpson-Hall. The 1887 Liberty eagle claims a business-strike mintage of 53,600 pieces and the issue is a major rarity in MS63 condition. This attractive Select example is sharply detailed in most areas, but a touch of softness shows on some star centers. The lustrous orange-gold surfaces are lightly abraded. Population: 6 in 63, 2 finer (2/19). NGC ID# 266H, PCGS# 8710

**4273** 1888-O MS62 PCGS. CAC. Variety 1. The New Orleans Mint coined 21,335 eagles in 1888, from two documented die pairs, although others may exist. This piece is from the more plentiful die pair, and exhibits frosty and fully brilliant yellow luster. The central details are strong with peripheral weakness that is especially evident on the obverse. PCGS has only certified 28 numerically finer examples (2/19). NGC ID# 266L, PCGS# 8713

**4274** 1889 AU53 NGC. A mere 4,440 circulation-strike eagles were produced in 1889, of which about 300 are estimated to survive in circulated grades. This well-detailed example boasts attractive reddish-gold color, including areas of deep toning at the upper-right and lower-left reverse. Minor marks scattered over each side. Housed in a former generation holder. NGC ID# 266N, PCGS# 8715

**4275** 1889 AU58 NGC. A surprise rarity in the Liberty Head series, the 1889 eagle has a mintage of just 4,440 pieces. It is the unquestioned key to the latter part of the long-running series, and joins several other rare, earlier issues that make the ten dollar gold series among the most formidable challenges in numismatics. This near-Mint example displays vibrant orange-gold surfaces, with only a few small ticks on the sharply struck and partially reflective surfaces. Census: 36 in 58, 61 finer (1/19). NGC ID# 266N, PCGS# 8715

**1890 Ten Dollar, MS63  
Underrated in This Grade**

**4276** 1890 MS63 PCGS. Softly frosted luster glistens on the orange-gold surfaces of this Select 1890 Liberty eagle. The strike is sharp, and only a few light, scattered abrasions prevent a finer grade from PCGS. The 1890 Liberty ten is rarely offered this well-preserved, and there are only two finer coins at PCGS and NGC combined. Population: 17 in 63 (1 in 63+), 2 finer (1/19). NGC ID# 266R, PCGS# 8717

**4277** 1890 MS61 Prooflike NGC. This piece is tied for the finest certified Prooflike 1890 Liberty eagle, and exhibits scattered marks in the mirrored fields. Sharp central devices are slightly lustrous and show a trace of field-to-device contrast. Census: 3 in 61 Prooflike, 0 finer (2/19). NGC ID# 266R, PCGS# 78717

**4278** 1891-CC MS61 NGC. Variety 2-B. The mintmark is wide, placed over the N in TEN. Yellow interiors cede to orange and occasionally copper-red at the margins on this lower-end Mint State Carson City eagle. Many wispy abrasions contribute to the grade but have little effect on the eye appeal.  
Ex: New York Signature (Heritage, 7/2002), lot 9329; FUN Signature (Heritage, 1/2012), lot 6553, which realized \$1,725. NGC ID# 266U, PCGS# 8720

**4279** 1891-CC MS61 NGC. Variety 1-A. As the most frequently seen CC ten, the 1891-CC is the logical choice for type purposes. Most of each side is lightly abraded, except for a prominent dig in the center of Liberty's cheek. Orange-gold color and sharply defined. NGC ID# 266U, PCGS# 8720

**4280** 1891-CC/CC FS-501 MS61 NGC. Variety 3-C. Repunching on both Cs in the mintmark is easily recognized by the curved tail of a secondary mintmark clearly visible at the bottom right of the primary mark. A short, spikelike die line from a dentil below the second 1 in the date confirms the obverse die for this *Cherrypickers'* variety. Attractive, rich-gold color and vibrant mint luster illuminate a sharp strike and mildly abraded surfaces. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

**4281** 1891-CC/CC FS-501 MS61 PCGS. Variety 4-C. Cherry-red accents add bits of color to lightly abraded, formerly prooflike fields of this bright and lustrous, medium-gold Carson City ten. A curved spike from the underside of Liberty's chin and bold repunching of the mintmark characterize this *Cherrypickers'* variety. Considerable reflectivity remains despite field chatter and scattered small bagmarks. NGC ID# 266U, PCGS# 145728 Base PCGS# 8720

4282 1894-S AU58 PCGS. CAC. A trace of wear is noted on the high points of this highly lustrous honey-gold eagle that survives from a mintage of only 25,000 coins. This piece has myriad surface marks as expected at this grade level. An important opportunity for the advanced collector. Population: 11 in 58, 23 finer. CAC: 1 in 58, 4 finer (2/19). NGC ID# 2677, PCGS# 8731

4283 1895-O MS62+ PCGS. Variety 2. The 1895-O is an available late-date ten from New Orleans and is frequently available in mint condition, although it is invariably extensively abraded. This is a bright, satiny example with numerous, small marks scattered about. Original surfaces. NGC ID# 2679, PCGS# 8733

#### 1896-S Ten Dollar, MS62+ Rarely Offered So Fine

4284 1896-S MS62+ PCGS. CAC. A sharp, CAC-endorsed MS62+ coin with frosty original luster and rich peach-gold and orange hues. Only light surface grazes limit the grade, and eye appeal exceeds expectations for the MS62 level. The reverse shows minor strike doubling on the mintmark and peripheral legends. The 1896-S ten is scarce in this grade and rare finer. Population: 32 in 62 (1 in 62+), 10 finer. CAC: 2 in 62, 1 finer (1/19). NGC ID# 267C, PCGS# 8736

4285 1901 MS64+ PCGS. A Plus-graded Choice example of this popular type issue, from a large mintage of 1.7 million pieces. This coin exhibits sharply detailed design elements and lustrous orange-gold surfaces on both sides. A short scratch on Liberty's cheek and another in the left reverse field are the only marks of note. NGC ID# 7LHF, PCGS# 8747

#### 1901 Liberty Eagle, MS66 Rarely Seen Finer

4286 1901 MS66 PCGS. Available in lower grades, the 1901 Liberty eagle is conditionally scarce in MS66 and decidedly rare finer. This Premium Gem is razor-sharp and beautifully preserved, as expected for the grade. Original sun-gold mint luster shimmers as it cartwheels around each side, producing remarkable visual appeal. Population: 46 in 66 (6 in 66+), 1 finer (1/19). NGC ID# 7LHF, PCGS# 8747

4287 1901-S MS64 PCGS. CAC. This attractive Choice example displays well-detailed design elements, with just a trace of softness on the neck curls. Some faint peripheral die cracks show on both sides and the lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 267S, PCGS# 8749

4288 1901-S MS65 PCGS. A well-preserved Gem representative of this popular type issue, from a mintage of 2.8 million pieces. This coin exhibits sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC ID# 267S, PCGS# 8749

#### 1901-S Ten Dollar, MS66 Beautifully Preserved and Lustrous

4289 1901-S MS66 PCGS. The 1901-S, a plentiful early 20th century issue among Liberty Head tens, is popular as type coin. It often comes with fantastic luster and incredible eye appeal, as is demonstrated by the present coin, a Premium Gem with a radiant cartwheel effect. This piece is sharp and displays luminous, unabraded surfaces. Rich orange-gold interiors cede to brighter wheat-gold borders. PCGS lists just two finer representatives (2/19). NGC ID# 267S, PCGS# 8749

4290 1903-O MS63 PCGS. Variety 2. An early die state example, without the cracks through the date and below the final S in STATES. The 1903-O Liberty eagle is scarce in this grade, and PCGS has seen only 25 finer submissions (1/19). Offered here is a satiny lemon-gold example with sharp detail and well-preserved surfaces. NGC ID# 267W, PCGS# 8753

4291 1903-O MS63 PCGS. Variety 2. The 1903-O is the most often seen O-mint ten. The strike on this piece is complete throughout and the surfaces show only slight evidence of abrasions. Satiny mint luster. NGC ID# 267W, PCGS# 8753

4292 1906-S MS63 PCGS. The 1906-S Liberty eagle is an elusive issue in MS63 condition. This attractive Select specimen offers sharply detailed design elements and lightly marked orange-gold surfaces, with vibrant mint luster throughout. Population: 38 in 63, 10 finer (1/19). NGC ID# 53FB, PCGS# 8762

4293 1907 MS64 PCGS. Vibrantly coruscated and razor-sharp throughout, this near-Gem eagle is smooth and nearly mark-free. More than 1.2 million Liberty Head tens were struck — many exported, and in recent decades returned to the U.S. The Choice Uncirculated designation is easily justified, and its overall surface quality and eye appeal an even finer grade is possible. Both grading services report few Gem coins in relation to the number of survivors from this transitional issue. PCGS has seen but 39 numerically finer coins (1/19). NGC ID# 2688, PCGS# 8763

4294 Two-Piece 1907 Liberty and Indian Eagle Type Set, MS63 PCGS. The set includes a 1907 Liberty Head eagle and a 1907 No Motto Indian Head eagle, commonly graded MS63 and housed in a single two-coin holder with special gold foil labels. Both coins are lightly abraded, as is appropriate for the grade, and the Indian piece has a singular mark below the N in UNITED. Neither coin shows mentionable strike weakness. (Total: 2 coins)

### INDIAN EAGLES

4295 1907 No Motto MS63 PCGS. Collectors always like the 1907 No Motto ten dollar, representing the introductory issue in the series and a two-year No Motto type. The centers are almost always incomplete, but this Select piece is well-detailed with frosty honey-gold surfaces. NGC ID# 28GF, PCGS# 8852

4296 1907 No Motto MS63 PCGS. By the time Charles Barber was done modifying the Saint-Gaudens eagle design, the triangular stops after the legends were gone, the rim was modified, as were the headdress feathers and other elements of the design. This brassy-gold MS63 example displays scattered marks and vibrant mint luster. The feather tips are sharp at the expense of central elements, which show a bit of weakness at Liberty's temple and the eagle's shoulder. NGC ID# 28GF, PCGS# 8852

- 4297** 1907 No Motto MS63 NGC. Ex: Rive d'Or Collection. A lustrous, bright brass-gold Select example of the 1907 No Periods Indian eagle, with well-struck design elements and light, grade-appropriate abrasions. The No Periods 1907 ten is a popular No Motto type coin in all grades. NGC ID# 28GF, PCGS# 8852
- 4298** 1907 No Motto MS64 PCGS. A vibrantly lustrous Choice example of this first-year No Motto type coin, showing a bold strike and rich honey-gold color. Only some light marks on the cheek and in the reverse field prevent Gem classification of this attractive Indian eagle. NGC ID# 28GF, PCGS# 8852
- 4299** 1907 No Motto MS64 NGC. To the untrained eye, this near-Gem 1907 Indian eagle is every bit as high quality as finer examples certified. However, a loupe reveals faint slide marks on Liberty's cheek that prevent a Gem designation. Lustrous surfaces yield yellow-gold luster and bold design elements. NGC ID# 28GF, PCGS# 8852
- 4300** 1908 No Motto MS62 PCGS. Glimmers of orange exist within the headdress, which displays a reasonably sharp strike and strong satin luster over attractive, honey-gold surfaces. Only a few minor marks are visible with the aid of a loupe. The 1908 is much scarcer than the 1907 for No Motto type, from a mintage of just 33,500 pieces. NGC ID# 28GG, PCGS# 8853
- 4301** 1908 Motto MS64+ PCGS. A sharp With Motto example of the 1908 Indian eagle, a first-year issue for the reverse type bearing IN GOD WE TRUST in the left field. This piece has satiny yellow-gold mint luster and only a few, unobtrusive abrasions. Finer examples of the issue are scarce. NGC ID# 28GJ, PCGS# 8859
- 4302** 1908-S AU55 NGC. The low mintage 1908-S is one of the few Indian ten issues with a higher NGC Census in AU than Mint State. The present almond-gold example shows only a hint of high point wear, along with ample luster and a smattering of inoffensive marks. Ex: Lighthouse Collection (Stack's, 6/1978), lot 911, which realized \$400. NGC ID# 28GL, PCGS# 8861
- 4303** 1909 MS63 PCGS. Sharply struck with vibrant, rich-gold color accented by attractive lemon-gold and rose accents, this gleaming 1909 offers strong eye appeal for the Select Uncirculated level. Finer Mint State coins are scarce, since bagmarks are present on nearly all 1909s. This example shows only a few small marks, mostly seen on the reverse, and a few grayish specks to confirm the natural surfaces. NGC ID# 28GM, PCGS# 8862
- 4304** 1909-D MS62 NGC. Although the 1909-D is generally considered to be an issue at the lower end of the Indian ten quality scale, this sharply struck example is brightly lustrous and frosted. Finely textured fields show a few light marks on the portrait, but no heavy or overly frequent abrasions. Rich golden color adds to the eye appeal. NGC ID# 28GN, PCGS# 8863
- 4305** 1909-D MS62 PCGS. The 1909-D is a scarce branch mint issue in the Indian ten series, with a mintage of just 121,540 pieces that seldom exceeds the MS63 level of preservation. This MS62 example is sharply struck for the issue, with glowing mint luster beneath fine-grained, wheat-gold fields and devices. Marks are limited to a few tiny ticks, with grayish "mint grime" on the high points that confirms the original surfaces. NGC ID# 28GN, PCGS# 8863
- 4306** 1909-S MS61 PCGS. Fine surface granularity contributes to bright mint luster that radiates from each side of this attractive 1909-S ten. A dusting of amber-gold patina adds to the eye appeal, with glimpses of vibrant yellow-gold beneath a sharp San Francisco strike. Bagmarks frequent nearly all examples of the issue, but they are less numerous here than the assigned grade implies. The mintmark is narrowly repunched outside the lower curve of S. NGC ID# 28GP, PCGS# 8864
- 4307** 1911 MS64 PCGS. A sharp strike captures the eye when viewing this well-produced, frosted Indian ten. Lustrous, yellow-gold surfaces show glints of pale-orange within central recesses and at the margins. There are no meaningful abrasions or marks, making the coin a Choice example of this readily available date, ideal for the type collector. NGC ID# 28GT, PCGS# 8868
- 4308** 1911-S AU53 PCGS. PCGS correctly identifies a few points of wear on this AU 1911-S ten, although a balance of luster in the fields retains a degree of luminance for the appealing wheat-gold surfaces. A few scattered marks are consistent with the grade. The 1911-S comes from a mintage of only 51,000 pieces and is scarce in high grade. NGC ID# 28GV, PCGS# 8870
- 4309** 1912-S MS61 PCGS. One of the premier condition rarities of the Indian ten series, the 1912-S becomes scarce at the MS63 level and is rare any finer. This MS61 coin is sharper than most of its grade in strike, color, and surface quality. Pleasing orange-gold coloration shows above-average luster for the grade. A few light marks are scattered across both sides. NGC ID# 269G, PCGS# 8872
- 4310** 1913 MS64 NGC. The finely grained surfaces of this attractive 1913 feature a razor-sharp strike. A few tiny marks appear under scrutiny with a lens, yet this near-Gem more than lives up to its grade in quality. Lustrous, sun-glow-gold color completes the appeal of this ideal Indian ten for a type or date collection. NGC ID# 28GY, PCGS# 8873
- 4311** 1914 MS63 PCGS. The design elements of this impressive Select specimen are well-detailed and the lustrous orange-gold surfaces are lightly abraded, with a thin vertical scratch near Liberty's chin the only mark of note. NGC ID# 28H2, PCGS# 8875
- 4312** 1914 MS63 NGC. Lustrous, medium-gold surfaces are finely granular and richly frosted for outstanding eye appeal. The 1914 is somewhat underrated among Philadelphia Indian ten issues. This Select Uncirculated example shows fewer marks than usually seen and displays a sharp strike, with excellent quality for the assigned grade. NGC ID# 28H2, PCGS# 8875
- 
- 1914-S Ten Dollar Indian, MS62  
Elusive in Mint Condition**
- 
- 4313** 1914-S MS62 NGC. The 1914-S Indian eagle claims a mintage of 218,000 pieces, but the issue is more elusive in mint condition than the substantial production figure would suggest. This attractive MS62 specimen offers well-detailed design elements, with just a trace of the usual softness on the eagle's shoulder. The lightly marked orange-gold surfaces are lustrous and appealing. NGC ID# 28H4, PCGS# 8877
- 
- 1914-S Ten Dollar Indian, MS62  
Challenging Issue in This Grade or Finer**
- 
- 4314** 1914-S MS62 NGC. CAC. Although 208,000 pieces were struck, few Mint State examples were set aside at the time of issue. This pleasing MS62 coin displays sun-gold patina and glowing mint luster that illuminates the well-struck devices. Several small marks are noted on Liberty's forehead, cheek, and neck, consistent with the assigned grade. NGC ID# 28H4, PCGS# 8877
-

1914-S Ten Dollar, MS63  
Better San Francisco Issue

4315 1914-S MS63 PCGS. The 1914-S is a better date in Uncirculated condition, and it is especially scarce finer than MS63. This collectible Select example displays frosty yellow-gold luster and sharp design elements. Scattered abrasions limit the grade, but a vibrant cartwheel effect is the chief visual attribute. Eye appeal is pleasing for the MS63 level. NGC ID# 28H4, PCGS# 8877

1914-S Indian Eagle, MS63  
Elusive Issue in High Grade

4316 1914-S MS63 PCGS. Despite the mintage of 208,000 pieces, the 1914-S Indian eagle is an elusive issue in high grade. This impressive Select specimen exhibits well-detailed design elements, with just a trace of the usual softness on the centers. The lustrous orange-gold surfaces are lightly marked. PCGS has graded 83 numerically finer examples (1/19). NGC ID# 28H4, PCGS# 8877

1926 Ten Dollar, MS65+  
Ultimate Saint-Gaudens Type Coin

4317 1926 MS65+ PCGS. The ultimate type coin in the Saint-Gaudens eagle series along with the 1932. This is a decidedly above-average Gem with glowing mint luster and warm yellow-gold color. The headdress, curls, and eagle's feathers and talons are sharp. A couple of ticks left of the date are the only ones seen. PCGS has graded 25 finer submissions (1/19). NGC ID# 28H9, PCGS# 8882

LIBERTY DOUBLE EAGLES

1850 Double Eagle, VF35  
First-Year Type Coin

4318 1850 VF35 NGC. This moderately worn, lightly abraded first-year double eagle will appeal to the type collector as much as the date collector, retaining most major details with pleasing olive-gold patina. Double eagles were not struck on the West Coast until 1854. Prior to the opening of the San Francisco Mint that year, gold mined in the California gold fields was often shipped by paddle wheel steamer to New Orleans and Philadelphia for coinage. NGC ID# 268F, PCGS# 8902

1850 Double Eagle, Choice XF  
Smooth and Partially Lustrous

4319 1850 XF45 NGC. Smooth, well-detailed surfaces on this Choice XF 1850 double eagle exhibit characteristic yellow-gold color, seen on many early double eagles that were struck from California gold. This piece retains elements of luster in the protected areas of the fields, and eye appeal is pleasing. NGC ID# 268F, PCGS# 8902

1850 Twenty Dollar, AU53  
Original Surfaces

4320 1850 AU53 NGC. Ex: Eureka Hoard. The surfaces on this first-year issue are unquestionably original. Each side displays remarkably deep green-gold color with peripheral accents of rose. The strike details are also surprisingly strong. A number of small, but individually insignificant abrasions are peppered across each side. For the collector who appreciates originality, this is a coin worthy of consideration. NGC ID# 268F, PCGS# 8902

**1851-O Liberty Double Eagle, AU Details  
Popular Branch Mint Type Coin**

**4321** 1851-O — Cleaned — PCGS Genuine. AU Details. Variety 2. From a substantial mintage of 315,000 pieces, the 1851-O Liberty double eagle is an available issue and a popular choice of type collectors. This impressive specimen shows just a trace of wear on the well-detailed design elements and the pleasing orange-gold surfaces are lightly abraded. Despite the noted cleaning, traces of prooflike reflectivity cling to the devices.

**4322** 1853 XF45 PCGS. Pleasing olive-gold patina joins scattered abrasions on this lightly circulated 1853 double eagle. A Gold Rush-era Philadelphia issue, struck prior to the opening of the San Francisco Mint. An excellent type coin. NGC ID# 268M, PCGS# 8908

**4323** 1853/1—3 AU53 NGC. VP-001, Breen-7161. This NGC VarietyPlus attribution cross references to an old Breen variety, which shows repunching on the 1 and the 3, revealing that the date on this die was originally entered with a noticeable upward slant to the right. This example displays partial luster and pleasing peach-gold surfaces. Scattered abrasions accompany the grade. NGC ID# 268M, PCGS# 8908

**4324** 1854 Small Date XF45 NGC. CAC. Ex: Granite Lady Hoard. An outstanding Small Date collector coin, this Choice XF 1854 double eagle is CAC endorsed and blatantly original in its surfaces. Each side displays well-detailed design elements and scattered abrasions consistent with light circulation. Hints of peach-gold luster emerge from the protected areas, complementing olive patina elsewhere. NGC ID# 268R, PCGS# 8911

**1855 Double Eagle, AU55  
Lustrous and Appealing**

**4325** 1855 AU55 NGC. This Type One Philadelphia coin will serve well to represent the No Motto design, being relatively smooth with natural straw-gold surfaces. Luster illuminates the protected areas and wear is light. The 1855 double eagle is elusive in the upper AU grades, and Mint State coins are rare. NGC ID# 268V, PCGS# 8914

**1855 Twenty Dollar, AU58  
Few Available Finer**

**4326** 1855 AU58 NGC. The 1855 double eagle is a rarity in Mint State, and even in AU58 it is elusive. This near-Mint coin displays sharp detail and original green-gold coloration with moderate luster remaining in the fields. The scattered abrasions scattered over each side are a familiar sight on AU-level Type One double eagles. Census: 82 in 58 (1 in 58+), 18 finer (2/19). NGC ID# 268V, PCGS# 8914

**4327** 1855-S AU55 NGC. The availability of the 1855-S double eagle was boosted by recoveries from the S.S. Central America. This Choice AU example has the appearance of coming from a more traditional source. Original wheat-gold luster is consistent with naturally stored Type One double eagles of this period, and five points of wear join a scattering of abrasions on each side that is not typical of shipwreck coins. Appealing for the grade and lustrous. NGC ID# 268X, PCGS# 8916

**4328** 1856 — Cleaned — PCGS Genuine. AU Details. Faint hairlines on the obverse of this sharp AU-level Type One double eagle earn a Cleaned designation from PCGS, although the surface appearance is more in line with the coin having been at one point wiped with a cloth — there is no obvious evidence of abrasive cleaning. The strike is sharp and frosty peach-gold luster illuminates each side. A few small abrasions are not bothersome.

**1858 Twenty Dollar, AU55  
Lustrous and Attractive**

**4329** 1858 AU55 NGC. Moderate luster remains in the fields on this Choice AU 1858 double eagle, an attractive Type One coin with bright yellow-gold surfaces. Scattered abrasions and a brush of high-point wear determine the grade. This Philadelphia issue is elusive in the upper AU grades, and Mint State pieces are out of reach for many collectors. NGC ID# 2697, PCGS# 8923

---

**1859-S Double Eagle, Lustrous AU58**

Rare Any Finer

- 4330 1859-S AU58 NGC.** This near-Mint State example retains a considerable amount of luster on its yellow-gold surfaces and has benefited from a good strike. Close examination reveals some scattered light marks, but these are not particularly distracting. This is a very rare issue in Mint State. NGC lists only 22 finer submissions (2/19).  
Ex: FUN Signature (Heritage, 1/2014), lot 7063, which realized \$4,700. NGC ID# 269C, PCGS# 8928

- 4331 1860 AU58 NGC.** The 1860 double eagle is scarce in Mint State despite a mintage exceeding 577,000 coins. This near-Mint example displays bold detail and frosted yellow-gold luster with warm rose accents. A hint of field reflectivity is evident at certain angles. Lightly abraded and showing a brush of high-point friction. NGC ID# 269D, PCGS# 8929

- 4332 1861-S XF45 NGC.** A lightly worn, lightly abraded specimen of this popular branch mint issue, from an ample mintage of 768,000 pieces. The pleasing orange-gold surfaces retain traces of original mint luster in sheltered areas. NGC ID# 269K, PCGS# 8935

---

**1862-S Twenty Dollar, AU55**

Lustrous Fields

- 4333 1862-S AU55 NGC.** Moderate luster remains in the fields of this Choice AU 1862-S double eagle, and the design elements retain most details. This is a sharply struck coin with pleasing honey-gold and pale rose hues across each side. Scattered surface chatter accompanies a brief time in circulation.

Ex: James Dines Collection, et al (Stack's, 3/1969), lot 871. NGC ID# 269N, PCGS# 8938

- 4334 1863-S XF45 PCGS. Breen-7217.** Small S. A green-gold Choice XF Civil War twenty with glimpses of rose-red near the rims. Remaining luster is ample for the designated grade. Scattered moderate marks include reverse rim knocks at 11 o'clock and 2:30. NGC ID# 269R, PCGS# 8940

---

**1863-S Double Eagle, AU55**

Natural Color, Sharp Strike, CAC

- 4335 1863-S AU55 NGC. CAC.** Medium S Mintmark. The S.S. Republic and the S.S. Brother Jonathan shipwrecks added nearly 300 1863-S double eagles to collector hands, most of them in the About Uncirculated range. It is uncertain if this example is one of them, since no provenance is indicated on the holder and the coin has the "look" of a piece that spent its short time in circulation on dry land. Attractive khaki-gold surfaces display glints of orange toning and considerable mint luster over surfaces that show few marks. A deep, sharp strike renders nearly full details throughout Liberty's hair and bun. This Choice About Uncirculated piece carries CAC endorsement and great eye appeal. NGC ID# 269R, PCGS# 8940

---

**1865 Double Eagle, AU55**  
Smooth and Lustrous

- 4336 1865 AU55 NGC.** Light wear on the high points of the design prevents this Choice AU coin from receiving Mint State recognition, although the surfaces are attractively smooth and there is substantial luster in the fields. Each side has pleasing honey-gold color and strong eye appeal.  
Ex: James Dines Collection, et al (Stack's, 3/1969), lot 876. NGC ID# 269U, PCGS# 8943

- 4337 1867-S XF40 PCGS.** This coin saw moderate circulation on the West coast, explaining light rub on each side and scattered abrasions, including one near star 3. Olive and red-gold color is entirely natural, and the overall eye appeal is good. Housed in a green label holder. NGC ID# 26A2, PCGS# 8952

- 4338 1870-S AU55 PCGS.** Partial luster remains in the fields of this Choice AU 1870-S double eagle, complementing well-detailed design elements that show only trivial wear. Light surface chatter accompanies the grade, but no singular abrasions are noted. NGC ID# 26A9, PCGS# 8959

**1871 Double Eagle, AU50  
Better Type Two Philadelphia Issue**

**4339** 1871 AU50 NGC. With the lowest mintage of any Philadelphia Type Two twenty, the 1871 is scarce in both an absolute and conditional sense. About Uncirculated pieces are scarce, and Mint State examples are rare. This medium-gold example occupies the lowest AU rung, with noticeable wear and scattered small marks from circulation. A fair amount of mint luster survives on the well-defined surfaces. NGC ID# 26AA, PCGS# 8960

**4340** 1873 Open 3, Doubled Die Obverse, FS-101, MS62 NGC. Strong doubling shows on the letters in LIBERTY, identifying the popular Cherrypickers variety. The design elements are well-detailed and the lustrous orange-gold surfaces are appropriately marked for the grade. Census: 56 in 62 (10 in 62+), 9 finer (1/19). NGC ID# 26AH, PCGS# 148749 Base PCGS# 8967

**4341** 1874-S MS61+ NGC. Small S Mintmark. Myriad surface marks appear on both sides of this lustrous Mint State double eagle, although none of the marks are singularly significant. This pleasing double eagle exhibits satiny yellow-gold surfaces. NGC ID# 26AR, PCGS# 8972

**4342** 1875-CC — Cleaned — ANACS. Variety 8-A. XF 45 Details. A lightly worn, lightly abraded orange-gold specimen of this popular Carson City issue, with a dull lump on Liberty's neck and a short die line above E in AMERICA. Despite the noted cleaning, a few traces of original mint luster remain intact.

**1877-CC Twenty Dollar, XF45  
Original Surfaces**

**4343** 1877-CC XF45 NGC. Variety 1-B. This late die state shows die lines from the top serif of the S to the serif of the T in STATES and another die line that angles downward from the bottom of the S toward the glory of rays. Additionally, the late die state crack is evident on the left side of the Y in TWENTY. This is a Choice example with original, untampered surfaces. NGC ID# 26AZ, PCGS# 8983

**1877-CC Double Eagle, XF45  
Original Orange-Gold Patina**

**4344** 1877-CC XF45 NGC. Variety 3-D. A lightly circulated of this collectible Carson City issue, showing original orange-gold patina with hints of luster in the protected regions of the fields. Scattered light abrasions appear elsewhere, as is typical of the grade for CC-mint gold pieces. The 1877-CC twenty comes from a mintage of 42,565 pieces, and it is the first Type Three issue from this mint. Ex: Metropolitan New York Numismatic Convention (Stack's, 5/1968), lot 973. NGC ID# 26AZ, PCGS# 8983

**4345** 1878 MS61 NGC. Doubled Die Reverse, Variety 2. VP-003. Various degrees of die doubling are seen on the reverse of many 1878 double eagles. This sharply struck example shows modest doubling of the legends and lower field stars. The thickly frosted fields are lustrous and only lightly marked for the assigned grade. We note two or three minor abrasions below Liberty's chin, but nothing heavy or distracting. Strong eye appeal accompanies the rich-gold color with orange highlights. NGC ID# 26B3, PCGS# 8985

**1878-S Liberty Twenty, MS62  
Rare Any Finer**

**4346** 1878-S MS62 NGC. Uncirculated 1878-S double eagles are occasionally seen, but rarely is a piece found above MS62. The current coin is especially lustrous, with original surfaces and sharp design elements. Some reflectivity appears in the fields, contrasting with scattered abrasions that define the grade. NGC has graded eight numerically finer examples (1/19). NGC ID# 338K, PCGS# 8987

**1878-S Twenty Dollar Liberty, MS62  
Colorful Lustrous Example**

**4347** 1878-S MS62 PCGS. CAC. The 1878-S Liberty double eagle claims a substantial mintage of 1.7 million pieces, but the issue is surprisingly difficult to locate in grades above the MS62 level. This impressive MS62 offers well-detailed design elements and lustrous orange-gold surfaces with the expected number of grade-consistent contact marks. PCGS has graded only 13 numerically finer examples (1/19). NGC ID# 338K, PCGS# 8987

---

**1882-CC Double Eagle, XF45**  
Smooth, Appealing Surfaces

- 4348** 1882-CC XF45 NGC. Variety 1-B. The mintmark placement, as well as a vertical die line on the bridge of Liberty's nose in front of the eye identify this variety. The 1882-CC double eagle is relatively plentiful overall, popular as a type coin. This Choice XF example displays smooth olive-gold and peach-orange surfaces with good detail. There are no detractions.  
Ex: Stadiem-Gardner Collection; Metropolitan New York Numismatic Convention (Stack's, 5/1968), lot 987. NGC ID# 26BF, PCGS# 8997

---

**1883-CC Double Eagle, AU50**  
Original Color, Smooth Surfaces

- 4349** 1883-CC AU50 NGC. Variety 2-A. Smooth olive-gold surfaces on this About Uncirculated 1883-CC double eagle display remnants of luster in the fields and sharp detail on the devices. No major abrasions are present despite light wear. Eye appeal surpasses expectations for the issue in this grade.  
Ex: Stadiem-Gardner Collection; Metropolitan New York Numismatic Convention (Stack's, 5/1968), lot 989. NGC ID# 26BH, PCGS# 8999

---

**1883-S Twenty Dollar, MS63+**  
A Rarity Any Finer

- 4350** 1883-S MS63+ PCGS. CAC. Ex: The Fairmont Collection. The 1883-S Liberty double eagle is occasionally available in MS63, but it is rare any finer. This Plus-graded, CAC-endorsed Select example displays sharp motifs and frosty cartwheel luster. Bright, greenish-gold luster warms to peach hues in the centers, complementing a lack of severe abrasions. While most 1883-S survivors are heavily bagmarked, this piece maintains remarkably smooth, frosted surfaces. PCGS lists only 16 finer submissions (2/19). NGC ID# 26BJ, PCGS# 9000

---

**1884-CC Liberty Twenty, AU Details**  
Lightly Worn Branch Mint Issue

- 4351** 1884-CC — Cleaned — PCGS Genuine. AU Details. Variety 1-A. The 1884-CC Liberty double eagle claims a fairly substantial mintage for a Carson City issue, at 81,139 pieces. Accordingly, examples are reasonably available for type purposes. This bright orange-gold specimen shows just the slightest trace of wear on the strongly impressed design elements and the appropriately abraded surfaces retain much original mint luster, despite the noted cleaning.

---

**1884-CC Double Eagle, AU53**  
Popular CC Issue

- 4352** 1884-CC AU53 PCGS. Variety 1-A. A fairly substantial percentage of the mintage must have been shipped to Europe in the 19th century since we are seeing a steady trickle of this issue returning from European sources (especially banks). Noticeable portions of mint luster remain, but there are also several noticeable marks present. NGC ID# 26BK, PCGS# 9001

---

**1889 Twenty Dollar, MS62**  
Rare CAC-Approved Example

- 4353** 1889 MS62 NGC. CAC. The 1889 is scarce-yet-available in MS62 condition, but it is rare any finer. NGC and PCGS combine for fewer than 45 certifications in finer grades — all of those at MS63, except for one MS64 example. The low CAC population is perhaps even more telling. Bagmarks are the bane of 1889 twenties, which were roughly handled and seldom escaped grade-limiting abrasions. This radiant, sun-gold example exhibits frosted, fine-grained surfaces with relatively few marks, plus a sharp strike. CAC endorsement sets it apart from most others at its grade. CAC: 24 in 62, 3 finer (1/19). NGC ID# 2695, PCGS# 9010

---

**1889-CC Twenty, XF Details**

Lower-Mintage Issue

- 4354** 1889-CC — Cleaned — NGC Details. XF. Variety 2-B. The Carson City Mint was downgraded to assay office status in 1885 under Cleveland, but resumed coinage in 1889 under Harrison. The mintage of only 30,945 pieces ensures survivors are scarce. This lightly abraded pumpkin-gold example is somewhat glossy and displays traces of struck-in grease above the eagle's beak.

**1889-CC Liberty Twenty, AU Details**

Type Three Carson City Issue

- 4355** 1889-CC — Cleaned — PCGS Genuine. AU Details. Variety 1-A. From a modest mintage of 30,945 pieces, the 1889-CC Liberty double eagle is still reasonably available, due to a hoard that surfaced in the 1990s. This pleasing orange-gold specimen is lightly abraded, but the surfaces have the flat aspect and lackluster appearance that indicates an improper cleaning. The design elements exhibit just a trace of wear.

Ex: Stadiem-Gardner Collection (Stack's, 2/1965), lot 991; Metropolitan New York Numismatic Convention Auction (Stack's, 5/1968), lot 1002, flip accompanies the lot.

- 4356** 1890-CC — Cleaned — NGC Details. AU. Variety 2-B. The rarer of the two die marriages, with the right C in the mintmark above the upright of the D in DOLLAR. Just a trace of wear is evident on the high points of the design elements and the lightly abraded orange-gold surfaces retain much of their original mint luster, despite the noted cleaning. From a mintage of 91,209 pieces. NGC ID# 26BY, PCGS# 9014

- 4357** 1892-CC — Cleaned — PCGS Genuine. XF Details. Variety 1-A. Some well-hidden hairlines exist beneath the olive-gold surfaces of this Carson City twenty, which shows pleasing orange accents around the raised devices. A sharp strike remains in evidence, as well as some brief areas of mint grime that give this coin a natural look despite the skillful cleaning. Just 27,265 pieces were struck, most of which were used for foreign transactions.

---

**1892-CC Double Eagle, XF40**  
Pleasing Original Color and Surfaces, CAC

- 4358** 1892-CC XF40 PCGS. CAC. Variety 1-A. A large number of 1892-CC double eagles were shipped overseas, some of which have returned to the U.S. and ultimately to the hands of collectors. Others, such as this example, most likely never left the country and circulated widely in the West. The deep orange-gold surfaces suggest original color, while moderate wear is seen on the high points of Liberty's hair and neck truncation. Marks are minimal in size and grade-appropriate. CAC endorsement is especially meaningful at this grade. CAC: 3 in 40, 65 finer (2/19). NGC ID# 26C6, PCGS# 9020

**1892-S Twenty Dollar, MS63**  
Seldom Offered With CAC Approval

- 4359** 1892-S MS63 PCGS. CAC. Medium S. Select Uncirculated condition is the highest grade level for which the 1892-S double eagle remains widely collectible, although we should note that MS63 representatives with CAC endorsement are scarcely offered. A crisp impression and glowing honey-gold color define each side. A couple of small abrasions before Liberty's profile barely preclude a higher grade. NGC ID# 26C7, PCGS# 9021

- 4360** 1894-S MS63 PCGS. Rich peach-gold fields and devices are bounded by lime-green margins. This San Francisco type coin exhibits booming luster and a sharp strike. Marks are fewer than anticipated, although those near the shoulder curl and obverse star 5 merit passing mention. Housed in a green label holder. NGC ID# 26CC, PCGS# 9026

**1895 Double Eagle, MS64+**  
Scarce CAC-Approved Example

- 4361 **1895 MS64+ PCGS. CAC.** Available in MS64, the 1895 double eagle is a great condition rarity any finer. This piece is Plus-designated and CAC endorsed, standing apart from the bulk of the near-Gem population. The strike is sharp, and the radiantly lustrous surfaces deliver pleasing straw-gold hues. Only a few faint grazes on the obverse prevent Gem classification. Population: 42 in 64+, 7 finer. CAC: 68 in 64, 1 finer (1/19). NGC ID# 26CD, PCGS# 9027
- 4362 **1895-S MS63 PCGS.** An attractive Select specimen from a mintage of 1.1 million pieces, this coin offers vivid orange-gold surfaces, with vibrant mint luster throughout. The design elements are sharply detailed and only minor signs of contact are evident. NGC ID# 26CE, PCGS# 9028
- 4363 **1897 MS64 PCGS.** Available to a certain extent in MS64, the 1897 double eagle is rare finer. PCGS lists just eight higher-grade submissions (1/19). This example has sharp detail and original yellow-gold luster. A few light grazes on Liberty's cheek are all that deny Gem classification. NGC ID# 26CH, PCGS# 9031

**1897 Liberty Double Eagle, MS64**  
Vivid Color, Vibrant Luster

- 4364 **1897 MS64 PCGS. CAC.** The near-Gem Uncirculated level is an optimal collector grade for the 1897 double eagle, because examples in finer grades are virtually unavailable. PCGS reports just eight numerically finer pieces (1/19). This CAC-endorsed MS64 coin dazzles with vibrant, rich-gold color. Deeply frosted, lustrous surfaces display a pinpoint-sharp strike. Only a few wispy grazes tiny ticks exist on the smooth, finely grained surfaces. More than 1.3 million pieces were struck, and relatively few coins survive with greater eye appeal. NGC ID# 26CH, PCGS# 9031

**1897-S Double Eagle, MS64+**  
Scarce CAC-Approved Example

- 4365 **1897-S MS64+ NGC. CAC.** The Plus designation and CAC endorsement attest to the high quality of this near-Gem 1897-S double eagle. The strike is sharp, and frosty original luster transitions from yellow-gold in the centers to greenish-gold in the margins. A few faint scuffs on Liberty's cheek are all that prevent Gem classification. NGC lists only 26 finer submissions (1/19). NGC ID# 26CJ, PCGS# 9032
- 4366 **1899 MS64+ PCGS. CAC.** Available in MS64, the 1899 Liberty double eagle — a popular 19th century type coin — is scarce in Gem condition. This Plus-graded CAC example displays a sharp strike and blazing peach-gold luster with a vibrant cartwheel effect. Only a tiny percentage of 1899 double eagles in this grade are CAC endorsed. NGC ID# 26CM, PCGS# 9035
- 4367 **1899 MS64+ NGC. CAC.** This is a plentiful Philadelphia issue, although CAC-approved coins in this grade are scarce, as are those with a Plus designation. Higher-grade pieces are out of reach for many collectors. This type coin displays a sharp strike and glistening luster. Peach-gold margins cede to delicate rose-gold color in the centers. NGC ID# 26CM, PCGS# 9035

**1899-S Twenty Dollar, MS64+**  
Exceedingly Rare Any Finer, CAC Approved

- 4368 **1899-S MS64+ PCGS. CAC.** This Plus-graded and CAC-endorsed 1899-S sits at the cusp of rarity in the Liberty Head series. Frosted surfaces radiate cartwheel luster and vibrant, rich-gold color. The strike is razor-sharp, and just a few widely scattered marks are minuscule factors to limit the grade. PCGS has seen just four numerically finer examples. Population: 20 in 64+, 4 finer. CAC: 33 in 64, 0 finer (1/19). NGC ID# 26CN, PCGS# 9036

---

**1900-S Liberty Double Eagle, MS64**  
Rarely Seen Finer

**4369 1900-S MS64 NGC.** The 1900-S Liberty double eagle is always popular because of the turn-of-the-century date. This impressive Choice example displays sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster throughout. The 1900-S becomes scarce in MS64 condition, and finer coins are rare. NGC has graded nine numerically finer examples (1/19). NGC ID# 26CR, PCGS# 9038

**4370 1901 MS64 PCGS.** The vivid orange-gold surfaces of this attractive Choice example display especially vibrant mint luster on both sides. The surfaces are well-preserved and the design elements are sharply detailed, adding to the terrific eye appeal. Housed in a green label holder. NGC ID# 26CS, PCGS# 9039

**4371 1901 MS64 PCGS.** An attractive Choice specimen of this popular turn-of-the-century issue, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. Housed in a green label holder. NGC ID# 26CS, PCGS# 9039

**4372 1901-S MS63 PCGS.** An attractive Select example of this popular issue, with sharply detailed design elements and lightly marked orange-gold surfaces that radiate especially vibrant mint luster. Housed in a green label holder. NGC ID# 26CT, PCGS# 9040

---

**1903 Liberty Head Twenty, MS65**  
Lustrous and Colorful

**4373 1903 MS65 PCGS.** Struck from fresh dies, this Gem 1903 double eagle displays razor-sharp detail and satiny, shimmering mint luster. Bright yellow-gold margins cede to swirls of rose and peach color in the centers, leaving this coin with tremendous visual interest. The 1903 double eagle is available in MS65, but seldom with this degree of eye appeal. PCGS lists only five numerically finer representatives (2/19). NGC ID# 26CW, PCGS# 9043

**4374 1904 MS65 PCGS.** Vivid orange-gold color and vibrant mint luster are the calling cards of this delightful Gem. The surfaces are well-preserved and the design elements are sharply detailed throughout. Eye appeal is terrific. NGC ID# 26CY, PCGS# 9045

**4375 1904 MS63 Prooflike NGC.** The 1904 is one of the few twenty dollar Libs that can occasionally be found with prooflike fields. As such, these pieces are highly collectible. The fields are uniformly reflective from rim to rim, and each side displays light, even reddish-gold color. Fully struck and minimally abraded. NGC ID# 26CY, PCGS# 79045

**4376 1904 MS63 Prooflike NGC.** The lemon-yellow surfaces of this impressive Select specimen display deeply reflective prooflike fields, with the expected number of minor contact marks for the grade. The design elements exhibit sharp definition and overall eye appeal is strong. NGC ID# 26CY, PCGS# 79045

---

---

**1904-S Double Eagle, MS65**  
Few Finer Pieces Are Known

**4377 1904-S MS65 NGC.** Gem 1904-S double eagles are plentiful enough that most collectors can acquire one, however, higher-grade coins are decidedly rare. NGC lists just two finer representatives, and PCGS has seen eight such submissions (1/19). Possible duplication exists in these figures. The present MS65 coin is a good balance of quality and value. The strike is sharp and the frosty luster is original. Rose-gold interiors gradually transition to brighter green-gold margins. NGC ID# 26CZ, PCGS# 9046

**1906-D Double Eagle, MS63+**  
Clean for the Grade

**4378 1906-D MS63+ PCGS. CAC.** Mint Director George E. Roberts wrote in his 1906 Annual Report: "The most important development in the mint service during the year was the opening of the new mint at Denver." This is a popular issue from that first year of operation, claiming a mintage of 620,250 coins. Each side presents yellow-gold color and vibrant mint luster. Strike detail is crisp with the exception of the eagle's neck feathers. Minimal chatter for the grade. NGC ID# 26D5, PCGS# 9050

**1906-S Liberty Double Eagle, MS64**  
Nice Color and Luster

**4379 1906-S MS64 NGC.** From a mintage of more than 2 million pieces, the 1906-S Liberty double eagle can be located in MS64 condition with a little patience, but finer coins are rare. This attractive Choice specimen offers well-detailed design elements, with just a trace of softness on the tiara and some star centers. The well-preserved peach-gold surfaces radiate vibrant mint luster, with outstanding eye appeal. NGC has graded six numerically finer examples (1/19). NGC ID# 26F6, PCGS# 9051

---

## SAINT-GAUDENS DOUBLE EAGLES

1907 Double Eagle, MS64+  
Cartwheel Mint Luster

- 4380 1907 MS64+ PCGS. CAC. Charles Barber's modifications to Saint-Gaudens' original High Relief double eagle often come under scrutiny, but it should be acknowledged that without his efforts the masterful design likely would never have made it into circulation. This high-quality near-Gem radiates cartwheel mint frost from original peach-gold surfaces. Each side is well-struck with light chatter but no major abrasions. NGC ID# 26F5, PCGS# 9141

1907 Saint-Gaudens Double Eagle, MS64+  
Green CAC Approval Sticker

- 4381 1907 MS64+ PCGS. CAC. These 1907 circulation strikes were struck late in the year and represent the first Saint-Gaudens double eagles produced for commercial use. Bright mint frost shines from luminous, minimally abraded yellow-gold surfaces. The Capitol dome, in particular, showcases excellent strike definition. NGC ID# 26F5, PCGS# 9141

1908 Twenty Dollar, MS66+  
No Motto, Strong Strike

- 4382 1908 No Motto MS66+ PCGS Gold Shield. Short Rays Obverse. The torch hand, visage, and Capitol dome are strongly defined on this Plus-designated Premium Gem example of the 1908 No Motto double eagle (4.2 million coins struck). Marks are unseen in the obverse field, and just a few light ticks appear at the lower reverse. Frosty with warm yellow-gold color. NGC ID# 26F6, PCGS# 9142

1908 No Motto Twenty, MS66+  
Virtually Unabraded Fields

- 4383 1908 No Motto MS66+ PCGS. CAC. Short Rays Obverse. A readily available No Motto issue is almost any grade, the 1908 is a perfect choice to represent this Saint-Gaudens type. The present example is a scintillating Premium Gem, recognized for its quality by both PCGS and CAC. The fields are exceptionally clean. Light yellow-gold surfaces showcase boldly struck relief elements. NGC ID# 26F6, PCGS# 9142

1908 Double Eagle, MS66  
No Motto, Ex: Wells Fargo Hoard

- 4384 1908 No Motto, Wells Fargo Nevada, MS66 PCGS. CAC. Ex: Wells Fargo Nevada Gold. Short Rays Obverse. This Premium Gem derives from one of the most famous hoards brought to market in recent decades. As usual, preservation, luster, and strike are all excellent, contributing to the phenomenal eye appeal. Obviously original with varying shades of rose and peach-gold. NGC ID# 26F6, PCGS# 99142 Base PCGS# 9142

- 4385 1908-D No Motto MS64 PCGS. Long Rays Obverse. Hints of golden-brown and sea-green grace this nicely struck and lustrous Choice Saint-Gaudens twenty. Thorough evaluation reveals only minor contact. The 1908 Philadelphia No Motto issue is readily available in high Mint State grades, but its Denver counterpart is considerably scarcer in such lofty quality. NGC ID# 26F7, PCGS# 9143

- 4386 1908-D No Motto MS64 PCGS. Long Rays Obverse. Lime-green borders cede to pumpkin-gold centers. A lustrous and sharply struck representative of the briefly issued No Motto subtype. Infrequent small marks are fewer than customary for the MS64 level. NGC ID# 26F7, PCGS# 9143

- 4387 1909/8 FS-301 — Cleaned — NGC Details. Unc. The Mint engraver mistakenly used a 1908 hub, then employed the correct 1909 hub to create the ever-popular 1909/8 overdate. Curiously, the overdate survives to a greater extent than the 1909 non-overdate twenties. This example shows faint hairlines from a past cleaning, yet retains its attractive medium-gold color and much of its mint luster. The sharpness of an Uncirculated example remains.

- 4388 1909/8 FS-301 MS61+ NGC. Ex: Rive d'Or Collection. The 1909/8 twenty was created when a working obverse die was successively hubbed by 1908 and 1909 hubs. It was the first overdate of its class, preceding the 1918/7-D nickel and 1918/7-S quarter. This satiny honey-gold example has a good strike and no more than the expected number of small abrasions. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**4389** 1909/8 FS-301 MS61 NGC. CAC. Apricot-gold centers are bounded by lime-green margins. This coin is lustrous and sharply struck with a number of minor abrasions consistent with the designated grade. The 1909/8 is a scarce, popular, and visually prominent overdate.

*Ex: Central States Signature (Heritage, 4/2013), lot 6116, which realized \$2,232.50. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151*

**1909/8 Twenty Dollar, MS62+ FS-301, Guide Book Variety**

**4390** 1909/8 FS-301 MS62+ PCGS. The overdate feature is visible to the naked eye on this, the only major variety in the Saint-Gaudens double eagle series. The Plus designation sets this coin apart from its peers, and it is indeed highly appealing for the grade. Well-struck design elements and satiny yellow-gold luster complement a lack of bothersome abrasions. NGC ID# 37XB, PCGS# 145740 Base PCGS# 9151

**4391** 1909 MS62 NGC. Lovely peach-gold, and yellowish hues adorn the original surfaces of this Mint State 1909 double eagle. Well-struck design elements and shimmering fields show only minor abrasions, with good eye appeal. The 1909 is a better date in high grade, coming from a mintage of 161,282 pieces — a fraction of the San Francisco coinage this year. NGC ID# 26FC, PCGS# 9150

**4392** 1910 MS64+ PCGS. With a mintage of 482,000 coins, the 1910 is an accessible Saint-Gaudens issue that becomes difficult to obtain in Gem condition. This sharp representative displays minimal abrasions and swirling mint luster over light yellow-gold surfaces. NGC ID# 26FF, PCGS# 9154

**1910-S Double Eagle, MS65 Rarely Found Finer**

**4393** 1910-S MS65 PCGS. A highly lustrous Gem, this lovely San Francisco Mint Saint-Gaudens double eagle exhibits frosty surfaces and brilliant orange-gold color. An exceptional representative that is exceeded for quality by just a baker's dozen that are numerically finer (2/19). NGC ID# 26FH, PCGS# 9156

**4394** 1911-D/D FS-501, HA-3, MS64+ PCGS. CAC. The mintmark is repunched east on this *Cherrypickers'* variety. It is the most prominent of five repunched mintmark varieties in Roger Burdette's *Saint-Gaudens Double Eagles*, and it was discovered by Walter Breen in the 1950s. This Plus-graded, CAC-endorsed Choice example displays a bold strike and radiant orange-gold and peach luster. Only a few light grazes are apparent. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**1911-D/D Double Eagle, MS65+ FS-501, Repunched Mintmark**

**4395** 1911-D/D FS-501, HA-3, MS65+ PCGS. CAC. FS-501 is the strongest 1911-D repunched mintmark in Roger Burdette's *Saint-Gaudens Double Eagles*, where it is attributed HA-3. The secondary mintmark is offset east of the primary by about 25%. This high-end Gem example displays a bold strike and dazzling orange-gold and rose luster. A lack of bothersome abrasions contributes to strong eye appeal. NGC ID# 26FK, PCGS# 145010 Base PCGS# 9158

**4396** 1911-S MS64+ NGC. CAC. The 1911-S was an export commodity, shipped in large quantities to Europe and South America, from which several large hoards have since returned to the U.S. Frosted peach-gold surfaces are brightly lustrous and sharply struck. CAC endorsement adds to the numerous attributes of this gleaming S-mint representative, which ranks high in the optimal collecting range when maximizing technical quality for the dollar. NGC ID# 26FL, PCGS# 9159

**4397** 1913-D MS64 NGC. A honey-gold near-Gem whose crisp strike and vibrant mint luster ensure the eye appeal. Marks are unexpectedly minor, though we note a tick beneath the D in DOLLARS. A few specks of removable residue are noted on the lower-left reverse margin. NGC ID# 26FP, PCGS# 9162

**4398** 1913-D MS64 PCGS. CAC. The availability of the 1913-D Saint-Gaudens double eagle declines above MS64. This attractive near-Gem displays a bold strike and softly frosted peach-gold and rose coloration. Eye appeal is outstanding. CAC-approved in a green label holder. NGC ID# 26FP, PCGS# 9162

**1913-S Twenty Dollar, MS62 Low-Mintage San Francisco Issue**

**4399** 1913-S MS62 NGC. A sought-after low-mintage issue, the 1913-S double eagle boasts a production total of only 34,000 pieces. Only the 1908-S, with a mintage of 22,000 pieces, has a lower production figure among With Motto Saints. This MS62 coin displays vibrant luster and impressively bold central detail. Scattered light marks on the peach-gold surfaces account for the grade. NGC ID# 26FR, PCGS# 9163

**1914 Saint-Gaudens Twenty, MS63  
Scarce CAC Example**

- 4400 1914 MS63 PCGS.** CAC. CAC recognized for its high-for-the-grade quality, this Select 1914 Saint-Gaudens double eagle displays softly frosted yellow-gold luster and boldly rendered design features. A few light contact marks and scattered field grazes limit the grade, but to the unaided eye, the aesthetics are quite pleasing. A better date, boasting a mintage of only 95,250 coins. NGC ID# 26FS, PCGS# 9164

**1914 Twenty Dollar, MS64  
Original Luster, Green Label Holder**

- 4401 1914 MS64 PCGS.** Natural honey-gold and peach hues adorn this Choice 1914 Saint-Gaudens double eagle. Bold design elements show minimal abrasions, producing strong eye appeal. The 1914 double eagle is available in MS64, but finer pieces are scarce. This example is housed in a green label holder. NGC ID# 26FS, PCGS# 9164

**1914 Double Eagle, MS64  
Seldom Available Finer**

- 4402 1914 MS64 NGC.** Coming from a small mintage of 95,250 coins, the 1914 double eagle is scarce finer than MS64. This collectible Choice example displays well-struck motifs and frosty orange-gold mint luster that cartwheels in-hand. Only light, unobtrusive surface marks are discernible. NGC lists a survivorship of 37 pieces in finer condition (2/19). NGC ID# 26FS, PCGS# 9164

- 4403 1914-S MS65 PCGS.** The 1914-S double eagle is plentiful in this grade but scarce finer. Even for an MS65, this example is high-end. The strike is sharp, and the softly frosted luster shows no bothersome abrasions. Rich orange-gold and peach hues spread warmth over each side. NGC ID# 82KA, PCGS# 9166

- 4404 1914-S MS65+ NGC.** Cartwheel luster flashes across smoothly frosted, minimally marked fields and sharply struck devices of this Plus-graded Gem double eagle. The 1914-S is known for its high-end eye appeal and finely textured, vibrant surfaces. This example does not disappoint in any of those regards, with a sharp strike that shows incompleteness only along the top end of the torch. NGC ID# 82KA, PCGS# 9166

**1914-S Double Eagle, MS66  
None Are Finer at PCGS**

- 4405 1914-S MS66 PCGS.** The 1914-S is generally available, making it drop off the radar of many collectors as a common date. However, it is conditionally scarce in MS66, and no finer pieces are reported by PCGS (2/19). This Premium Gem displays a bold strike and satiny prairie-gold mint luster that easily cartwheels in-hand. Eye appeal is outstanding. NGC ID# 82KA, PCGS# 9166

**1915 Twenty Dollar, Vibrant MS64  
Seldom Offered Finer**

- 4406 1915 MS64 PCGS.** Bright brass-gold mint luster delivers satiny luminance in the fields of this Choice 1915 double eagle, and a radiant cartwheel effect prevails over each side. A few contact marks are evident on the Liberty portrait, and there is a thin scratch on the reverse from the M in AMERICA down into the eagle's wing. Eye appeal is pleasing overall. This Philadelphia issue is scarce in finer grades. NGC ID# 26FV, PCGS# 9167

- 4407 1916-S MS64 PCGS.** The design elements of this impressive Choice example are sharply detailed throughout and the lightly marked orange-gold surfaces radiate vibrant mint luster from both sides. Overall eye appeal is outstanding. NGC ID# 34NJ, PCGS# 9169

- 4408 1920 MS63+ PCGS.** CAC. An important issue in the Saint-Gaudens series, the 1920 had a mintage under one-quarter million coins. This Select Mint State example features a sharp strike and brilliant, frosty yellow-gold luster. Scattered marks are consistent with the grade. NGC ID# 26FY, PCGS# 9170

- 4409 1923-D MS65 PCGS.** This spectacular Gem would make an exceptional branch mint type coin, with sharply detailed design elements and well-preserved orange-gold surfaces that radiate vibrant mint luster. Overall eye appeal is outstanding. NGC ID# 26G6, PCGS# 9176

**1923-D Saint-Gaudens Twenty, MS66  
Excellent Branch Mint Type Coin**

**4410 1923-D MS66 PCGS.** From a substantial mintage of 1.7 million pieces, the 1923-D Saint-Gaudens double eagle is an available issue in grades up to the MS66 level, but finer coins are scarce. This delightful Premium Gem exhibits sharply detailed design elements and virtually pristine yellow-gold surfaces, with vibrant mint luster and terrific eye appeal. NGC ID# 26G6, PCGS# 9176

**1923-D Twenty Dollar, MS66+  
Incredible Luster and Color**

**4411 1923-D MS66+ NGC.** Famous for strong eye appeal and exceptional luster, the 1923-D Saint-Gaudens double eagle is a popular type coin. This high-end Premium Gem does not disappoint. The frosty surfaces are sharp and unabraded, showing shades of greenish-gold, peach, orange, and rose throughout. Eye appeal is spectacular, as is the preservation. NGC ID# 26G6, PCGS# 9176

**1923-D Twenty Dollar, MS66+  
Eye-Catching Type Coin**

**4412 1923-D MS66+ PCGS.** The 1923-D is plentiful, but its reputation for outstanding eye appeal and its relative affordability earn it high marks as a type coin. This Plus-graded Premium Gem is of outstanding quality. The beautiful surfaces deliver softly frosted luster and bold devices with rich orange-gold and peach coloration. A couple of faint grazes in the left obverse field are all that prevent a full MS67 designation, as the high points of Liberty's figure are remarkably clean. NGC ID# 26G6, PCGS# 9176

**4413 1924 MS66 PCGS.** This delightful Premium Gem exhibits sharply detailed design elements and impeccably preserved orange-gold surfaces, with vibrant mint luster and terrific eye appeal. This piece would make an exceptional type coin. NGC ID# 26G7, PCGS# 9177

**1926 Double Eagle, MS66+  
Few Finer Pieces Are Known**

**4414 1926 MS66+ PCGS.** The 1926 double eagle is plentiful in MS66, but only a few finer pieces are known. This Plus-designated Premium Gem stands apart from its peers. The sharpness of the strike fully brings out the details in the top of the torch and Liberty's fingers below it, and the Capitol building is boldly developed. Satiny luster is largely undisturbed and eye appeal is outstanding. Population: 25 in 66+, 5 finer (2/19). NGC ID# 26GD, PCGS# 9183

**4415 1927 MS65+ PCGS. CAC.** Clean, vibrantly lustrous fields on this high-end Gem 1927 double eagle earn a CAC green label. Abrasions are limited to the high points of the eagle and Liberty's figure, and even there they are light. Eye appeal is spectacular. An outstanding Saint-Gaudens type coin. NGC ID# 26GG, PCGS# 9186

**1927 Saint-Gaudens Twenty, MS66+  
Scarce Any Finer**

**4416 1927 MS66+ NGC.** The 1927 is characteristic of other Philadelphia Mint twenties from the mid-to-late 1920s. That is to say examples are generally collectible in high grades and perfect for type purposes. Specifically, the 1927 can be found easily through MS66 but becomes scarce in MS67. This clean, frosty double eagle enjoys light yellow-gold color and a crisp strike. NGC ID# 26GG, PCGS# 9186

**4417 1928 MS66 PCGS.** A brilliant and boldly lustrous Premium Gem, with vibrant orange-gold color and wonderfully smooth, frosted surfaces. A needle-sharp strike completes the outstanding eye appeal. PCGS has certified more than 3,300 examples in this high grade, but only 101 pieces are finer (1/19). NGC ID# 34VK, PCGS# 9189

**4418 1928 MS66 NGC.** The strike on Liberty's portrait is sharp from head to toes, and the torch shows most of its flame and finger detail. Only a few tiny marks exist on the frosted, greenish-gold Premium Gem surfaces. Although the 1928 is readily available through the MS66 grade, finer examples are scarce. NGC reports just 93 numerically finer coins (2/19). NGC ID# 34VK, PCGS# 9189

**1928 Double Eagle, MS66+  
Ideal Type Coin**

- 4419 1928 MS66+ PCGS.** Few Saint-Gaudens double eagles are as available as the 1928, and none claim higher mintages. Yet, collectors will encounter more than a little difficulty trying to locate an example finer than this Plus-graded Premium Gem. Coruscating frost over smooth peach-gold surfaces draws the eye of the viewer. The devices are razor-sharp on both sides of this ideal type coin. NGC ID# 34VK, PCGS# 9189

**COMMEMORATIVE SILVER**

- 4420 1893 Isabella Quarter MS66 PCGS. CAC.** This luminous Gem type coin displays sharp motifs and unabraded surfaces. Original olive, amber-gold, and russet toning embraces softly frosted fields and devices, promoting excellent visual merit. The distribution of the Isabella quarter amounted to only 24,214 coins, and Gem survivors are in high demand today. NGC ID# BYJ9, PCGS# 9220

- 4421 1921 Alabama 2x2 MS66 NGC.** Alabama governors Bibb and Kilby were separated in time by a century, but on the commemorative design, their busts are conjoined. The low-mintage variety with the state entry number incused in the right obverse field. Medium golden-brown and blue-green toning confirms the originality of this well-struck and high-grade Premium Gem. NGC ID# BYEZ, PCGS# 9225

- 4422 1937 Antietam MS67+ PCGS.** The jugate busts of Generals McClellan and Lee are especially prone to abrasions on this popular Civil War-themed commemorative. The devices on this piece are notably free from marks or defects. The centers are brilliant with a thin trimming of golden-brown around the margins. NGC ID# BYF4, PCGS# 9229

- 4423 1937 Antietam MS67 PCGS. CAC.** A sharply struck and pristine Superb Gem. Lightly toned overall, though the obverse margin displays tobacco-brown tab toning. Among the scarcer silver commemorative types. Lots 4423 through 4427 exhibit consecutive certification numbers and were stored together in the original holder for more than eight decades. The holder is offered as part of lot 4427. NGC ID# BYF4, PCGS# 9229

- 4424 1937 Antietam MS67+ PCGS. CAC.** Lustrous and unabraded with peripheral lavender-red and forest-green toning that is more prominent on the reverse. The centers are practically brilliant. A high-grade example of the popular Civil War-themed issue. Lots 4423 through 4427 exhibit consecutive certification numbers and were stored together in the original holder for more than eight decades. The holder is offered as part of lot 4427. NGC ID# BYF4, PCGS# 9229

- 4425 1937 Antietam MS67+ PCGS. CAC.** Rich plum-red and jade-green toning enriches the margins. The fields and motifs are close to brilliant. Lustrous and immaculate with a crisp strike and outstanding eye appeal. Lots 4423 through 4427 exhibit consecutive certification numbers and were stored together in the original holder for more than eight decades. The holder is offered as part of lot 4427. NGC ID# BYF4, PCGS# 9229

- 4426 1937 Antietam MS67+ PCGS. CAC.** Magenta patination covers most of the obverse margin, though the remainder of the present Superb Gem is primarily white. This pristine and lustrous half dollar is well struck and desirable. Lots 4423 through 4427 exhibit consecutive certification numbers and were stored together in the original holder for more than eight decades. The holder is offered as part of lot 4427. NGC ID# BYF4, PCGS# 9229

**1937 Antietam Half Dollar, MS68  
Offered With Original Holder**

- 4427 1937 Antietam MS68 PCGS Gold Shield. CAC.** The reverse displays only a whisper of russet patina, but the obverse border shows rich ruby-red, peach-gold, and aquamarine toning. A lustrous high-grade example of the popular issue, which commemorates the 75th anniversary of the Battle of Antietam. Lots 4423 through 4427 exhibit consecutive certification numbers and were stored together in the original holder for more than eight decades. The holder is offered in the present lot, with printing on the back that lists all nine members of the Washington County Historical Society Commemorative Coin Committee. CAC: 15 in 68, 0 finer (1/19). NGC ID# BYF4, PCGS# 9229

- 4428 1939 Arkansas MS66 PCGS.** Smooth, satiny pearl-white interiors cede to gold and lilac color around the outer peripheries of this Premium Gem Arkansas half dollar. The strike is sharp and the surfaces are devoid of abrasions. Only a handful of finer pieces are known. Population: 92 in 66 (17 in 66+), 4 finer (2/19). NGC ID# BYFJ, PCGS# 9249

- 4429 1939 Arkansas MS66 PCGS.** The 1939 Arkansas half dollar is scarce in this grade, and only a handful of pieces are finer at PCGS and NGC combined. This Premium Gem displays light olive-gold toning that deepens around the peripheries. Scattered microscopic russet flecks appear under a loupe. Eye appeal is outstanding. Population: 92 in 66 (17 in 66+), 4 finer (2/19). NGC ID# BYFJ, PCGS# 9249

- 4430 1939 Arkansas MS66 PCGS. CAC.** Final year of issue and a low-mintage issue with only 2,000 pieces struck. The satiny mint luster is covered with a light layer of original patina on each side, deepening somewhat toward the margins. Population: 92 in 66 (17 in 66+), 4 finer. CAC: 31 in 66, 0 finer (2/19). NGC ID# BYFJ, PCGS# 9249

- 4431 1935/34-D Boone MS67 PCGS. CAC.** Only 2,003 examples of this double-dated Boone half dollar from the Denver Mint were distributed, making it the key to the series. Outstanding preservation — the coin looks even cleaner than the grade suggests — and total brilliance define this Superb Gem. PCGS has graded 10 pieces finer (1/19). NGC ID# BYFU, PCGS# 9263

- 4432 1935/34-D Boone MS67 PCGS. CAC.** Only 2,000 pieces were struck of this special 1935 commemorative half dollar. This is an extraordinarily clean and problem-free example whose surfaces are brilliant and exhibit rich, velvety satin luster. Population: 73 in 67 (5 in 67+), 10 finer. CAC: 22 in 67, 1 finer (2/19). NGC ID# BYFU, PCGS# 9263

- 4433 1937 Boone MS67+ NGC. CAC.** The Plus designation and CAC endorsement hardly do this high-end Boone half dollar justice. The typical satin luster is almost flawless, and it glows beneath dusky lilac-blue and champagne toning. The strike is sharp and eye appeal is spectacular. The 1937 is scarce in this grade and nearly uncollectible finer. Census: 60 in 67 (6 in 67+, 3 in 67★), 1 finer. CAC: 55 in 67, 2 finer (1/19). NGC ID# BYG3, PCGS# 9270

- 4434** 1936-D Cincinnati MS67 PCGS. The Cincinnati type has one of the lowest mintages among classic silver commemoratives, and that production was evenly sliced into Philadelphia, Denver, and San Francisco issues. This lustrous and smooth Superb Gem displays light peripheral autumn-brown toning. Population: 64 in 67 (13 in 67+), 2 finer (2/19). NGC ID# BYCK, PCGS# 9284
- 4435** 1936 Gettysburg MS67 NGC. Beautiful luster and preservation adorn this exceptional Superb Gem Gettysburg half dollar. Both sides have consistent lavender-blue toning, with olive-gold and peach overtones evident in some areas. Eye appeal is outstanding. Census: 76 in 67 (6 in 67+, 6 in 67★, 2 in 67+★), 4 finer (1/19). NGC ID# BYGM, PCGS# 9305
- 4436** 1936 Gettysburg MS67 PCGS. The Gettysburg 75th Anniversary half dollar is scarce in Superb Gem condition, and this piece showcases every bit of that quality in its frosty, delicately toned surfaces. The strike is bold and eye appeal is simply outstanding. PCGS lists only three numerically finer pieces (2/19). NGC ID# BYGM, PCGS# 9305
- 4437** 1936 Gettysburg MS67 PCGS. The Civil War-themed Gettysburg half dollar was dated 1936 but commemorated an anniversary held two years later. This lustrous and lightly toned Superb Gem has essentially pristine preservation, and is rare any finer. NGC ID# BYGM, PCGS# 9305
- 4438** 1922 Grant With Star MS63 PCGS. With a distribution of only 4,256 coins, the With Star variant of the Grant Memorial half dollar is scarce, and one of the keys to the classic commemorative series. This is a lightly toned example, with faint golden hues concentrated at the margins. Raised die finishing lines run in random directions on the obverse, as seen on all examples of the issue. This Select Uncirculated coin is sharply struck except for the hair at Grant's temple. Nearly mark-free and lustrous surfaces provide strong eye appeal. NGC ID# BYPP, PCGS# 9307
- 4439** 1928 Hawaiian — Cleaned — PCGS Genuine. Unc. Details. Although unnaturally bright due to a recent cleaning, this unworn Hawaiian half dollar's satiny luster is typical of the issue, and the design elements are well-defined. Only light, scattered contact marks are visible. Eye appeal is pleasing for a Details-graded coin.
- 4440** 1928 Hawaiian — Cleaned — PCGS Genuine. Unc. Details. Pastel ice-blue and almond-gold toning accompanies satiny and sharply struck surfaces. Faintly hairlined, but free from mentionable marks. The Hawaiian is rarest among the 50 different classic silver commemorative types.
- 4441** 1928 Hawaiian MS63+ PCGS. The 1928 Hawaiian is the rarest issue of the classic commemorative series and popular in all grades. This Plus-graded Select Uncirculated example has attractive, silver-gray surfaces and soft mint luster throughout both sides. Captain Cook's cheekbone is the high point of the obverse, and it displays an unblemished sharp strike here. Likewise for the Hawaiian chieftain on the reverse, whose legs show no wear and only a few small marks. NGC ID# BYGR, PCGS# 9309
- 4442** 1928 Hawaiian MS64 PCGS. Shades of golden-brown and lavender toning blanket the well-preserved surfaces of this key silver commemorative, with well-detailed design elements and satiny mint luster underneath. From a distribution of 9,958 pieces. NGC ID# BYGR, PCGS# 9309
- 4443** 1918 Lincoln MS67 PCGS. Delicate shades of golden-tan toning enhance the impeccably preserved surfaces of this delightful Superb Gem, with sharply detailed design elements and vibrant mint luster underneath. PCGS has graded five numerically finer examples (1/19). NGC ID# BYGU, PCGS# 9320
- 4444** 1918 Lincoln MS67 NGC. The Illinois Centennial half dollar features a portrait of Abraham Lincoln on the obverse, earning it the oft-used "Lincoln half dollar" moniker. This Superb Gem example is scarce. Sharp devices and satiny luster produce stellar eye appeal beneath a dusting of champagne and greenish toning. Census: 83 in 67 (1 in 67+, 8 in 67★, 4 in 67+★), 7 finer (1/19). NGC ID# BYGU, PCGS# 9320
- 4445** 1934 Maryland MS67 PCGS. CAC. An eye-appealing, technically superb MS67 example of the Maryland Tercentenary half dollar, showing a bold strike and satiny mint luster. Golden-toned interiors cede to sea-green, russet, and olive border hues. The Maryland half dollar commemorates the 300th anniversary of the founding of the Maryland colony. Only 25,015 pieces were distributed, including assay coins. This piece is among the finest survivors at PCGS. Population: 82 in 67 (12 in 67+), 0 finer. CAC: 53 in 67, 0 finer (2/19). NGC ID# BYGZ, PCGS# 9328
- 4446** 1921 Missouri MS65+ NGC. A high-end Gem example of the "plain" Missouri Centennial half dollar. Softly frosted luster displays subdued amber-gold and light olive toning over each side, and no bothersome abrasions are apparent with a loupe. NGC lists only 47 finer submissions (2/19). NGC ID# BYH2, PCGS# 9330
- 4447** 1921 Missouri 2x4 MS65 NGC. Satiny luster and bold design elements earn high aesthetic marks for this Gem Missouri half dollar, and a dusting of mottled russet-olive toning on each side attests to the originality of the surfaces. Finer 2x4 examples are scarce. NGC ID# 2FE9, PCGS# 9331
- 4448** 1921 Missouri 2x4 MS65 PCGS. CAC. Only 5,000 pieces were produced of this special Missouri half dollar with a star between the 2 and 4, the numbers indicating Missouri's entrance into the Union as the 24th state. This is an untoned example whose surfaces exhibit thick, frosted mint luster. Long regarded as a key commemorative issue. NGC ID# 2FE9, PCGS# 9331
- 4449** 1923-S Monroe MS66 PCGS Gold Shield. Monroe Doctrine half dollars are seldom seen at this grade level, though the distribution nearly approaches 275,000 coins. Blushes of pale gold color and satiny mint luster meld over light, silvery surfaces. A few deeper specks also appear on the reverse. PCGS has only graded eight finer submissions (1/19). NGC ID# BYH4, PCGS# 9333
- 4450** 1936 Norfolk MS68 NGC. CAC. The 1936 Norfolk, Virginia, Bicentennial half dollar is scarce but collectible in MS68. However, just one finer coin is reported at NGC (1/19). This is among the finest pieces with CAC endorsement. Olive-gold and amber border toning surrounds brilliant interiors, complementing a sharp strike. Eye appeal is outstanding. NGC ID# BYH5, PCGS# 9337
- 4451** 1926-S Oregon MS67+ NGC. Although occasionally available in MS67, Plus-graded coins are rare at this level. This piece is one of just 13 Plus-graded NGC coins this fine, including five that are also Star-designated. The strike is sharp and neither side exhibits noteworthy abrasions in the satiny luster. Vivid blue and lavender border toning adds to the appeal. Census: 8 in 67+, 19 in 67★, 5 in 67+★, 23 finer (1/19). NGC ID# BYH7, PCGS# 9341
- 4452** 1938-D Oregon MS68 NGC. A spectacular Oregon Trail type coin with luminous satin luster and delicate pastel and champagne toning overall. Trivial strike weakness is seen on the only rear edge of the covered wagon on the reverse. Census: 69 in 68 (4 in 68+, 34 in 68★, 3 in 68+★), 2 finer (2/19). NGC ID# BYHJ, PCGS# 9349
- 4453** 1938-S Oregon MS67+ PCGS. CAC. A Plus-graded Superb Gem representative of this popular silver commemorative, with sharply detailed design elements and impeccably preserved lustrous surfaces. Highlights of lavender and emerald-green toning add to the terrific eye appeal. PCGS has graded 17 numerically finer examples (2/19). NGC ID# BYHK, PCGS# 9350
- 4454** 1939 Oregon PDS Set MS67 to MS67+ PCGS Gold Shield. CAC. Only 3,000 1939 Oregon Trail half dollar PDS sets were distributed. Surviving coins from either of the three mints are scarce in Superb Gem condition. This set is CAC endorsed in individual PCGS Gold Shield holders. Included are: 1939 MS67, sharp and satiny from rim to rim on both sides with a dusting of olive-russet toning; 1939-D MS67+, similar in appearance to the Philadelphia coin but slightly weak on the back end of the wagon; 1939-S MS67, well-matched to the other two pieces with satiny luster, well-struck design elements, and light toning.(Total: 3 coins) NGC ID# BYHL, PCGS# 9355
- 4455** 1915-S Panama-Pacific MS66 PCGS. CAC. Satiny luster on this Premium Gem Pan-Pac half dollar displays traditional olive, gold, and lilac-gray toning overall. The peripheries are more luminous than the interiors, although the entirety of each side is without abrasion. Well-struck design elements add to the appeal. NGC ID# BYHP, PCGS# 9357

- 4456** 1915-S/S Panama-Pacific, FS-501, MS66 PCGS. CAC. The upper serif of a repunched mintmark is visible to the right of the primary S on this variety. As a Pan-Pac type coin, this piece is well-preserved and appealing. Natural lilac hues adorn the interiors, ceding to olive and russet at the borders. Well-struck design elements complete the attributes. Housed in a green label holder with CAC endorsement. NGC ID# BYHP, PCGS# 145748 Base PCGS# 9357
- 4457** 1936-D San Diego MS67 PCGS. CAC. Both sides of this Superb Gem display rich toning, with luster emerging beneath the patina. Among the colors present are olive-green, red-orange, mauve, electric-blue, violet, yellow-gold. Only a single 1936-D San Diego half dollar is numerically finer than this piece at PCGS; none are finer at CAC. CAC: 65 in 67, 0 finer (1/19).  
Ex: FUN Signature (Heritage, 1/2014), lot 6208. NGC ID# BYJ2, PCGS# 9372
- 4458** 1936-D San Diego MS67+ PCGS. CAC. One unusual characteristic about this issue is the thick, frosted nature of the mint luster. Most Denver products exhibit more subdued, satiny luster. Much of the original brilliance radiates through the pale pastel toning seen on each side. Exceptional quality and eye appeal. NGC ID# BYJ2, PCGS# 9372
- 4459** 1935 Spanish Trail MS65 PCGS. Faint almond-gold, ice-blue, and olive-green toning visits this thoroughly lustrous and boldly struck Gem. A splendid example of this low mintage type. Both sides are sharply struck, with full details on the steer's head and yucca tree. Encapsulated in an old green label holder. NGC ID# BYJ5, PCGS# 9376

### 1935 Texas Half Dollar, MS68 Sharp and Virtually Flawless

**4460** 1935 Texas MS68 NGC. The 1935 Philadelphia issue of the Texas Independence Centennial half dollar is usually available in grades through MS66, and it is only marginally elusive in MS67. However, MS68 coins are rare, and it is these pieces which are the most sought-after for Registry collections. The coin offered here is brilliant and luminous. In addition to its virtually flawless preservation, it is impressively well-struck. Census: 15 in 68, 1 finer (2/19). NGC ID# BYJA, PCGS# 9382

### 1935-D Texas Half Dollar, MS68 Among the Finest Certified

**4461** 1935-D Texas MS68 NGC. Available in lower grades, the 1935-D Texas Independence Centennial half dollar is conditionally rare in MS68 and unknown numerically finer. This Registry-grade example is an outstanding type coin, showing an above-average strike and satiny, unabraded mint luster. Delicate iridescent toning adorns each side. Census: 15 in 68 (3 in 68★), 0 finer (2/19). NGC ID# BYJC, PCGS# 9383

**4462** 1938 Texas MS67 PCGS. CAC. A thin crescent of rainbow toning sits on the rim beneath the eagle, highlighting HALF DOLLAR. Ice-blue toning predominates throughout both sides, which are remarkably well-struck for the complicated Texas design. There are no marks to mention on the satiny, Superb Gem surfaces. Population: 80 in 67 (12 in 67+), 1 finer. CAC: 46 in 67, 1 finer (1/19). NGC ID# BYJL, PCGS# 9394

**4463** 1925 Vancouver MS67 NGC. CAC. CAC recognizes the spectacular preservation of this Vancouver half dollar, as it is cast in mottled golden and multicolor toning with satiny underlying mint luster. Superb Gems are scarce overall, and only a few are finer than the present. This is among the finest pieces at CAC. Census: 67 in 67 (5 in 67+, 11 in 67★), 1 finer. CAC: 40 in 67, 0 finer (1/19). NGC ID# BYJP, PCGS# 9399

**4464** 1949 Booker T. Washington MS67 PCGS. CAC. Traces of champagne toning accent the satiny mint luster of this Superb Gem 1949 Booker T. Washington half dollar. The strike is well-executed and eye appeal is pleasing. No examples of this Philadelphia issue are finer at either leading service. Population: 36 in 67, 0 finer. CAC: 25 in 67, 0 finer (1/19).  
Ex: Long Beach Signature (Heritage, 9/2011), lot 3271, which realized \$1,997.50. NGC ID# BYK3, PCGS# 9416

**4465** 1950 Booker T. Washington MS67 PCGS. CAC. A spectacular Superb Gem representative of this popular commemorative issue, with sharply detailed design elements and virtually pristine surfaces that radiate vibrant mint luster, with terrific eye appeal. A few hints of lavender and pale gold toning visit both sides, along with a single streak of amber on the obverse. NGC ID# BYK6, PCGS# 9420

## COMMEMORATIVE GOLD

- 4466** 1903 Louisiana Purchase, Jefferson Gold Dollar MS67 NGC. The Jefferson variety of the 1903 Louisiana Purchase gold dollar is scarce in MS67 and nearly uncollectible finer. This piece is sharp and virtually flawless, showing semiprooflike fields and satiny devices. Honey-gold and peach hues adorn each side, producing strong visual appeal. Census: 95 in 67 (3 in 67+, 2 in 67★), 3 finer (2/19). NGC ID# BYLD, PCGS# 7443
- 4467** 1903 Louisiana Purchase, Jefferson Gold Dollar MS63 Prooflike NGC. The fields are profoundly reflective, contrasting against lightly frosted, well-defined motifs. A deep shade of warm, honey-gold color blankets each side of this Jefferson gold dollar. Wispy abrasions and bagmarks are not generally distracting. Census: 9 in 63 Prooflike, 10 finer (2/19). NGC ID# BYLD, PCGS# 77443
- 4468** 1903 Louisiana Purchase, McKinley Gold Dollar MS66 PCGS. CAC. A lovely Premium Gem, this 1903 Louisiana Purchase / McKinley gold dollar displays shimmering peach-gold, rose, and greenish hues. Under a loupe, the faint beginnings of die erosion are evident in the margins, but no distracting abrasions are seen. NGC ID# BYLE, PCGS# 7444
- 4469** 1904 Lewis and Clark Gold Dollar MS64 PCGS. There is a hint of reflectivity in the fields of this near-Gem 1904 Lewis and Clark gold dollar, earning high marks for eye appeal. Peach-yellow and honey-gold hues adorn each side, and the devices are sharply struck. An appealing type coin for the classic commemorative collector. NGC ID# BYLF, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS65

Splendid Color and Luster

**4470** 1904 Lewis and Clark Gold Dollar MS65 PCGS. This glittering Gem 1904 Lewis and Clark gold dollar displays a sharp strike despite the often-seen die erosion that adds texture to the fields. Greenish-gold surfaces show peach-colored accents on the central portraits. Vibrant mint luster gleams from rim-to-rim. Ideal for a Gem collection of gold commemoratives or for high-end type. NGC ID# BYLF, PCGS# 7447

1904 Lewis and Clark, MS65

Uncommonly Smooth and Sharp Surfaces

**4471** 1904 Lewis and Clark Gold Dollar MS65 NGC. Struck from an early state of the dies, this pleasing gold dollar shows smooth margins and mostly sharp dentils as well as sharply struck legends. The central devices are equally well-struck, lacking any of the frequently seen die wear that compromises sharpness. Brilliant yellow-gold surfaces radiate strong mint luster and undeniable Gem quality. NGC ID# BYLF, PCGS# 7447

1904 Lewis and Clark Gold Dollar  
MS64+ Prooflike

**4472** 1904 Lewis & Clark Gold Dollar MS64+ Prooflike NGC. A highly lustrous canary-gold Choice commemorative. The strike is bold on the portraits, though selected dentils are lightly brought up. No marks are noticeable, but we note a hair-thin strike-through on the face of Meriwether Lewis. NGC has certified just 22 pieces as Prooflike. Census: 8 in 64 (1 in 64+) Prooflike, 1 finer (2/19). NGC ID# BYLF, PCGS# 77447

**4473** 1905 Lewis and Clark Gold Dollar MS64 PCGS. The 1905 Lewis and Clark gold dollar is more elusive in high grade than its 1904 counterpart, despite an identical distribution of 10,000 pieces. This lightly marked orange-gold specimen is sharply detailed and lustrous throughout. NGC ID# BYLG, PCGS# 7448

**4474** 1905 Lewis and Clark Gold Dollar MS64+ PCGS. CAC. The 1905 Lewis and Clark is the key issue among the small denomination gold commemoratives. This is a lovely example that appears much finer than the stated grade. The fields on each side glitter with slight reflectivity and there are no obvious or detracting abrasions present. NGC ID# BYLG, PCGS# 7448

**4475** 1915-S Panama-Pacific Gold Dollar MS65+ PCGS. A lovely high-end Gem example of this smallest Pan-Pac gold issue. This sharp dollar is luminous and satiny with peach and orange-gold hues across unabraded surfaces. Eye appeal is outstanding. NGC ID# BYLH, PCGS# 7449

**4476** 1915-S Panama-Pacific Gold Dollar MS66 NGC. Rich orange toning accompanies this lustrous and undisturbed Premium Gem. A magnificent representative of the Charles Keck design, which features a canal worker on the obverse and two dolphins on the reverse. Certified in a circa-2000 holder. NGC ID# BYLH, PCGS# 7449

1915-S Pan-Pac Gold Dollar, MS67

Among the Finest Pieces Certified

**4477** 1915-S Panama-Pacific Gold Dollar MS67 PCGS. The mintmark is repunched on this piece, a variety that is occasionally seen but not formally documented. The secondary S is visible to the lower right of the primary mintmark. This Superb Gem Pan-Pac gold dollar displays exceptional preservation and sharpness of strike. Rich yellow-gold luster illuminates the surfaces. Population: 82 in 67 (2 in 67+), 0 finer (2/19). NGC ID# BYLH, PCGS# 7449

**4478** 1915-S Panama-Pacific Quarter Eagle AU53 ANACS. Columbia rides a hippocampus and holds a caduceus, which symbolizes America's triumph over yellow fever during construction of the Panama Canal. Rare in any circulated condition, this glossy and bright, yellow-gold About Uncirculated example retains much of its mint luster and sharp details on the motifs. NGC ID# BYLP, PCGS# 7450

**4479** 1915-S Panama-Pacific Quarter Eagle AU55 PCGS. This caramel-gold representative may have been briefly carried as a pocket piece at the Panama-Pacific Exposition, held in San Francisco in 1915. We note only a cluster of unobtrusive field marks beneath the eagle's beak. NGC ID# BYLP, PCGS# 7450

1915-S Panama-Pacific Quarter Eagle, MS63

**4480** 1915-S Panama-Pacific Quarter Eagle MS63 PCGS. From a distribution of 6,749 pieces, the 1915-S Panama-Pacific quarter eagle is relatively available in MS63 condition. This attractive Select specimen exhibits well-detailed design elements, with just a touch of the usual softness on the eagle's feathers. The lustrous orange-gold surfaces are lightly marked, with occasional highlights of red. NGC ID# BYLP, PCGS# 7450

**1915-S Pan-Pac Quarter Eagle, MS64  
Elusive CAC-Approved Example**

- 4481 **1915-S Panama-Pacific Quarter Eagle MS64 PCGS.** CAC. A satiny Choice example of the Panama-Pacific quarter eagle, among a minority of pieces in this grade with CAC recognition. It is well-struck and shows only a few light grazes under a loupe. Natural peach-gold luster has a dusky appearance. Only 6,749 Pan-Pac quarter eagles were distributed in 1915, out of 10,000 pieces authorized for coinage. NGC ID# BYLP, PCGS# 7450
- 4482 **1916 McKinley Gold Dollar MS67 PCGS.** A well-struck, satiny example with wheat-gold luster that is devoid of abrasions. The 1916 McKinley gold dollar is scarce in MS67, and only a couple of finer coins are reported. This piece is ideal for the Registry Set collector. Population: 106 in 67 (8 in 67+), 0 finer (2/19). NGC ID# BYLK, PCGS# 7454

**1917 McKinley Gold Dollar, MS67  
Among the Finest at PCGS**

- 4483 **1917 McKinley Gold Dollar MS67 PCGS.** This Superb Gem McKinley type coin is among the finest examples at PCGS, making it important for Registry Set collectors. The issue is scarce so fine. Rose-gold interiors cede to peach-gold margins, and the frosty mint luster is unabraded. Both sides are well-struck on this outstanding example. Population: 91 in 67 (11 in 67+), 0 finer (2/19). NGC ID# BYLL, PCGS# 7455
- 4484 **1922 Grant Gold Dollar, No Star, MS65 NGC.** CAC. A beautiful, satiny Gem example of the No Star Grant Memorial gold dollar. Yellow-gold luster shimmers across well-struck devices, and no notable abrasions are present. Housed in a prior generation holder with CAC endorsement. NGC ID# BYLN, PCGS# 7458

**1922 No Star Grant Gold Dollar, MS67  
Only One Coin Finer at PCGS**

- 4485 **1922 Grant Gold Dollar, No Star, MS67 PCGS.** Despite identical distribution of 5,016 pieces, the No Star Grant Memorial gold dollar is scarcer in high grade than its more-famous With Star counterpart. This is an exceptional Superb Gem No Star example, with a needle-sharp strike on Grant's hair and essentially unmarked surfaces. Vibrant mint luster illuminates lemon-gold highlights that glimmer from rich, sun-gold fields and devices. Housed in an old-generation blue label holder with barcode on the back. PCGS reports just one numerically finer example (2/19). NGC ID# BYLN, PCGS# 7458
- 4486 **1922 Grant Gold Dollar, With Star, MS64 NGC.** Mint luster illuminates attractive, greenish-gold color that glows from this near-Gem Grant With Star dollar. Designed by Laura Gardin Fraser (wife of sculptor James Earl Fraser), most survivors fall within the MS63 to MS65 grade range, placing this pleasing example as an optimal candidate for most classic commemorative collections. The piece is sharply struck with no distractions. NGC ID# BYPS, PCGS# 7459
- 4487 **1922 Grant Gold Dollar, With Star, MS65 NGC.** A lovely Gem, sharply struck with satiny yellow-gold surfaces. The Grant half dollars and gold dollars both had Star and No Star varieties. Unlike the half dollar with a low mintage for the With Star variety, the gold dollars had equal mintages for both varieties (5,016 pieces). This is an excellent With Star type coin. NGC ID# BYPS, PCGS# 7459
- 4488 **1922 Grant Gold Dollar, With Star, MS65 NGC.** Gold CAC. A beautiful With Star type coin, visually finer than expected the Gem grade assigned on the prior generation NGC holder. CAC awards this coin a Gold label, considering it at least one grade point undergraded. The strike is sharp, and radiant luster engulfs each side in vivid lemon-gold and peach hues. NGC ID# BYPS, PCGS# 7459
- 4489 **1926 Sesquicentennial Quarter Eagle MS65 PCGS.** The Sesquicentennial quarter eagle was the last classic commemorative gold issue produced by the U.S. Mint. Examples are plentiful in MS65 but elusive finer. This Gem has well-struck devices and rich tangerine-gold luster. A few faint slide lines on the obverse are all that prevent a grade of at least one point higher. NGC ID# 2FE9, PCGS# 7466
- 4490 **1926 Sesquicentennial Quarter Eagle MS65 PCGS.** Available in MS65, the Sesquicentennial quarter eagle is seldom offered finer. This collector-grade example of the final classic commemorative gold issue displays a bold strike and frosty mint luster. Bright greenish-gold border hues transition to peach hues across the interiors. NGC ID# 2FE9, PCGS# 7466
- 4491 **1926 Sesquicentennial Quarter Eagle MS65 PCGS.** From a substantial distribution of 46,019 pieces, this impressive Gem exhibits sharply detailed design elements and well-preserved orange-gold surfaces, with vibrant mint luster and outstanding eye appeal. NGC ID# 2FE9, PCGS# 7466

**MODERN BULLION COINS**

- 4492 **1987 Quarter-Ounce Gold Eagle MS70 NGC.** The 1987 quarter-ounce Gold Eagle is scarce in MS70 and sought-after as a Registry coin. This piece showcases satiny mint luster and flawless preservation. Each design element is full defined. NGC ID# 26M3, PCGS# 9811

**1995-W Silver Eagle, PR69 Ultra Cameo  
The Unrivaled Series Key**

**4493 1995-W Silver Eagle PR69 Ultra Cameo NGC.** No Silver Eagle has garnered more attention over the past 24 years than the 1995-W. Its credentials are well-known, including a paltry mintage of 30,125 pieces and status as the first Silver Eagle struck at the West Point Mint. Each side is practically pristine with jet-black mirrors and frosty, fully struck devices. NGC ID# CFWX, PCGS# 9887

**10th Anniversary Set of Proof Bullion Coins  
Includes the Key 1995-W Silver Eagle**

**4494 1995-W Uncertified Five-Piece 1995-W 10th Anniversary Silver Eagle and Gold Proof Set.** A five-piece set of proof bullion coins issued to commemorate the 10th anniversary of the U.S. Mint's bullion coin program. The set includes an exquisite proof example of the 1995 one-ounce, half-ounce, quarter-ounce, and tenth-ounce Gold Eagle from the West Point Mint, and the key-date one-ounce 1995-W Silver Eagle, with a low mintage of 30,125 pieces. Original case, box, and leaflet included. (Total: 5 coins)

**1999 Silver Eagle, MS70  
Elusive Top-Grade Example**

**4495 1999 Silver Eagle MS70 NGC.** Frosty, shimmering luster illuminates flawless surfaces on this Registry-grade 1999 Silver Eagle, among a fraction of the population that has qualified for an MS70 grade from either leading service. The strike is full throughout. Overall, the 1999 is a plentiful issue, although it has a reputation for being elusive in MS70. NGC ID# 26JX, PCGS# 9947

**4496 2003 One-Ounce Gold Eagle MS70 NGC.** This perfectly preserved American Eagle one-ounce gold piece displays satin luster and brilliant yellow-gold surfaces with a high degree of aesthetic appeal. NGC ID# 26SC, PCGS# 9968

**4497 2006-W One-Ounce Gold Reverse Proof, 20th Anniversary, First Strike, PR70 PCGS.** The 2006-W reverse proof one-ounce Gold Eagle was only available to collectors in the three-coin 20th anniversary Gold Eagle sets, which also included a regular proof coin and a burnished piece. Just 9,996 sets were distributed. This flawless survivor of the reverse proof coin is fully struck and eye-catching with its frosted fields and glimmering devices. NGC ID# CNCZ, PCGS# 89995 Base PCGS# 89994

**4498 2006-W One-Ounce Gold Reverse Proof, 20th Anniversary, First Strike, PR70 PCGS.** No more than 10,000 20th anniversary three-coin Gold Eagle sets were authorized, which was the only mode of distribution for the 2006-W reverse proof one-ounce Gold Eagle. Nearly all — 9,996 sets — were sold. Still, the mintage figure for the reverse proof is tiny compared to regular proof issues in the series. This iconic bullion issue is sought-after in PR70, where this flawless, honey-gold First Strike coin resides. NGC ID# CNCZ, PCGS# 89995 Base PCGS# 89994

**4499 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** Deeply prooflike fields do not deliver true mirrorlike qualities due to the concavity of the fields, but the reflectivity is obvious. This piece is pristine and fully struck, showing outstanding eye appeal. NGC ID# 26S4, PCGS# 506602

**4500 2009 One-Ounce Gold Ultra High Relief Twenty Dollar MS70 Prooflike NGC.** Struck from a fresh state of the dies, this 2009 one-ounce Ultra High Relief twenty is fully prooflike, and the sharp design elements are beautifully showcased by the reflective, concave fields. An important modern issue, highly sought-after by admirers of Saint-Gaudens' original Ultra High Relief double eagle of 1907. NGC ID# 26S4, PCGS# 506602

**2009 Modern ‘Humbert Commemorative’ Slug  
Gem Ultra Cameo Proof**

**4501 2009 “Humbert Commemorative” Gem Proof Ultra Cameo NGC.** Struck from two and a half ounces of 999.9 Fine “Pure California Gold.” This piece is modeled after the famous fifty dollar “slugs” produced by United States Assayer of Gold Augustus Humbert. Rich yellow-gold surfaces feature pronounced field-device contrast, accounting for the Ultra Cameo designation.

Five-Ounce Gold '1876' \$100 Union  
Proposed Design Struck 2010  
Ultra Cameo Gem Proof

- 4502 (2010) "1876" \$100 Gold Union Ultra Cameo Gem Proof NGC. This private issue of the New York Mint contains five ounces of pure gold. A portion of the revenues were destined for the Smithsonian Institution. This imposing piece, based on drawings by Mint engraver George T. Morgan, displays unimprovable field-to-device contrast. Housed in a custom wood box with informational card.

## TERRITORIAL GOLD

- 4503 1849 Moffat & Co. — Scratch — PCGS Genuine Gold Shield. VF Details. K-4, R.5. Several shallow, crisscrossing scratches on the obverse of this VF-level Moffat & Co. five prevent a numeric grade, although they only become apparent at certain angles due to their shallow nature. The coin is otherwise evenly worn with honey-gold color and smooth surfaces. This is an early die state piece with no clash marks visible. An incredible opportunity for the Territorial gold enthusiast to acquire an affordable type coin. Listed on page 396 of the 2019 Guide Book.

## CALIFORNIA FRACTIONAL GOLD

- 4504 1868 Liberty Octagonal 25 Cents, BG-711, R.4, MS67 PCGS. As of (1/19), the present lot is the single finest PCGS-certified BG-711 octagonal quarter. The lemon-gold and lime-green surfaces appear immaculate, and all that denies perfection is moderate incompleteness of strike on the central reverse. The homely, thick-necked Liberty bust identifies the maker as Frontier, Deviercy & Co. The firm struck two 1868 octagonal quarter varieties, BG-710 and BG-711, which are readily distinguished by star and berry placements. NGC ID# 2BMM, PCGS# 10538

1871 Liberty Octagonal Quarter  
Rare BG-716 Variety  
MS67, Among Finest Certified

- 4505 1871 Liberty Octagonal 25 Cents, BG-716, High R.6, MS67 PCGS. A pristine lemon-gold Superb Gem that boasts flashy fields and outstanding eye appeal. The thick-necked Liberty bust is characteristic of Frontier & Co., a Period Two San Francisco jewelry firm. The obverse die is shared with comparatively available varieties such as BG-714 and BG-717. The reverse, though, is unique to BG-716, and is noteworthy for its misplaced A in DOLLAR. Population: 3 in 67, 0 finer (2/19). NGC ID# 2BMT, PCGS# 10543

- 4506 1871 Liberty Octagonal 25 Cents, BG-717, R.3, MS67 Prooflike PCGS. A lovely Superb Gem, this brilliant greenish-gold example has fully mirrored fields that frame its lustrous devices, imparting excellent cameo contrast. This is the only example of BG-717 to earn the PCGS Prooflike designation. NGC ID# 26MT, PCGS# 710544

1872 Washington Quarter, MS66  
Baker-503, BG-722  
Premium Guide Book Type

- 4507 1872 Washington Octagonal 25 Cents, Baker-503, BG-722, Musante GW-818, Low R.4, MS66 PCGS. The Period Two octagonal quarter series is rife with Liberty and Indian heads, but there are only three such Washington varieties, BG-722 through BG-724. Those who collect California Small Denomination gold by Guide Book variety typically select BG-722, since the other two marriages are rarities. This lustrous sun-gold Premium Gem is evenly struck and offers smooth semiprooflike fields. Population: 36 in 66 (3 in 66+), 2 finer (2/19). NGC ID# 2BN4, PCGS# 10549

- 4508 1874 1/7 Liberty Octagonal 25 Cents, BG-776, Low R.5, MS64 Prooflike NGC. PCGS refers to the variety as 1874/7874, but only the first digit is repunched, a 1 over a 7. It is difficult to distinguish between the die cracks and clash marks throughout the central reverse. A lustrous butter-gold Choice octagonal quarter. Glimpses of lavender patina reside in obverse crevices. Census: 3 in 64 Prooflike, 0 finer (1/19). PCGS# 710603

- 4509 1874 Indian Round 25 Cents, BG-888, High R.5, MS66 NGC. Struck in 1881-1882, the BG-888 is a backdated issue that carries the date 1874. The usually seen strike softness is limited on this piece, but the also usually seen deep prooflike mirrors are exceptionally deep and mirrored. Bright yellow-gold color. NGC ID# 2BVP, PCGS# 10749

1876/5 Octagonal Indian Dollar  
BG-1129, MS65 Prooflike

- 4510 1876/5 Indian Octagonal Dollar, BG-1129, R.4, MS65 Prooflike PCGS. BG-1129 was one of the last die marriages issued from the productive workshop of Christopher Ferdinand Mohrig. Mohrig was arrested by the Secret Service on August 10, 1876, and his dies, planchets, and struck pieces were confiscated. The present Gem offers unblemished apricot-gold surfaces. The central reverse shows minor incompleteness of strike. Single-finest among three examples certified as Prooflike by PCGS. That service has graded two finer (as MS66 and MS67) without a Prooflike designation (2/19). NGC ID# 2C3X, PCGS# 710940

## COINS OF HAWAII

**4511** 1847 Hawaii Cent MS62 Brown PCGS. Medcalf 2CC-2. Crosslet 4 in date. This is a plentiful variety of the 1847 Hawaii cent, popular as a type coin. This piece is Uncirculated and sharp, showing glossy reddish-brown surfaces with satiny luster in the fields. An appealing coin for the grade. Listed on page 425 of the 2019 Guide Book. NGC ID# 2C52, PCGS# 10965

**4512** 1847 Hawaii Cent MS62 Brown PCGS. Medcalf 2CC-2. Crosslet 4 in date. Graded Brown, this attractive example displays tinges of original copper-red luster in the protected areas of the fields. Toning on each side, which mainly covers the interior regions, is burgundy and plum with occasional olive accents. Some strike weakness is noted on the upper and lower wreath, and on the border legends. Listed on page 425 of the 2019 Guide Book. NGC ID# 2C52, PCGS# 10965

**4513** 1847 Hawaii Cent MS62 Brown PCGS. Medcalf 2CC-2. Crosslet 4 in date. The common variety, ideal for type purposes. This lower-end Uncirculated coin has eye appeal beyond its grade. The devices are remarkably sharp, especially in the facial features. Lustrous surfaces show a blend of copper-red originality and soft burgundy toning, while allowing for a pleasant cartwheel effect. Clearly high-end for the grade. Listed on page 425 of the 2019 Guide Book. NGC ID# 2C52, PCGS# 10965

**4514** 1847 Hawaii Cent MS62 Brown NGC. M. 2CC-2. Crosslet 4, 7x8 berries. A single-year Hawaii denomination, the "hana hana" or cent was struck by Massachusetts private coiner H.M. & E.I. Richards. This example displays glimmers of remaining red though medium brown dominates. We note minor carbon along with a narrow horizontal line on the reverse near 12 o'clock. Listed on page 425 of the 2019 Guide Book.

*From A Network Television Executive's Collection of Rare Hawaiian Coins.* NGC ID# 2C52, PCGS# 10965

**4515** 1847 Hawaii Cent MS63 Brown NGC. M. 2CC-2. The initial orange-gold color outlines design elements, though open areas and high points are chocolate-brown. Devoid of contact, though a couple of unobtrusive spots are located near 9 o'clock on both sides. Listed on page 425 of the 2019 Guide Book.

*From A Network Television Executive's Collection of Rare Hawaiian Coins.* NGC ID# 2C52, PCGS# 10965

## PATTERNS

### 1855 Flying Eagle Cent in Bronze Judd-167 Original, PR55

**4516** 1855 Flying Eagle Cent, Judd-167 Original, Pollock-193, R.5, PR55 NGC. A large cent pattern featuring a hooked-neck eagle and slanting 5s on the obverse. The reverse resembles the issued large cent reverse but the wreath and denomination are smaller, and UNITED STATES OF AMERICA is widely spaced. Struck in bronze with a plain edge. Struck from clashed dies, as often seen. The surfaces are even chocolate-brown on each side. The reverse shows significant unfinished areas on the die, most clearly displayed around the peripheral lettering and between the leaves in the wreath. Housed in a special Red Book encasement with an autograph by Ken Bressett. NGC ID# 29AD, PCGS# 11709

### 1858 Indian Cent in Copper-Nickel Centered Date Judd-212, PR64+ Cameo

**4517** 1858 Indian Cent, Judd-212, Pollock-263, R.4, PR64+ Cameo NGC. This is a Centered Date variant with a rounded bust tip. Similar to the later regular issue Indian cent but with a broad, ornamented shield at the top of the reverse and broad rims. Struck in copper-nickel with a plain edge. The fields exhibit extraordinary depth of reflectivity with corresponding thick mint frost on the devices, the combination yielding the sought-after cameo effect. Light, even reddish patina is seen over each side. PCGS# 811895

### 1861 Half Dollar in Copper Judd-280, Bronzed, PR63 Brown

**4518** 1861 Half Dollar, Judd-280, Pollock-331, Low R.7, PR63 Brown NGC. A regular dies obverse is paired with a reverse the same as the regular issue, except that the motto GOD OUR TRUST is set directly onto the upper field. Struck in copper with a reeded edge. This half was one of the experimental pieces struck that tried out differing mottoes and their placement. This piece was bronzed, and these pieces are believed to be later restrikes. The surfaces are even brown with just a slight underlying reddish tone. A field scratch to the right of the eagle's head is the only mark of note. NGC ID# 29DP, PCGS# 12108

### 1863 Washington Two Cent in Copper/Bronze Judd-305, PR64 Brown Cameo

**4519** 1863 Two Cents, Judd-305, Pollock-370, R.4, PR64 Brown Cameo NGC. The obverse displays a portrait of Washington facing right, GOD AND OUR COUNTRY around, date and two stars below. The reverse expresses the denomination 2 CENTS within a wheat wreath, UNITED STATES OF AMERICA around. CENTS is curved dramatically. Struck in copper / bronze with a plain edge. Also struck in copper-nickel and aluminum. This piece has an unusual grade designation as a Brown Cameo; but it is accurate. The fields are glassy-smooth and unfathomably deep, even apparent through the layers of brown and blue toning seen over each side. Contrasted against the depth of mirroring are frosted devices that present a strong cameo effect. NGC ID# 29EK, PCGS# 60460

---

1870 Standard Silver Ten Cents in Silver

Judd-868, PR64

- 4520 1870 Standard Silver Ten Cents, Judd-868, Pollock-964, Low R.7, PR64 PCGS. On the obverse Liberty's head is tied back in a bun, there is a star on the headband, UNITED STATES OF AMERICA around, and the motto IN GOD WE TRUST is placed on a scroll below. The reverse has 10 / CENTS inside a small oak and laurel wreath, STANDARD SILVER in large letters, arcs along the upper reverse margin. The date 1870 is at the reverse exergue. Struck in silver with a plain edge. About a dozen pieces are known. The fields are brightly reflective and each side shows just the slightest accent of toning. PCGS# 61112

---

1870 Standard Silver Quarter in Silver

Judd-894, PR66 Cameo

- 4521 1870 Standard Silver Quarter, Judd-894, Pollock-1001, R.5, PR66 Cameo PCGS. CAC. Standard Silver design with a bust of Liberty facing right on the obverse. Liberty wears a ribbon inscribed LIBERTY, the legend UNITED STATES OF AMERICA is at the periphery, the motto IN GOD WE TRUST is on a scroll below. The reverse depicts the denomination 25 CENTS and the date 1870 within a wreath of corn and cotton. The word STANDARD is at the top. Struck in silver with a reeded edge. The reeded edge pieces in silver are known with thin and thick planchets. This appears to be a thin planchet variant. The outstanding surface quality is readily apparent, as reinforced by the green CAC sticker. Deeply reflective mirrors on each side with frosted devices that yield the Cameo designation. Exceptional quality. PCGS# 861138 Base PCGS# 61138

## GSA DOLLARS

- 4522 1878-CC GSA MS64 Prooflike NGC. Prooflike 1878-CC dollars in their original GSA holders are scarce in MS64 and rare finer, as evidenced by the population data. This piece is brilliant and well-mirrored, showing only a few light grazes on Liberty's cheek. Census (GSA coins): 80 in 64 (4 in 64+ Prooflike, 3 in 64 ★ Prooflike), 9 finer (1/19). NGC ID# 253M, PCGS# 518846 Base PCGS# 7081

- 4523 1882-S GSA MS66 NGC. The availability of the 1882-S Morgan dollar evaporates if one limits their search to coins that came out of the GSA sales of the early 1970s. GSA coins are genuinely rare in Premium Gem condition. This piece displays a sharp strike and luminous, untoned satin luster. Eye appeal is outstanding. Census (GSA coins): 13 in 66 (1 in 66+), 2 finer (1/19). NGC ID# 254F, PCGS# 407140 Base PCGS# 7140

## CERTIFIED MODERN PROOF SETS

- 4524 Five-Piece 1905 Proof Set PR63 to PR66 PCGS Gold Shield. The coins are separately housed in holders bearing consecutive certification numbers. The set includes cent PR65 Red and Brown, intricately struck, deep ruby-red and apple-green toning; nickel PR65, light to medium lime-green and powder-blue patina; dime PR66, Breen-3543, the 05 is repunched north, a nearly brilliant specimen with apparent (though undesigned) cameo contrast; quarter PR64, attractive variegated khaki-green, peach-gold, and lavender toning; and a half dollar PR63 Cameo, brilliant and frosty with minor slide marks on the cheek. (Total: 5 coins)

- 4525 Five-Piece 1937 Proof Set PR63 to PR66 PCGS. The coins are separately housed in holders bearing consecutive certification numbers. The set includes: cent PR64 Brown, iridescent apple-green and fire-red colors; nickel PR66 CAC, a lightly toned and essentially pristine proof Buffalo type coin; dime PR64, fully struck, a few dabs of tan and gray toning; quarter PR63 CAC, stone-white with minor obverse field hairlines; and a half dollar PR63, a hint of gold patina, delicate obverse hairlines. (Total: 5 coins) PCGS# 904751

## LINCOLN

- 8274** President Lincoln Plaque. Bronze, oval, 112 x 130 mm. Naked bust right of Lincoln. Cast by Henry Bonnard Bronze Co. circa 1890.

## U.S. PRESIDENTS & STATESMEN

- 8275** Five-Piece Lot of Clinton First Inaugural Medals. Included are: (1) bronze 70 mm. medal, with original stand and box; (1) silver 70 mm. medal, with original case and box; and (1) three-piece set containing both the bronze and silver 70 mm. as well as a 24 karat 27 mm. gold medal. The three-piece set is in a wooden box. All produced by Hoffman and Hoffman. Ex: Long Beach Sale (Heritage, 6/1997), lot 6635, which realized \$724.50. (Total: 5 medals)

- 8276** President Garfield Plaque. Bronze, oval, 112 x 130 mm. Naked bust left of Garfield. Cast by Henry Bonnard Bronze Co. circa 1891.

## U.S. MINT MEDAL

- 8277** 1861-Dated George Washington, Oath of Allegiance, MS65 Prooflike NGC. Baker-279, Julian-CM-2b, Musante GW-476. Silver, 30 mm.

## SO-CALLED DOLLAR

- 8278** 1878 Battle of Wyoming Centennial, Bronze, HK-120, R.7, MS64 Brown NGC. NGC Census: (0/0). PCGS Population: (0/0). PCGS# 642305

## EXPOSITIONS AND FAIRS

- 8279** 1893 World's Columbian Exposition. Ten different varieties of Uncirculated admission tickets to the Chicago exposition. The lot includes: Egli-389; Egli-390; Egli-391; Egli-392; Egli-393; Egli-394; Egli-395, stub attached; Egli-397, stub attached; Egli-398; Egli-399. Displayed in a 22 1/4" x 20" custom-made wood frame, with the tickets professionally arranged and archivally matted, protected by non-glare glass.

## HARD TIMES TOKENS

- 8280** 1833 I Take the Responsibility MS66 Red and Brown PCGS. Low-51, DeWitt-CE-1834-16, HT-70, R.1.
- 8281** 1838 Am I Not a Woman & A Sister MS63 Brown PCGS Secure. Low-54, DeWitt-CE-1838-19, HT-81. Copper, 28mm, plain edge.

## CIVIL WAR PATRIOTICS

- 8282** 1863 Army & Navy AU58 NGC, Fuld-11/298a, R.1; 1863 Peace Forever MS62 Brown NGC, Fuld-22/418a, R.3; 1863 Peace Forever XF45 NGC, Fuld-26/418a, R.2; 1864 Union For Ever — Bent — NGC Details, AU, Fuld-51/342Aa, R.2; 1863 Army & Navy — Cleaned — NGC Details, Unc., Fuld-233/312a, R.1; 1863 Army & Navy — Cleaned — NGC Details, Unc., Fuld-233/312a, R.1. (Total: 6 tokens)

## CONFEDERATE STATES OF AMERICA

- 8283** Four-Piece (2011) Smithsonian "Restrike" 1861 Confederate Cent, Gem Proof NGC. Bertram B861-239 to B861-242. 150th Anniversary. The set includes one example each in copper, silver, gold, and platinum. (Total: 4 tokens)

**End of Auction**

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., Heritage Auctions, Inc., Heritage Collectibles, Inc., Heritage Luxury Property Auctions, Inc., Heritage Numismatic Auctions, Inc., Heritage Vintage Sports Auctions, Inc., Currency Auctions of America, Inc., Heritage Auctions (HK) Limited, or Heritage Auctions – Europe Cooperatif U.A. as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

- 2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid.
- For Domain Names & Intellectual Property Auction lots the Buyer's Premium is Fifteen percent (15%) subject to a minimum of \$19 per lot;
- For Animation Art, Comic, Currency, Movie Posters, Sports Collectibles, US Coin, and World & Ancient Coin Auction lots the Buyer's Premium is Twenty percent (20%) subject to a minimum of \$19 per lot, except for Sports Collectibles lots which are subject to a minimum of \$14 per lot;
- For Wine Auction lots the Buyer's Premium is Twenty-three percent (23%) subject to a minimum of \$19 per lot;
- For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$300,000 subject to a minimum of \$49 per lot, plus twenty percent (20%) of any amount between \$300,000 and \$3,000,000, plus twelve percent (12%) of any amount over \$3,000,000.

## Auction Venues:

- 3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Jewelry, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

- 4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
- 5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
- 6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

- 7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

- 8. Bids in Signature® Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#bidding> tutorial.
- 9. Presentation of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
- 10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, email, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
- 11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments  
(see HA.com/c/ref/web-tips.zx#guidelines-increments).

Current Bid .....	Bid Increment .....	Current Bid .....	Bid Increment .....
< \$10.....	\$1	\$10,000 - \$19,999.....	\$1,000
\$10 - \$49.....	\$2	\$20,000 - \$49,999.....	\$2,000
\$50 - \$99.....	\$5	\$50,000 - \$99,999.....	\$5,000
\$100 - \$199.....	\$10	\$100,000 - \$199,999.....	\$10,000
\$200 - \$499.....	\$20	\$200,000 - \$499,999.....	\$20,000
\$500 - \$999.....	\$50	\$500,000 - \$999,999.....	\$25,000
\$1,000 - \$1,999.....	\$100	\$1,000,000 - \$1,999,999.....	\$50,000
\$2,000 - \$4,999.....	\$200	\$2,000,000 - \$9,999,999.....	\$100,000
\$5,000 - \$9,999.....	\$500	>= \$10,000,000 .....	\$200,000

- 12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

- 13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the

"Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.

14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise. Regardless that bids are made on a Property, Auctioneer reserves the right to withdraw the Properties, or any part of the Properties, from the Auction at any time prior to the opening of any lot containing such Properties for sale by the auctioneer (crier), or in the case of Internet-only auctions when the bid opens for either live bidding online or the beginning of the extended period, if any.

15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot consigned by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.

16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40–60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.

17. Lots bearing bidding estimates shall open at Auctioneer's discretion (generally 40%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.

18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.

19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.

20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).

21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.

22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.

24. Payment is due upon closing of the Auction session, or upon presentation of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer. Alternatively, Auctioneer at its sole option, may charge a twenty (20%) fee based on the amount of the purchase. In either case the Auctioneer may offset amount of its claim against any monies owing to the Bidder or secure its claim against any of the Bidder's properties held by the Auctioneer.

25. Lots you purchase may be subject to taxes or fees imposed by various foreign taxing agencies. You are responsible for paying all foreign imposed taxes whether VAT, GST, etc. prior to delivery unless other arrangements are made in writing. Lots delivered to you, or your representative are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. Should state sales tax become applicable in the state for delivery prior to delivery of the property on the invoice, the bidder agrees to pay all applicable state sales tax as required by the delivery state as of the shipping date. Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.

26. In the event that a Bidder's payment is dishonored upon presentation(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.

27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.

28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.

29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.

30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession.

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.
- Delivery; Shipping; and Handling Charges:**
32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website HA.com/c/shipping.zx for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.
33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.
34. All shipping charges will be borne by the successful Bidder. On all shipments in which Heritage charges the Delivery, Handling, and Transit Fee *infra*, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file, this is the "Secure Location". A common carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature. Auctioneer shall arrange, select, and engage common carriers and other transportation vendors on your behalf. Transit services are subject to the following terms and conditions:
- a. **Scope of Transit Services:** Your properties for transit will be insured under one or more insurance policies issued by an authorized broker to Auctioneer. The properties will be insured for the invoice price of the properties (hammer price plus Buyer's Premium) ("Insured Value"). For each shipment, you will provide a Secure Location to which the items will be delivered. NOTICE: **Auctioneer is neither an insurance company nor a common carrier of any type.**
  - b. **Auctioneer's Compensation for Transit Services:** Auctioneer will provide transit services to Buyer for 3% of 1% of the Insured Value, plus packaging and handling fees and fees for the common carrier (collectively, "Delivery, Handling, and Transit Fee"). You agree to pay Delivery, Handling, and Transit Fee and comply with all terms of payment as set forth in paragraphs 23 to 31 of this Agreement.
  - c. **Auctioneer's Limitation of Liability for Transit Services:** You understand and agree that Auctioneer's liability for loss of or damage to the items, if any, ends when the items have been delivered to the Secure Location, and Auctioneer has received evidence of delivery. If you claim that any property has sustained loss or damage during transit, you must report any such loss or damage to Auctioneer within seventy-two (72) hours of the delivery date. Your recovery for loss of or damage to any property is limited to the lesser of actual cash value of the property or the Insured Value. **Under no circumstances is Auctioneer liable for consequential or punitive damages.**
35. It shall be the responsibility for the successful Bidder to arrange pick-up or shipping in a timely manner (within 10 days). Held Lots will be subject to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 20% Seller's Commission.
36. **A. NOTICE OF CITES COMPLIANCE:** The purchase of items made from protected species: Any property made of or incorporating endangered or protected species or wildlife may have import and/or export restrictions established by the Convention of International Trade in Endangered Species of Wild Fauna and Flora (CITES) in various countries and domestically. Plant and animal properties include (but are not limited to) items made of (or including) Brazilian rosewood, ivory, whalebone, turtle shell, coral, crocodile, alligator, lizard, or other wildlife. These items may not be available to ship internationally or, in some cases, domestically. Domestic bans and restrictions exist in these states: 1) California state law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California. 2) Fossil Ivory is currently banned or restricted in 5 U.S. states: New York, New Jersey, California, Hawaii, and New Mexico. By placing a bid, the bidder acknowledges that he or she is aware of any restriction in their country or place of residence and takes responsibility for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay, failure, or incapacity to obtain any such license or permit does not relieve the buyer of timely payment or afford them the capacity to void their purchase or payment. Lots containing potentially regulated wildlife material are noted in the description as a convenience to our clients. Heritage Auctions does not accept liability for errors or failure to mark lots containing protected or regulated species. For further assistance, please contact client services at 1-800-872-6467.
36. **B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.**
36. **C. Auctioneer shall not be liable for any loss caused by or resulting from:**
  - a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
  - b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles.
37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.
- Cataloging, Warranties, and Disclaimers:**
38. **NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE.** Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions.
39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.
40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.
41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.
42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.
- Release:**
43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opinions, from any and all claims, cause of action, chose of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity,
- typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.
44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.
- Dispute Resolution and Arbitration Provision:**
45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.
46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.
47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.
48. **Exclusive Dispute Resolution Process:** All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer [which claim you consent to be made a party] (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.
49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.
50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid of arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.
51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.
- Miscellaneous:**
52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.
53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.
54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.
- State Notices:**
- Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.
- Notice as to an Auction in New York City: This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site. All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21 which states: Consignor, auctioneer's affiliates and, its employees may bid on their lots or other lots for their own account in accordance with the laws of New York and they may have information as to the lots not available to the public. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.
- Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

## Additional Terms & Conditions: COINS & CURRENCY

**COINS AND CURRENCY TERM A:** Signature® Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

**COINS AND CURRENCY TERM B:** Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

**COINS AND CURRENCY TERM C:** Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

**COINS AND CURRENCY TERM D:** Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcgs.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

**COINS AND CURRENCY TERM E:** Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency and PMG may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 10470, Peoria, IL 61612-0470. Third-party graded notes are not returnable for any reason whatsoever.

**COINS AND CURRENCY TERM F:** Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

**COINS AND CURRENCY TERM G:** Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be resubmitted to any future auction.

**COINS AND CURRENCY TERM H:** Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

**COINS AND CURRENCY TERM I:** Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

**COINS AND CURRENCY TERM J:** All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the noncertified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

**COINS AND CURRENCY TERM K:** Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

**COINS AND CURRENCY TERM L: NOTE:** Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

**COINS AND CURRENCY TERM M:** For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

**COINS AND CURRENCY TERM N: FINANCING:** Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions, call the Credit department at 877-HERITAGE (437-4824) or email: CreditDept@HA.com.

### **Notice as to an Auction in New York City:**

This Auction is conducted in accord with the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This a Public Auction Sale conducted by Auctioneer. The New York City Auctioneers conducting the sale of behalf of Heritage Auctions No. 41513036 ("Auctioneer") are licensed Auctioneers including Dawes, Nicholas 1304724, Guzman, Kathleen 762165, Luray, Elyse 2015375, or as listed at HA.com/Licenses and as posted at the venue site.

All lots are subject to the consignor's right to bid thereon and consignor's option to receive advances on their consignments. Auction may offer, in its sole discretion, advances on consignments and extended financing to registered bidders, in accord with Auctioneer's internal credit standards. Auctioneer will disclose to bidders, upon request, a list of lots subject to an advance, reserve, guarantee, or Auctioneer's financial interests of any kind. All Terms and Conditions of Sale are available at HA.com and in the printed catalog, including term #21, which states: The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

# Groundbreaking New Benefit at Heritage Auctions: Make Offer to Owner Archive

DALLAS, Texas (Dec. 18, 2018) – Heritage Auctions' Make Offer to Owner (MOtO) program, through which clients can make anonymous offers on lots previously sold at auction, has added an extremely useful new feature showing the amount and status of every resale offer ever made via HA.com.

SHORT DESCRIPTION	SOLD FOR (WITH BPI)	OFFER	STATUS	OFFER DATE	Actions
WALTER BIG-35 (Amsterdam 1886-1968) Self Life with Voice of Flowers and Porcelain Guitar and Violin Violin Case ...	\$1702.50	\$2,400	Pending	Dec-17-2018	<a href="#">Make Offer to Owner</a>
DALE FERRER (Hollywood 1927-1989) Tuxedo Jacket Size 40 Regular 20 x 28 inches (50.8 x 71.1 cm) ...	\$6,000.00	\$6,500	Rejected	Dec-17-2018	<a href="#">Make Offer to Owner</a>
GEORGE FETTER (U.S.A. 1895-1982) Korova Milk Powers, 1920 Advert for cover 23 x 28 inches (58.4 x 71.1 cm) ...	\$4780.00	\$6,000	Pending	Dec-17-2018	<a href="#">Make Offer to Owner</a>
GEORGE EASTMAN (Rochester, New York 1850-1932) Autograph Autograph Dated 1882 ...	\$1702.50	\$2,500	Pending	Dec-17-2018	<a href="#">Buy Now From Owner</a> <a href="#">Make Offer to Owner</a>
PAUL MATSCHIECK Samuel J. Ullman, President of the United States Signature	\$4,687.50	\$8,200	Pending	Dec-16-2018	<a href="#">Make Offer to Owner</a>
VEGUMAINT JEWELRY AND FINE ARTS COLLECTOR'S LEADERSHIP ASSOCIATION Les Souvenirs RICM Club Awards Catalogue	\$1,375.00	\$2,204	Pending	Dec-16-2018	<a href="#">Make Offer to Owner</a>

Any Heritage member who sees a previously auctioned item of interest with a Make Offer to Owner button has the option of submitting an offer, after which the item's owner can accept or decline the offer, or submit a counter-offer to the potential buyer. The new [Make Offer to Owner Archive](#) is sortable by Category as well as by Accepted, Rejected and Pending status. The Archive includes every MOtO offer made via HA.com since the feature was introduced first in 2009, with the most recent offers appearing first.

"This new, permanent archive increases our already market-leading transparency," said Heritage Auctions Co-Chairman Jim Halperin, "and we hope it will encourage more MOtO competition on previously auctioned items by showing pending offers in one convenient place. Just type 'HA.com/moto' into your browser to access the main MOtO Archive page anytime, then pick a category and refine the list to see Pending, Rejected, Accepted or All offers. Our members will be amazed at how much information they can glean by accessing their favorite categories on a daily basis. Every listing includes a link to the entire item page. Members are encouraged to outbid any and all pending MOtO offers if they would pay more for that item than the pending high offer."

Heritage's MOtO program has become increasingly popular with both sellers and buyers. Most members who have made a purchase through the program have bought, or at least made offers, again. Using the program offers clients an added measure of security and comfort about the authenticity of a lot that cannot be replicated through a secondary outside seller.

The program has enjoyed tremendous growth, with combined sales in 2017 and 2018 – the program's two most successful years – of more than \$16 million. The MOtO program has been particularly popular among Sports and Comics collectors.

*Heritage Auctions is the largest fine art and collectibles auction house founded in the United States, and the world's largest collectibles auctioneer. Heritage maintains offices in New York, Dallas, Beverly Hills, San Francisco, Chicago, Palm Beach, London, Paris, Geneva, Amsterdam and Hong Kong.*

*The Internet's most popular auction-house website, HA.com, has over one million registered bidder-members and searchable free archives of four million past auction records with prices realized, descriptions and enlargable photos. Reproduction rights routinely granted to media for photo credit.*

"The best parts

of working with Heritage are  
the simplicity of drop-off of my  
wine, and the price realized!"

– S.H. | California

"He was professional, knowledgeable, responsive and exceeded our expectations.

We called 3 national auction houses to compare listing our items, and it was because of Jim (Wolf), that we went with Heritage.

I manage five nonprofit entities and we will be referring anyone with specialty auction needs to Heritage from now on.

He is an asset to Heritage Auctions."
